The Commission took the view that this affidavit is an essential part of the bid and when it is omitted by any bidder the bid should be classed as irregular and should not be considered, particularly in view of the fact that the waiving of this feature of the specifications in this instance would preclude its future use inasmuch as the Commission could not insist upon full compliance with the specifications in one instance and waive it in another. It was the thought of the Commission that this affidavit is of such importance in the efficient and economical purchase of equipment, and particularly special types of equipment, that its use should be continued and should not be waived in any instance, regardless of how it affects the low bidder. The Engineer was instructed by the Commission to convey such information to the State Board of Control.

The Commission adjourned at 10:00 o'clock a. m. and left immediately for Gold Beach.

Commissioner

APR 22 1939

Gold Beach, Oregon, April 24, 1939

The State Highway Commission met in special session at 11:00 o'clock a. m. in Sunset Inn for the consideration of a number of routine matters. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Claisyer, Secretary

A letter was presented from the Grants Pass Chamber of Commerce urging the Commission to acquire at once the right of way needed for the proposed revision of the Pacific Highway south of Grants Pass, particularly between the Rogue River Bridge and a place known as Fred's Auto Camp, approximately 2½ miles. They pointed out that the location survey for this improvement has already been made and that the Commission has exercised a number of options for right of way which have a direct bearing on property values in this vicinity. The rebuilding of the highway this summer was particularly urged in order to settle definitely the question as to whether or not the highway is actually to be reconstructed, and to stabilize property values. The Commission considered this a meritorious project worthy of construction at an early date if there were funds to finance it, but it appears that funds are not available unless they are taken from other approved projects in that vicinity; however, after considerable discussion, the Commission authorized the securing of options for the balance of the right of way that is needed.

The Attorney reported receipt of an offer from Talent Grange, Talent, Oregon, to purchase a small parcel of land containing .09 acre, opposite Highway Engineer's Station 195+00 on the Bear Creek-Talent Section of the Pacific Highway, in Jackson County. He advised that this parcel lies outside of the standard width right of way and that it cost the state \$186.00; further, that he quoted the Grange a tentative price of \$250.00 for the same but the Grange wants the state to donate it for grange purposes, it being their intention to build a grange hall on the property, to beautify the grounds, and to provide space on the property for the parking of cars. The Commission by unanimous vote authorized the sale of this property for \$250.00 to the Talent Grange, although it indicated reluctance to dispose of property once acquired for highway purposes and does not wish to sell such property as a general policy.

The Secretary presented a letter from the Taft-Nelascott-DeLake Fire District requesting permission to place fire hydrants on the right of way of the Oregon Coast Highway in connection with their project for installation of fire protection facilities in this district. The Engineer recommended approval of this request, provided the hydrants are placed in locations that do not interfere with the proper maintenance of the highway. It was his thought that hydrants in the settled district should be placed back of the curb line, and at the right of way line where the district is not built up. The Commission approved the recommendation unanimously.

The Commission discussed briefly a number of accounts outstanding against certain counties and cities, particularly its account against Clatsop County for right of way. It appears that the Clatsop County Court is of the understanding that the Commission has taken action to relieve the county from the payment of this account, which is contrary to the Commission's understanding. The Engineer was instructed to discuss the matter with Judge Boyington and the Clatsop County Court.

Governor Charles A. Sprague came before the Commission at this time and introduced Herbert Dewart of Gold Beach and Raymond W. Wood, Brookings, who discussed with the Commission a labor matter involving a State Highway Department foreman by the name of W. J. Pacquet. It appears that Mr. Pacquet had charge of a maintenance crew operating near Gold Beach, one member of which, by the name of John Sleeman, was discharged by Mr. Pacquet, and that the rest of the crew, who quit their jobs in sympathy with him, have not been able to secure employment with the State Highway Department since that time, which leads them to believe that they are on a black list. They were assured by Chairman Cabell and the Engineer that the State Highway Department does not maintain a "black list" and, so far as this department is concerned, Mr. Sleeman and any of the other workers on such crew will be reinstated on highway work whenever an opportunity arises where their services can be used.

The Attorney reported on the status of negotiations with P. J. Butler for the acquisition of a recreational area containing 160 acres situate adjacent to the Oregon Coast Highway, in northern Tillamook County. He said that Mr. Butler originally demanded \$12,000 for this property but is now willing to accept the sum of \$6,000 for the same, which amount is still about \$1,300 more than its value, as determined by a cruise of the timber standing thereon. He further stated that he is not in position today to make a recommendation on the matter, and suggested the retention of competent authority to appraise the property before the Commission makes its decision. The Commission approved the Attorney's suggestion and thereupon authorized him to consult such competent authority in Portland regarding the matter, the results of which are to be reported to the Commission later, by letter.

The Commission was unanimously in favor of acquiring the Butler tract in order to fill out the present state park at this location, even if it becomes necessary to condemn the property in order to obtain it at reasonable cost.

In this connection the Commission considered it advisable, in acquiring land for state park purposes, to secure recommendations from not only the State Parks Superintendent but also from the Right of Way Department as to the prices to be paid for the same, it being the thought of the Commission that the experience that the Right of Way Department has had in land purchases would be of much benefit and value in the acquisition of park areas. The Commission adopted such procedure as its general policy to be followed hereafter in such matters.

The Attorney reported on the application of the West Coast Power Company to construct its pole line across the state park located adjacent to

APR 24 1939

the Oregon Coast Highway at the Lincoln-Lane County line, being the park recently acquired from the Pratt interests. He said that he inspected this property in person with some of the officials of the power company, who pointed out certain features that would make it impracticable to construct their pole line in the location designated by the Commission at the extreme edge of the property, and who estimated that to build their line in such location would cost between \$4,000 and \$5,000 more than to build it through the body of the park. He further stated that these officials have expressed a willingness to place the poles as far back from the highway as is practicable and to paint the poles and fixtures with creosote so that they will blend with the landscape and not be noticeable from the highway, notwithstanding that it will cost the company about \$1,000 extra to do that; but they declared it simply out of the question to place the pole line at the back end of the park, and indicated that the company would take the matter to court, if necessary, in order to maintain its rights.

The Attorney gave as his thought that the company would have a good case in court and recommended reconsideration of the Commission's previous action. After discussion, the Commission referred the matter to the Engineer with instructions to have the Parks Superintendent, Mr. Boardman, and Division Engineer K. D. Lytle inspect the premises and endeavor to determine a location for this pole line that will be satisfactory to all parties concerned. He was also instructed to obtain a report from the Landscape Engineer with respect to the painting and creosoting of poles, it being the Commission's idea that it would adopt a general policy with respect thereto for future guidance in the granting of permits for pole line construction along state highways.

The Commission considered and by unanimous vote adopted the following resolution abandoning certain portions of the Middleton-Newberg Section of the Pacific Highway West, in Washington County, which sections, the Engineer advised, are no longer of value for state highway purposes, since this highway has been reconstructed on new alignment at this location:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate certain portions of the Middleton-Newberg Section of the Pacific Highway West, in Washington County; and

WHEREAS, by reason of said relocation and the reconstruction of the said sections of said highway there were eliminated and made unnecessary as parts of the completed highway the certain sections which are more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of the Commission the purpose and plan of the Commission to abandon as parts of the Pacific Highway West and therefore as parts of the state highway system, the fragments or portions of the right of way of the old alignment hereinafter defined and heretofore included within the area

of the right of way of the Pacific Highway West as formerly located between the said termini and as heretofore improved and used;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments of land confined within the areas hereinafter described, which said fragments of land were formerly within the limits of the right of way of the Pacific Highway West, but which are now without the limits of the right of way of said highway as said highway has been relocated be and said fragments of land are hereby abandoned as parts of the right of way of said highway. The portions of the right of way of said highway which by this resolution are abandoned are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Washington County for highway or other public purposes as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All that certain section of the old right of way of the Middleton-Newberg Section of the Pacific Highway West, and lying on the easterly and westerly side of the right of way required for the reconstructed Pacific Highway West. The beginning and ending points with reference to the engineer's stations of the reconstructed highway are as follows:

All that section lying on the easterly side of the reconstructed highway between engineer's station 477+25 on the northerly end and station 539+20 on the southerly end.

All that section lying on the westerly side of the reconstructed highway between engineer's station 543+30 on the northerly end and station 596+25 on the southerly end.

All situated in Section 31, Township 2 South, Range 1 West, and in Section 36, Township 2 South, Range 2 West, and in Sections 1, 12 and 11, Township 3 South, Range 2 West, W. M., Washington County, Oregon.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of E. A. Collier, Division Engineer; H. G. Smith, Construction Engineer; and C. B. McCullough,

Assistant State Highway Engineer, and is dated April 5, 1939, upon which map or exhibit there are reflected the above described parcels of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Washington County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Washington County and beyond any responsibility or supervision by the State Highway Commission.

The Commission adjourned at 12:00 o'clock noon but resumed consideration of additional routine matters at 3:30 o'clock p. m. enroute from Gold Beach to Roseburg, there being present at such time Chairman Henry F. Cabell, Commissioner Huron W. Clough, State Highway Engineer R. H. Baldock, and Secretary H. B. Glaisyer.

The Engineer reported the cost to oil a portion of the Scholls-Campbells Bridge Section of the Hillsboro-Woodburn Secondary Highway, which work has been requested by residents of that district. He stated that it would be inadvisable to oil this entire section because the present road is not on permanent alignment and the Commission does not have funds available for a major project, so he has confined his estimate to the 2.7-mile section between Scholls and a place known as Christenson Lane, which is the most important section and requires very little realignment. He estimated that the oiling of such section, including the acquisition of right of way, crushed gravel surfacing, and preparation of subgrade would cost between \$15,000 and \$20,000. After discussion, the Commission authorized the Engineer to prepare such project for consideration in the 1940 budget.

The Commission discussed the matter of improving the Umpqua Highway between 12th Street and 15th Street in the town of Reedsport, which the Commission inspected enroute from Salem to Gold Beach on Saturday, April 22. The

* Map Filed in Right of Way Retention and Abandonment File - No. 63

APR 24 1939

Commission decided that the state should pay for the moving of certain buildings in order to secure a standard width right of way but that no definite action should be taken on the matter until a detailed report has been rendered thereon by the Engineer. The Engineer was instructed to make such investigation and to report the results thereof, by telephone, to Chairman Cabell and Commissioner Clough. Chairman Cabell was given full power to act for the Commission in the matter.

Consideration was given by the Commission to the oiling of the road which extends from the Oregon Coast Highway to Annalea State Park, Brookings. The Engineer advised that he has no crew available to do this oiling work now and suggested that the work be postponed until next year when it can be done at much less expense, considering that it will be necessary to ship in a crew for this special assignment if the work is done now. The Commission approved the suggestion unanimously and instructed the Engineer to inform Mr. Elmer Bankus, Brookings, who is sponsoring this project, of the action taken.

Reconsideration was given by the Commission to the request of Mr. Millard C. Holbrook for state cooperation in the construction of a small fill across swampy land on his property near Scappoose. Chairman Cabell advised that he inspected this property and is inclined to the belief that the state is not obligated in any way to make this fill and that this case, which is now some six or seven years old, should not be reopened. He pointed out that a small landscape project is to be undertaken near this place soon, in connection with which there probably will be some waste materials, and suggested that the Engineer be authorized to place such waste materials in Mr. Holbrook's fill if that can be done without extra expense to the state. Commissioner Clough approved Chairman Cabell's suggestion and it was so ordered. The Engineer was instructed to inform Mr. Holbrook of the action taken.

The Engineer reported on his investigation of the Frank Forth claim arising out of the construction of the Pacific Highway (new route) across Mr. Forth's property in the Siskiyou Mountains, south of Ashland. He said that Mr. Forth acquired this property after the right of way had been secured from a prior owner with whom a satisfactory settlement was made, and, in his estimation, when Mr. Forth purchased the property he accepted with it the conditions that were attached to the property, so he really has no valid claim for compensation. He further advised that his investigation reveals that the present approach to Mr. Forth's land is not very good and should be improved in the interests of safety to the traveling public and motorists who patronize Mr. Forth's service station. He suggested, as an aid to the elimination of this condition, the widening of the fill in front of Mr. Forth's premises with slide materials removed from the highway at nearby points. It was his thought that this could be done at practically no additional expense and recommended approval of the suggestion if Mr. Forth will agree that such arrangement will satisfy his claim in full. The Commission approved the suggestion by unanimous vote.

The Commission discussed the claim of the Oregon American Lumber Corporation for certain losses occasioned by a fire started by W.P.A. workers on the Wolf Creek Highway in November, 1938. In this connection the Secretary

APR 24 1939

presented a letter from the Attorney giving as his opinion that the Commission is without legal authority to pay this claim and suggesting that the claimants present their claim direct to the representatives of the Federal Government in charge of the work on which these W.P.A. forces were employed. The Commission ordered that a copy of this opinion be forwarded to Mr. E. J. Griffith, Works Progress Administrator for Oregon, Portland, and also that a copy be sent to the National Liberty Insurance Company, inasmuch as this company has requested information relative to the Commission's legal liability because of a claim based upon a policy payment and a subsequent subrogation agreement with the Oregon American Lumber Corporation.

A letter was presented from Ramsay Signs, Inc., Portland, relative to a marquee that the company maintains at the Highway Theatre, Northeast 50th Avenue and Sandy Boulevard, Portland. The Company advised that this marquee will have to be reconstructed when Sandy Boulevard is widened at this location and gave as their belief that the company is entitled to reimbursement for the expense of such reconstruction work, particularly in view of the fact that the marquee is being maintained under a permit from the City of Portland. The Commission considered that this is a matter that comes under the jurisdiction of the City of Portland and ordered that the Ramsay Sign Company be referred to the city officials for disposal of its claim.

Reconsideration was given by the Commission to the construction of maintenance station headquarters at Government Camp and at Hogg Pass. The Engineer estimated that the buildings at Government Camp would cost approximately \$61,000 and those at Hogg Pass \$58,000. He advised that the buildings at Government Camp are not an immediate necessity, but it would be absolutely necessary to provide quarters at Hogg Pass for the use of the men employed on the North and South Santiam Highways, particularly if these highways are to be kept open the year round. He submitted detailed estimates for the improvements at each location, together with blueprint plans of the proposed buildings. After considerable discussion, the Commission decided not to construct the Government Camp facilities at this time, but approved, by unanimous vote, an expenditure of \$35,000 at the Hogg Pass location, it being considered that this is the least amount that could be spent at this place and still provide adequate facilities for the men working out of this headquarters.

The Engineer requested authority to purchase, through the State Board of Control, two Snogos at an estimated cost of \$15,000 each. He explained that one of these Snogos is for use in connection with snow removal operations on the North and South Santiam Highways, and that the other is for use on the Mt. Hood Highway and Timberline Lodge road. The Commission approved the request by unanimous vote.

In this connection, the Engineer advised that it will be necessary to conduct a certain amount of snow removal work on the Willamette Highway in order to make it possible for highway contractors to inspect the project on which the Commission expects to receive bids on May 18. He requested authority to do this work. The Commission approved the request by unanimous vote.

The Commission had under consideration the lifting of reduced load

limits heretofore in effect on certain state highways and state highway bridges, and upon recommendation of the Engineer adopted the following resolutions relative thereto:

WHEREAS, on the 2nd day of March, 1939, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highways:

WALLOWA LAKE HIGHWAY from Elgin, in Union County, to a point five miles west of Wallowa (Rock Creek) in Wallowa County;

PENDLETON-JOHN DAY HIGHWAY from Nye Junction, in Umatilla County, to Long Creek, in Grant County;

THE DALLES-CALIFORNIA HIGHWAY from Bend, in Deschutes County, to Klamath Falls, in Klamath County;

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable, to maintain the said reduced load limits set out in said resolution insofar as they pertain to the above-mentioned highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limits on the

WALLOWA LAKE HIGHWAY from Elgin, in Union County, to a point five miles west of Wallowa (Rock Creek) in Wallowa County;

PENDLETON-JOHN DAY HIGHWAY from Nye Junction, in Umatilla County, to Long Creek, in Grant County;

and on that portion of

THE DALLES-CALIFORNIA HIGHWAY from the junction with the Fremont Highway, in Deschutes County, to the junction with the Crater Lake Highway, in Klamath County (the reduced load limit on the remainder of this highway, as fixed in said former resolution, has previously been lifted by order of the State Highway Commission);

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law.

APR 24 1939

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

WHEREAS, the State Highway Commission, by resolution duly and regularly adopted on September 25, 1928, reduced the permissible load limit on the

LOST RIVER BRIDGE, No. 4-302.21, on The Dalles-California Highway, in Klamath County;

And on September 27, 1932, by resolution duly and regularly adopted, reduced the permissible load limit on the

ROGUE RIVER BRIDGE, No. 271-15.6, on the Sams Valley Secondary Highway, in Jackson County;

And on July 2, 1934, by resolution duly and regularly adopted, reduced the permissible load limit on the

SEVEN MILE CREEK BRIDGE, No. 421-06.5, on the Klamath Lake Secondary Highway, in Klamath County;

And on May 16, 1937, by resolution duly and regularly adopted, reduced the permissible load limit on the

CATCHING SLOUGH BRIDGE, No. 241-02.1, on the Coos River Secondary Highway, in Coos County;

and

WHEREAS, a new bridge has been constructed over Catching Slough on the said Coos River Secondary Highway, and substantial improvements and repairs have been made to the other three bridges above named, thereby placing all of said structures in a condition to withstand heavier load limits;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and participating, as follows:

1. That the resolution by which a load limit was fixed for the LOST RIVER BRIDGE and the resolution fixing a load limit for the SEVEN MILE CREEK BRIDGE be and each of the same hereby is modified so as to remove the load limit fixed for each of said bridges and permit the statutory load limit in each instance to prevail;

2. That the resolution by which a load limit was fixed

for the ROGUE RIVER BRIDGE be and the same hereby is modified so as to permit a load limit of fifteen (15) tons;

3. That the resolution by which there was fixed a load limit for the CATCHING SLOUGH BRIDGE be and the same hereby is vacated and annulled.

BE IT FURTHER RESOLVED that the restrictions and limits hereby fixed by this resolution shall prevail and shall be in full force and effect until otherwise changed or modified by the order of the State Highway Commission.

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said bridges are located; and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Engineer reported receipt of a letter from County Judge J. J. Barrett of Linn County, in which the Commission is asked to receive bids at its meeting on May 18, on behalf of Linn County, for the construction of a bridge over Thomas Creek on Main Street in the town of Scio, it being understood that the county will award the contract and pay construction costs. The Commission approved the request by unanimous vote.

The Secretary presented a letter from the town of Monroe, Benton County, requesting the oiling of the Territorial Secondary Highway through the Monroe city limits. The matter was referred to the Engineer for investigation and report.

A letter was presented from the Union High School District, Estacada, advising that the City of Estacada and the Estacada Union High School District and Local School District No. 108, meeting in joint session on April 11, decided to undertake a W.P.A. project for the improvement of the state secondary highway in front of the high school, in Estacada, if the State Highway Department will pay the cost of surfacing this street after the rest of the work is completed. The Engineer estimated that such surfacing work would cost about \$800 and recommended acceptance of the offer. The Commission approved the recommendation unanimously.

The Commission discussed and referred to the Attorney for legal advice a letter from the Horsefly Cattle and Horse Association, Klamath Falls, requesting permission to construct an electrified fence along a 4-mile section of the Klamath Falls-Lakeview Highway east of the town of Bly, and along a 2-mile section of this highway west of the town of Bly.

A petition was presented from numerous residents of the town of Shedd, requesting the installation of adequate markers designating certain areas of the Pacific Highway within the limits of Shedd for pedestrians' use in crossing said highway. The Engineer advised that the main concern of these

APR 24 1939

people is for the reduction of speed of highway traffic through this town, which, in his estimation, could not be accomplished either by the painting of pedestrian lanes or the erection of additional signs. He pointed out that there now exist at both entrances of this highway into Shedd signs indicating a speed limit of 25 miles per hour through this town, and it appeared to him that the solution of this problem is simply the securing of additional police protection rather than the supplying of additional signs or the painting of pedestrian lanes. The Commission concurred in the Engineer's viewpoint and ordered that the petitioners be so informed.

The Commission discussed the oiling of the Sunset Camp-Elsie Section of the Wolf Creek Highway, and the county road between Balm Grove and Sunset Camp, which is now being used as a state highway route pending completion of the state highway connection. The Engineer advised that the section from Balm Grove to Elsie is 30 miles in length and estimated the cost of a light oil treatment at approximately \$30,000. He recommended the improvement and that he be authorized to advertise this project for bids to be received at the June meeting of the Commission. After considerable discussion, the Commission approved the Engineer's recommendation unanimously, it being understood that if the bids received for the project are too high, then the work will be done with state forces. In this connection a letter was presented from H. D. Kerkman, County Judge of Washington County, offering to contribute the sum of \$10,000 of county funds for the securing of base rock and oil rock that will be needed to oil the road between Balm Grove and Sunset Camp. The Commission accepted the offer.

A letter was presented from Julius P. Hult of the Hult Lumber Company, Horton, Oregon, giving information as to the daily tonnage that is moved over the Siuslaw Highway, for the Commission's information in its studies for the proposed improvement of this road. After discussion, the Commission referred the letter to the Engineer with instructions to render a report on the cost to conduct a reconnaissance survey of the Triangle Lake Section, which the people of this district are particularly anxious to have improved at this time.

The Commission considered and ordered filed a letter from County Judge Nelson B. Higgs, of Harney County, asking the designation, as a secondary state highway, of the proposed road extending southeasterly from the town of Princeton, in Harney County, to a connection with the I.O.N. Secondary Highway, in Malheur County.

The Secretary presented a petition signed by 369 residents of Brownsville and vicinity, and letters from W. E. Winslow, of the Hudson-Duncan Company, Portland; Dr. Ralph E. Herron, representing the Brownsville Chamber of Commerce; Melvin C. Morgan, Manager of the Pacific Fruit and Produce Company, Albany; Chester A. Page, owner of the Brownsville Woolen Mills; and Walter T. Malloy, Manager, Cherry City Baking Company, Salem, urging the improvement of the Halsey-Sweet Home Secondary State Highway from Brownsville easterly about 3 miles to what is known as the Hughes Place. The Commission ordered that this project be included with others for consideration in the preparation of the 1940 federal aid secondary highway program.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Edwin C. Gerber, contract No. 2103, for grading, surfacing, and oiling the Umapine-Sunnyside Section of the Umapine Secondary Highway, in Umatilla County, requested an extension of time from January 16 to June 30, 1939, within which to complete this project. He alleged that his failure to complete the project within the specified time limit was due to the fact that it was impossible to do the oiling work in the winter months. The Engineer advised that the reason given by Mr. Gerber for failure to complete this job on time is correct and recommended, in view of the circumstances, that the extension requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

R. I. Stuart & Sons, contract No. 2129, for furnishing crushed gravel in stock piles for the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways, in Jackson and Josephine Counties, requested an extension of time from April 5 to April 17, 1939, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that there is no good reason why this contract should not have been completed within the specified time limit; however, that this is a P.W.A. project, and, under the rulings of the Public Works Administration, contractors performing such contracts are allowed a grace period within which to complete their jobs after the expiration of the specified time limit. He recommended, in view of the fact that the work under this contract was completed within the limits of the grace period, that the extension requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2112, 2129, and 2147, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2112, with Castelloe & Stocker Electric Company, for installation of traffic signals in the city of Eugene. Completed January 23, 1939.

APR 24 1939

Contract No. 2129, with R. I. Stuart & Sons, for furnishing crushed rock for the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways, in Jackson and Josephine Counties. Completed April 17, 1939.

Contract No. 2147, with Eugene Sand and Gravel Company, for furnishing crushed rock for the Greenleaf-Cheshire Section of the Siuslaw Highway, in Lane County. Completed April 18, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The meeting was declared adjourned at 6:00 o'clock p. m.

<p><u><i>Prosser</i></u> State Highway Engineer</p> <p><u><i>H. B. Glaisyer</i></u> Secretary</p>	<p><u><i>Henry F. Cabell</i></u> Chairman</p> <p><u><i>Huron W. Clough</i></u> Commissioner</p>
---	---

Roseburg, Oregon, April 25, 1939

The State Highway Commission met in special session at 9:00 o'clock a. m. in the office of Division Engineer K. D. Lytle to dispose of a number of state park matters. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary
S. H. Boardman, State Parks Superintendent

The State Parks Superintendent reported briefly on the activities of the National Parks Service which is investigating a proposed national park and monument site along the Oregon coast line. The Commission took no action on this matter.

He also reported on his endeavors to secure 2,000 acres of O. & C. land for the Silver Falls Recreational Demonstration Project. He said that he previously petitioned the Secretary of the Interior, Honorable Harold Ickes, for a transfer of this land to the demonstration project because of its recreational features and for the further reason that it would enhance the value of the 5,000 acres already contained in such demonstration project, and,

as a result, there is a bill now pending in Congress providing for such transfer.

The Commission discussed with the Parks Superintendent the matter of securing title to 110 acres of land that are now included in the Umpqua Lighthouse Reserve. The Parks Superintendent advised that this tract joins the present state park at this location and that the only hold that the state has on the 110 acres is a revocable permit; however, there is now a bill before Congress which provides that title to the property shall rest with the state upon payment by the state of 50 per cent of the assessed value of the property, which would amount to about \$450.00. He recommended payment of such sum. The Commission approved the recommendation unanimously.

The Parks Superintendent requested approval of applications for the following C.C.C. camps for the 14th period, which begins October 1, 1939:

Renewal of Saddle Mountain Camp, in Clatsop County
 Renewal of Silver Falls Camp, in Marion County
 Renewal of Coos Head Camp, in Coos County
 Renewal of Casey's Camp, in Jackson County - and
 New camps to develop the Salmon River Highway wayside timber
 and Neahkahnie Mountain State Park

The Commission approved such applications unanimously.

The Parks Superintendent recommended approval of the request of the State Forester, J. W. Ferguson, for permission to construct and maintain a fire patrol headquarters on a tract containing 1.8 acres located within the recently acquired Salmon River Highway wayside strip. The Commission approved the recommendation.

A brief report was made by the State Parks Superintendent on the activities of Mrs. Vern Van Dyke, who maintains a cottage in Casey State Park, adjacent to the Crater Lake Highway, in Jackson County. He advised that Mrs. Van Dyke refuses to vacate the premises as ordered by the Commission, and indicates by her actions that she intends to stay there indefinitely, inasmuch as she has just completed construction of a new fence around her cottage and has done considerable clean-up work. He requested instructions from the Commission, in view of the fact that she was previously ordered by the Commission to vacate the premises by June 30, 1939. The Commission withheld its decision in this matter until a future meeting.

The matter of acquiring timber land from the Crown-Willamette Company at Cape Lookout, in Tillamook County, was brought up for discussion by the Parks Superintendent. He advised that the company has now reduced its price to \$2,131.00, based upon 67,000 FBM spruce timber at \$3 per M; and \$38 for the standing hemlock timber; and \$83 for the land, totaling 119 acres. This offer, he said, is based upon the state purchasing everything on the west side of a trail that he proposes to construct and the purchase of a 100-ft. strip on the east side of this trail, although provision is also made that the state may purchase the land on the east side of the trail beyond the

APR 25 1939

limits of the timbered strip at such time as the timber has been removed therefrom. The Commission indicated approval of this settlement but deferred definite action pending a verification of the price by the Right of Way Department.

There being no further business to come before the Commission at this time, the meeting was adjourned at 10:00 o'clock a. m.

Henry F. Cabell
Chairman

Huron W. Clough
Commissioner

R. H. Baldock
State Highway Engineer

J. M. Devers
Secretary

Prineville, Oregon, May 17, 1939

The State Highway Commission met in special session at 9:00 o'clock a. m. in the Circuit Court Room of Crook County Court House, in accordance with notification previously given the Prineville City Council, to secure expressions from the people of Prineville with respect to the Commission's plans for rerouting the Warm Springs Secondary Highway and the Ochoco Highway in this town. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were about 30 local citizens, including W. B. Morse, Mayor; County Judge A. R. Bowman, County Commissioner Chas. T. Brown, Mrs. W. I. Dishman, H. R. Lakin, Millard Smith, S. M. Gibbs, Mrs. Frank Alander, Mrs. Grimes, and J. T. Amundson.

Chairman Cabell called the meeting to order and explained its purpose and the law which requires the Commission to hold a public hearing in any city or town before it changes or alters the route or entrance of any highway through or into such city or town. The Engineer explained the plans of the Commission for the rerouting of both highways under discussion and exhibited a map showing the proposed changes, which are more particularly described as follows:

Ochoco Highway: Beginning at a point on the present highway at the intersection of Main Street with Third Street, thence

extending westerly along Third Street to the end thereof at the city limits, thence continuing along an extension of Third Street to a connection with the present highway at the curve on the west side of the Crooked River Bridge.

Warm Springs Secondary Highway: Commencing at a point on the present highway at the intersection of Main Street with Third Street (southern terminus of Warm Springs Secondary Highway) and extending thence westerly along Third Street to a point at or near Park Boulevard, thence in a northwesterly direction along the easterly side of the Crooked River toward Madras.

Chairman Cabell then invited local citizens to express their views either for or against such changes.

Mayor Morse suggested that the Warm Springs Highway be retained in its present location along Main Street for several blocks and then turn in a northwesterly direction, leaving the city at the west end of Tenth Street. He said that the City Council has discussed this matter and favors such routing from the city's standpoint because it would give the city additional mileage of state highways and would lessen their street maintenance expense. However, the Council does not wish to appear arbitrary in the matter and will not oppose the change as proposed by the Commission if the Commission feels that it cannot change the present plan. He pointed out that the Crooked River Highway enters Prineville on Main Street and connects with the Warm Springs Highway at Third Street, so it appears logical to them that the Warm Springs Highway be retained in its present location so as to avoid a right-angle turn in the center of town for through traffic bound for Madras. He presented a resolution from the Prineville City Council unanimously endorsing the route suggested by him.

County Commissioner Brown inquired whether or not the Commission has any plans for the rerouting of the Crooked River Highway and was informed by Chairman Cabell that this matter has not as yet been given any consideration by the Commission. Mrs. Dishman stated that she resides on a ranch about 7½ miles north of Prineville and is very much in favor of the retention of the present route of the Warm Springs Highway because it will not cut up her property as will the proposed route.

Mr. Lakin favored the present routing of the Ochoco Highway on Second Street because of service stations and other business interests along that street. He said that he has discussed this matter with numerous people in Prineville and all seem to be in favor of retaining the present route for this highway. Mr. Smith inquired as to whether or not the north Main Street route has been given serious consideration by the Commission and its engineers and was informed that such route was given first consideration but was eliminated because of the advantages of the other route, it being the thought of the Commission that this highway is of major importance as an east and west trunk highway and should be located with that thought in mind.

Mr. Gibbs gave as his thought that it would be unfair for the Highway

Commission to change the present route of the Ochoco Highway. Mrs. Alander endorsed the route suggested by Mayor Morse. She pointed out that the present road passes two sawmills and gave as her thought that if the highway is changed it will work to the disadvantage of these mills. She was opposed to changing the route because it would cut through farm property and would discommode some 89 farmers along the present road.

Judge Bowman advised that Prineville is just now entering a period of rapid growth, and, in his estimation, the highway should be located permanently so as to avoid changes later on. He declared this to be the sentiment of the majority of the townspeople, who are perfectly willing to leave the decision up to the State Highway Commission and are only asking that the decision be made as soon as possible. Mrs. Grimes stated that she is not immediately affected by the proposed change in the Warm Springs Highway but believes that the present route of such highway should be retained because it is in a more centralized location. She declared that the road as now located is satisfactory and that all it needs is the elimination of several sharp curves and oiling to provide a dustless surface.

Mr. Amundson stated that he owns a service station at the corner of Second and Main Streets and is opposed to any change in the Ochoco Highway because it will affect his business adversely. He also objected to any change from the standpoint of safety to children, stating that a number of people have already purchased property along Third Street primarily because it was not a state highway route and would be much safer for their children.

Chairman Cabell advised that the Crooked River Bridge near the west limits of Prineville is in an unsafe condition and must be replaced soon and that it was the thought of the Commission that the new bridge should be placed in a permanent location, and while such work was under way it would be proper to permanently locate the highway leading into Prineville. Mr. Amundson approved construction of a new bridge but gave as his thought that there is no need to change the route of the highway until travel develops. He suggested the construction of a ramp from the east end of the new bridge to the present highway on Second Street rather than an entire rerouting of the highway. He declared that the completion of the Ochoco Highway east of Prineville and the improvement of the Crooked River Highway south from Prineville is of much more importance than the rerouting of the highways within the Prineville city limits.

Chairman Cabell concluded the hearing by outlining the policy followed by the Commission in the selection of state highway routes and by stating that the Highway Commission will take under advisement the arguments presented at this meeting and will make its decision as soon as possible.

The meeting was adjourned at 10:00 o'clock a. m.

Robert M. Work
State Highway Engineer
W. H. Seay
Secretary

Henry F. Cabell
Chairman
Wm. H. Clough
Commissioner

Bend, Oregon, May 17, 1939

The State Highway Commission met in special session at 11:00 o'clock a. m. in the City Council Chambers of the Bend City Hall, in accordance with previous notification given to the Bend City Council, to secure expressions from the people of this city relative to the rerouting of Century Drive Secondary Highway along Riverside Boulevard in Bend. Also, with respect to the alteration of the entrance of such highway into the city of Bend. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were ten local citizens, including C. G. Reiter, City Manager; Don Peoples, Secretary of the Bend Chamber of Commerce; County Judge Charles L. Allen and County Commissioner Wm. Baer, of Deschutes County; Ross Farnum and Jim Donovan. Chairman Cabell called the meeting to order by explaining its purpose and the law which requires the Commission to hold a public hearing in any incorporated city or town before it alters or changes the route or entrance of any state highway through or into such city or town.

The State Highway Engineer explained the plans for the rerouting of the Century Drive Secondary Highway and exhibited a map disclosing such changes, which are described as follows:

Beginning at a point on the present highway route at the intersection of Broadway with Franklin Avenue, thence following along Riverside Boulevard to a connection with the present highway at the intersection of Tumalo Avenue with Riverside Boulevard; also, beginning at a point on the present Century Drive Secondary Highway at the intersection of 14th Street and Albany Avenue, thence south a distance of approximately 1/4 mile to a connection with the existing Century Drive Secondary Highway.

He particularly pointed out that it will be necessary to flatten the curve where Riverside Boulevard turns onto Tumalo Avenue near the crossing of the Deschutes River, which would necessitate the taking of a small portion of the city park at such point. He also explained that the hearing with respect to the change at 14th Street and Albany Avenue is simply to confirm the change that the state has already made along this section. Chairman Cabell then requested expressions from the local people relative to these changes.

Mr. Reiter advised that the changes are not opposed by anyone in Bend; furthermore, that it would be quite satisfactory with the city for the state to take some of the city's park property as may be needed to ease off the curve at the intersection of Riverside Boulevard with Tumalo Avenue. He presented a letter from Mr. Henry M. Fowler endorsing the change on behalf of a number of property owners along Riverside Boulevard.

MAY 17 1939

Mr. Farnum stated that he is a property owner who will be affected by this change, but wishes to endorse it heartily. He declared that he expressed the sentiment of all of the people who own property at his end of this street. Mr. Donovan advised that he has contacted every person who will be affected by the proposed changes and has found no one opposed to either of them.

Judge Allen endorsed the changes, particularly the one on Riverside Boulevard, because it would eliminate cross-traffic, there being no intersecting streets along Riverside Boulevard.

As there were no others present desiring to be heard on this subject Chairman Cabell concluded the hearing by stating that the Commission will make its decision relative thereto at an early date. The meeting was adjourned at 11:30 o'clock a. m.

The Honorable Earl H. Hill, Cushman, Oregon, and O. H. Hinsdale, Gardiner, Oregon, came before the Commission and asked for the widening of the Oregon Coast Highway through the town of Gardiner. Mr. Hinsdale advised that a new building program is under way in Gardiner, which involves the construction of a mill on the river side of the highway between Marsh Street and Camp Street and the subdividing of the property adjacent to the mill site into city lots. He requested state cooperation in the improvements to the extent of widening the highway, construction of sidewalks, installation of lights, et cetera. After discussion, the Commission authorized and instructed the Engineer to make surveys as may be needed to establish a permanent route for the highway through this town and to render a report thereon as soon as possible. The Attorney was authorized to secure right of way options in accordance with the survey.

Messrs. O. B. Peake and H. K. Magness, Portland, came before the Commission relative to the proposed Sandy Boulevard improvement between 44th Avenue and 52nd Avenue. They asked the Commission to postpone this improvement until such time as it can be done without interfering with business along Sandy Boulevard, as they do not want a repetition of business interruptions such as they experienced last year when this street was improved west of 44th Avenue.

The Commission decided unanimously not to alter its present plans for this project, which provide for the taking of bids on June 22, 1939. However, the Commission instructed the Engineer to include in the specifications for the job provisions for handling the work in a manner that will cause the least possible interference with local business.

The Commission had under discussion the matter of improving the sight distance at the junction of The Dalles-California Highway with the Tuma-lo-Deschutes Secondary Highway, in Deschutes County. Chairman Cabell advised that he inspected this intersection in company with Commissioner Clough and

MAY 18 1939

the Engineer on the previous day and is of the opinion that the rock cut at this point should be widened to give a longer sight distance for traffic entering the highway at this point. The Engineer estimated that a satisfactory job would cost approximately \$500. The Commission by unanimous vote authorized the improvement and instructed the Engineer to proceed therewith.

The Engineer brought up for discussion the matter of oiling the road known as The Dalles Scenic Drive leading from The Dalles to the Eastern Oregon Tuberculosis Hospital at The Dalles. He advised that to oil this road will cost approximately \$1,500, of which amount \$540 is the estimated cost to oil within the city limits and should be paid by the city; \$500 represents the cost of oiling on the hospital grounds and should be paid by the State Board of Control; and the balance, amounting to \$460, is the estimated cost to improve the section lying between the city limits and the hospital, which is a county road, and should be paid by Wasco County. He further advised that the road in question is not a state highway, so the State Highway Commission has no legal authority to expend state highway funds to improve it. However, he recommended that the work be done with state forces if the city, the county, and the Board of Control will pay for it. The Commission approved the recommendation by unanimous vote, provided satisfactory arrangements are made for the financing of the work as suggested by the Engineer.

The Engineer reported on the cost to improve the Robinette-Homestead Secondary Highway over Oxbow Tunnel and between Homestead and the Interstate Bridge at Ballard's Landing, in Baker County. He estimated that it would cost about \$2,500 to improve the Oxbow Tunnel hill section and an additional amount of \$500 to fix up the road to the Ballard's Landing bridge so that it will be passable throughout the entire year. He recommended approval of such expenditures because it is not possible under present conditions to keep the road open for travel during the winter season and the permanent improvement of the section is not contemplated for a number of years and because the improvement is needed in order to realize to the fullest extent on the expenditures that have already been made for the improvement of the old railroad grade between Robinette and Homestead. The Commission approved the recommendation unanimously, subject to the condition that the plan also meets with the approval of the Baker County Court.

The Commission had under discussion the Engineer's report on the request of Hood River County for construction of a footpath along the Columbia River Highway between Hood River and the Columbia Gorge Hotel, a distance of approximately one mile. The Engineer advised that a recent traffic count reveals very little pedestrian traffic along this section; in fact, only thirty people used the road in this manner the day that the count was made, and, in his estimation, the expense of constructing a footpath is not justified. He recommended, as an alternative, an expenditure of approximately \$1,000 for the widening of the shoulders along this section, which he thought would serve the purpose until the need for a walk is more apparent. The Commission approved the recommendation unanimously.

A letter was presented from the town council of Myrtle Creek, Oregon, in which the State Highway Commission was requested to oil, at city

expense, Second Street and Division Street in that town. The Engineer estimated that this work will cost about \$800. He recommended approval of the city's request, subject to the usual requirement: that the city will deposit its check for the estimated cost of the work, in advance. The Commission approved the recommendation under such condition and authorized the work when a state oiling crew is in that vicinity.

The Commission discussed and approved an expenditure of \$200 for the oiling of the road which extends from the Oregon Coast Highway to the state's quarry at Agate Beach, Lincoln County.

The Engineer reported the results of investigation that has been made with respect to the construction of a proposed road connecting Diamond Valley Secondary Highway, in Harney County, with the I.O.N. Highway, in Malheur County, passing through a place known as Pollyfarm, which project was requested by a delegation that appeared before the Commission at the previous meeting. He recalled that this delegation asked the State Highway Commission to furnish culvert pipe, powder, right of way, engineering, and fencing for such project, and agreed to perform the construction operations with C.C.C. forces located in that vicinity. He said that according to the best information available the culvert pipe will cost about \$2,100, powder approximately \$600, fencing \$1,980, right of way across private lands \$500, and engineering \$1,300, to which should be added 10% for contingencies, making a total of \$7,130 as the state's cooperative share. He recommended approval of the expenditure. The recommendation was approved by the Commission by unanimous vote. This matter was reconsidered later in the session when a delegation appeared before the Commission relative thereto. The Commission at that time adopted resolutions designating such road as a secondary state highway. (See resolutions ahead.)

The Engineer reported on the cost to construct a portion of the Astor Street extension in Astoria, particularly from Columbia Avenue to Third Street, in order to provide a roadway to the plant of the Columbia River Packers' Association, which is now in an inaccessible location, having been moved in order to clear the highway right of way. He estimated that such work would cost approximately \$38,000. There was also discussed in this connection the question of what minimum width right of way shall be required along Taylor Avenue between Columbia Avenue and Kingston Street, where a number of buildings now encroach upon this street, which was originally dedicated 120 feet wide. As a result of considerable discussion the Commission decided to require a right of way at least 92 feet wide between said points and a right of way 80 feet wide west of Kingston Street to a connection with the completed highway. The Commission also decided not to construct any portion of this project until a right of way of such width has been furnished. The Engineer was instructed to inform the Astoria City Council of the Commission's requirements and the Attorney was instructed to render an opinion of law as to whether or not the state is obligated to pay the cost of removing the buildings from the right of way in view of the fact that they now encroach upon a dedicated street. In this connection a letter was presented from Mr. Frank Patton of Astoria protesting the narrowing of Taylor Avenue in Astoria.

MAY 10 1939

The Commission had under discussion the Attorney's opinion with respect to the request of J. U. Smith and others to construct an electrified fence along portions of the Sams Valley Secondary Highway, in Jackson County. It was the Attorney's belief that the Commission has the authority to permit the construction and maintenance of such fence within the highway right of way, if by so doing public convenience will be aided and the hazard of livestock running on the highway will be minimized or entirely eliminated. However, such license or permit should contain proper safeguards and provision for removal of the fence if, in the judgment of the Commission, it is in any way detrimental to public interests or causes inconvenience in connection with highway construction or maintenance operations. It was also his thought that it would be unwise to grant a permit authorizing the construction of an electrified fence. After discussion, motion was made by Commissioner Clough that the application of J. U. Smith be denied. The motion was duly seconded by Commissioner Aldrich and carried by the unanimous vote of the Commission.

The Engineer reported receipt of a letter from L. V. Murrow, Director of highways for the State of Washington, outlining the plans for the completion of the Washington Section of the state highway between Enterprise, Oregon, and Lewiston, Idaho. Mr. Murrow reports that the program of the Washington Highway Department for the present biennium includes the construction of the Grande Ronde River bridge and approaches thereto but there are insufficient funds available for primary highway construction in that state, so it does not seem possible to undertake further construction on this road during the present year; however, they will endeavor, in the formulation of their construction program for the next biennium, to arrange for the completion of the remaining section up to the Oregon state line. The Commission took no action on this.

The Engineer reported that investigation has been made of the request of the city of Florence for oiling work on certain city streets in that town and it has been found that this work can be done for approximately \$2000. He also said that the city would like to have the work done with state forces and has agreed to pay for it with city funds. He recommended approval of the request subject to the condition that the city will deposit with the Commission its certified check in an amount equal to the estimated cost of the work. The Commission approved the recommendation unanimously, provided the work does not cost more than \$2000.

Mr. L. E. Lucas, County Engineer of Grant County, was present and asked for the improvement of the county road which extends from the John Day Highway at a place known as Bates, down the Middle Fork of the John Day River to a connection with the Pendleton-John Day Highway at a place known as Flowers Gulch. He was informed by the Commission that it does not have funds available to finance such project now.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, with all Commissioners present and participating. Also present were the Engineer, the Attorney, and the Secretary.

The City Council of McMinnville, consisting of Mayor R. H. Windisher

and Councilmen M. W. Mattacheck, A. R. Miller, O. L. Milks, W. S. Wright, A. W. Cameron, and L. L. Farnham, came before the Commission and asked for the designation, as a state secondary highway route, of Lafayette Avenue and Third Street, the old route of the Pacific Highway West through McMinnville. They pointed out that the Three Mile Lane Secondary Highway, which enters McMinnville from the east, now has no direct connection with the Pacific Highway West and gave as their thought that Third Street is the logical route for such connection, in view of the churches, schools, and city buildings along Second Street, which has been considered, and for the further reason that the selection of Second Street would necessitate the moving of buildings. They gave as their main reason in asking such designation that it would relieve the city from the expense of maintaining such streets.

In the discussion of this matter, the Engineer pointed out that there is a question as to where the Three Mile Lane Secondary Highway should enter McMinnville. He pointed out that the present entrance is crooked and that the bridge on the present route is inadequate and must be replaced soon at some site yet to be determined because it does not appear that the existing structure is in proper location. Mayor Windishar suggested the routing of this highway into McMinnville along an extension of Third Street notwithstanding that there is a parochial school on such extension.

After considerable discussion, Chairman Cabell advised that the Commission does not have sufficient facts before it at this time to render a decision in this matter, but must know first how the Three Mile Lane Secondary Highway is to be routed into this town, its decision in that regard being dependent upon the other, and the Commission does not care to act hastily. The Engineer was thereupon instructed to investigate the conditions and render a report on the entire matter as quickly as possible.

The County Court of Hood River County, represented by County Judge C. D. Nickelsen and County Commissioner R. Waldo Arens, and County Engineer C. M. Hurlburt, was present in regard to several road matters. They were accompanied by Mr. Rory Collins, of Dee, Oregon. They asked for the following:

1. Designation as a secondary state highway of the county road which extends from the Mt. Hood Highway, near Odell, through Odell and a place known as Summit, to a connection with the Hood River Secondary State Highway.
2. Rerouting of the Mt. Hood Secondary Highway in the vicinity of Parkdale before this section of the road is improved.
3. Reconstruction of the Mt. Hood Highway in the vicinity of Fikes Corner, following more closely along the present road and utilizing the present railroad undercrossing rather than the revision heretofore proposed, which involves construction of the highway over the railroad.

They advised that the first of these projects is the county's choice for the first secondary highway funds available in Hood River County and urged

MAY 18 1939

it particularly from the traffic standpoint, advising that Odell is an important shipping point for the people of this district and a good road leading to this place is essential.

They were informed by the Commission that, while this road qualifies as a secondary state highway, the Commission is reluctant to so designate it at this time because of its established policy not to place any more roads on the secondary highway system until funds are available to improve them. However, the Commission will give it consideration and will make its decision as soon as possible. As to the rerouting of the Hood River Secondary Highway north from Parkdale, the Commission stated that it would have this matter investigated before proceeding with the improvement of this end of the road.

In regard to the reconstruction of the Mt. Hood Highway at Fikes Corner, Mr. Hurlburt pointed out that Mr. Fike's house, which occupied a site at the top of the hill and was a controlling factor in the determination of the route, burned some time ago and is no longer a barrier to the rerouting of this highway under an alternate location if the Commission so desires. He suggested that the state could save some money by following more closely the route of the present highway and by passing under the railroad rather than over it, which would simply mean the widening of the present undercrossing. Judge Nickelsen advised that the county is desirous of constructing a county road to connect with the Mt. Hood Highway near this underpass and would like a decision in the matter as soon as possible. After discussion, the Commission instructed the Engineer to investigate this possibility and advised the County Court that a decision relative thereto would be rendered at the earliest possible time.

A delegation from Harney and Malheur Counties, consisting of County Judge Nelson B. Higgs of Harney County, County Judge David F. Graham of Malheur County, and George W. Beers, Improvement Supervisor, Taylor Grazing Department, came before the Commission relative to the construction of a road connecting the I.O.N. Highway in Malheur County with the Diamond Valley Secondary Highway in Harney County, passing through a place known as Follyfarn, which matter was first discussed at the previous meeting. The Engineer advised that investigation has been made of this project and indications are that it will cost the state approximately \$7,200 for culvert pipe, powder, right of way, fencing, and engineering, which the state has been asked to furnish. Mr. Beers advised that the actual construction operations will be done with C.C.C. forces but their main object at the present time is to grade the road and install proper drainage facilities with the hope that the surfacing can be taken care of later.

Commissioner Aldrich expressed himself as in favor of state cooperation in this project and the designation of this road as a secondary highway in order to legalize the expenditure of state funds thereon. Commissioner Clough also expressed himself as in favor of the project. Chairman Cabell concurred in the viewpoint of the other two Commissioners. The Secretary presented at this time resolutions from the County Courts of Harney and Malheur Counties requesting the designation of this road as a secondary state highway. Motion was thereupon made, duly seconded, and carried by unanimous vote, that

MAY 10 1939

the road under discussion be designated a secondary state highway. The following resolutions pertaining thereto were adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Malheur County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Malheur County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Rome-Princeton Secondary Highway No. 442:

Beginning at a point near the center of Section 18, T. 32 S., R. 40 E., W. M., at a junction point with the I.O.N. Secondary Highway; thence in a northwesterly direction following the route surveyed by the State Highway Department to a point on the township line, between Section 36, T. 28 S., R. 36 E., and Section 31, T. 28 S., R. 37 E., W. M., north of Follyfarm, a distance of approximately 30.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several

counties of the state, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Harney County Court of the State of Oregon, has selected the highway hereinafter described, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with the other highways heretofore adopted and which may hereafter from time to time be added, the system of secondary state highways, under the provisions of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following named highway, route, or location of a highway in Harney County be, and the said highway, location, or route hereby is selected, designated, established, adopted and approved as a secondary state highway, and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Rome-Princeton Secondary Highway No. 442:

Beginning at a point on the Diamond Valley Secondary Highway approximately four miles north of Princeton; thence in a southeasterly direction via Market Road No. 1 of Harney County, or a relocation thereof, to the Harney-Malheur County Line, at a point on the township line between Section 36, T. 28 S., R. 36 E., and Section 31, T. 28 S., R. 37 E., W. M., north of Follyfarm, a distance of approximately 23.90 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931, and Chapter 196, Oregon Laws of 1935, and amendments thereof.

In this connection Mr. Beers mentioned that part of the work involved will be the digging of a well, which would not only be used in connection with the maintenance of a C.C.C. camp but when the camp has been discontinued will be used for the watering of stock. He agreed to dig such well in a location near the highway, if possible, so that it can be used in connection with the maintenance of an oasis if one is established by the state in this vicinity. However, he pointed out that the primary purpose of the well is to furnish water for the C.C.C. camp and for the watering of stock when the camp has been discontinued. He gave as his thought that there will be plenty of water for all purposes, including the oasis. The Engineer was instructed to have Division Engineer W. C. Williams contact Mr. Beers relative to the location of the well.

MAY 16 1936

Judge Graham asked for the following improvements on behalf of Malheur County Court:

1. Construction of a road extending from Harper, on the Central Oregon Highway, southerly through Coyote Wells to a connection with the I.O.N. Secondary Highway.
2. Completion of oiling of the Central Oregon Highway between Juntura and Buchanan.
3. Construction of a proposed cutoff for the Old Oregon Trail north from Ontario to Olds Ferry.
4. Designation as a secondary state highway of the Sucker Creek Road between Adrian and Jordan Valley.
5. Improvement of Lytle Boulevard which extends southeasterly from Vale to a connection with the Nyssa-Adrian Secondary Highway.
6. Improvement of Graham Boulevard (Secondary Highway No. 451) westerly from Vale.
7. Early disposal of the controversy with A. R. Hollingshead relative to right of way.

With reference to the last request the Attorney advised that he is now negotiating with Mr. W. H. Holmes, Portland, from whom Mr. Hollingshead is purchasing his property, and expects in the near future to arrive at a satisfactory settlement which should dispose of the matter for all time.

The Commission informed Judge Graham that it would give consideration at the proper time to the projects mentioned by him.

Messrs. C. H. Grieder, representing the National Parks Service, and S. H. Boardman, State Parks Superintendent, came before the Commission at this time relative to the completion of the State Planning Board's report on recreational areas of Oregon. Mr. Grieder stated that the State Planning Board has gone out of existence but there are a few things that should be done in connection with the report to make it complete, and these cannot be done unless the report has proper sponsorship, which he believed could be very nicely taken care of by the State Parks Department. He mentioned three important projects that should be included in this report: first, report on organized camps of a non-commercial nature; second, an authentic inventory of historic sites; third, a report showing county basic data such as population, recreational facilities, et cetera. He advised that there is sufficient money on hand to finance the work if it does not extend beyond the first of October, when it is thought the work will be completed, so the State Highway Commission would not be called upon to assist financially in the project.

The State Parks Superintendent gave as his thought that the report should be completed in order to be of full value, and recommended approval of

MAY 13 1939

Mr. Grieder's request, provided the state is put to no expense thereby. After discussion, the Commission approved the recommendation by unanimous vote.

Reverend R. J. Milton, Pastor of the Free Methodist Church of Albany, came before the Commission relative to a right of way matter. It appears that the highway improvement in Albany will require a strip of land 20 feet wide across the front of the church property, including a part of the entrance to the church, and will necessitate the moving of the church to another location. Reverend Milton stated that the taking of 20 feet off the front of the church property will not leave enough land for the re-establishment of the church on the present site and provide room for expansion which they contemplate. He also objected to another site that has been suggested by the Right of Way Department. He gave as his thought that the state should purchase all of the church property and let the church people re-establish themselves on other property that is satisfactory to them; also, that the church directors would sell this property for \$3000. The Commission took the matter under advisement.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards and sales having been previously approved by the Commission by unanimous vote:

"Road Creek-Wren Section of the Kings Valley Secondary Highway, in Benton County. 1.73 miles grading, surfacing, and oiling. The low bid received for this project was that of S. S. Montague, Portland, at \$36,955.50, using tar. No bid submitted using road oil. The next low bid was that of H. L. Rice, Portland, at \$39,773.00, using tar. Mr. Rice also did not submit a bid using road oil. There were 8 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder, S. S. Montague, when certain conditions have been fulfilled.

"Construct reinforced concrete building and reinstall laundry equipment for Oregon City Laundry Company, in Oregon City. Peter Stuart, of Portland, submitted the low bid for this project at \$1,573.00, for Alternate 'A'. His bid on Alternate 'B' was \$17,907.00. Frank Watt Construction Company, of Portland, submitted the next low bid at \$13,600.00 on Alternate 'A' and \$15,350.00 on Alternate 'B'. There were 3 higher bidders. Bids for this project were received on behalf of the Oregon City Laundry Company, to whom they have been referred for consideration and the Commission hopes to announce its decision in regard thereto before adjournment.

"Deschutes Oiling Project on Central Oregon, Fremont, and Century Drive Highways, in Deschutes, Klamath, and Lake Counties. 43.53 miles oiling. Warren Northwest, Inc., of Portland, submitted the low bid for this job at \$23,562.35. Babler Bros., of Portland, submitted the next low bid at \$23,764.50. There were 5 higher bidders. The Commission awards this contract to Warren Northwest, Inc., at their low bid of \$23,562.35.

"Robert Overcrossing on The Dalles-California Highway, in Klamath County. The low bid received for this project was that of Edlefsen-Weygandt Company, Portland, at \$26,220.00. The next low bid was that of Clifford A. Dunn, Klamath Falls, at \$27,651.00. There were 5 higher bidders. This contract is awarded to the low bidder, Edlefsen-Weygandt Company, at its bid of \$26,220.00.

"Salt Creek Falls-Odell Lake Section of the Willamette Highway, in Klamath and Lane Counties. 3.23 miles grading, 6.86 miles surfacing and oiling, and furnishing 2,450 cubic yards crushed rock in stock piles. J. A. Lyons, Portland, submitted the low bid for this project at \$166,859.90. Leonard & Slate, Multnomah, were the second-low bidders, with their bid of \$167,385.00. There were 7 higher bidders. The Commission awards this contract to J. A. Lyons, the low bidder, at his bid of \$166,859.90.

"Silver Lake-Harris Creek Section of the Fremont Highway, in Lake County. 9.22 miles grading, 26.5 miles surfacing and oiling; oiling of approximately 100,000 square yards sand areas, and furnishing 12,200 cubic yards crushed gravel in stock piles. The low bid received for this project is that of E. C. Hall Company, Eugene, at \$121,378.00. The next low bid is that of Babler Bros., Portland, at \$121,729.00. There are 5 higher bidders. All bids on this project have been referred to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Interstate Avenue Lighting Project in the city of Portland. Construction of 3.23 miles highway lighting. Birkemeier & Saremal, Milwaukie, submitted the low bid at \$38,476.00. Newport Construction Company, Portland, submitted the next low bid at \$38,879.44. There were 6 higher bidders. The Commission awards this contract to Birkemeier & Saremal at their low bid of \$38,476.00.

"Service Creek-Mule Shoe Creek Section of the John Day Highway, in Wheeler County. 1.12 miles grading, 1.04 miles surfacing and oiling, and construction of a 60-foot reinforced concrete bridge. The bid of Leonard & Slate, Multnomah, at \$19,520.00, was the low one received for this job. Saxton, Looney & Risley, of Oak Grove, submitted the second low bid at \$21,527.00. There were 6 higher bidders. This contract is awarded to Leonard & Slate, the low bidders, at their bid of \$19,520.00."

Building in West Portland.

"Building No. 5472, formerly owned by George S. Smith. 2 bids were received for the purchase of this building, the high one being that of George S. Smith, Portland, at \$40.00. The other bid was that of the Sullivan Wrecking Company, Portland, at \$5.00. The Commission has sold this building to the high bidder, George S. Smith, at his bid of \$40.00."

MAY 13 1939

Buildings in Albany

"Building No. 5846, formerly owned by Norbert Aya. The only bid received for this building is that of Burt Picha, of Salem, who offers \$65.00. This bid is rejected and the building will be readvertised.

"Building No. 5847, formerly owned by Edward Falwell. Two bids were submitted for the purchase of this building, the high one being that of Edward Falwell, Albany, at \$51.00. The other bid was that of Martin F. Schults, of Albany, at \$26.50. This building is sold to the high bidder, Edward Falwell, at his bid of \$51.00.

"Building No. 5850, formerly owned by E. D. Bahrke. M. R. Halsey, of Albany, submitted the high bid for the purchase of this building, at \$156.00. Burt Picha was the next high bidder at \$65.00. There was one other bidder, being Martin F. Schults, of Albany, who bid \$26.50. This building is sold to Mr. Halsey at his high bid of \$156.00.

"Building No. 4959, formerly owned by the City of Albany. The high bid received for this building was that of Burt Picha, Salem, at \$65.00. Rev. G. E. Baker, of Philomath, submitted the next high bid at \$46. The third and only other bidder was Martin F. Schults, of Albany, who submitted a bid of \$26.50. The Commission rejects all bids for this building and the same will be readvertised."

Members of the Bridge Committee of Sauvies Island Grange, consisting of E. V. Everett, Ben Howell, William Eberhart, and Joe Kendricks, came before the Commission relative to their previous request for state cooperation in the construction of a bridge over Multnomah Channel of the Willamette River to connect Sauvies Island with the mainland. Speaking on behalf of the project were Messrs. Everett and Howell. The Engineer advised that several locations for this bridge have been investigated, as ordered by the Commission at the previous meeting, and estimates of cost prepared, which indicate that a bridge at either of two satisfactory sites would cost approximately \$400,000.

Chairman Cabell advised that the State Highway Commission does not have funds available to allocate to this project now, regardless of whether or not Multnomah County will pay for a portion of the costs. Furthermore, the Commission has many other projects that are pressing for completion and will not be in a position to consider this project until construction on the others is further advanced. Commissioner Aldrich and Commissioner Clough concurred, which concluded the conference.

Mr. Lewis A. McArthur, President of the Oregon Historical Society, was present and conferred briefly with the Commission in regard to the installation of a V-shaped sign at the old Fort Yamhill blockhouse, which is now located in the town of Dayton. He said that a group of women is particularly interested in preserving the old fort and would like to maintain a sign there giving an outline of the history of the fort and events relating thereto,

which context, he added, he would personally prepare so that it would be authentic. After discussion the Commission instructed the Engineer to install the sign when the wording for the same has been furnished by Mr. McArthur.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Umpqua Lighthouse Park:- The Parks Superintendent reported the offer of Douglas County to donate to the state for park purposes 500 acres of land situate adjacent to the Oregon Coast Highway south of Winchester Bay, provided the state will accept it. He recommended acceptance of the gift because the tract would provide 4 miles of ocean frontage and would fit in admirably with the present state park at this location. The Commission approved the recommendation unanimously.

Proposed park site at the confluence of the Crooked River, Metolius River, and Deschutes River, in Jefferson County:- The Parks Superintendent reported the advisability of securing from the Federal Government some 2,500 acres of land at the above-mentioned location for recreational purposes. He said that the state now controls 1,150 acres at this place but the additional land is needed to complete the area. It was his thought that it could be obtained without cost to the state. After discussion the Commission authorized the Secretary to petition the Secretary of the Interior for the lease of such lands and thereupon approved letters directed to the Department of the Interior and to the Federal Power Commission relative thereto.

Additional timber strip along the Salmon River Highway:- The Parks Superintendent advised that he has investigated a timber tract on the north side of the Salmon River Highway a short distance east of Boyer and has ascertained that it can be purchased on the stumpage basis at the rate of \$4.00 per M, or for a total cost of approximately \$4,188.00, exclusive of the land which is owned by the Miami Timber Corporation and would probably cost \$5.00 per acre. He pointed out that there is considerable timber land lying adjacent to the highway west of the strips already acquired by the state or which are now under negotiation by the state, and he questioned the advisability of acquiring the tract east of Boyer until deals for the acquisition of other tracts have been closed. After discussion the Commission decided to defer final action on the matter pending consultation with Governor Charles A. Sprague. The matter was thereupon referred by the Commission to Chairman Cabell, Commissioner Clough and the State Parks Superintendent to discuss with Governor Sprague during the following week.

Wolf Creek Highway timber strips:- The Parks Superintendent advised that he has contacted the owners of timber situate adjacent to this highway and has ascertained that one of the owners, Mr. Norman Rupp, is willing to sell strips 300 feet wide through his holdings, except that he wants to retain certain land at the Nehalem River Bridge site. The Blodgett Company, he said, is also willing to sell strips 300 feet wide on each side of the highway through its holdings and will donate the land to the state; furthermore, this company will also give to the state, without cost, other land along this highway when it has been logged off. He further advised that he has not been

MAY 10 1939

able to secure a commitment from the Oregon American Lumber Corporation for its timber near Rock Creek and along the South Fork of Rock Creek west of the Clatsop-Tillamook County line. He suggested that it would be advisable to purchase 300-foot strips along the highway at this place if they cannot be secured otherwise and to pay for the burned timber standing thereon, since the company will not sell the land without the timber or deliver title to the state until the timber has been removed, which they anticipate will take from 10 to 15 years. It appeared to the Commission that it would be very desirable to acquire the timber stands along this highway as soon as possible and particularly to secure control of the levelled-off areas adjacent to the highway in order to prevent their being commercialized with hot dog stands, service stations, et cetera. In view thereof the Commission instructed its Attorney to secure options for such tracts, if possible, particularly the small levelled-off areas adjacent to the highway, such options to be acquired before July 1, 1939, when this highway is to be opened for general public use. He was authorized to condemn them if they cannot be acquired by negotiation. The Engineer was authorized and instructed to make surveys of the several parcels as may be necessary.

Acquisition from Tillamook County of the timber tract described as the N.W. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of Section 2, T. 3 N., R. 6 W., W. M., which lies adjacent to the Wolf Creek Highway near Sunset Camp:- The Parks Superintendent advised that there are 220 M-FBM of timber on this tract and that the county will sell it at the rate of \$2.00 per M. He recommended acquisition of the property on such basis. The Commission approved the recommendation unanimously.

Acquisition of timber tract adjacent to the Nehalem Highway 4 miles northwest of Mist:- The Parks Superintendent advised that this property, which contains 10 acres of land, is owned by the Clarke-Wilson Lumber Company, which is demanding the sum of \$6,000 for the timber only, which amount is far more than he considers the property worth inasmuch as the value of the timber at \$4.00 per M. amounts to only \$2,112.00, based upon the state's cruise. He further advised that the tract contains a fine stand of timber and that the company will give the land to the state if the state will buy the timber. He suggested that, if the Commission wants to acquire the tract, another cruise of the timber be made jointly by cruisers for the Clarke-Wilson Company and the state. Chairman Cabell gave as his opinion, in view of the shortage of funds for purchase of recreational areas, that the Commission should concentrate its purchases for timber along main trunk highways, such as the Wolf Creek Highway, before it purchases timber along the highways of a secondary nature. Commissioners Aldrich and Clough concurred. Notwithstanding this decision, Chairman Cabell agreed to inspect the property the next time he is in that vicinity. (Mrs. Pearl Becker, Scappoose, Secretary of Columbia County Pomona Grange, appeared before the Commission in regard to this matter on the following day. In view of her report on the subject, the Commission ordered a further investigation of the area by the State Parks Superintendent.)

The Commission had under discussion the Park Superintendent's request for a \$50,000.00 increase in the state parks budget for the year 1939.

Chairman Cabell expressed himself as in favor of such increase for this year only, particularly in view of the fact that unusual demands have been made on the amount originally budgeted for this purpose and for the further reason that during the past 5 years the amounts actually expended for acquisition and development of state parks have been less than the amounts budgeted for such purposes. He said that he would approve the increase of \$50,000 for this year with the understanding that it would in no way commit the Commission to budget more than \$100,000 in any future year for parks. Commissioners Aldrich and Clough also approved such increase on the same basis and it was so ordered.

The Commission adjourned at 5:30 o'clock p. m. and reconvened at 8:00 o'clock p. m. on the same day in Room 204, Benson Hotel, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Assistant Attorney brought up for discussion the bids received at the morning session for the remodelling of the Oregon City Laundry. He said that he referred the bids to the laundry company officials, who have requested the rejection of all of the bids and settlement with them on a cash basis in the amount of \$13,600, which is the amount of the low bid submitted by the Frank Watt Construction Company of Portland for Alternate "A", the laundry company to make its own arrangements for the re-establishment of its business. In view of this report the Commission decided unanimously to reject all the bids received for this project and to pay the company \$13,600 cash, as settlement in full of its claim.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or

MAY 10 1939

bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>West Portland-Tualatin Section - West Portland-Hubbard Highway</u>				
4088-Baker, Helen M.	R/W	0.379	\$250 per a. plus \$74	Benson

The Commission had under discussion the matter of ordering condemnation proceedings to acquire certain properties that are needed for various highway improvements and in connection with which the Attorney has been unable to reach satisfactory settlements. The Attorney presented a list of such properties as follows:

Transaction No. 6744 - right of way required from M. L. White for the Nehalem Spit Section of the Oregon Coast Highway, in Tillamook County. Owner demands \$500. Commission approved offer of \$250.00.

MAY 10 1939

Transaction No. 6746 - right of way required from W. E. Crawford for the Service Creek-Burton Canyon Section of the John Day Highway. Owner demands \$1,000.00. Commission approved offer of \$600.00.

Transaction No. 6776 - right of way needed from B. A. Young for the Roseburg-Shady Point Section of the Pacific Highway, in Douglas County. Owner demands \$1,000.00. Commission approved offer of \$325.00.

Transaction No. 6760 - right of way needed from R. Rausch for the Roseburg-Shady Point Section of the Pacific Highway. Owner demands \$250.00. Commission approved offer of \$100.00.

Transaction No. 6778 - right of way needed for the Silver Lake-Picture Rock Pass Section of the Fremont Highway, in Lake County. Commission approved condemnation for this property in view of the fact that the Attorney has been unable to locate the owner.

Transaction No. 5262 - right of way needed from Dean Harris, et al, for the Ana Spring-Hunter Hill Section of the Fremont Highway, in Lake County.

Transaction No. 6772 - right of way needed from Geary G. and Ura Alberta Rapp for the Roseburg-Shady Point Section of the Pacific Highway.

Transaction No. 6768 - right of way needed from A. G. Pendo and Ruby Pendo for the Roseburg-Shady Point Section of the Pacific Highway.

After discussion, the Commission authorized the Attorney to proceed with condemnation of these properties and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Roseburg-Shady Point Section of the Pacific Highway
 Service Creek-Burton Canyon Section of the John Day Highway
 Ana Spring-Hunter Hill Section of the Fremont Highway
 Silver Lake-Picture Rock Pass Section of the Fremont Highway
 Nehalem Spit Section of the Oregon Coast Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Roseburg-Shady Point Section of the Pacific Highway
 6760-E. Rausch
 6772-Geary G. Rapp and Ura Alberta Rapp
 6776 and 6776A-B. A. Young, A. J. Young
 6768-A. G. Pendo and Ruby Pendo
 Service Creek-Burton Canyon Section of the John Day Highway
 6746-W. E. Crawford
 Ana Spring-Hunter Hill Section of the Fremont Highway
 5262-Dean Harris, et al
 Silver Lake-Picture Rock Pass Section of the Fremont Highway
 6778-State of Oregon, James M. Allen
 Nehalem Spit Section of the Oregon Coast Highway
 6744-M. L. White

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the

MAY 13 1939

said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action or suits or actions as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission also adopted by unanimous vote the following resolution authorizing the Attorney to condemn right of way that is needed for the Pacific Highway East in Oregon City across the property of the Security & Investment Company of Oregon City:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

OREGON CITY SECTION OF THE PACIFIC HIGHWAY EAST

land and property owned by or in possession of the following parties and/or persons, to wit:

Security & Investment Company of Oregon City

as their respective interests may appear, and this Commission does

MAY 10 1939

hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action or suits or actions as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission had under discussion the controversy with C.A. Hardy relative to the location of the John Day Highway across Mr. Hardy's property

MAY 13 1939

between John Day and Prairie City, in Grant County, which involves the question of whether the highway should be constructed on straight alignment or on curved alignment. The Commission decided in favor of the straight alignment and by unanimous vote authorized the Attorney to condemn the right of way in accordance therewith if Mr. Hardy will not accept \$2000 for same.

The Assistant Attorney reported on the status of securing right of way options for the proposed revision of the Pacific Highway West through the town of Tigard. He advised that the estimated cost of such right of way along the southerly route is \$66,000, whereas that along the northerly route is \$96,500. The Engineer advised that it would cost about \$265,000 to construct the southerly route, whereas the northerly route can be constructed for \$244,000, making a total cost of \$331,000 for the southerly route and \$340,500 for the northerly route. He recommended the adoption of the northerly route notwithstanding that it is slightly more expensive than the other, particularly because it apparently is favored by most of the people in Tigard and because it can be built in sections and will involve a lesser expenditure of state funds at any one time. Also, because there is very little to choose between the two routes so far as alignment is concerned. After considerable discussion Chairman Cabell expressed himself tentatively in favor of the northerly route as did also Commissioners Aldrich and Clough. A definite decision in regard thereto was deferred by the Commission until later in the session after it has heard additional arguments to be presented by groups favoring both routes. (The Commission adopted a resolution on the following day definitely deciding in favor of the northerly route.)

Commissioner Aldrich brought up for discussion the matter of prohibiting the erection of advertising signs on privately-owned property adjacent to state highway rights of way and particularly along the Pendleton-Stanfield Section of the Old Oregon Trail. He advised that practically all of the property owners along this section of the Old Oregon Trail have signed statements to the effect that they will not allow signs to be maintained on their properties, but one owner objects to doing so because he realizes about \$30 per year rental from such source. The Attorney advised that the Commission has authority to spend state funds to purchase exclusive rights for the maintenance of signs on private properties if it so desires, but suggested that that would be unwise because it would eventually mean an expenditure of a large sum of state highway funds, which the Commission cannot afford. The Commission decided not to follow such procedure but to try again to secure signed statements from all of the property owners. The Commission also decided that the proper time to secure statements of this kind is when right of way for new projects is acquired, and accordingly instructed the Attorney to follow such procedure hereafter in connection with right of way negotiations.

The Engineer reported considerable savings in the contracting of state highway construction work and suggested that this money should be expended for oiling work. He presented the following list of eligible projects for such funds and recommended approval of the same for light oil treatment costing approximately \$1000 per mile:

Sunset Camp Oiling Project:

Balm Grove-Sunset Camp Section	State	\$ 12,000
Sunset Camp-Nehalem River Section	"	14,000
Butte Creek & Mt. Vernon Oiling Project:		
Butte Creek-Service Creek Section	"	12,000
Mt. Vernon-Forest Boundary Section	"	24,000
Baker-Gibbs Ranch Section	"	5,000
Weston-Forest Boundary, Oiling	"	12,000
Willamette Valley Oiling Project:		
Midway-Scholls Section	"	15,000
McMinnville Rd.-Sunnycrest Rd. Section	"	3,000
Hopewell Section	"	3,000
Colton-Springwater Section	"	7,000
Maple Grove-Pedee Section	"	3,000
Pedee-Benton County Line Section	"	3,000
Santiam Highway-Crabtree Section	"	2,000
Eastside-Enegren Ferry, Oiling	(State Force)	4,000

The Commission by unanimous vote approved the recommendation and instructed the Engineer to advertise as many of these jobs as possible for bids to be received at the meetings that are scheduled for June 6 and June 22, 1939.

The Commission also by unanimous vote authorized the Engineer to construct a light oil treatment on the Eastside-Enegren Ferry Section of the Coos River Secondary Highway in Coos County, with state forces. However, it was understood that this work is authorized for state forces as an exception and not as a general rule and that as a general policy such projects should be advertised for bids.

The Engineer reported that there is a possibility that Congress will make additional moneys available for a new P.W.A. program and suggested that it would be advisable to take advantage of such funds if and when they are authorized. He advised that present indications are that the Commission will be able to arrange for a program amounting to between \$1,500,000 and \$2,000,000 under such a setup and suggested that the P.W.A. authorities be so informed. After considerable discussion the Commission approved the suggestion and authorized the Engineer to pass this information along to Mr. C. C. Hockley, Regional Director of the P.W.A., Portland.

The Commission adjourned at 10:45 o'clock p. m., to reconvene at 9:00 o'clock on the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, May 19, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for highway construction projects were opened and

MAY 19 1939

read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 o'clock p. m. in the same room:

Two delegations from the town of Tigard were present and presented arguments with respect to the rerouting of the Pacific Highway West through that town. One of the delegations was headed by Mr. Thomas Tongue, Attorney-at-Law, Hillsboro, and consisted of approximately 15 persons who favored the northern route. The other delegation, consisting of 19 members, was headed by Mr. Kemmer, Attorney-at-Law, Beaverton, and favored the adoption of the southerly route. Mr. Kemmer presented arguments on behalf of the delegation

MAY 19 1939

favoring the southerly route and was followed by Mr. Tongue who presented those on behalf of the people who favored the northerly route. At the conclusion of the presentation of both groups Chairman Cabell advised that the Commission is glad to have the arguments of both factions and that the Commission hopes to make its decision with respect to this matter before adjournment of this meeting. This matter was discussed by the Commission in private following the appearance of the delegations, at which time the Commission decided definitely in favor of the northerly route. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Pacific Highway West has for some time been routed through the unincorporated town of Tigard over the main street or thoroughfare of said town; and

WHEREAS, it is the opinion of the Highway Commission that a change in the alignment of said highway with respect to said town of Tigard should be made in order to afford a more convenient, safe and adequate highway for the motoring public; and

WHEREAS, after thorough and repeated surveys had been made and after listening to delegations and citizens of the said community with respect to several possible routes, and after due consideration of all matters pertaining to the selection of a permanent route the Commission has selected as the route of the highway through said town the route which in the judgment and opinion of the Commission will most adequately serve the general public.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the route of the Pacific Highway West through the unincorporated town of Tigard shall be along a route and over territory defined and described as follows, to wit:

Beginning approximately 500 feet westerly of the Multnomah-Washington County Line at engineer's station 204+99.0 - 5+33.4 at the end of the present four-lane pavement; thence in a southwesterly direction in general following the present highway to approximately 400 feet easterly of the High School; thence leaving the present highway and passing back of the Methodist-Episcopal Church, crossing the railroad tracks of the Oregon Electric Railway Company and the Southern Pacific Company approximately 275 feet northwesterly of the present highway crossing, and then joining the present highway near the Catholic Church and School; thence following the present highway to a connection with the end of the present concrete pavement approximately 250 feet westerly of the Public School.

2. That the survey, field notes and other data made, acquired and assembled by the Engineer with respect to said route, all

MAY 19 1939

of which have been filed in the office of the State Highway Commission at Salem, Oregon, be and the same hereby are approved and adopted as the survey, field notes and route of said highway.

3. Be it further resolved that in due time and as funds are made available therefor the Pacific Highway West shall be constructed over the above described route, and as soon as the highway has been permanently constructed over said route and is ready to receive the traffic which uses and employs the said West Side Pacific Highway in said vicinity the present route of said highway shall thereafter be abandoned as a portion or part of the Pacific Highway West.

4. That this resolution shall be entered in the minutes and records of the Highway Commission and a duly certified copy thereof delivered to the United States Bureau of Public Roads and a like copy to the County Court of and for Washington County.

A delegation from Reedsport, consisting of Mayor E. G. Dunn, W. A. Burdick, W. G. Benson, J. H. Richards, N. Hogan, and Mrs. Harriet Edwards, came before the Commission relative to the proposed improvement of the Umpqua Highway between 12th and 15th Streets in this town, particularly with reference to the moving of the city's building and the theatre building located on the easterly side of this highway. It was recalled from previous discussions that the city building and the theatre building would have to be moved back from the highway a distance of 10 feet in order to provide a standard width highway right of way and that Mrs. Edwards, who owns the theatre building, is not inclined to give up any of her present property fronting on the highway unless she is guaranteed additional land at the back of her premises, because she has need for a full 100-foot property depth in order to satisfactorily carry on her business. It appeared from comparisons that the cost of moving the buildings will nearly equal the cost of improving the highway, for which reason the Commission indicated an unwillingness to assume such obligation. The Engineer suggested, as a solution to the entire problem, the narrowing of the existing sidewalks to 7 feet, which would provide a width of 56 feet between curbs for traffic, including a central neutral zone 2 feet wide. It was his thought that such arrangement would be adequate for a long time. He also suggested an 80-foot right of way at 12th Street in order to improve sight distance at this intersection, which would necessitate the cutting back of the concrete garage building at this point. After discussion the Commission by unanimous vote tentatively approved such arrangement pending further study of the matter.

The question of reconstructing the canopies on business houses in connection with this improvement was also discussed. Chairman Cabell suggested that the state assume such expense if it is not large and if it is a legal expenditure of state funds. The Attorney advised that the Commission has legal authority to expend state funds for improvements of this kind, whereupon the Commission by unanimous vote agreed to assume this responsibility when the street work is undertaken.

MAY 19 1939

The Assistant Attorney presented a form of agreement with the California Western States Life Insurance Company, providing for group insurance coverage for highway department employees who are paid on the hourly basis. The Commission approved the agreement and referred to the Attorney for further study the matter of including coverage for employees who are paid on the monthly basis.

The Assistant Attorney brought up for discussion the matter of selling to Talent Grange, of Jackson County, a small tract of state-owned land at the intersection of the Pacific Highway with the Valley View County Road south of Talent. He recalled that the Commission at the previous meeting authorized the sale of this property to the Grange for the sum of \$250. He gave as his understanding that the Grange wants the state to deed this property to the Grange without cost. He inquired whether or not the Commission had considered the matter from that standpoint and requested instructions relative thereto. After discussion the Commission decided definitely not to deed this property to the Grange without cost, but to make a charge for it, the amount thereof to be determined by Commissioner Clough. Commissioner Clough was given full authority to act in the matter.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

A delegation from Hood River, representing the Chamber of Commerce, came before the Commission relative to snow removal on the Mt. Hood Highway. Mr. Harold Loomis, Secretary of the Chamber of Commerce, headed the group, which included the following: John Mohr of Hood River and County Judge C. D. Nickelson of Hood River County; L. P. Jaeger, Ross Finnegan, Ed Pettig, Joe Herman, W. H. Hoffman, Flavel Temple, and Mr. Halcomb, all representing the Portland Hotelmen's Association; also, Jack Meier of Timberline Lodge, Inc., Tim O'Conner, representing the Gray Line buses, and James Frankland of the U. S. Forest Service. They asked the Commission to endeavor to keep this highway open throughout its entire length for year-round travel, and, if that is impossible, to at least set definite dates for the opening and closing of the highway in the spring and in the fall.

Chairman Cabell advised that the opening of this road is dependent upon the balancing of the expense involved against the probable use of the road, and that in some years the road could be opened much earlier than in others, so the Commission is not in a position at this time to make any definite statement as to what it could do, if anything at all. Mr. Jaeger urged the early opening of this highway on behalf of hotel people. He advised that the Mt. Hood Loop trip is one of the big features that they carry in their advertising matter, and when tourists come to Oregon they expect to make the trip as advertised and many times are disappointed because the road is not open for travel. If the highway could be kept open the year round, he said, or at least if the Commission would set definite dates for the opening and closing of the highway, it would be a great help and then they could advertise this trip accordingly and tourists who want to make the trip would be able to

arrange their itinerary to fit. Also speaking on behalf of this project were Mr. O'Connor, County Judge Nickelsen, and Jack Meier.

As a result of the appearance of this delegation, the Commission instructed the Engineer to render a report on what it would have cost the state to open this highway to travel throughout its entire length on May 1 of each year for the past 10 years. The delegation was informed that the Commission would render its decision after the report has been studied.

A delegation from Tillamook and Washington Counties conferred with the Commission relative to the Wilson River Highway. The delegation was headed by County Judge Harland M. Woods, of Tillamook County, and included the following: County Commissioner E. G. Anderson, of Tillamook County; County Commissioners James Lewis and J. W. Hughes, of Washington County; Jack Aschim; Warren McMinnee, District Attorney; B. Charlie Lamb, Arthur Beals, M. D. Ackley, R. B. Miller, Senator C. J. Edwards, and W. J. Mandley, all of Tillamook; also Charles West, of Portland. Mr. Aschim presented the principal arguments. He particularly urged the oiling of the section between Jordan Creek and McNamers Camp and the construction of a bridge over the Wilson River near the summit of the Coast Range. Mr. Aschim asked for the early construction of the bridge because, in his estimation, it will take considerably longer to build the bridge than to complete the grading work on the adjacent sections.

Mr. Mandley, Senator Edwards, and County Commissioner Hughes endorsed the remarks of Judge Woods and Mr. Aschim. Judge Woods inquired as to the Commission's plans for this highway. He was informed that in order to advance its completion as much as possible the Commission has decided to construct log bridges over all the streams with the exception of the bridge near the summit, which is to be of a permanent type. These log bridges, he said, will be financed with W.P.A. funds as will also the grading work, surfacing, and tunnel construction, but the Commission plans to contract the high bridge at the summit and the oiling work. They were further informed that the Commission plans to move one of its crushers from the Wolf Creek Highway W.P.A. project to this job so as to expedite the preparation of rock needed for surfacing and oiling work. It was explained that the rock would be financed with W.P.A. funds and stockpiled for use in 1940 under an oiling contract.

Chairman Cabell pointed out the possibility of financing the construction of the bridge at the summit with P.W.A. funds and assured the delegation that this project would be undertaken under such program if the funds materialize, as is now expected. If they do not materialize, he added, then the Commission will have to find some other way to finance the work. This concluded the conference.

County Judge Nelson B. Higgs, of Harney County, Archie McGowan of Burns, and County Commissioner Wm. Baer of Deschutes County, came before the Commission relative to the completion of the oiling of the Central Oregon Highway between Buchanan and Burns, a distance of about 30 miles. They were informed that this work will cost approximately \$300,000, which is more money than the Commission can spare in any one year for such work, so it has been decided to do the work in two units, one of which, extending from Juntura to

MAY 19 1939

the Stinkingwater Bridge and costing about \$145,000, will be included in the next construction program for contracting in the fall.

Mr. McGowan inquired as to the possibility of securing additional oiling work on this road to insure a dustless surface throughout its entire length in 1940. After some discussion the Engineer suggested that it would be advisable to construct a light oil surface on the section that is not to be contracted this fall, which, in his estimation, would satisfy everyone until a standard oil surface could be financed. Judge Higge and Mr. McGowan both approved such arrangement and it was so ordered by the Commission.

Commissioner Baer then inquired as to the plans of the Commission for the improvement of the Butler Market Road, which extends northeasterly from the city of Bend. He was informed that the Commission considers this a priority project and intends to include it in its next construction program for federal aid secondary highway funds which will be arranged later in the year.

Mrs. Pearl Becker, Secretary of the Pomona Grange, Scappoose, Oregon, came before the Commission relative to Natal Park, which is situate adjacent to the Nehalem Secondary Highway about 4 miles west of Mist. She said that this tract contains 10 acres of very fine timber; in fact, this is one of the few stands of fine timber remaining in Columbia County, which should be preserved if some way can be found to finance it. She said that the Clarke-Wilson Lumber Company, which owns the timber, has plans to cut it in the near future, but has consented to defer logging operations pending settlement of the question of whether or not the state wants the area for park purposes and is willing to pay for the timber. The company, she said, is asking payment for the timber only, and, if the state buys it, will deed the land to the state free of cost.

Chairman Cabell explained that the Commission had this matter under discussion on the previous day and understood at that time that the Clarke-Wilson Company demands \$6,000 for the timber, which price the Commission considers exorbitant. He also stated that, in view of the limited amount of funds that the Commission has available for park purposes, the Commission has decided to concentrate on purchases along the heavily traveled highways where the Commission feels the most good would be accomplished. There is a question in the minds of the Commissioners, he added, whether or not the purchase of Natal Park is justified in view of the fact that there are so many desirable places along the heavily traveled highways which more nearly meet the Commission's requirements and which the Commission should purchase if it had the money.

Mrs. Becker urged the Commission to purchase at least a part of the tract if it cannot finance the entire area. The Commission agreed to give the matter further study and referred it to the State Parks Superintendent for additional information. Mrs. Becker agreed to contact the Clarke-Wilson Lumber Company again in an endeavor to secure its consent to the postponement of its logging operations on this tract until the state decides definitely whether or not to acquire it.

A delegation from Multnomah County, representing business interests along Sandy Boulevard through the Parkrose District, came before the Commission and urged the improvement of Sandy Boulevard (Columbia River Highway) from 74th Avenue to 122nd Avenue. The delegation was headed by Mr. James J. Schwary and included W. S. Wessling, R. L. Freeman, Harry Pierce, and W. L. Paterson; also County Commissioner C. A. Bigelow of Multnomah County. Speaking on behalf of this project were Messrs. Paterson, Wessling, Pierce, Freeman, Schwary, and County Commissioner Bigelow. They particularly asked that this project be included in the contract for the construction of the 44th Avenue-74th Avenue Section on which the Commission expects to receive bids at its meeting in June.

Chairman Cabell advised that the 44th Avenue-74th Avenue project is a part of the project that the Commission programmed last year and was not undertaken at that time simply because the Commission did not have funds to finance it. He further advised that it would not be possible to include in this contract additional work between 74th Avenue and 122nd Avenue because there is not sufficient time to make the survey and prepare the data. He added that this job must be considered on its merits and that the Commission will do this when it arranges its next federal aid program, although no commitments or promises can be made relative thereto at the present time. The Engineer was thereupon authorized to make a survey of the section under discussion. Mr. Bigelow presented a letter from the Board of County Commissioners of Multnomah County endorsing this project.

At 3:30 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Roseburg-Shady Point Section of the Pacific Highway, in Douglas County. 2.41 miles grading and paving. Berke Bros., Portland, submitted the low bid for this project at \$191,992.00. The next low bid was submitted by Edlefsen-Weygandt Company of Portland at \$193,387.00. There were 7 higher bidders. The Commission has referred all bids on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Flat Creek-John Day Section of the John Day Highway, in Grant County. 24.56 miles of oiling. The low bid received for this project was that of Babler Bros., Portland, at \$17,415.00. The next low bid was that of R. O. Dail & Warren Bros., Inc., Portland, at \$17,589.00. There were 3 higher bidders. The Commission has awarded this contract to the low bidder, Babler Bros., at their bid of \$17,415.00.

"John Day-Prairie City Section of the John Day Highway, in Grant County. 8.17 miles grading and topping and 4.43 miles oiling. E. L. Rigdon, of Klamath Falls, submitted the low bid of \$79,361.00 on this project. The next low bid was submitted by the Triangle Construction Company of Boise, Idaho, at \$79,441.25. There were 14 higher bidders. The Commission has referred all bids received on this project to the

Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Construction of three bridges and one culvert and extensions to seven culverts on the Dean Creek-Prairie City Section of the John Day Highway, in Grant County. The low bid received for this project was that of Edlefsen-Weygandt Company, of Portland, in the amount of \$22,974.50. The next low bid was that of J. F. Johnston, Newberg, at \$23,959.00. There were 11 higher bidders. The Commission has referred all bids received on this project to the Engineer, with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Bridge over Thomas Creek, on Main Street, in the town of Scio, Linn County. The low bidder for this project was the Contracting & Sales Company, Inc., of Portland, at \$10,568.00. The next low bidder was J. F. Johnston, of Newberg, at \$11,576.00. There were 5 higher bidders. The bids for this project were received for and on behalf of the County Court of Linn County. The Commission, therefore, has referred all of them to Linn County Court for consideration.

"Lamb Creek-Sheep Ridge Section of the Santiam Highway, in Linn County. Construction of a 60-foot log span with 205 lin. ft. of trestle approach. The apparent low bidders, Leonard & Slate of Multnomah, bid \$100 per cu. yd. on Item No. 9, removal of roadbed slides, but their total extension was \$500, which would be at the rate of \$1.00 per cubic yard instead of \$100 per cubic yard; and, while I do not think there is much doubt that they meant their unit price to be \$1.00 per cubic yard, nevertheless, in the specifications there is a clause which reads as follows:

'The total amount of a bid for the purpose of determining the amounts of bidders' deposits and surety bond and of comparing the bids shall be the total sum computed from the State Highway Engineer's approximate estimate of the quantities of work involved, and the unit prices proposed in said bid.'

Therefore, since the unit price is clearly \$100, in order to comply with the specifications, the Commission considers that it has no alternative but to compute the bid on the basis of the unit price, which resulted in Leonard & Slate being the high bidders instead of the low. This leaves J. F. Johnston, of Newberg, the low bidder, with his bid of \$11,522.00. The next low bidder was F. C. Dillard, of Eugene, at \$14,168.00. There were 3 higher bidders. The Commission awards this contract to J. F. Johnston at his low bid of \$11,522.00.

"Strebin Road-Hosner Road Section of the Troutdale-Sandy Road, in Multnomah County. 3.25 miles grading, surfacing, and oiling. The low bid submitted for this project was that of H. L. Rice, of Port-

land, in the amount of \$37,585.00, based on the use of tar. Mr. Rice did not submit a bid using road oil. The next low bid was submitted by Newport Construction Company, of Portland, being in the sum of \$38,828.50, based on the use of tar, and \$39,220.90 using road oil. There were 5 higher bidders. The Commission has referred all bids on this job to the Engineer with power to award the contract to the low bidder, H. L. Rice, when certain conditions have been fulfilled."

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, conferred with the Commission at this time relative to several forest highway matters. He was accompanied by F. E. Andrews, Senior Highway Engineer, T. M. Davis, Highway Engineer, and James Frankland, Regional Engineer, U. S. Forestry Department. Mr. Lynch advised that there is a short section of the Willamette Highway about 1600 feet in length, between the Salt Creek Tunnel and the J.A. Lyons contract which was awarded on the previous day, for which no provision has been made for surfacing and oiling, although the grading work has been accounted for. He recommended an allocation of \$5,000 from the Oregon Forest Highway Contingent Fund to finance such work in order to insure the completion of this short section along with the other work in this vicinity. The State Highway Engineer concurred in such recommendation. The Commission approved the recommendation by unanimous vote.

Mr. Lynch also brought up for discussion the plans for the oiling of the forest highway section of the Weston-Elgin Secondary State Highway between Tollgate and the west forest boundary. He said that \$80,000 has been set up to finance this work and they plan to let a contract for the same this season, although there is a certain amount of grading work that will have to be done first. He said that he thought the Commission should know the facts because there is a possibility that the oiling work will be contracted too late to be completed this year. The Commission took no action on this matter.

Mr. Lynch inquired as to the plans of the Highway Commission for snow removal on the North Santiam Highway this coming winter. He advised that the cost to perform such work during the past winter was between \$15,000 and \$20,000, which, in their estimation, is rather expensive, considering that only 3,000 cars traveled over this road during the 3-month period ending March 31. He requested an expression from the Commission in regard thereto. The State Highway Engineer pointed out that the grading of the Santiam Highway will be completed this fall and will provide a year-round road from Central Oregon into the Willamette Valley. He questioned the advisability of keeping both the Santiam Highways open during the winter months. The Commission deferred a decision in this matter until next fall.

Mr. Lynch also brought up for discussion the matter of reallocating the \$50,000 of Fiscal Year 1940 Forest Highway Funds that were budgeted for the improvement of the north end of the Cascade Lakes Forest Highway. He said that they have made a very careful analysis of this road from different standpoints but do not seem able to justify the expense of such improvement and there is a question whether or not it will be approved by the authorities in Washington. He inquired as to where the Commission wishes to place these funds

in the event that definite approval of this project is not secured. The Commission deferred its decision in this matter until later.

A letter was presented from Mr. Ormond R. Bean, Commissioner of Public Works, Portland, confirming, in writing, the verbal understanding that he previously had with the Engineer with reference to the planning, installation, operation, and maintenance of traffic signals and traffic channelizing islands in the city of Portland along the established routes of state highways into and through this city. The Engineer read aloud the provisions of this tentative agreement, as follows, and recommended approval of the same and that he be given authority to indicate such approval by signing and returning to Mr. Bean a copy of said letter:

1. On or before June 1st of each year, the engineering staffs of the City and of the State will submit to the State Highway Commission and the City Council of Portland, a budget of expenditures for the year beginning on the first of the following December. The expenditures made under this budget for the purchase of the necessary equipment, material and supplies and for the installation of traffic signals and channelizing islands shall be borne 50% by the City of Portland and 50% by the State Highway Commission.
2. Plans in detail for the installation of signals and channelizing islands shall be prepared by the City Traffic Engineer and approved by the City Engineer and the State Highway Engineer, in writing. No subsequent changes shall be made in the master plan unless approved by both parties in writing.
3. When the State or the City lets contracts for widening and repaving streets, either authority shall install the conduits requisite for the signals and install the channelizing islands, and bill the other party for half the cost. The City shall be charged with the responsibility for the purchase and installation of the signals and controllers. They shall also be privileged to install channelizing islands and conduits with their own forces, where no major reconstruction is involved, and shall bill the State for half the cost of the labor, materials and equipment used.
4. It is to be understood that all equipment purchased shall be on the basis of specifications approved by the State Highway Engineer. All equipment with the exception of signal controllers shall be purchased on competitive bids.
5. It is further understood that the City will maintain and operate the facilities installed under this agreement.

MAY 19 1939

6. It is understood and agreed that the ownership of the signals shall be vested half with the City and half with the State, and that neither party will dispose of the signals without mutual agreement.

The Commission approved the arrangement as outlined, by unanimous vote, and authorized the Engineer to endorse Mr. Bean's letter. The Commission also approved an expenditure of \$30,000 of state funds this year in connection with such work.

The Engineer requested authority to purchase a Churn drill for testing materials in connection with soil foundation investigations. He estimated that such drill would cost about \$1,500. The Commission authorized the purchase by unanimous vote.

The Commission considered and accepted the offer of the City of Milton to pay \$10.00 for an old tank stored at the Pendleton maintenance headquarters.

The Engineer reported that the Prairie City-Unity Section of the John Day Highway is now sufficiently dry and stabilized to permit the hauling thereover of legal weight loads and recommended the lifting of the reduced load limit heretofore in effect on this section. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, on the 21st day of March, 1939, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

JOHN DAY HIGHWAY, from Prairie City,
in Grant County, to Unity, in Baker County;

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable, to maintain the said reduced load limit set out in said resolution insofar as it pertains to the above mentioned highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

MAY 19 1939

JOHN DAY HIGHWAY from Prairie City, in Grant County, to Unity, in Baker County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highway is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

Consideration was given by the Commission to the setting of a date for the public hearing in the city of Reedsport relative to the rerouting of the Umpqua Highway in that town. It was decided to hold such public hearing on Wednesday, June 21, 1939, starting at 10:00 o'clock a. m. The Secretary was instructed to send formal notification of such meeting to the Reedsport city officials.

The Commission also tentatively decided to go to Roseburg on Tuesday, June 20, for an inspection of the North Umpqua Highway and to be the guests of the Roseburg Chamber of Commerce that evening.

The Commission had under consideration the application of Senator George H. Chaney, Coquille, for a permit to transport a boat 44 feet long, 15 feet wide, and 17 feet high over the Oregon Coast Highway from 11th Street, in Coquille, to a point near the Southern Pacific Depot in that town. The Commission approved the granting of such permit provided Senator Chaney will furnish the customary insurance and will maintain flagmen for the protection of the general public during the moving operations.

The Engineer reported that on April 28, 1939, he awarded to Leonard & Slate the contract covering the grading, surfacing, and oiling of the Charleston-Sunset Bay Section of Cape Arago Secondary Highway, in Coos County, in accordance with authority previously granted him by the Commission, the bid of Leonard & Slate being the low one received for such project on April 7, and the conditions of the award having been satisfied. The Commission approved the award of this contract by unanimous vote.

The Engineer discussed with the Commission correspondence pertaining to the claim of K. W. Kite in the amount of \$128.95, representing the amount that he alleges is due him from the state by reason of improper classification of the work that he was required to do. The Engineer advised that Mr. Kite's duties were to grease, service, and maintain trucks of the maintenance crew operating in the Seaside district and that he was paid the regular wage for the performance of such work, which is less than the rate of a truck driver; further, that Mr. Kite alleges erroneously that such work is the regular assignment of truck drivers and, in view thereof, that he should receive truck driver's pay. He added that the greasing of trucks is classified as common

MAY 19 1939

labor, for which Mr. Kite was paid, and, in his estimation, the claim should be denied. The Commission concurred in the viewpoint of the Engineer and instructed him to convey such information to Mr. Kite's attorneys, Messrs. Norblad & Norblad, of Astoria.

The Commission had under discussion the question of renewing the contract with Leonard & Slate for the operation of the Willamette River Ferry at Wilsonville, inasmuch as the present contract expires on July 1, 1939. The Engineer advised that the present contract contains an extension clause to the effect that upon the expiration of the original 2-year period the contract may be extended at the option of the State Highway Commission for such period as the Commission may decide, but, in any event, not to exceed one year. He further advised that Leonard & Slate have given good service and recommended that the Commission take advantage of this extension clause and renew the present contract for one year. The Commission approved the recommendation by unanimous vote and so ordered.

The Secretary presented resolutions from the County Court of Deschutes County requesting the rerouting of the Century Drive Secondary Highway along Riverside Boulevard in Bend, which matter was the subject of the Commission's public hearing in Bend on May 17th. After discussion, and it appearing to the Commission that such change in route is logical and meets with the unanimous approval of the people of this city, the Commission approved such change. The following resolutions relative thereto were adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Deschutes County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Century Drive Secondary Highway No. 372; and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Deschutes County Court of the State of Oregon to eliminate and remove from the system of secondary state highways, under the provisions of Chapter 196, Oregon Laws of 1935, the hereinafter described section of the Century Drive Secondary Highway No. 372; and

WHEREAS, it is mutually understood and agreed by the State Highway Commission, the Deschutes County Court and the City of Bend of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission, the hereinafter described section of the Century Drive Secondary Highway No. 372

MAY 19 1939

shall, under the provisions of the laws of Oregon, become a city street, and the construction, repair, maintenance, or improvement, and the jurisdiction thereof, shall be exclusively under the city authorities of Bend.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described section of the Century Drive Secondary Highway No. 372 is hereby eliminated from the secondary state highway system, to wit:

Beginning at the intersection of Broadway and Franklin Avenue and Riverside Boulevard in the City of Bend; thence via Broadway and Tumalo Avenue to the intersection of Tumalo Avenue and Riverside Boulevard, a distance of approximately 0.5 mile.

2. That the said above described section shall be and is hereby declared to be eliminated and removed from the secondary system of highways, and, from and after the adoption of this resolution, shall become a city street, and the construction, repair, maintenance, or improvement, and the jurisdiction thereof, shall be exclusively under the city authorities of the City of Bend, as provided by law.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Deschutes County and to the City Recorder of the City of Bend.

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the County Court of Deschutes County, has selected the route hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said route as a section of highway to constitute, together with other highways which have heretofore been added and which may hereafter from time to time be added, a part of the system of secondary state highways of Deschutes County, under the provisions of said Acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the

State Highway Commission, all members being present and affirmatively voting and participating, as follows:

That the following named section of city street in the City of Bend in Deschutes County be and the said route is hereby selected, designated, established, adopted and approved as a secondary state highway and shall be and is hereby designated as a part of the secondary state highway system, to wit:

A Section of Century Drive Secondary Highway No. 372:

Beginning at the intersection of Broadway, Franklin Avenue, and Riverside Boulevard in the City of Bend; thence in a southwesterly direction along Riverside Boulevard to the intersection of Tumalo Avenue and Riverside Boulevard, a distance of approximately 0.5 mile.

That said route shall be, and is hereby qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and Chapter 196, Oregon Laws 1935, and amendments thereof;

That the Engineer be, and he hereby is authorized to make proper surveys with respect to the physical location upon the ground of the said route and properly file in the records of the Commission all of said data;

That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Deschutes County.

The Engineer reported on investigations that have been made to ascertain what is necessary to improve conditions on the Pacific Highway West at a place known as Six Corners, near Sherwood, where a traffic hazard now exists on account of the number of roads that enter the highway at this place. He advised that many pedestrians cross the highway at this point, and during the year 1938 five accidents occurred at this intersection. The proper solution of this condition, he said, is a re-design of the intersection, which would be quite costly and would involve the expenditure of considerably more money than can be spared at the present time. He recommended, therefore, as a temporary measure, the installation of a six-way flashing beacon over the intersection and that the cost of operating the same be assumed by the state, inasmuch as the beacon is outside of the corporate limits of any city or town. He estimated the cost of the installation at \$200. The Commission approved the recommendation unanimously.

A letter was presented from the City of Newport requesting the installation of flasher-type signals over the Oregon Coast Highway at its junction with the Corvallis-Newport Highway and at the Spruce Street intersection where the Oregon Coast Highway enters Newport from the north. The Engineer advised that investigation reveals that there is insufficient traffic

MAY 19 1939

entering the highway from Spruce Street to warrant the installation of a flashing beacon at such location and he recommended that the request for the light at this point be denied. However, he recommended approval of the request for a light at the Corvallis-Newport Highway intersection inasmuch as a large volume of traffic enters the Coast Highway at this point and a real hazard exists. The Commission approved the recommendation unanimously, subject to the condition that the City of Newport will pay the costs of operation.

A letter was presented from County Judge W. R. Cook, of Jefferson County, in regard to additional construction work on the Warm Springs Highway north of Warm Springs Agency. The Engineer advised that the Commission has \$25,000 of Federal Lands Funds budgeted for grading work on this road this year in the vicinity of He He Butte, but the County Court and the people of this district are particularly anxious for the construction of a new bridge over the Warm Springs River in connection therewith. He estimated that such bridge would cost about \$30,000 and recommended an additional allocation of state funds in such amount to finance it. The Commission approved the recommendation by unanimous vote.

The Secretary presented requests as follows for highway construction projects:

Request of J. D. Perry for oiling portions of Columbia River Highway at Deer Island.

Request for oiling John Day Highway between Service Creek Station and Shelton Park.

Petition from residents of Sisters, Oregon, for oiling of Main Street in that town full width through the business district.

Request of Cecil Armitage for grading of the Scholls-Campbells Bridge Section of Secondary Highway No. 219 on proposed new alignment.

Request of Baker County Chamber of Commerce for completion of oiling on Baker-Halfway Highway and improvements to Baker-Medical Springs Highway and Baker-Unity Highway.

Letter from Astoria Chamber of Commerce renewing request for construction of Elsie-Fish Hawk Falls cutoff.

Letter from Mrs. Ella Westenhouse, Scio, requesting the oiling of the reconstructed section of the secondary highway east of Scio.

Request of H. A. Utley, Lakeview, to Governor Sprague, urging additional oiling work on the Klamath Falls-Lakeview Highway.

Request of Pendleton Park Commission for landscaping of 1½-acre tract at junction of Old Oregon Trail with Oregon-Washington Highway, East Pendleton.

MAY 19 1939

Petition from property owners south of Monroe for the oiling of the Territorial Secondary Highway from Monroe to the Lane-Douglas County Line.

Request from Board of County Commissioners of Multnomah County for improvement of county road at intersection of N. E. 45th Avenue and Holman Street, Portland.

The Commission deferred action on these requests but instructed the Engineer to render a report on them at the next meeting.

The Attorney brought up for discussion matters pertaining to the Water Street project in Oregon City. He advised that the Supreme Court has rendered an adverse opinion with respect to the ownership of the street ends that are involved in this project, and requested instructions as to whether he should ask for a re-hearing of the matter or should institute condemnation proceedings to acquire such street ends on the basis of the Commission's original offer of \$20,000, which involves also the claim of the Surety and Investment Company with respect to moorage rights in the Willamette River at this location. After discussion the Commission instructed the Attorney to proceed with condemnation immediately and to delete entirely from the proceedings any reference whatsoever to the moorage rights.

The Attorney also brought up for discussion the request of the U.S. War Department for a permit authorizing the movement over state highways of oversize trucks designed particularly for the salvaging of wrecked airplanes. He read aloud a draft of a resolution with respect to the granting of such permit to the War Department under certain conditions. The Commission tentatively approved such resolution, deferring final action on the same until a future meeting.

The Attorney also presented a draft of a resolution prepared to outline the responsibility of the State Highway Engineer and the Attorney with respect to future right of way purchases, in view of the new Highway Code adopted by the 1939 Legislature, which goes into effect on June 15, 1939. Action on this matter was deferred by the Commission until a future meeting.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with E. H. Itschner disposing of his claim for extra compensation arising out of construction of Baker-Flagstaff Hill Section of the Baker-Homestead Highway.

Agreement with Multnomah County providing for county maintenance of the Troutdale-Sandy County Road upon construction of same by the state as a federal aid secondary highway project.

Agreement with the U. S. Soil Conservation Service relative to the conducting of demonstrations of methods of erosion control along highways.

MAY 19 1939

Agreement with Oregon Trunk Railway Company pertaining to the proposed Third Street Undercrossing in Bend.

Agreements with N. P. Grant and Robert Fromm providing for the pasturing of sheep in Humbug Mountain State Park, Curry County.

Agreement with Consolidated Timber Company providing for undercrossings of their railroad on the Wilson River Highway, in Washington County.

Flowage easement granting to the United States of America certain rights to state-owned property adjacent to the Upper Columbia River Highway at Warren Creek.

Bargain and Sale Deed conveying unto the State Forestry Department 1.8 acres of land adjacent to Salmon River Highway, Tillamook County.

Bargain and Sale Deed conveying unto Florence N. Van Lydegraf and Faith Van Lydegraf Lots 2,3,4,5, & 6 of West Bunker Hill Addition to Marshfield, Coos County. Right of Way Transaction No. 5101.

Quitclaim Deed conveying unto Thomas Purdy property situate in Govt. Lot 2 of Section 22, T. 15 S., R. 12 W., W.M., adjacent to the Oregon Coast Highway, in Lane County. R/W Transaction No. 6574.

Bargain and Sale Deed conveying unto Henry Rees and Max Schlag and wife property situate in Lots 8,9,10,& 11, Block 7, Bunker Hill Addition to Marshfield, Coos County. R/W Transaction No. 4775.

Bargain and Sale Deed conveying unto R. A. Schofield and R. W. Knoefel property situate in Lots 6 & 7 of Block 4, Oregon City, being R/W transaction No. 3053.

Joint letter with W. H. Lynch, District Engineer, Bureau of Public Roads, providing for the contracting of all remaining work on the I.O.N. Highway in the fall of 1939.

The Commission considered dates for its next regular meetings and decided to hold such meetings in Portland on Tuesday, June 6, and on Thursday, June 22, 1939. The Engineer was instructed to advertise projects for bids to be received on those days. The Secretary was instructed to make the usual arrangements to hold the meetings in the Auditorium of the Public Service Building.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

MAY 19 1939

Portland, Oregon, June 5, 1939

The State Highway Commission met in regular session at 8:00 o'clock p. m. in the Rose Room of the Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Haron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Attorney brought up for discussion matters pertaining to the controversy with the Security & Investment Company of Oregon City relative to the acquisition of certain street ends in Oregon City that are needed as right of way for the Pacific Highway East in this town. He advised that he renewed his offer to pay \$20,000 for this property but it was refused, although the company stated a willingness to accept the sum of \$40,000 for the same. The Commission considered such amount far in excess of the real value of the property and thereupon refused the offer and ordered that the property be acquired by condemnation, as previously authorized.

The Attorney reported receipt of a letter from Orris Knapp, Port Orford, in regard to the relocation of the Oregon Coast Highway at this place. It appears that Mr. Knapp has plans to subdivide some of his property and wants the plat to conform to the proposed highway revision, which will require some of his land for right of way, and that he is willing to sell the right of way at this time at \$40 per acre if the state wants it; otherwise, will proceed with the subdividing of the property without any regard whatsoever to the proposed highway improvement. The Commission authorized the Attorney to negotiate for the acquisition of right of way across that part of Mr. Knapp's property that is affected by the proposed subdivision, the thought being that the Commission would purchase such portion now, in the event it is not too costly.

The Engineer requested authority to acquire certain parcels of real property that are needed for various improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful study, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property acquired, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

JUN 5 1939

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Jewell-Banser Bridge Section - Nehalem Highway</u>				
6874-Larson, F. A.	Stock Pile	1.05	\$150 per a.	McChesney

The Commission also discussed matters pertaining to the acquisition of right of way needed for the proposed revision of the Pacific Highway West

JUN 5 1939

through the town of Tigard. It was decided to defer approval of the prices contained in the options pending personal inspection of the properties by Chairman Cabell.

The Attorney also brought up for reconsideration the proposed settlement for right of way needed for the Wolf Creek Highway across property owned by H. E. McGraw, in Washington County. He advised that the Commission previously authorized offering Mr. McGraw \$3,500 for his property and, if he refused, acquiring the property by condemnation. He gave as his thought that, after having carried on further negotiations, Mr. McGraw would settle with the state for \$4,000, which is \$2,000 less than his original demand and is only \$400 more than the appraised value of the property. He requested authority to make such offer. The Commission approved the request.

The Attorney also reported the results of an investigation with respect to the renting of state-owned residence buildings in Pendleton. He advised that the G. F. Hodges Agency has offered to handle this business at the customary rate, which is \$1.00 per month plus 5 per cent of the monthly rentals, which would amount to \$3.62 per month for each house, based on the rent that the Commission is now charging. The Commission deferred a decision on whether to continue to rent the houses or to sell them until it has had an opportunity to inspect them, which it is thought will be some time this summer.

The Attorney requested instructions whether an allowance should be made to Mr. L. M. Erickson to cover taxes in the amount of \$25 that have accrued during the past two years against some of Mr. Erickson's property that the state needs for right of way for the West Portland-Hubbard Secondary Highway. He said that some two years ago an option was secured from Mr. Erickson who agreed to accept \$800 for this property. However, before the deal was consummated, the Commission ordered the negotiations discontinued, which places Mr. Erickson in an undesirable position with respect to the use of his property. In the meantime, taxes in the amount of \$25 have accumulated. Mr. Erickson feels, he said, that he should be reimbursed for this expense in view of the fact that he was not responsible for the deal not having been closed, although, if the Commission decides against him, he will accept the amount originally agreed upon. The Attorney recommended payment of \$25. The Commission approved the same with the understanding that it be considered as increased value of the property and not as payment of taxes.

The Attorney reported receipt of an offer of \$15 to purchase a state-owned building adjacent to the Corvallis-Newport Highway just east of Toledo. He recalled that the Commission previously ordered this building advertised for sale in the local newspaper and a "For Sale" sign posted on the property so that all interested might submit a bid for the same. Such procedure, he said, has been followed for the past six weeks but only the one offer has been received, being that of Roy E. Benson for \$15. He recommended acceptance of the same. The Commission approved the recommendation unanimously.

The Attorney requested instructions relative to the acquisition of right of way across the property of Mr. P. B. Patterson, which property is needed for a revision of the Pacific Highway just south of Grants Pass, in

Josephine County. He explained that Mr. Patterson has advised that he contemplates subdividing his property and that, in his estimation, it would be better for the Commission to deal with only one owner. In view of the circumstances, the Commission authorized the Attorney to negotiate for an option for this property.

The Attorney requested instructions relative to the settlement with the Free Methodist Church of Albany for right of way that is needed for the revision of the Pacific Highway East in Albany. This matter was discussed at some length, during which the Attorney recalled the alternate propositions for the solution of this problem as presented to the Commission at a previous meeting when the Reverend R. J. Milton was present. The Commission instructed the Attorney to negotiate further with the church officials in an endeavor to settle the matter on the basis of his alternative, which involves an expenditure of \$1,341 for the moving of the church and parsonage to a new location nearby.

The Commission discussed the controversy with Mr. Henry Eggers, Corvallis, relative to the construction of a private roadway approach to the Pacific Highway West, south of Corvallis. It appears that Mr. Eggers' private roadway enters the highway at a point where it is necessary to maintain either a culvert or small bridge across the highway ditch, and in replacing an old timber structure at such crossing Mr. Eggers simply rebuilt it of similar material, which is contrary to the Commission's requirements that such facilities be constructed of permanent materials such as steel or concrete. It also appears that Mr. Eggers has refused to comply with such requirements, which contemplate the installation of an 18-inch culvert pipe either of concrete or of metal, and insists on building a timber drainage facility, which is less costly. The Engineer advised that the Commission, a long time ago, ordered that all such drainage facilities should be of permanent construction and that such order has been followed throughout the state whenever new facilities have been installed, although there are some places where no replacements have as yet been made, which is probably true in the instant case. He gave as his thought that the Commission should not deviate from this policy and should require Mr. Eggers to install a permanent type of drainage facility, and he so recommended. The Commission concurred in the Engineer's viewpoint and thereupon instructed the Attorney to contact Mr. Eggers and explain to him the Commission's requirements, in an endeavor to secure his compliance therewith, which would obviate the necessity for the Commission to change its policy with respect to such matters. The Attorney was instructed to report the results of his conference at the next meeting.

In this connection the Engineer mentioned that logging operators frequently construct logging road approaches to state highways at places where the sight distance is short, thus creating a serious hazard to highway traffic. Furthermore, trucks operating over such logging roads carry onto the highway from the woods considerable mud and muck, which causes a slippery condition that is dangerous to travel. He gave as his thought that such approach roads should not be constructed until the State Highway Department has approved the location of the same, and that the operators of the trucks should be required to clean the wheels of their equipment before entering the highway, which would

JUN 5 1939

eliminate to a large extent the cause of the slippery condition. After discussion the Commission instructed the Secretary to ask the Public Utilities Commissioner to hereafter include in log-hauling permits issued from his office provision for inspection of all proposed logging-road approaches before they are actually constructed, and for the cleaning of the wheels of logging trucks before they enter upon state highway rights of way.

The Engineer brought up for discussion matters pertaining to the Wolf Creek Highway W.P.A. project. He advised that, according to information received from the W.P.A. officials, it will be necessary to close down this work because of lack of W.P.A. funds with which to finance the non-labor items unless the state will advance state funds for such purpose; in fact, the operation of some of the equipment has already been discontinued because there are no W.P.A. funds available with which to purchase gasoline to operate them. The Engineer estimated that it would take about \$12,000 of state highway funds to finance certain rock production operations that must be completed by July 1, 1939, if this highway is to be opened for general public use at that time. The Commission decided tentatively, after considerable discussion, to advance state funds to carry on this work until July 1, but deferred a definite decision in regard thereto pending consultation with W.P.A. officials on the following day. (See additional entry in the following day's record.)

The State Parks Superintendent, Mr. S. H. Boardman, and Division Engineer F. D. Eason were present and reported on investigations made by them of desirable recreational sites along the Wolf Creek Highway between Sunset Camp and Elsie. They stated that they selected nine sites which, in their estimation, should be acquired by the state, and that surveys of all of these sites have been made. They exhibited a map showing the location of such sites with reference to the highway. After discussion, the Commission approved such sites and instructed the Attorney to proceed immediately with the securing of options for them. He is to report his findings to the Commission on June 22, 1939.

Consideration was given by the Commission to the selection of projects for the fiscal year 1940 funds. The Engineer presented a list of projects that are eligible for such funds and advised that such list is based upon the Commission's securing additional P.W.A. funds to finance other important highway projects. He said that if the P.W.A. funds do not materialize, then it would be necessary to revise this list. After considerable discussion and careful study, the Commission selected the following projects for such program, it being strictly understood that the selection is tentative only; however, the Commission by unanimous vote authorized the Engineer to work up plans for all of them:

BASIC ALLOCATION - FEDERAL AND STATE FUNDS AS INDICATED

Program	Total (100%)	Divisions			
		* (47.0%)	Division 3 (18.0%)	Division 4 (14.5%)	Division 5 (20.5%)

The Commission adjourned at midnight, to reconvene on the following morning in the Public Service Building.

Portland, Oregon, June 6, 1939

The State Highway Commission met in regular session at 9:00 o'clock A. M. in the Auditorium of the Public Service Building, Portland, Oregon.
Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the purchase of buildings were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts and the sale of buildings would be made at 2:00 o'clock p. m. in the same room:

The Commission had under consideration the needs and requirements of the revolving fund provided for under Chapter 529, Oregon Laws, 1939, and was of the opinion that the said revolving fund should consist of the full sum of \$200,000, as provided in said act, and should be maintained for the purposes of and pursuant to the conditions and requirements of said act. Thereupon, Commissioner Aldrich offered the following resolution and moved its adoption:

WHEREAS, heretofore, under the provisions of Section 44-146, Oregon Code 1930, the Secretary of State, upon the order of the Highway Commission, drew a warrant on the state highway fund in favor of the State Highway Engineer in the sum of \$75,000, which said sum was designated as an emergency or revolving fund to be maintained for the use of the State Highway Engineer for the purposes provided in said section; and

WHEREAS, thereafter the said Section 44-146, Oregon Code 1930, was amended by Chapter 87, Oregon Laws, 1937, and pursuant to and under the authority of the said amendment the Secretary of State drew a warrant upon the state highway fund in favor of the State Highway Engineer in the additional sum of \$75,000, which said additional sum was deposited in the said revolving or emergency fund for the purposes authorized and provided by the said Section 44-146, Oregon Code 1930, and the amendment thereof by the said Chapter 87, Oregon Laws, 1937; and

WHEREAS, Chapter 529, Oregon Laws, 1939, repeals the said Section 44-146, Oregon Code 1930, as amended by Chapter 87, Oregon Laws, 1937, and authorizes the issuance of a warrant by the Secretary of State on any fund belonging to the state highway fund in favor of the State Highway Engineer in the sum of \$200,000, which said sum shall be used by the said Engineer as an emergency or revolving fund for the uses and purposes stated in said act; and

WHEREAS, in the opinion of this Commission the best interests of the State will be promoted by making available to the State Highway Engineer as a revolving or emergency fund under the said act the sum of \$200,000;

JUN 6 1939

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the Secretary of State be and he hereby is respectfully requested to draw a warrant on any fund belonging to the state highway fund in the sum of \$200,000, which said warrant is to be drawn in favor of the Highway Engineer and to be by him deposited or kept in a fund to be known as a revolving or emergency fund and to be used by the State Highway Commission and the State Highway Engineer for the purposes approved and authorized by Chapter 529, Oregon Laws, 1939.

2. That this resolution shall not be effective and the said warrant for \$200,000 shall not be issued until Chapter 529, Oregon Laws, 1939, goes into full force and effect.

3. That coincident with the issuance of the said warrant for \$200,000 and the deposit of the same by the State Highway Engineer for the uses and purposes designated by Chapter 529, Oregon Laws, 1939, the State Highway Engineer shall issue a check or checks drawn upon the said revolving fund authorized by Section 44-146, Oregon Code 1930, as amended by Chapter 87, Oregon Laws, 1937, in the sum of \$150,000 payable to the State Treasurer of the State of Oregon, which said sum shall be credited to the general state highway fund of the State of Oregon and which said credit shall operate as a cancellation of the transfers aggregating \$150,000 previously made from the state highway fund to the said revolving or emergency fund under the terms of the said Section 44-146, Oregon Code 1930, as amended by Chapter 87, Oregon Laws, 1937, and that thereafter the said account shall be considered closed; provided, however, that all outstanding checks which have been drawn against said fund shall, when presented for payment, be paid out of and charged against the said sum of \$200,000 herein provided for; and provided further that all claims or vouchers audited and presented for reimbursement shall be credited to the said \$200,000 fund.

4. That this resolution be attested by the Secretary of the Highway Commission and thereafter entered in the minutes and records of the Commission and that a duly certified copy thereof be delivered by the Secretary of this Commission to the Honorable Secretary of State.

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is directed to disburse the said revolving or emergency fund of \$200,000 pursuant to and within the provisions of the said Chapter 529, Oregon Laws, 1939.

The motion for the adoption of the foregoing resolution was seconded by Commissioner Huron W. Clough and submitted to the Commission by the Chairman for vote, and received the unanimous vote of all three Commissioners. Whereupon, the Chairman declared the motion carried and the resolution adopted.

JUN 6 1939

In this connection the Secretary pointed out that according to the new law the State Highway Engineer is required to furnish a bond in the amount of \$200,000 covering such revolving fund. He inquired as to the wishes of the Commission with respect to the placing of this business. After discussion the Commission decided unanimously to give the business to the companies that wrote Mr. Baldock's previous bonds, provided they are representative of the companies that have expressed a desire for this business.

The Attorney reported receipt of a communication filed by the County Judge and the District Attorney of Baker County relative to the case of the Sumpter Valley Railroad Company versus Baker County, et al, being the railroad company's claim for damages arising out of the wrecking of one of its trains, and expense incurred in clearing the railroad property of debris which it was alleged came from the highway onto the railroad tracks.

It appears that the courts held that the county was liable because, when it procured the right of way for the highway, it obligated itself to keep the railroad company free from any damage or cost, or from anything that might result by reason of the construction of the highway, and that it is the contention of the county court that the state should assume at least a portion of the expense because the highway was under the jurisdiction of the state at the time that the wreck occurred. According to the statement, the jury returned a verdict in the sum of \$2,440, of which amount the county court thinks the state should pay \$1,982.75.

The Attorney advised that there is considerable merit in the county's position and that the Commission has legal authority to pay the claim if it so desires. The Engineer gave as his thought that the state is morally obligated to pay at least a portion of the expense because the highway was under the jurisdiction of the state when the wreck occurred. After discussion, the Commission authorized the Attorney to discuss the matter with the County Court and endeavor to settle the matter on a 50-50 basis.

The Commission had under discussion a letter from the Oregon State Game Commission advising that, owing to unsatisfactory water conditions at its Union Trout Hatchery, which is located about one mile from the town of Union, in Union County, it seems proper to discontinue the operation of this hatchery, and inquiring whether or not the State Highway Commission has any use for this property. The Engineer advised that inspection of the buildings reveals that some of them could be used to good advantage for maintenance headquarters although there are more buildings than the highway department would need for such purpose. He doubted that the property could be secured from the State Game Commission at a cost that would justify its purchase. However, he recommended purchase of the property if it can be obtained at reasonable cost. The Commission referred this matter to the Attorney with instructions to ascertain how much the State Game Commission wants for this property.

The Engineer reported the need to construct a maintenance headquarters at Seneca, in southern Grant County. He advised that it is extremely difficult to secure living accommodations at Seneca and that the timber company from whom the section foreman is now renting a house has given notice to vacate

JUN 6 1939

because the company needs the building for the accommodation of its own employees. Furthermore, during the winter season it is extremely difficult to find accommodations for the additional highway workers who are employed on snow removal operations. He recommended, in view thereof, that the state acquire its own maintenance site, which he estimated would cost not to exceed \$400, and construct its own buildings similar to the ones recently constructed along the Central Oregon Highway between Bend and Burns. The Commission authorized and instructed the Attorney to conduct negotiations for the acquisition of a maintenance site at this place.

The Engineer also requested authority to purchase a section headquarters site adjacent to the Crater Lake Highway at Prospect, in Jackson County. He estimated that a suitable site at such location would cost about \$517. The Commission instructed the Attorney to negotiate for the same.

A delegation from Oregon City, consisting of Mayor L. O. Harding; J. L. Fransen, City Manager; Alden E. Miller, City Attorney; Arthur Beatty, and John Busch, came before the Commission in regard to the 11th Street approach to the Pacific Highway East in this town. They asked the Commission to revise its plans for this approach by cutting back the curb and by widening the fill on the north side of 11th street so as to make it easier for south-bound traffic to enter 11th Street from the highway. They declared that the plan proposed by the Commission for such intersection is unsatisfactory inasmuch as it does not provide sufficient room for traffic entering 11th Street and very likely accidents will occur by reason thereof. They also declared that the property of Mr. Busch, which is located on the north side of 11th Street at Main Street, has been damaged by change in the grade of 11th Street, but advised that Mr. Busch will waive his claim for damages if the Commission will fill in the state property between the highway and his property line so as to permit the use of his property from the highway. They estimated the cost of such improvement at \$1,500.

Chairman Cabell questioned the necessity for this change because, in his estimation, only very little traffic would use this street, there being other physical connections with the highway at 10th Street and at 13th Street and there being no connection along 11th Street from Main Street to the top of the hill in Oregon City. Furthermore, Main Street traffic would still have the present connection with the highway near the Abernethy Creek Bridge. The Engineer advised that the grade for the 11th Street approach has already been constructed as has also the concrete curb. He gave as his thought that the plan as originally proposed and constructed is preferable to the proposed change, particularly in view of the fact that it would be much easier for logging trucks to enter the highway on the diagonal enroute to the paper mills; furthermore, the widening of the highway as proposed would introduce a hazard to pedestrians and would necessitate the construction of safety islands for pedestrian use and the channelizing of traffic. The Commission appeared reluctant to make any change in the original plans for this improvement; however, deferred definite action thereon pending a report from the Engineer as to what it would cost to make the change requested.

This matter was reconsidered by the Commission later in the session,

at which time the Commission voted unanimously to adhere to the original plan notwithstanding that there is a possibility that Mr. Busch will institute a claim for damages. The Engineer was instructed to study the traffic conditions upon completion of the highway, to ascertain whether or not the change as proposed is justified.

County Judge J. B. Wilkerson, Columbia County, came before the Commission and inquired whether or not the Commission intends to spend any federal moneys for county road construction in Columbia County this year. He was informed by Chairman Cabell that the 1940 federal aid moneys are the first moneys available for programming, and because the Federal Government provided a lesser amount of such moneys this year, it does not appear possible to allocate any of them for county roads in Columbia County, although a small sum has been tentatively budgeted for the oiling of the Mist-Clatskanie Secondary Highway, which the Commission considers is the most important project in Columbia County.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Natal Grange Park, near Mist, in Columbia County:- The Parks Superintendent advised that this tract contains the only stand of old timber in Columbia County and would make a fine addition to the state parks system if it can be purchased from the owner, the Clarke-Wilson Lumber Company, at reasonable cost. After discussion the Commission authorized the purchase of the tract if it can be secured for not to exceed \$3,000. Arrangements were thereupon made for Chairman Cabell and the Parks Superintendent to inspect the property within the next few days.

Custody of C.C.C. Camp located in Jessie H. Honeyman State Park:- The Parks Superintendent advised that this camp has been turned over to him for supervision but there is a question whether or not the state should assume such responsibility, in view of the fact that the Government has such a large amount invested there, consisting of buildings and equipment valued in excess of \$22,000. He advised that he would like to have charge of this camp if the state were not obligated in the event of loss of any of the buildings or equipment by fire or otherwise. The Commission approved taking over this camp in the event that it would involve no legal entanglements and authorized the signing of the necessary papers unless the Commission's Attorney advises legal objections thereto.

Removal of building from Emigrant State Park:- The Parks Superintendent advised that Mr. Oscar E. Hoover, Boy Scout Master of Walla Walla, Washington, has requested permission to remove from Emigrant State Park an old C.C.C. building that was given to the Boy Scouts by the Federal Government. He recommended approval of the request in view of the fact that the building is an old structure of not much value and would better the appearance of the park if removed. The Commission approved the recommendation by unanimous vote subject to the condition that the building be razed rather than moved intact over the state highway.

JUN 6 1939

C.C.C. Camp at Short Sand Beach State Park:- The Parks Superintendent advised the necessity to obtain a site for the Nehalem C.C.C. Camp that is to be established at this park. He said that an 11-acre tract that meets the requirements has been found, for which the owner wants \$10 per month rental, but if the state later decides to purchase it outright he will sell for \$1200 and will credit the amount paid by the state for rentals against such purchase price. The Commission approved the rental of this property on such basis.

Addition to Umpqua Lighthouse State Park, in Douglas County:- The Parks Superintendent reported that President Franklin D. Roosevelt has signed the bill conveying unto the state for park purposes a portion of the Umpqua Lighthouse Reservation, consisting of 110 acres. He also reported a gift from Douglas County of 300 acres of land adjoining this park, which the Commission accepted with thanks.

In this connection the Parks Superintendent requested authority to negotiate for the acquisition of additional land at this location. He particularly mentioned government land with a 2-mile frontage on the ocean, which property, he said, would make an excellent addition to this state park. He was authorized by the Commission to secure this property if possible.

Acquisition of strip of land about 150 feet wide overlooking the Pacific Ocean at Depoe Bay:- The Parks Superintendent advised that in connection with the platting of a subdivision known as "Breakers Addition" to Depoe Bay, which is located just south of the highway bridge at this point, provision was made for a park area about 150 feet wide between the platted lots and the ocean, such strip having been dedicated to general public use and being under the control of Lincoln County. He further advised that the citizens of Depoe Bay have requested that the state take over this area, which extends about 2,000 feet south from the bay entrance, in order to make certain that the area will be preserved for all time for general public use and enjoyment. He recommended acquisition of the area for state park purposes if possible. The Commission approved the recommendation subject to the condition that the county will convey it to the state without cost.

Acquisition of area including what is known as Tub Springs on the Green Springs Highway, in Jackson County:- The Parks Superintendent advised that investigation reveals that the property embracing Tub Springs is in private ownership and that the owner, Mr. A. L. Coggins, plans to remove the timber therefrom in the near future; also, that Mr. Coggins has indicated a willingness to sell all or any part of this 40-acre tract for the sum of \$800. The Commission considered it advisable to acquire this property in order to preserve the spring for general public use, and thereupon authorized the Parks Superintendent to inspect the property and to purchase the same if he considers that advisable.

Purchase of 40-acre tract at junction of state highways just east of the town of Sisters, in Deschutes County:- The Parks Superintendent advised that this tract is owned by the Louis W. Hill interests and that a recent cruise of the timber by the owners indicates that the tract contains 383,000

board feet, whereas the first cruise showed 444,000 board feet. The United States Forest Service, he said, has also made a cruise of the timber which shows 374,000 board feet of timber, whereas a cruise made by the state's cruiser, Mr. Whitten, indicated that the tract contains only 143,000 board feet of timber. On account of the variation in the results of the several cruises, the Commission decided not to take any definite action on this matter at the present time but to have another cruise made. The Attorney was thereupon authorized and instructed to secure the services of another cruiser to do this work.

Agreement with Mr. Edward L. Dimmitt for concession at Crown Point Vista House, Columbia River Highway:- The Parks Superintendent submitted a form of agreement covering this matter, which the Commission discussed and referred back to him for certain corrections.

Request of Mr. H. R. Blackwell to lease state property at Waldport:- The Parks Superintendent advised that Mr. Blackwell conducts a tourist camp south of Waldport and wants to buy or lease a part of the old Spruce Production Railway right of way which the state now owns, because he alleges that he cannot properly conduct his business without securing some of the state land. He gave as his thought that the main reason that Mr. Blackwell wants to secure possession of this additional land is simply to enlarge his present holdings, his cabins now being constructed right up to the property line. The Commission decided as a matter of policy not to dispose of this land to Mr. Blackwell.

Controversy with L. J. Rickard relative to maintenance of a roadway across state-owned property from the Oregon Coast Highway to the beach at Waldport:- It appears that Mr. Rickard started construction of the roadway from the highway to the beach and was stopped by highway department employees because of its encroachment upon state-owned park property near the end of the sea wall at Waldport. Also that Mr. Rickard alleges that the roadway is necessary in order to accommodate the many people of Oregon who must have access to the beach in order to launch their boats in Alsea Bay, this being the only feasible approach for such roadway. The Engineer gave as his thought that, if a road to the beach is necessary, it should be constructed by the state and should be maintained by the state for general public use. The State Parks Superintendent advised that he is satisfied that the roadway that Mr. Rickard has commenced to construct is properly located, notwithstanding the fact that it passes Mr. Rickard's filling station. After discussion the Commission ordered further investigation to determine definitely whether or not the location of the road is proper from the general public standpoint, and, if it is found that the road is properly located, then it is to be constructed as a state project and not as a private venture and appropriate signs are to be installed warning tourists of the possibility of their cars becoming mired in quicksand, and that the road is a public thoroughfare. The Attorney was instructed to convey such information to Mr. Rickard and to make it clear to him that the Commission considers that such road is strictly a state road.

Disposition of Cunningham strawberry lease at Silver Creek Falls:- The Parks Superintendent advised that the Volz property, which the state

acquired as an addition to Silver Creek Falls State Park, has been under lease for some time past to a Mr. J. H. Cunningham who has it planted to strawberries which he values highly, and it appears that in order to secure a release of Mr. Cunningham's right to such property the state will have to pay him the sum of \$500 and give him possession of a small building located on the property. He recommended settlement with Mr. Cunningham on such basis. The Commission approved the recommendation unanimously.

In this connection the Parks Superintendent advised that he is ready to construct an entrance to the park over the property acquired from Mr. Vols but has encountered difficulties in view of the unsettled status of the transfer of ownership. The Attorney advised that this property is under condemnation and the state has a perfect right to enter the property at any time that it wishes, whereupon the Commission instructed the Parks Superintendent to proceed with the construction of said approach road at his convenience.

The Commission reconsidered and denied the request of Mr. Geo. L. Govro, Yachats, to remove gravel from that portion of Cummings Creek which is located within the boundaries of a state park south of Yachats.

The Commission had under discussion a request of Contractor S. S. Montague to be relieved from the requirements of the Commission with respect to the acceptance of the provisions of the Oregon Workmen's Compensation Act in connection with the contract recently awarded him for the construction of the Read Creek-Wren Section of the Kings Valley Secondary Highway, in Benton County, Contract No. 2184. Mr. Montague states that his work is not confined to strictly highway construction but he has much other work in connection with which he carries protection with private companies, which not only costs him much less than the state insurance but has other advantages. He alleges that confusion will develop if he is required to carry insurance both with the state and with the private concerns and that he will suffer severe loss if required to give up his private insurance contracts, so is asking the Commission to waive its requirement in this respect. The Commission decided not to change this feature in Mr. Montague's present contract but instructed the Attorney to inform Mr. Montague that, if he or any other contractor has complaint in this regard, the Commission will be glad to grant a hearing relative thereto.

The Commission had under discussion the claim of A. T. Crawford, Oakland, Oregon, in the amount of \$1,100, for damages that he alleges occurred to his property by reason of the sliding of embankment materials thereon from an adjacent highway fill. The Engineer advised that the highway was constructed on a fill in front of Mr. Crawford's land and that rock was placed on the fill slopes to confine the fill to the highway right of way. However, the rock happened to be of an inferior grade and in the course of time decomposed, allowing some of the fill material to slide onto Mr. Crawford's property. He further advised that the only way to remedy this situation is to acquire about 15 feet additional width right of way from Mr. Crawford so as to make it possible to reconstruct the fill on a slope that will not slide. Such strip, he said, is worth only about \$75. He recommended acquisition of such right of way and that the Attorney be authorized to condemn the same if Mr. Crawford will not settle on a reasonable basis. In view of the circumstances and the

facts of the case, the Commission denied Mr. Crawford's claim for damages. However, the Commission authorized payment to Mr. Crawford of a reasonable sum for the additional right of way, provided Mr. Crawford will accept the same as satisfaction of his claim in full and will relieve the state from further liability. The Attorney was authorized and instructed to negotiate such settlement with Mr. Crawford and to secure a release from him. He was also authorized to condemn for the right of way if necessary.

The Attorney reported that, as instructed by the Commission at a previous meeting, he advertised in the Albany paper the sale of the A. F. Norby building, bids to be received on May 10, and as a result of such advertisement only one offer was submitted, being that of Mr. Herman Staley, at \$16. He recommended acceptance of this offer inasmuch as the building is an old structure unsuitable for moving and is not worth any more even from a wreckage or salvage standpoint. The Commission approved the recommendation unanimously.

The Engineer advised that a large sawmill is being constructed adjacent to The Dalles-California Highway north of the town of Crescent, in Klamath County, and as a result this town is experiencing considerable development and growth. He pointed out that the present right of way through this town is only 60 feet wide and suggested that it would be advisable to acquire a uniform 100-foot right of way, which he estimated could be done at this time at not to exceed \$3,000. It was his thought that a considerable saving could be made by acquiring the right of way now rather than later, and recommended that authority be granted to the Attorney to proceed with the taking of options for the same. The Commission approved the recommendation unanimously.

A letter was presented from the Willamina Commercial Club, in which the Commission was requested to take appropriate action to preserve an old oak anchorage post that was used nearly one hundred years ago to tie the ferry that used to operate across the Yamhill River just west of the town of Willamina. They advised that this old post is in good condition and is of great historical interest in that vicinity and that, in their estimation, it is worthy of preservation. The Commission instructed the Secretary to secure a recommendation from Mr. Lewis A. McArthur, President of the Oregon Historical Society, relative thereto.

The Commission discussed an inquiry from J. E. Murphy, Junction City, as to whether or not the state would be willing to sell an old gravel pit that it acquired from James Calvert about two miles south of Junction City. The Engineer advised that this pit is located on the opposite side of the Oregon Electric Railway from the highway and that it is no longer of any value for state purposes because all the material which it seems practical to secure therefrom has already been taken, so he would offer no objections to the sale of the property. He suggested, however, that it might be advisable to circulate other state departments and the County Court of Lane County, to ascertain whether or not the property could be used to advantage for state or county purposes before it is offered to private individuals. The Commission concurred in the viewpoint of the Engineer and thereupon ordered an investigation to that end, thus deferring its decision on Mr. Murphy's inquiry for the time being.

The Engineer reported on the matter of service club signs that have been erected on state highway rights of way throughout the state, of which there is a considerable number. He inquired as to what action he should take to secure their removal. The Commission deferred a decision in this matter pending receipt of information as to how such matters are handled in the State of Washington.

A letter was presented from Earl C. Reynolds, Executive Secretary, Klamath County Chamber of Commerce, inquiring as to the possibilities of securing the designation as federal aid highways of the secondary highway which extends southerly from The Dalles-California Highway to the California state line at Hatfield, and of the Klamath Falls-Lakeview Highway. The Engineer was instructed to discuss this matter with Mr. Reynolds in person and to explain to him the federal requirements with respect to the designation of federal aid highways.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, all Commissioners being present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Division No. 1 Oiling Project on three secondary highways, in Clackamas, Washington, and Yamhill Counties. 2.33 miles surfacing and 14.63 miles oiling. R. O. Dail & Warren Bros., Inc., Portland, submitted the low bid for this project at \$21,383.50, based on the use of tar. They did not submit a bid based on the use of road oil. J. C. Compton, McMinnville, submitted the next low bid at \$21,907.00 based on the use of road oil, with no bid based on the use of tar. Warren Northwest, Inc., Portland, submitted the third low bid at \$24,190.00, based on the use of tar but no bid based on the use of road oil. There were 2 higher bidders. The Commission has awarded the contract to the low bidders, R. O. Dail & Warren Bros., at their bid of \$21,383.50, based on the use of tar.

"Elsie-Balm Grove Section of the Wolf Creek Highway and county roads, in Clatsop, Columbia, Tillamook and Washington Counties. 33.2 miles oiling. 6 bids were received for this project, the low one being that of J. C. Compton, McMinnville, at \$29,462.00. The second low bid was submitted by R. O. Dail & Warren Bros., Inc., Portland, at \$33,161.00. The Commission has awarded the contract to J. C. Compton, the low bidder, at his bid of \$29,462.00.

"Mt. Vernon, Weston, and Service Creek Oiling Project on the Beech Creek and Weston-Elgin Secondary Highways and on the Pendleton-John Day and John Day Primary Highways, in Grant, Umatilla, and Wheeler Counties. 40.20 miles oiling. The low bid submitted for

this project was that of Norris Bros., Burlington, Washington, at \$31,758.00. The second low bid was submitted by Newport Construction company, Portland, at \$32,351.00. There were 5 higher bidders. The Commission has awarded the contract to the low bidder, Norris Bros., at their bid of \$31,758.00.

"Division No. 2 Oiling Project on three secondary highways, in Linn, Polk, and Yamhill Counties. 14.60 miles oiling. J. C. Compton, McMinnville, submitted the low bid for this project at \$10,356.30, based on the use of road oil but no bid based on the use of tar. Newport Construction Company, Portland, submitted the next low bid at \$11,491.60 based on the use of road oil and \$11,159.60 based on the use of tar. There were 3 higher bidders. The Commission has awarded the contract to J. C. Compton at his low bid of \$10,356.30 based on the use of road oil.

"Clean and repaint structural steel on 14-span bridge over the Columbia River on the Pacific Highway, between Portland, Oregon, and Vancouver, Washington. Five bids were submitted for this job, the low one being that of Pacific Bridge Painting Company, San Francisco, California, at \$28,875.00. Odom Construction Company, Oregon City, submitted the second low bid at \$29,222.00. The award of this contract was deferred pending a conference with officials of the State of Washington inasmuch as that state is cooperating in the cost of the painting." (At 3:00 o'clock p. m. Chairman Cabell publicly announced the award of this painting job to Pacific Bridge Painting Company at its low bid of \$28,875.00, concurrence in the award having previously been secured from Mr. Lacey V. Murrow, Director of Highways of the State of Washington.)

Buildings in Albany

"Building No. 5246, formerly owned by Norbert Aya. The Commission received only one bid for the purchase of this building, being that of Burt Picha, Salem, at \$71.00. The Commission considers this offer satisfactory and accordingly has sold the building to Mr. Picha for \$71.00.

"Building No. 4959, formerly owned by the City of Albany. Two bids were received for the purchase of this building, the high one being that of Ralph Orton, Albany, at \$76.00. The other bid was submitted by Frank Hoffman, Albany, at \$51.00. The Commission has sold the building to Ralph Orton, at his high bid of \$76.00."

The Engineer brought up for discussion the matter of reallocating the \$50,000 of forest highway funds previously approved by the Commission, the United States Forest Service, and the United States Bureau of Public Roads, in joint session, for financing the construction of a section at the north end of what is known as the Cascade Lakes Forest Highway, in Deschutes County. He advised that, as previously instructed by the Commission, he conferred with the federal officials relative to the allocation and is satisfied that the

solvency quotient of this road does not meet the requirements for an expenditure of this amount. He pointed out that the road carries but very little traffic throughout most of the year and is open for general public use only during the summer months, being principally used during that period by people who seek recreational and sporting facilities at the lake resorts in this vicinity. It was his thought that an expenditure of \$50,000 for the construction of a short section of standard road is not justified and suggested in lieu thereof an expenditure of approximately \$20,000 for widening the present road with bulldozer equipment and placing a dust palliative of oil on the existing roadbed, which would provide a dustless road from Bend to Elk Lake. This work, he said, would cost about \$1,000 per mile and for an annual expenditure of \$600 per mile the road could be kept in satisfactory condition for a long time to come. The advantage of such a procedure, he pointed out, would be that it would give the general public a dustless road from Bend to Elk Lake rather than a short length of standard road construction. Furthermore, if this experience proves successful, it would open up possibilities of providing dustless roads into other remote districts pending availability of funds to finance construction of standard-type roads. In this particular instance, he added, there would remain about \$30,000 of forest highway funds to be reallocated to some other project. This matter was discussed at some length but final decision relative thereto was deferred by the Commission until the next meeting. The Engineer was instructed to advise Mr. Robert W. Sawyer, Bend, and the Bend Chamber of Commerce of the proposed plan and to secure reactions to the same before the next meeting.

Mr. Ivan E. Oakes, Deputy Administrator, Works Progress Administration, came before the Commission at this time in regard to the Wolf Creek Highway W.P.A. project, particularly with reference to the securing of additional state funds with which to finance non-labor items in connection with this work. He advised that the W.P.A. funds that were to be used for the financing of such items have been exhausted and that the work on this project will have to close down pending approval of the new allocation unless the state will furnish additional state funds to pay such costs. In fact, he advised that some of the gasoline-powered equipment has already stopped operating because of lack of funds with which to purchase gasoline. He further advised that the new W.P.A. project which is being prepared will contain a sufficient amount to cover the non-labor items but it will be some time before the moneys are available. He asked the Commission to approve an additional expenditure of state funds, estimated at \$12,000, in order to keep the work going until July 1, 1939, and advised that such amount would have to be paid in advance.

Chairman Cabell advised that the Commission had this matter under discussion at the previous meeting and decided at that time to make available sufficient state funds to pay the non-labor items until the first of July, but did not then understand that it would take \$12,000 and that the money would have to be advanced; so, in view thereof, the matter would have to be given further thought. After further discussion it was agreed that Mr. Oakes would prepare a new project statement and submit the same to Chairman Cabell and the Engineer for approval. Such statement was presented and discussed later in the session, when it was pointed out that the state's contribution to finance the non-labor items up to July 1st will amount to \$14,000 rather than \$12,000.

The Commission's Attorney advised that the Commission has authority to advance such amount immediately if it so desires, by a check drawn on the revolving fund. Chairman Cabell expressed a desire to give the matter further study before approving the same, whereupon the matter was referred to him by Commissioners Aldrich and Clough, with full power to act. (Chairman Cabell and the Engineer discussed this matter on the following day, at which time it was decided to advance state funds in the estimated amount of \$8,527.27 for equipment rental and supplies, and in no event should said sum advanced exceed \$10,000. An agreement covering the matter was executed by the Commission and Mr. Oakes on June 7, 1939.)

The Commission had under discussion a letter from J. D. Perry, Deer Island, requesting the oiling of several short sections of the Lower Columbia River Highway in Deer Island, particularly in front of his store building and the Farmers Service Station. The Engineer advised that there is merit in Mr. Perry's request but the work that he particularly has in mind would require the oiling of a section about 400 feet long and 8 feet wide, which would cost about \$150, or about \$560 if the area were paved. He further advised that there is no oiling crew working in the vicinity of Deer Island at the present time and if the Commission ordered the work done it would be necessary to send in a special crew, which would naturally increase the cost. After discussion the Commission instructed the Engineer to ascertain whether there are any other small oiling projects in this vicinity that could be done at the same time, which would justify the sending of a special crew to do the work. A report on this matter is to be rendered to the Commission at the next meeting.

A petition was presented from 9 residents and property owners of the Bunker Hill district, Marshfield, in which the Commission was requested to change its plans for the outlets of Center Street and Mullen Street in connection with the improvement that is now under way at this place, so as to provide a diagonal entrance into Hill Street, thus decreasing the distance to be traveled by the people residing on Center and Mullen Streets in reaching the new highway. The Engineer advised that considerable study has been given to the matter of providing an approach to the highway from these streets, one of the plans providing for a diagonal roadway entering the highway at the Hill Street Intersection, but such route was eliminated because it involved an excessive grade and would be undesirable from the traffic safety standpoint. He pointed out that people residing along Mullen and Center Streets, according to the adopted plan, will have to travel south on such streets about one block to Empire Avenue, thence westerly to a connection with Flannigan Street at its intersection with McCullum, thence north on Flannigan Street to the new highway. Flannigan Street, he said, contains a rather steep grade but is less than would be the grade of the diagonal from Mullen to Hill Street, and was adopted as the approach to the highway because it was considered best and safest notwithstanding that these people would have to travel a little farther in reaching the highway. The Commission decided to adhere to the present plan and thereupon denied the request.

A petition was presented from the residents of the town of Sisters, Deschutes County, requesting the oiling of Main Street full width in that town through the business district when the state conducts recoiling operations in

that vicinity. The Engineer advised that, in order to make a good estimate of the cost of doing such work, a survey of the road should be undertaken. He estimated the cost of such survey at \$150 and requested authority to proceed with the same. The Commission approved the survey by unanimous vote.

The Commission had under consideration the request from the City of Junction City for the oiling of the shoulders adjacent to the pavement on the Pacific Highway between 11th Street and 15th Street in that town. The Engineer estimated that such oiling work would cost \$360. The Commission approved the project by unanimous vote.

A letter was presented from the Baker County Chamber of Commerce requesting the following improvements: (1) Completion of the oiling of the Baker-Halfway Highway; (2) Oiling of a 7-mile section of the Baker-Unity Highway heretofore graded to modern standards; (3) Oiling of a 7-mile section of the Baker-Medical Springs Secondary Highway. The Commission ordered these projects kept in mind in the formulation of future highway programs.

A letter was presented from Mrs. Ella Westinghouse, Scio, requesting the oiling of the reconstructed section of the Albany-Lyons Secondary Highway east of Scio. The Commission decided that it was too late in the season to undertake this work, particularly in view of the fact that the plans for the project have not been prepared. The Engineer was instructed to make investigations as may be necessary and submit an estimate of cost to finance the project for consideration by the Commission at its next meeting.

The Commission considered and ordered filed for future consideration a letter from H. A. Utley, Lakeview, to Governor Charles A. Sprague, urging additional oiling work on the Klamath Falls-Lakeview Highway.

The Secretary presented a letter from the Board of Park Commissioners of the city of Pendleton, urging the construction of a landscaping project on a 1½-acre tract of land situate at the junction of the Old Oregon Trail with the Oregon-Washington Highway just east of Pendleton, and advising that the City Park Department will maintain the project if the state will construct it. The Commission considered this a meritorious project and approved the same subject to the condition that the City of Pendleton will maintain it after construction is completed. The Engineer was instructed to include this job in the 1940 budget for landscaping projects.

The Commission discussed and ordered filed for consideration in the formulation of future construction programs a petition signed by numerous property owners residing along the Territorial Secondary Highway between Monroe and the Douglas County line, in which the oiling of the said road was urgently requested.

A letter was presented from the Eugene Water Board requesting the construction of two short sections of guard fence along the McKensie Highway in the vicinity of Leaburg Dam, particularly a 930-foot section extending down stream from the dam, and a 175-foot section across the spillway section at the Leaburg power plant. The Water Board offered to contribute one-half of the

cost of such fence construction. The Commission by unanimous vote accepted the offer and authorized the Engineer to proceed with the construction of the fence on such basis.

The Commission discussed and ordered filed for future consideration a letter from Mr. R. Frank, Secretary of the Yachats Booster Club, Yachats, Oregon, relative to the improvement of the Alsea Highway, in Lincoln County. The Engineer was instructed to keep this project in mind in the formulation of future construction programs.

The Engineer reported on investigations conducted at the request of citizens of Woodburn for the substitution of a stop- and go-signal for the flashing beacons at the intersection of the Pacific Highway with Young Street, in East Woodburn. He recommended against any change because, in his estimation, traffic conditions do not justify the expense, which is estimated at \$2,600, exclusive of curbs and sidewalks which should also be built. The Commission approved the recommendation.

The Engineer reported that the Coos County Court has asked the state to give to Coos County the old wooden truss bridge over the south fork of the Coquille River, on the Powers Secondary State Highway, about $1\frac{1}{2}$ miles north of Powers, which structure has been replaced by a new bridge. He advised that the bridge is of no value to the state and recommended approval of the county's request. The Commission approved the recommendation unanimously, subject to the condition that the county will remove the old structure and clean up the site to the satisfaction of the State Highway Engineer.

The Secretary presented a resolution from the County Court of Linn County accepting full responsibility for the maintenance and use of that certain section of the old right of way of the Fleming Ranch-Shindler Bridge Section of the Albany-Lyons Secondary Highway, including the old bridge structure which has heretofore been abandoned by the state as a state highway in view of the reconstruction of the highway on new alignment. The said resolution was approved and accepted by the Commission by unanimous vote and ordered filed in the department records, it appearing to the Commission that the provisions thereof satisfactorily relieve the state from responsibility or liability in the event of accidents occurring on said highway and said bridge.

The Commission had under consideration the matter of disposal of certain obsolete highway department records and decided to keep all of them. The Secretary was instructed to arrange to store them in a convenient place for future use.

The Commission discussed the matter of rerouting the Ochoco Highway and the Warm Springs Highway in the town of Prineville, concerning which a public hearing was held in Prineville on May 17, 1939. The Commission decided to reroute these highways in accordance with the plan outlined at such public meeting and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, pursuant to notice given as required by Section 44-120, Oregon Code, 1935 Supplement, the Highway Commission met in the City Hall in the City of Prineville on May 17, 1939, for the purpose of conducting a hearing as provided for in said law with respect to a proposed change in the point or place of entrance of the Ochoco Highway into and through said City of Prineville and with respect to the proposed change in the point or place of entrance of the Warm Springs Highway into and through the City of Prineville; and

WHEREAS, said meeting was called to order by Henry F. Cabell, Chairman of the State Highway Commission, who explained to those assembled the purpose of the meeting and the proposed change of the point of entrance of the Warm Springs Highway into said city from the north and the proposed change in the route of said highway within said city, and explained the proposed change of the point of entrance of the Ochoco Highway from the westerly side of the said city and the proposed change of the route of said Ochoco Highway within the limits of said city; and

WHEREAS, the said Chairman, after explaining the purpose of the meeting and the proposed changes in the locations and routes of the said highways, invited discussion with respect to said matters and extended to persons present an opportunity to be heard for or against the said proposed changes; and

WHEREAS, after all who evidenced a desire to be heard had entered their names in the record and minutes of the meeting and had declared their approval or disapproval of said proposed changes, the Chairman announced that said matters would be taken under advisement by the Commission and a decision made and announced at a later date; and

WHEREAS, after due and full consideration of said matters and of the arguments and declarations made for and against the said proposed changes at said public hearing, both with respect to the point of entrance of each of said highways and with respect to the routes or locations of the same within said city, the Commission now being fully advised with respect to all of said matters is of the opinion, and it is the judgment of the Commission, that the interests of the State at large will best be served by the adoption of the proposed change of the point of entrance of the Warm Springs Highway into the City of Prineville from the northerly boundary and the proposed change of the route of said highway within said city, and the proposed change of the point of entrance of the Ochoco Highway into said city from the westerly boundary and the proposed change of the route of said highway within said city, all of which changes will, in the judgment of the Commission, make possible better alignments, and more serviceable, convenient and safe thoroughfares into and through said City, and, therefore, it is the opinion of the Commission that the routes and alignment of said highways should be

altered and modified, and the points of entrance into said city and the routes in and through said city should be changed, fixed and determined in harmony with the notice as given and the plan as proposed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting, as follows:

1. That the route and location of the Warm Springs Highway as the same enters the City of Prineville and is located within the said city over a route described as follows, to wit:

Beginning at the northerly city limits of Prineville and thence in a southeasterly direction to Tenth Street near the intersection of Tenth and "C" Streets; thence easterly along Tenth Street to "A" Street or Main Street; thence southerly along "A" or Main Street to Third Street, connecting with the Ochoco Highway at the intersection of Third and "A" or Main Streets.

be and the same hereby is changed and the point of entrance of said highway and the route within the limits of said City of Prineville shall be over and along a route defined and described as follows, to wit:

Beginning at the westerly city limits of Prineville on Locust Street between Third and Fourth Streets; thence easterly to a connection with the Ochoco Highway on Third Street near Park Boulevard.

2. That the Ochoco Highway as the same enters the City of Prineville from the westerly boundary over a route defined and described as follows, to wit:

Beginning at the westerly city limits of Prineville at the intersection of Second and Locust Streets and thence easterly along Second Street to "A" or Main Street; thence northerly along "A" or Main Street one block to Third Street; thence easterly along Third Street to the easterly city limits,

be and the same hereby is changed and said highway shall be and is routed and located into and through the City of Prineville along a route and location described as follows, to wit:

Beginning at the westerly city limits of Prineville at the intersection of Third and Locust Streets, and thence easterly along Third Street to the easterly city limits, the new route being that portion of Third Street between "A" or Main Street and Locust Street or the westerly city limits.

3. That the said above described new routes, locations and alignments be and the same hereby are adopted as the routes and locations of said respective highways with respect to points of entrance into and locations and routes within the City of Prineville.

4. That the Engineer be and he is hereby instructed to definitely locate and establish said highways by proper monuments and markers and make proper record thereof in the records of the Highway Commission, and erect proper signs on the streets over which said highways are routed, and proceed with the permanent improvement and maintenance of said highways along the routes herein defined and in harmony with plans and specifications by this Commission approved.

5. That as soon as the said highways have been properly and permanently constructed over the said respective routes and are ready to be thrown open for public travel highway traffic now using the old routes shall be directed over the new routes and thereafter the old routes shall be abandoned as the route of either of said highways.

6. That this resolution be entered in the records and minutes of the Highway Commission, and a duly certified copy thereof mailed to the Mayor of the City of Prineville and a like copy to the County Court of Crook County.

The Engineer reported that, in conformance with authority previously granted him by the Commission, he awarded contracts as follows, bids for which were taken by the Commission on May 18 and 19, 1939:

Construction of Read Creek-Wren Section of the Kings Valley Secondary Highway, in Benton County. Bids taken May 18, 1939; contract awarded May 26, 1939, to S. S. Montague, who submitted the low bid therefor.

Construction of John Day-Prairie City Section of the John Day Highway, in Grant County. Bids taken May 19, 1939; contract awarded May 26, 1939, to E. L. Rigdon, who submitted the low bid therefor.

Bridge construction on Dean Creek-Prairie City Section of the John Day Highway, in Grant County. Bids taken May 19, 1939; contract awarded May 26, 1939, to Edlefsen-Weygandt Company, who submitted the low bid therefor.

The Commission by unanimous vote confirmed the award of these contracts as reported.

The Commission considered and accepted an invitation from E. J. Griffith, State Administrator, Works Progress Administration, to be present on the Caravan trip over the Wolf Creek Highway on June 30, 1939, commemorating the opening of that highway to general public use.

The Commission had under discussion the bond to be furnished the state in connection with the granting of sign and marquee installations over state highways, and decided that if the permittee carries public liability and property damage insurance sufficient to protect the state in case of accidents occurring by reason of installation of such signs or marquees, then an additional bond would not be required; however, the permittee must furnish the state with a certificate or affidavit as evidence that such insurance coverage is now provided.

The Engineer requested authority to purchase the following equipment:

Three 50-watt radio transmitters to replace a like number of 10-watt portable transmitters that have not proved satisfactory where positive communication is needed. Estimated total cost \$975.00.

Two 550-gallon asphalt kettles to replace a like number of 300-gallon kettles which are too small to operate in connection with state paving plants. Estimated total cost \$2,000.00.

One portable gasoline hammer for use by the sign department in the installation of signs and signals. Estimated cost \$380.00.

The Commission approved such purchases by unanimous vote.

The Engineer brought up for discussion the advisability of conferring with Mr. R. J. Newell, Construction Engineer with the United States Bureau of Reclamation, relative to the construction of irrigation ditches and drains across state highway rights of way. The Commission approved such conference but deemed it advisable to ascertain what other states are doing along that line beforehand. The Engineer was instructed to communicate with the highway departments of other states similarly affected, with respect thereto.

The Engineer requested authority to prepare plans for the following maintenance material projects in Divisions No. 4 and No. 5, which projects it is proposed to include in the P.W.A. program:

Nye Junction-Long Creek Section of the Pendleton-John Day Highway, in Umatilla and Grant Counties. 66.0 miles in length. Requires production of 24,000 cu. yds. of crushed rock. Estimated total cost \$44,000.00.

Elgin-Rock Creek Section of the Wallowa Lake Highway, in Wallowa County. 22.0 miles in length. Requires 8,000 cu. yds. crushed rock. Estimated total cost \$15,000.00.

Union-Bidwell Hill Section of the Old Oregon Trail, in Union County. 14.0 miles in length. Requires 6,000 cu. yds. crushed rock. Estimated total cost \$13,000.00.

JUN 6 1939

Mountain Rest-Mt. Vernon Section of the Pendleton-John Day Highway, in Grant County. 14.0 miles in length. Requires 6,000 cu.yds. crushed rock or gravel. Estimated total cost \$12,000.00.

Weston-Elgin Section of the Weston-Elgin Highway, in Umatilla and Mallova Counties. 40.0 miles in length. Requires 15,000 cu.yds. crushed rock. Estimated total cost \$30,000.00.

Seufert-Dufur Section of The Dalles-California Highway, in Wasco County. 20.7 miles in length. Requires 6,500 cu.yds. crushed rock. Estimated total cost \$12,680.00.

Maupin-Cow Canyon Section of The Dalles-California Highway, in Sherman County. 31.0 miles in length. Requires 9,300 cu.yds. crushed rock. Estimated total cost \$17,815.00.

Redmond-Prineville Section of the Ochoco Highway, in Deschutes and Crook Counties. 18.25 miles in length. Requires 6,500 cu.yds. crushed rock. Estimated total cost \$12,620.00.

Bend-Horse Ridge Section of the Central Oregon Highway, in Deschutes County. 21.0 miles in length; and the Bend Section of the Century Drive Secondary Highway, in Deschutes County. 2.76 miles in length. Requires 7,150 cu.yds. crushed rock. Estimated total cost \$13,580.00.

Beaver Marsh-Ft. Klamath Section of The Dalles-California Highway, in Klamath County. 34.0 miles in length. The Crater Lake Junction-The Dalles-California Section of the Diamond Lake Secondary Highway, in Klamath County. 14.72 miles in length. Park Boundary-Ft. Klamath Section of the Crater Lake Highway, in Klamath County. 6.5 miles in length. Park Boundary-The Dalles-California Section of the Sand Creek Secondary Highway, in Klamath County. 4.2 miles in length. Requires 17,800 cu.yds. crushed rock. Estimated total cost \$30,965.00.

Chiloquin-Klamath Falls Section of The Dalles-California Highway, in Klamath County. 20.0 miles in length. Requires 6,000 cu.yds. crushed rock. Estimated total cost \$12,400.00.

The Commission by unanimous vote authorized the working up of plans for such projects.

The Commission had under consideration the matter of granting to the Bonneville Authority permission to construct its transmission pole line over and across a number of state highways between Portland and Eugene, particularly the authorizing of spans exceeding the 130-ft. span limit heretofore established by the Commission. The Commission referred this matter to the Engineer to discuss with engineers of the Public Utilities Commissioner's office. In the event that it is determined that the plans for such crossings are in conformance with good engineering practice, then a permit authorizing the over-length spans is to be issued.

The Commission considered and ordered filed communications as follows:

Letter from the Washington County Court agreeing to contribute \$10,000 of county funds in 1940 toward the cost of construction of a standard oil surface on the Balm Grove-Sunset Camp Section of the Gales Creek County Road, which is being used as a state highway detour pending completion of the Wolf Creek Highway, provided the temporary treatment that is being constructed this year does not prove successful.

Letter from Clarence N. Crocker, Eugene, suggesting that, when the state reconstructs the Pacific Highway through Eugene, it select a route around the city rather than along Sixth Street, as has been proposed.

Letter from Isaac Walton League of America opposing, in principle, the further extension of roads into roadless areas and demanding that, before any further extension into such areas is authorized, all values be given due consideration from the truly public standpoint.

Communications from the Elgin Community Club, Walla Walla Chamber of Commerce, Enterprise Chamber of Commerce; J. G. Kelley, President, Walla Walla Union Bulletin; and Weston-Elgin Highway Association, urging the oiling of the Weston-Elgin Secondary State Highway between Weston and Tollgate.

The Secretary presented a communication from the Tillamook County Flying Club, requesting permission to use the ocean beach at either Rockaway or Saltair, in Tillamook County, as a landing field for airplanes during the conduct of federal examinations for the securing of pilots' licenses. The Commission denied the request, it being considered that such use of the beach would constitute a serious hazard to people who use such areas for recreational purposes.

The Commission discussed a letter from the Lower Columbia Associated Chambers of Commerce with respect to the improvement of the county road extending from the Oregon Coast Highway to Fort Stevens, in Clatsop County. The Commission took no action on this matter other than to recall that this project was tentatively approved for the 1940 construction program at its session on the previous day.

A letter was presented from Guy E. Reddick, owner of the Midway Boathouse in the Willamette River at the foot of 15th Street in Oregon City, in which permission is requested to maintain a water pipe line on state property to supply his boathouse, and also to maintain a parking space on state property between 14th Street and 15th Street for the benefit and convenience of people who patronize his boathouse. The Commission ordered that Mr. Reddick be informed that a permit for such use of the state's property will be granted only in the event that the boathouse in question is owned and operated as a

public enterprise and as a non-profit undertaking, but will allow him to maintain his private boathouse in its present location as a temporary proposition this year only, pending completion of the highway along Water Street.

A letter was presented from Mrs. Jessie M. Honeyman, President, Oregon Roadside Council, in which the Commission was asked to use its influence with the State Board of Control to the end that office space be provided by the state for use in connection with the Council's W.P.A. project for the preservation of scenery along Oregon roadsides. The Engineer was instructed to advise Mrs. Honeyman that the State Highway Commission has no authority in this matter, and, while it is sympathetic with the movement, it is not in a position either to sponsor the project or to provide office space for the workers.

The Engineer discussed with the Commission a letter from Huntington, Wilson and Davis, Attorneys, Portland, relative to the claim of the Arch Cape Land Company and W.C. Calder for damages that they allege occurred to their property by reason of the sliding of a highway fill on the Oregon Coast Highway near Arch Cape, Clatsop County. Action on this matter was deferred pending inspection of the premises by members of the Commission and the Engineer.

The Commission discussed but deferred action on the matter of recommending the designation of the Central Oregon Highway as U. S. Highway Route No. 14.

The Commission also discussed a letter from W. C. Markham, Executive Secretary, American Association of State Highway Officials, relative to the designation of U. S. Highway Route No. 95 across the State of Oregon. The Engineer advised that it is planned to route this highway over the I.O.N. Secondary State Highway through the State of Oregon, which, in his estimation, would be proper, although he did not believe that publicity should be given thereto until the road has been completed throughout and could be shown on maps as an improved route through Oregon. He further advised that he so informed Mr. Markham. The Commission approved the Engineer's action in this matter.

The Commission considered and ordered filed a letter from Mr. F. W. White, Eugene, directed to Governor Charles A. Sprague, with respect to the designation of the Junction City-Eugene Secondary State Highway and the Pacific Highway between Junction City and Eugene as U. S. Highway Route No. 99E and U. S. Highway Route No. 99W, respectively, inasmuch as Mr. White has previously been informed of the reasons why such designation could not be approved.

The Commission also considered and ordered filed a letter from Congressman Walter M. Pierce relative to the proposed federal plan for the construction of federal military highways.

The Secretary presented a letter from Mrs. Mary H. Clarke, Portland, inquiring as to when the Commission intends to construct the proposed revision of the Pacific Highway West through the town of Tigard so that she can plan the remodelling of her premises in accordance therewith. He was instructed to inform Mrs. Clarke that the Commission has this project in mind but is

unable to state at this time just when construction will be undertaken, as that depends upon the availability of funds and the formulation of the Commission's construction program.

A letter was presented from the Newberg Berrians requesting suggestions relative to the handling of traffic during the regatta that is to be held in the Willamette River at Newberg on June 18, 1939, and in connection with which it is likely that a large crowd will assemble on the highway bridge during the festivities. The Engineer advised that the bridge is an old structure and incapable of withstanding a large crowd, and, in his estimation, in order to avoid the possibilities of a tragedy, should not be used as a viewing stand. Furthermore, the bridge crew is now installing additional falsework on this structure in order to make it safe for ordinary vehicular traffic. The Commission instructed the Secretary to inform the Newberg Berrians of the condition of this bridge and to request them to see to it that people do not use the bridge during the regatta. He was also instructed to convey such information to the Department of State Police, with the request that officers be assigned to keep the people off this structure during the time that the regatta is under way.

A letter was also presented from O. D. Mathews, President of the Klamath Buckaroo Days Committee, requesting permission to install 10 lines of decorations over The Dalles-California Highway just outside of the city limits of Klamath Falls during the time of their rodeo, which is to be held July 2, 3, and 4, 1939. The Commission denied the request as a matter of policy and ordered that the suggestion be given to Mr. Mathews that such decorations be placed over the highway within the city limits where the State Highway Commission does not have jurisdiction.

The Engineer discussed briefly with the Commission matters pertaining to the adoption of a federal aid secondary highway system. He advised that the Bureau of Public Roads has requested the submission of a list of roads representing at least 25 per cent of the total available mileage, before it will approve any further expenditures of either the 1940 or the 1941 federal aid secondary highway funds, and that they have also requested graphs with respect to the economical selection of the various roads to be included in such system. The Commission instructed the Engineer to proceed with the preparation of the additional information and to submit a full report on the matter at its next meeting, if possible.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts authorized for each. After due consideration, motion was made by Commissioner Aldrich that the State Highway Engineer be authorized and instructed to make such surveys on various sections of highways of this state, which said sections of highways and the amounts authorized for survey expenditures are as follows:

Location - 1-2812 - Flagstaff Hill-Middle Bridge Section, Baker-Homestead Highway. Baker County. 2nd authorization - \$500.00
Total to date \$6,600.00

JUN 6 1939

Plans - - - - 2-2817 - Corvallis Bridge Approaches, Albany-Corvallis Highway, Benton County. 1st authorization - \$100.00

Right of Way - 103-2821 - Aurora-Wilsonville Section, Hillsboro-Woodburn Sec. Hwy., Clackamas Co. 1st authorization - \$300.00

Plans - - - - 103-2822 - Estacada School Section, Woodburn-Sandy Highway, Clackamas County. 1st authorization - \$100.00

Slide - - - - 4-2824 - Nehalem River-Rock Creek Section, Wolf Creek Highway, Clatsop County. 1st authorization - \$500.00

Plans - - - - 4-2825 - Astoria Plaza Section, Oregon Coast Highway, Clatsop County. 1st authorization - \$600.00

Plans - - - - 5-2814 - Warren-Scappoose Section, Columbia River Highway, Columbia County. 2nd authorization - \$1,200.00
Total to date \$3,200.00

Plans - - - - 10-2819 - Rice Hill-Turkey Hill Section, Pacific Highway, Douglas County. 3rd authorization - \$500.00
Total to date \$1,550.00

Right of Way - 117-2809 - Provolt-Williams Section, Williams Secondary Highway, Josephine Co. 3rd & 4th authorizations - \$1,000.00
Total to date \$2,000.00

Quarry - - - - 19-2817 - Drews Gap-Forest Boundary Section, Klamath Falls-Lakeview Hwy., Lake Co. 1st authorization - \$50.00

Right of Way - 20-2836 - Lincoln County Line-Cape Creek Section, Oregon Coast Highway, Lane Co. 1st authorization - \$500.00

Right of Way
& Plans - - - - 20-2837 - Lowell-Goshen Section, Willamette Highway, Lane Co. 1st authorization - \$9,800.00

Plans - - - - 220-2832 - Walton-Veneta Section, Route "F", Lane County 2nd authorization - \$450.00
Total to date \$10,250.00

Right of Way- 21-2829 - Kernville-Newport Section, Oregon Coast Highway, Lincoln County. 1st authorization - \$125.00

Right of Way - 21-2830 - Boyer-Rose Lodge Section, Salmon River Highway, Lincoln County. 1st authorization - \$1,000.00

Bridge - - - - 21-2831 - Alsea Bridge, Alsea Highway, Lincoln County 1st authorization - \$300.00

Location - - - 22-2816 - Foster-Bryant Hill Section, Santiam Highway, Linn County. 2nd authorization - \$2,500.00
Total to date \$10,000.00

JUN 6 1939

- Quarry - - - - 228-2806 - Hay Canyon Section, Moro-Hay Canyon Road, Sherman County. 2nd authorization - \$26.00
Total to date \$776.00
- Plans - - - - 29-2828 - Mills Bridge-Mining Creek Section, Wilson River Hwy., Tillamook County. 1st authorization - \$400.00

- Plans - - - - 134-2822 - Christensen-Lane-Scholls Section, Hillsboro-Woodburn Sec. Hwy., Washington Co. 1st authorization - \$540.00
- Right of Way - 36-2822 - Sheridan-Willamina Section, McMinnville-Tillamook Hwy., Yamhill County. 1st authorization - \$125.00
- Plans - - - - 136-2823 - Amity-Hopewell Section, Belleview-Hopewell Road, Yamhill County. 1st authorization - \$100.00

The motion was duly seconded by Commissioner Clough and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Commission had under consideration a request from Viesko & Hannaman, contractors for the construction of a maintenance building at Albany, Contract No. 2123, requesting an extension of time from March 7 to May 13, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to bad weather conditions which rendered impossible the painting of the exterior brick walls and the construction of driveways at the time that the other work was completed. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct; in fact, he ordered the contractor to close down the work between February 8 and April 11 because he considered it poor engineering to allow the work to proceed under the prevailing conditions. He recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2095, 2108, 2110, 2123, 2125, 2127, 2130, 2136, 2138, 2143, 2146, 2156, and 2162, for the construction of state highway projects, have been completed according to the require-

JUN 6 1939

ments of the contracts or modifications thereof, and that said jobs are ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2095, with McNutt Bros., for grading, surfacing and oiling on the Bly Mountain-Beatty Section of the Klamath Falls-Lakeview Highway, in Klamath County. Completed May 28, 1939.

Contract No. 2108, with Henry C. Nelson, for construction of maintenance buildings at Suntex Junction and Brothers, in Deschutes and Harney Counties. Completed May 12, 1939.

Contract No. 2110, with Mountain States Construction Company, for constructing canal and railway roadbed on the Albany Section of the Pacific Highway East, in Linn County. Completed April 22, 1939.

Contract No. 2123, with Viesko & Hannaman, for constructing a maintenance building at Albany, in Linn County. Completed May 13, 1939.

Contract No. 2125, with D. L. Ashton, for furnishing crushed rock on the Olney-Jewell Section of the Nehalem Secondary Highway, in Clatsop County. Completed April 27, 1939.

Contract No. 2127, with D. L. Ashton, for landscaping on the Brothers Roadside Oasis Project on the Central Oregon Highway, in Deschutes County. Completed May 15, 1939.

Contract No. 2130, with J. C. Compton, for surfacing and oiling the Vanora-Madras Section of the Warm Springs Secondary Highway, in Jefferson County. Completed May 15, 1939.

Contract No. 2136, with Leonard & Slate, for landscaping on the State Hospital-Ash Street Section of the Old Oregon Trail Highway, in Umatilla County. Completed April 25, 1939.

Contract No. 2138, with O. C. Yocom, for furnishing crushed rock on the Coquille Section of the Oregon

Coast and Coos Bay-Roseburg Highways, in Coos County.
Completed May 15, 1939.

Contract No. 2143, with Mountain States Construction Company, for furnishing crushed rock on the Rough Creek-Belknap Springs Section of the McKenzie Highway, in Lane County. Completed April 22, 1939.

Contract No. 2146, with Saxton, Looney & Risley, for furnishing crushed rock on the Lakeview Section of the Fremont and Klamath Falls-Lakeview Highways, in Lake County. Completed May 31, 1939.

Contract No. 2156, with A. S. Wallace, for furnishing crushed rock on the Polallie Creek-Hood River Section of the Mt. Hood Highway, in Hood River County. Completed May 5, 1939.

Contract No. 2162, with C. E. Silbaugh Company, for grading the North Powder-Davis Ranch Section of the North Powder River County Road, in Union County. Completed May 4, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the setting of a date for its next regular meeting for the receiving of bids on highway construction projects following that set for June 22, 1939, and tentatively scheduled such meeting for Thursday, July 27, 1939, it being understood that a special meeting would be called in the meantime for the disposal of accumulated routine matters.

The Commission considered and signed agreements, et cetera, as follows:

Supplemental cooperative agreement with United States of America providing for snow removal on the west leg of Timberline Lodge Road.

Agreement with California Western States Life Insurance Company, providing for group insurance for Highway Department employees.

Agreement with City of Bend covering reimbursement to the city for work that the city will do in revising the water system by reason of the Third Street undercrossing project.

Agreement with C. H. Lake, Salem, authorizing parking of cars

JUN 6 1939

on state highway right of way while being serviced at his station south of Salem.

Agreement with Olive Lee providing for construction of an approach road to her premises adjacent to the Oregon Coast Highway in Lincoln County when this highway has been constructed on new alignment.

Revokable permit from Pacific Power and Light Company authorizing the state to install and maintain one traffic signal suspension cable attachment to the company's pole No. 2107, in Rainier.

Agreement with R. G. Saylor providing for the abandonment of a cattle pass on the Lexington-Echo Secondary Highway in Umatilla County, being Bridge No. 320-26.1, situate at Highway Engineer's Station 398+47 in the N.W. $\frac{1}{4}$ of Sec. 31, T. 3 N., L. 28 E., W.M.

Agreement with Frits Luscher et al pertaining to the acquisition of right of way needed for the new Columbia River Highway near Bridal Veil, in Multnomah County.

Easement granting to the Mountain States Power Company the right to construct, maintain, and operate a canal or ditch to convey water across Lots 5 & 6 of Block 5, and Lots 5, 6, 7, and 8 of Block 8, Hackleman's Second Addition to Albany, which is state-owned property.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

Ed. L. L.
Commissioner

Thos. W. L.
Commissioner

June 21, 1939
(9:00 a.m. - Enroute Drain to Reedsport)

The State Highway Commission disposed of the following routine matters enroute from Drain to Reedsport, there being present and participating in the discussions the following:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Secretary reported receipt of a letter from Mr. Lewis A. McArthur, President of the Oregon Historical Society, recommending approval of the request of the Willamina Commercial Club for the preservation of the old anchoring post that was used to tie up the ferry that operated across the Yamhill River just west of Willamina one hundred years ago. The Commission approved the recommendation and authorized construction of a concrete base around the post provided investigation reveals that it is located on the state highway right of way. The Commission also authorized the erection of a sign near this anchoring post giving historical information relative thereto. The Engineer was instructed to ask Mr. McArthur to prepare the wording for such sign.

The Attorney reported on the building encroachments on Astor Street, in Astoria. Inspection on the ground, he said, reveals that some of the buildings encroach fully 20 feet upon the dedicated street, this being particularly true of those on the west side of the street where the traveled roadway was a considerable distance from the property line. He gave as his opinion that the property owners cannot establish their rights to the use of the street as against the rights of the general public but advised that the cost of litigation would be expensive and that the results would be uncertain and it would take considerable time to bring the matter to a final conclusion if it were brought to trial. He estimated that the state could save approximately \$4,000 in the cost of removing the buildings from the highway right of way were the Commission to prevail in a lawsuit to enjoin the further use of the street for private purposes but, on the other hand, if the property owners prevailed, then the Commission would be under obligation to pay the cost of moving the buildings and in addition thereto would be required to purchase from the property owners the area in the dedicated street that they had acquired by reason of long use. He further reported that some of the property owners who are occupying street area on the easterly side of the street and who will not be disturbed by the highway improvement have indicated a willingness to help pay the cost of making adjustments on the opposite side of the street, the consideration being the benefits which they would receive by reason of the vacation of a 20-foot strip of street area which they are now occupying on the easterly side of this street.

He pointed out that in only one instance would the state be required to deal with any of the building owners, that being a case where the state

JUN 21 1939

will require some of this owner's property that is located outside of the dedicated street area and, in that instance, the Commission in its negotiations will have to give consideration to the moving of this property owner's building. After discussion, the Commission decided to pay the cost of moving the building belonging to this one property owner, and to require the City of Astoria to assume such obligation with respect to the moving of the other buildings inasmuch as the Commission feels that this is a city responsibility. The Attorney was instructed to convey such information to the City Council. He was authorized to assist the city in condemnation proceedings if such are necessary with respect thereto.

The Engineer brought up for discussion the matter of constructing timber linings in all state highway tunnels that are unlined at the present time, with particular reference to the Elkton Tunnel on the Umpqua Highway where, he said, rocks are continually falling from the roof of the tunnel, endangering traffic and requiring constant maintenance by the state maintenance crew. He recommended the budgeting of a sufficient amount in next year's budget to pay the cost of such timber lining work. The Commission indicated approval of the recommendation and instructed the Engineer to bear the matter in mind when the 1941 budget is prepared.

Chairman Cabell reported that in company with the State Parks Superintendent he recently inspected Natal Park, a 10-acre tract of privately-owned timber land situate adjacent to the Nehalem Highway near Mist, Oregon, and ascertained that this is a beautiful place, well suited to state park purposes, and would be a fine addition to the state parks system if it can be acquired at reasonable cost. It was his thought that the state should purchase the area if it can be obtained at its actual worth. Commissioner Clough concurred, but a definite decision was deferred pending further investigation and consultation with the owner.

The Attorney reported that a new state law is now in effect which authorizes the Commission to institute condemnation proceedings to acquire state highway right of way through cemeteries, and suggested that it would be advisable to start such proceedings in connection with the acquisition of right of way needed for the Lower Columbia River Highway through the Fairview Cemetery, near Scappoose, which right of way has been the cause of delay in reconstructing this section of this highway. The Commission approved the suggestion and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby; and

WHEREAS, by the provisions of Chapter 529, Oregon Laws, 1939, the Commission is vested with authority to acquire by purchase, agreement, donation or by the exercise of the power of eminent

domain real property for right of way through a cemetery and by said law the Commission is further authorized to acquire by purchase, agreement, or the exercise of the power of eminent domain real property contiguous to the cemetery, and having acquired such property may convey the same to the cemetery association or the owners of the cemetery in exchange for the real property sought to be acquired for right of way purposes; and

WHEREAS, the Commission has found it necessary in order to properly locate, construct and maintain that section of the Columbia River Highway lying between the Multnomah County line and Scappoose to extend the same through and locate a portion of said highway within the boundaries of the cemetery known as the Fairview Cemetery; and

WHEREAS, the route and location of the said highway within the boundaries of said cemetery is over and across an area within which there are no graves which will be disturbed by reason of the appropriation and use of the area over which is routed the said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE STATE HIGHWAY COMMISSION AS FOLLOWS:

1. That the Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon to acquire for right of way purposes in connection with the permanent location, construction, improvement and maintenance of said section of the Columbia River Highway the real property described as follows: to wit:

A parcel of land lying in the T. J. Jackson, D. L. C. in Township 3 North, Range 2 West, W. M., Columbia County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Mildred J. Watts, recorded in Book 17, Page 492 of Columbia County Record of Deeds, the said parcel being a strip of land eighty feet in width, forty feet on each side of the relocated center line of the Columbia River Highway as said highway has been surveyed over and across the Fairview Cemetery property, the said parcel being more particularly described as follows:

Beginning at a point on the north line of the Fairview Cemetery, which point is North $89^{\circ} 32' 30''$ West a distance of 40 feet from engineer's station 50+80 of the relocated Columbia River Highway, said point also being 1442 feet south and 128 feet east of the northwest corner of the T. J. Jackson, D. L. C. in Township 3 North, Range 2 West, W. M.; thence South $89^{\circ} 32' 30''$ East along the north line of said property a distance of 80 feet; thence South $2^{\circ} 11' 30''$

JUN 21 1939

East, 40 feet distant and parallel to said center line a distance of 260 feet to the south line of the cemetery property; thence North $89^{\circ} 19' 30''$ West along the south line of the cemetery property a distance of 80 feet; thence North $2^{\circ} 11' 30''$ West, 40 feet distant and parallel to said center line a distance of 260 feet to the point of beginning, containing 0.48 acres.

2. This Commission does hereby further declare that the above described property is necessary and is needed for highway purposes and the acquisition of the same will be of advantage to the State of Oregon for right of way purposes in order to make it possible for this Commission to properly locate, construct, improve and maintain the said section of said Columbia River Highway in accordance with standards adopted by this Commission with respect to curvature, grades, alignment, drainage and other factors of safety.

3. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel of land required for such right of way purposes and prepare proper and adequate description thereof, which description shall be employed in the preparation of a deed or other instruments necessary to complete the acquisition of said property, or which description may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

4. That the boundaries of the said parcel of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That in connection with such effort or attempt as may be made with the owner of said property the said attorneys are hereby instructed to offer to procure an equal area of land adjoining and contiguous to said cemetery and convey or cause the same to be conveyed to the owner of the land by this complaint sought to be appropriated in exchange for the real property sought to be condemned in this proceeding.

7. The Engineer hereby is instructed in the preparation of plans for the construction of the highway through said cemetery to make proper and adequate provisions for convenient and commodious access from the said cemetery to the highway when constructed over the new location and to provide for vehicular and/or pedestrian communication across said newly constructed highway between the cemetery property and the portion of said cemetery which will be severed or segregated by reason of the location of said highway.

8. That this resolution be entered in full in the minutes and records of this Commission as of June 6, 1939, but the same shall not become effective until June 14, 1939.

The Engineer reported on his investigation of the methods used by the State of Washington in controlling service club signs, as previously ordered by the Commission. He said that the State of Washington provides a convenient post with crossarms on the state highway right of way at the entrance to a city and each of the service clubs hangs thereon a standard-designed plaque carrying its insignia. The cost of the site, the post, and the cross-arm, he said, is borne by the State of Washington but the service clubs are required to pay the cost of their individual plaques. He gave as his thought that such manner of handling this matter in the State of Oregon would not be satisfactory because the maintenance of signs of this kind on highway rights of way in this state is illegal and because it would establish a very bad precedent. The suggestion was made that the state furnish the signs, which would be uniform in character, and let the service clubs erect and maintain them provided they are placed within the corporate limits of the city or town. The suggestion was tentatively approved by the Commission. The Engineer was instructed to ascertain the attitude of the state representative of each of the service clubs relative thereto.

The Attorney reported receipt of a letter from Mr. Henry Eggers, Corvallis, approving the plan suggested by the Commission for the construction of his private approach road to the highway south of Corvallis. Mr. Devers stated that Mr. Eggers has expressed a willingness to perform the work in connection with the construction of a standard approach road provided the state will furnish the drainage pipe. The Commission approved this arrangement and authorized the Engineer to purchase the pipe for Mr. Eggers' use. In this connection the Commission discussed the advisability of adopting a

JUN 21 1939

permanent policy with respect to the construction of approach roads but deferred definite action thereon for a future meeting.

The Attorney reported receipt of a complaint that Dr. Fred Thompson, The Dalles, is maintaining a neon advertising sign on the right of way of the Columbia River Highway in front of his auto park near the west city limits of The Dalles, in violation of his agreement with the Commission when this section of the highway was built. He recalled that the relocation of the highway completely changed Dr. Thompson's park setup and made necessary a new and rather expensive entrance to the same at a point where it was difficult to bring to the attention of the motoring public his park facilities and, in view thereof, the Commission, on April 11, 1935, granted Dr. Thompson an easement authorizing him to maintain a sign over the highway right of way provided it did not extend more than 15 feet from the right of way line. He read aloud the provisions of the easement and in view of the provisions thereof the Commission instructed him to order Dr. Thompson to remove the sign immediately.

The Engineer reported briefly the results of a traffic count that was taken at the intersection of the Wapinitia Highway with the Mt. Hood Highway between the hours of 8:00 a. m. and 4:00 p. m. on Sunday, June 4, and Tuesday, June 6, 1939, to determine the volume of traffic over the Mt. Hood Highway, which was recently opened after being closed by snow during the past winter, as compared to the traffic count taken at the same location on Wednesday, June 10, 1936, during the same hours. The Commission took no action on this report.

The Engineer also reported on an investigation that has been made to determine whether or not the design of the power transmission pole line, that the Bonneville Power Authority proposes to construct from Portland to Eugene, is in conformance with good engineering practice. He said that such investigation and check reveals that the design fully meets the requirements of good engineering practice inasmuch as it provides safety factors ranging from 3.2 to as high as 7.3. He recommended, in view thereof, that the permit requested by the Bonneville authorities for the construction of extra long spans over and across state highway rights of way be granted. The Commission approved the recommendation unanimously.

A letter was presented from Mr. W. W. Evans, Halfway, Oregon, requesting the oiling, this year, of the Dry Gulch Section of the Baker-Homestead Highway, and the grading of the CCC Camp-Virtue Hill Section of this highway so that the oiling of this section can be completed during 1940. The Secretary was instructed to inform Mr. Evans that the Commission is not able to approve his request in its entirety but has the interests of this highway in mind, in fact, has included in its tentative budget for P.W.A. projects an amount of \$30,000 for resurfacing and oiling the Dry Gulch Section in 1940, if the P.W.A. funds materialize. The Engineer suggested that this work could probably be financed with state funds in the event that the proposed P.W.A. program did not materialize. The Commission tentatively approved the suggestion.

A letter was also presented from the County Court of Umatilla County in which the Commission was urged to adopt a program for the future improvement of the first 5-mile section of the Weston-Elgin Secondary State Highway easterly from Weston. The Commission indicated that the only hope for such project would be the financing of the same in the P.W.A. program, this project already having been approved under the tentative program for P.W.A. funds.

The Commission discussed briefly, but deferred definite action on a suggestion from the Engineer with respect to the removal of gravel from the ocean beach for commercial purposes.

The Engineer requested authority to purchase the following equipment:

1 semi-portable scale for weighing individual axle loads, estimated total cost, installed, \$1,035.00;

1 electric drill, estimated cost \$75.00, for use in connection with the construction of log bridges on the Wilson River Highway;

1 Gerlinger paving plant, estimated cost \$12,000.00, but valued at \$17,600.00.

After discussion the Commission by unanimous vote authorized the purchase of such equipment.

The Commission had under discussion a report from the State Police Department concerning the fatal accident that occurred on the John Day Highway between Vale and Jamieson in Malheur County on the night of May 30, 1939, when a passenger car containing a family of five persons collided with a truck owned by the Bunting Tractor Company of La Grande which was being used to transport bulldozer equipment of a width in excess of the statutory width limits, resulting in the death of three members of the family. The Commission was informed that a permit was issued to the Bunting Tractor Company to transport this bulldozer over state highways under certain conditions but the company, according to the report, did not comply with the requirements in that the movement was being made on a holiday, during the hours of darkness, and without flagmen. The Commission was also informed that this is the second time that equipment belonging to the Bunting Tractor Company has been involved in an accident on Oregon highways and that in each instance it so happened that the movement was being made in violation of the provisions of the permit that was issued to them. Instructions were requested as to whether or not this company should be granted permits in the future, in view of its apparent unwillingness to comply with the provisions of its permits. The Commission decided unanimously not to grant this company any permits hereafter for the special use of the highways of this state and instructed the Secretary to so inform the company.

The Engineer reported the award of the following contracts in accord-

JUN 21 1939

ance with authority previously granted him by the Commission, the conditions of the awards having been satisfied:

Grading, surfacing and oiling of the Silver Lake-Harris Creek Section of the Fremont Highway, in Lake County. Bids taken May 18, 1939, contract awarded June 9, 1939, to E. C. Hall Company, the low bidder;

Grading and paving the Roseburg-Shady Point Section of the Pacific Highway, in Douglas County. Bids taken May 19, 1939, contract awarded June 9, 1939, to Berke Bros., Inc., who submitted the low bid.

The Commission approved the award of these contracts by unanimous vote.

The Engineer reported receipt of a letter from Thomas H. McDonald, Chief of the Bureau of Public Roads, requesting his attendance at a meeting of the Committee on Design, American Association of State Highway Officials, which is to be held in Chicago on June 26 and 27, 1939. He explained that this trip would be entirely at government expense and inquired whether or not he should accept the invitation. The Commission, by unanimous vote, authorized the Engineer to attend such meeting in view of the fact that his expenses are to be paid by the Federal Government.

The Engineer also reported that Construction Engineer H. G. Smith has received an invitation to attend and deliver a paper at the 1939 Montana Bituminous Conference which is to be held this year at Sun Valley, Idaho, September 11 to 14. The Commission decided that this meeting is not of sufficient importance to justify the expense, however, authorized the preparation of a paper to be read at such conference.

The Commission confirmed out-of-state travel expense for Harold B. Say and Irene Payne of the Travel and Information Department who attended a meeting of the National Greeters' Association in Seattle, Washington, June 10 to 13, 1939. The Commission ordered, however, that hereafter no expense shall be incurred for out-of-state travel unless it has been previously authorized by the Commission.

The Secretary presented a letter, signed by 14 residents of the town of Spray, Oregon, expressing appreciation and gratitude for the recent installation of drinking fountains at a place known as Johnny Kirk Springs, situated adjacent to the John Day Highway between Spray and Dayville. The Commission accepted the letter, with thanks, and instructed the Secretary to send an appropriate letter of acknowledgment.

A letter was presented from the Chief of Police, Nyssa, Oregon, advising that the city has plans for the Harvest Festival on September 8 and 9, 1939, in connection with which they desire the use of two blocks of the state highway route which will necessitate the detouring of traffic over city streets that are in good condition. The Commission granted the request by unanimous vote subject to the condition that the detour is maintained in a dustless

condition and that flagmen are maintained to direct traffic and that the detour is properly signed so the general traveling public will not be inconvenienced more than is necessary.

A letter was presented from Nehalem Valley Grange No. 804, Jewell, Oregon, protesting the delay in contracting the oiling of the Nehalem Secondary Highway between Birkenfeld and Jewell. A similar letter was presented from Jewell Grange No. 876, Jewell, Oregon. The Secretary was instructed to reply that this project is in the Commission's 1939 construction program, a substantial portion of which cannot be placed under contract until this fall because of the lack of funds with which to finance the same. Also, that \$71,000 heretofore approved by the Commission for such project is still intact and the Commission has no intention to reallocate it to any other project.

The Commission considered and ordered filed a letter from Netel Grange No. 410, Astoria, in which the Commission was asked to give consideration to the benefits accruing to the farm element and settlements when contemplating or building roads, with particular reference to the Wolf Creek Highway connection to Astoria.

A letter was presented from the South Lane-North Douglas 99 Highway Improvement Association urging favorable consideration of its previous request for the construction of the Cottage Grove Section of the Pacific Highway. The Secretary was instructed to inform the Association that, due to the lack of state funds with which to match Federal Aid, the Commission has found it necessary to defer the contracting of a substantial portion of its 1939 construction program until later in the fall. Also, that the Commission has not yet made a definite selection of projects for its 1940 funds but the Cottage Grove improvement is one of those being considered for such program.

A telegram was presented from the Buckaroo Days' Committee, Klamath Falls, renewing its request for authority to maintain banners over and across The Dalles-California Highway for three blocks just outside of the city limits of Klamath Falls, advertising its buckaroo celebration. The Commission denied the request.

The Engineer reported that, in accordance with authority previously granted by the Commission, he has ordered certain surveys since the last meeting. He submitted a list of such surveys and asked the Commission to approve them. After due consideration the Commission by unanimous vote authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - - -	9-2823 - Sisters Section, McKenzie Highway, Deschutes County.	1st authorization - \$150.00
Quarry & Stock Pile	12-2816 - Nye Junction-Long Creek Section, Pendleton-John Day Hwy.	1st authorization - \$500.00

JUN 21 1939

Quarry - - - - - 12-2817 - Mtn. Rest-Mt. Vernon Sec., Pendleton John Day and
 Beach Creek Highways. 1st authorization - \$300.00

Reconnaissance - 12-2815 - Prairie City-Baker Co. Line Sec., John Day Highway.
 Grant County. 2nd authorization - \$200.00
 Total to date - \$1,200.00

Plans - - - - - 15-2822 - North Entrance Medford, Pacific Highway. Jackson
 County. 1st authorization - \$500.00

Plans - - - - - 18-2835 - Bly-E. Bndry. Indian Res. Section, Klamath Falls-
 Lakeview Hwy. 1st authorization - \$1,000.00

Plans - - - - - 19-2813 - Horse Ranch Section, Fremont Highway. Lake County.
 2nd authorization - \$495.00
 Total to date - \$1,155.00

Test Pits - - - 19-2819 - E. Forest Bndry.-Cottonwood Creek, Klamath Falls-
 Lakeview Hwy. 1st authorization - \$400.00

Quarry - - - - - 19-2819 - E. Forest Bndry.-Cottonwood Creek, Klamath Falls-
 Lakeview Hwy. 2nd authorization - \$500.00
 Total to date - \$900.00

Quarry - - - - - 19-2818 - Lakeview Section, Fremont Highway. Lake County.
 1st authorization - \$500.00

Plans - - - - - 22-2819 - So. Junct.-Lost Lake Sec., Santiam Highway. Linn
 County. 1st authorization - \$150.00

Reconnaissance - 22-2820 - Sweet Home-Foster Section, Santiam Highway. Linn
 County. 1st authorization - \$1,200.00

Right of Way - - 24-2823 - Jefferson Section, Pacific Highway East. Marion
 County. 1st authorization - \$ 75.00

Reconnaissance -111-2809 - Wasco-Condon Section, Wasco-Heppner Highway. Gil-
 liam County. 1st authorization - \$2,325.00

Right of Way - - 29-2829 - Brighton Creek-W. Beaver Creek, Oregon Coast High-
 way. 1st authorization - \$ 50.00

Quarry - - - - -130-2825 - Weston-Elgin Section, Weston-Elgin Highway. Umatilla
 County. 1st authorization - \$500.00

Plans - - - - - 30-2824 - Milton Section, Oregon-Washington Hwy. Umatilla
 County. 2nd authorization - \$100.00
 Total to date - \$600.00

Quarry - - - - - 31-2816 - Elgin-Rock Creek Section, Wallowa Highway. Union
 County. 1st authorization - \$300.00

Quarry - - - - 31-2815 - Union-Bidwell Hill Section, Old Oregon Trail. Union
County. 1st authorization - \$200.00

Right of Way - 33-2818 - Deschutes River Section, Columbia River Highway.
Wasco County. 1st authorization - \$ 50.00

Plans - - - - 34-2818 - Multnomah Co. Line-Tigard Sec., Pacific Highway West.
Washington County. 4th authorization - \$1,100.00
Total to date - \$4,500.00

Location - - -136-2824 - McMinnville-Three Mile Creek Sec., Three Mile Lane
Highway. 1st authorization - \$800.00

The Engineer also reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration, the Commission approved the respective surveys as reported, and adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys herein-after designated and described, together with their identifying location map file numbers, as shown in the map filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highway involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
8C28-1	4-2820	Clatsop	Reconn.	Svenson-Westport	Columbia River

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

R. I. Stuart & Sons, Contract No. 2007, for furnishing crushed rock, in stock piles, for the Diamond Lake Section of the West Diamond Lake Secondary Highway and the Crater Lake-North Secondary Highway, in Douglas and Jackson Counties, requested an extension of time to July 18, 1939, within which to complete this project. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on September 14, 1937, and that the specified completion date was October 31, 1938. He gave as his opinion that there is no valid reason why the contract could not have been completed within

the time specified and accordingly recommended the granting of the extension now requested subject to the condition that the contractor be required to reimburse the state in the amount of the total engineering costs incurred by the state subsequent to the date of completion specified in the contract. The Commission approved the recommendation unanimously.

F. C. Dillard, Contract No. 2100, for clearing the Salt Creek Section of the Willamette Highway, in Lane County, requested an extension of time from December 31, 1938, to July 10, 1939, within which to complete this project. He attributed his failure to complete the contract within the specified time limit to bad weather conditions and particularly early snowfall, which necessitated closing down the work earlier than was anticipated. The Engineer advised that the reason given by the contractor for failure to complete this job by December 31, 1938, the specified date of completion, is correct. He recommended, in view thereof, that the extension requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Fisher Bros. on June 7, 1939, completed their contract No. 2140 for furnishing crushed rock in stock piles for the Crescent-Beaver Marsh Section of The Dalles-California Highway, in Klamath County, according to the requirements of the contract, or modifications thereof, and that said job is now ready for acceptance by the Commission. The following resolution accepting this project was offered and was adopted by the Commission by unanimous vote:

WHEREAS, the Engineer has reported that Contract No. 2140 with Fisher Bros., for furnishing crushed rock in stock piles for the Crescent-Beaver Marsh Section of The Dalles-California Highway, was completed on June 7, 1939, according to the terms and provisions of the contract, and that said job is now ready for acceptance,

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contract No. 2140 for the construction of said state highway project be declared completed according to the terms of the contract and said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Commission set Thursday, July 27, and Thursday, August 31, 1939, as the dates for its regular meetings in July and August and instructed the Secretary to make the usual arrangements to hold these meetings in the Auditorium of the Public Service Building, Portland.

The meeting was declared adjourned at 10:45 o'clock a. m.

JUN 21 1939

Reedsport, Oregon, June 21, 1939

The State Highway Commission met in special session at 11:00 o'clock a. m. in the council chamber of the Reedsport City Hall, in accordance with notice previously given the Reedsport City Council, to secure expressions from the people of this city relative to the rerouting of the Umpqua Highway into and through Reedsport. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were 15 local citizens, including Mayor E. G. Dunn, William A. Lovelace, and M. Kelley.

Chairman Cabell called the meeting to order and explained its purpose and the law which requires the Commission to conduct a public hearing in any city or town before it changes the route of a state highway into or through such city or town. The Engineer exhibited a map showing the proposed rerouting of the Umpqua Highway in Reedsport, and explained the engineering features involved. Chairman Cabell then invited the local citizens to express themselves either for or against the proposed change.

Mr. Kelley stated that he owns a service station at the north end of Reedsport, which will be somewhat affected by the change, and inquired particularly as to whether or not the grade of the highway would be altered to any extent in front of his premises. He was informed that indications are that there would be practically no change in the existing grade line at this point. Mr. Kelley also asked for better highway drainage than now obtains and was informed that such matter would be properly taken care of as one of the details of construction.

Mr. Lovelace expressed himself as being well satisfied with the proposed change, as did also Mayor Dunn. Mayor Dunn also asked for the following improvements:

Landscaping of the area included within the wye connection of the Umpqua Highway and the Oregon Coast Highway, and the betterment of the approach of 8th Avenue to the Oregon Coast Highway by widening the existing fill and extending the existing culvert at such location.

He explained that the City of Reedsport wants to eliminate the unsightly conditions that exist at the wye connection, hence their request for the landscaping of this area; also, that the city is spending considerable money for the improvement of some of its most important streets, of which 8th Avenue is one, and would like for the State Highway Commission to cooperate by improving the intersection of this particular street with the Oregon Coast Highway.

After discussion the Commission referred these projects to the Engineer for investigation and report.

Dr. Fields, of Gardiner, was present and advised the Commission that he is landscaping his property which fronts on the Oregon Coast Highway in Gardiner, and needs, in connection therewith, the removal of some earth material that is on the highway right of way. He asked the Commission to assist him by authorizing the removal of such material with state forces. The matter was referred to the Engineer for investigation.

Following the hearing, the Commission inspected the Oregon Coast Highway in Gardiner, the improvement of which is contemplated. In this connection the Engineer requested authority to conduct a preliminary survey of this highway north of Gardiner so as to determine the proper location for the permanent highway in that locality with relation to the permanent highway location through the town. The Commission granted the request by unanimous vote.

There being no others present desiring to be heard on any matter, Chairman Cabell declared the meeting adjourned at 11:15 o'clock a. m.

W. B. Aldrich
State Highway Engineer

Henry F. Cabell
Chairman

H. B. Glaisyer
Secretary

Huron W. Clough
Commissioner

Portland, Oregon, June 22, 1939

The State Highway Commission met in special session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room:

BAKER-UNITY HIGHWAY
BAKER-GIBBS RANCH SECTION - OILING

Norris Bros.	\$ 4,850.50
Babler Bros.	4,850.50
J. C. Compton	4,996.70
McNutt Bros.	5,861.00

The Engineer reported receipt of a request from the Columbia Truck Line for the use of the state's magnet to remove nails and small pieces of scrap iron from a private road in Wallowa County, over which it is proposed to conduct log-hauling operations. He pointed out that it is contrary to the Commission's established policy to loan its equipment to private individuals because of the undesirable precedent that would be established thereby. The Commission decided not to deviate from this policy but authorized the loan of this equipment to the County Court of Wallowa County, which would not be deviating from the established policy, and the County Court could then make whatever arrangements it desired with respect to the use of the equipment on the private road.

JUN 22 1939

A delegation from Umatilla County, consisting of County Judge Carl W. Chambers and County Commissioners Wm. P. Meiners and Bill Switzler; State Representative Carl Engdahl; Roy Ritner, Mayor F. C. McKenzie of Hermiston, and a Mr. Dodd of Hermiston; also, County Judge Nelson B. Higgs of Harney County, came before the Commission in regard to the reconstruction of the Old Oregon Trail between Hermiston and Umatilla so as to eliminate existing railroad grade crossings. Judge Chambers headed the group and introduced the speakers.

Mr. Engdahl presented the principal arguments on behalf of this project. He advised that the town of Umatilla has become a place of considerable importance since the construction of Bonneville Dam and that a good deal of development work is now being carried on there, particularly by some of the large oil companies, which recognize this town as a desirable center for the distribution of their products into Eastern Oregon and Washington, as is evidenced by the fact that they are now constructing large storage facilities for gasoline and oil products which they believe they can barge up the Columbia River from Portland and distribute from Umatilla much more cheaply than by the method now used. Similar savings in freight expense, he said, will accrue to wheat haulers when their plans for the handling of wheat at the dock, in Umatilla, have been completed; but, in order to realize the full benefit of river transportation, the wheat haulers as well as the oil companies will need much better highway facilities than now exist. He urged particularly the straightening of the highway and the elimination of the railroad grade crossings, especially the one at Hermiston.

Mr. Ritner declared that the Port of Umatilla is the seaport for the entire eastern part of the state. He advised that one boat line is now operating between Portland and Umatilla and that another is to start soon; also, that the people of this district feel that they are entitled to a good road leading to this port, particularly because of the savings that will accrue by reason of reduction in freight rates in the shipping in of gasoline products and the trucking out of wheat. Mayor McKenzie exhibited a map of the town of Hermiston on which was shown the route of the proposed highway passing through this town, which route commences at a point on the present highway about one-fourth mile south of Hermiston and extends thence northerly to First Street, following along First Street to the northerly city limits and thence to the town of Umatilla. He pointed out that such route would eliminate 5 railroad grade crossings between Hermiston and Umatilla and would reduce by 75 per cent the volume of traffic that now crosses the railroad tracks in the town of Hermiston, where accidents frequently occur.

Mr. Dodd endorsed the remarks of the other speakers and added that the present road between Hermiston and Umatilla is in an unsatisfactory condition and will not stand up long under the heavy loads of wheat, gasoline, and other products that are being transported over it. He exhibited pictures of gasoline trucks that are now being operated out of the town of Umatilla, and declared that a good road between Umatilla and Hermiston will be of great help in securing the Umatilla port. County Commissioner Switzler also spoke in favor of this project. He declared that approximately 40 gasoline tank trucks operate over this road each night and that the present road cannot be expected to stand up under such heavy traffic.

County Judge Nelson B. Higgs, of Harney County, also endorsed this project from the standpoint of securing reductions in the price of gasoline for the benefit of the people of his county.

Chairman Cabell thanked the delegation for its appearance and advised that the Commission realizes the value of the open river and hopes that it will develop as anticipated. However, as to the building of a new highway between Umatilla and Hermiston, the Commission is of the opinion that it should defer such project until traffic develops; otherwise, the cost of constructing an entirely new highway could not be justified. He also pointed out that the Commission has plans for the construction of a cutoff between Stanfield and Boardman which will reduce the highway distance between these points several miles, and, when constructed, will take away from the present road between Hermiston and Umatilla a large percentage of the traffic that now uses this road and in all probability will reduce greatly the volume of traffic over the grade crossing in Hermiston. In view of this situation, he added, the Commission believes that it should wait and see if traffic to the Port of Umatilla develops to the extent it is anticipated. This concluded the conference.

Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, and Mr. William Baer, County Commissioner of Deschutes County, came before the Commission in regard to the construction of the forest highway section of the Century Drive Secondary Highway between Bend and Elk Lake. Also present were Messrs. Lyle F. Watts, Regional Forester, and James Frankland, Regional Engineer, representing the U. S. Forest Service; W. H. Lynch, District Engineer, H. D. Farmer, Senior Highway Engineer, and T. M. Davis, Highway Engineer, representing the Bureau of Public Roads.

Mr. Peoples gave as his understanding that the Highway Commission and the government agencies have under contemplation the construction of a light-oil treatment on the existing road between Bend and Elk Lake rather than a standard improvement, as was originally planned, and advised that their object in appearing before the Commission at this time is to enter a protest against such type of improvement because they feel that the road is of sufficient importance to justify a higher type of construction, and that they are entitled to more consideration than has been given them. He admitted that probably the traffic that uses the road would not justify the construction that was originally contemplated, but asked for a better improvement than simply the oiling of the present road. He said that the south portion of the Century Drive Loop Road is good up to Elk Lake and the northerly end is good from Bend to the forest boundary, but the balance is poorly aligned, narrow, and dusty and all that they are asking for is that this portion be improved to compare favorably with the balance of the road.

The Engineer estimated that it would cost more than one million dollars to construct this entire road, which is about 40 miles long, to proper standards; and that to grade, surface, and oil the 20-mile section between Bend and Elk Lake would cost approximately \$640,000 for a high-type improvement. He estimated the cost to construct this 20-mile section with maximum 8-per cent grades, 20-degree curves, 20-foot roadbed, and an oil surface 12

feet wide, at \$200,000. After considerable discussion, Mr. Peoples indicated that such type of improvement would meet with their approval. A definite decision on this matter was deferred by the Commission until the next meeting. It was agreed that the Commission in the meantime would make an inspection of the road so as to get first-hand information regarding it.

Mr. Peoples then inquired as to the status of the Warm Springs Secondary Highway construction. He was informed that the Commission's construction program contains an item of \$25,000 of 1939 federal lands funds and \$30,000 of state funds for expenditure on this road in the vicinity of Warm Springs Creek, including a bridge over this stream, and that the contract for this project will probably be awarded by the Commission this fall. He was further informed that the Commission has found it necessary to allocate all of the 1940 federal lands moneys to the I.O.N. Secondary Highway in order to complete this highway across the State of Oregon, in view of which the next moneys available for allocation to the Warm Springs Highway will be the 1941 federal lands funds, a program for which will probably be arranged in the fall of 1940.

Commissioner Baer asked the Commission to furnish engineering service in connection with the removal of a rock point on the Cline Falls Secondary Highway just north of the town of Tumalo. He said that this improvement is quite necessary in order to improve sight distance and if the state could furnish the required supervision the county would remove this rock point at county expense. The Commission approved the request by unanimous vote.

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, was present and discussed with the Commission matters pertaining to the forest highway section of the Weston-Elgin Secondary State Highway, in Umatilla County. He pointed out that the forest highway program calls for an expenditure of \$45,000 for the oiling of this section, but investigations reveal that such sum is insufficient to finance the work, due to the fact that there is considerable grading work to be done in connection therewith; so, unless additional funds from some other source can be provided, it will be necessary to construct a low type of improvement. He estimated that a satisfactory project, consisting of an 18-foot roadway, surfacing 8 inches thick, and a light-oil treatment would cost approximately \$55,000, or \$10,000 more than the budgeted amount. After a lengthy discussion, the Commission by unanimous vote approved an expenditure of \$10,000 of state funds to make up this deficit, if necessary.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

A delegation representing the Oregon Coast Highway Association and consisting of the following members came before the Commission and presented a unified program for 1940 activities along the Oregon Coast Highway: Mr. A. B. Sanders, Secretary of the Association; County Judge Guy Boyington and County Commissioners John Slotte and James Elliott, of Clatsop County; Tom Cuning, Guy Hickok, Fred Ransom, G. C. Barlow, and F. G. Mauser, all from Clatsop

County; County Judge Harland M. Woods and County Commissioner E. H. Lindsey, Sam G. Reed, John Aschim, W. F. Nichols, Claude Barrick, George D. Riechers, and J. C. Rogers, all of Tillamook County; Harold Hickerson, Henry Kern, J. E. Norton, Lafe Compton, Ben Chandler, and John Ferguson, all of Coos County; County Judge A. H. Boice, Roy Carter, M. E. Kelly, Jay Moetyner, Frank Seale, and Dr. D. E. Baird, all of Curry County; County Judge Clinton Hurd and County Engineer P. M. Morse, also Earl Hill, of Lane County; and County Judge Franklin E. Gilkey, of Lincoln County.

Mr. Sanders headed the group and introduced the speakers. He mentioned four projects which, he declared, are the most pressing needs of the Oregon Coast Highway, and advised that this 4-point program, which follows, has been agreed to unanimously by representatives of the seven counties along the coast:

1. Complete and oil the highway around Neahkahnie Mountain, in Tillamook County, and construct a lining in Arch Cape Tunnel.
2. Adopt a definite location for the Oregon Coast Highway between Newport and Otter Rock, in Lincoln County, as a guide to the people of this district in the development of their holdings.
3. Commence the reconstruction of this highway between North Bend and Coquille, starting at any place that the Commission thinks best.
4. Reconstruct the highway from the north edge of Port Orford to Mussel Creek, a distance of 15 miles, by eliminating curves and making other necessary improvements; also, reconstruct the section just south of the Rogue River Bridge at Gold Beach.

Mr. Sanders then called upon the other members of the delegation to express their views.

County Judge Guy Boyington, of Clatsop County, endorsed project No. 1, particularly urging the completion of the highway between Neahkahnie Mountain and Cannon Beach. He strongly urged this work in 1940 and asserted that Clatsop County is entitled to this improvement because it has fulfilled its obligation to the state with respect to this road.

County Judge Harland M. Woods, of Tillamook County, also endorsed project No. 1. At his request County Commissioner E. H. Lindsey, also of Tillamook County, made a further statement. Mr. Lindsey predicted a large increase in the volume of traffic over the Oregon Coast Highway upon completion of the Wolf Creek Highway and the Wilson River Highway, which, he said, will emphasize the need for the early improvement and the elimination of the present "bottle neck" on the Oregon Coast Highway between Seaside and Wheeler. County Judge Franklin E. Gilkey, of Lincoln County, urged the Commission to adopt a definite permanent location for the Oregon Coast Highway between Newport and Otter Rock so that the people can develop their properties in accordance therewith.

County Judge Clinton Hurd, of Lane County, spoke in favor of the early reconstruction of the Curry County Section of this highway, particularly the elimination of curves south of Port Orford. At this juncture Mr. Sanders read aloud and filed with the Commission a resolution adopted by the Medford Chamber of Commerce heartily endorsing the 4-point program presented at this meeting. Mr. J. E. Norton, of Coquille, endorsed the entire program in behalf of the Coos County Court. He advised that Coos County is behind this program 100 per cent and urged particularly a start on project No. 3, being the reconstruction of the highway between North Bend and Coquille.

County Judge A. H. Boice, of Curry County, urged the elimination of curves on the highway south of Port Orford, and improvements at Gold Beach and Port Orford.

Mr. Sanders concluded their presentation by offering the services of the Oregon Coast Highway Association in any way possible to bring about the construction of this program.

Chairman Cabell advised, on behalf of the Commission, that the Commission is very glad to know just what the people of the coast counties desire with respect to highway construction and that all of the counties are in agreement with respect to the various projects. He expressed the Commission's appreciation for the spirit of cooperation shown by the members of the Association and advised that the Commission will give due consideration to each project in the formulation of future construction programs.

A delegation from Linn County, consisting of County Judge J. J. Barrett, County Commissioner H. A. Renninger, Honorable Samuel Gerland of Lebanon, and County Commissioner W. H. Malone of Benton County, came before the Commission with regard to a privately-owned park at Cascadia. They urged the Commission to acquire this property for state park purposes and advised that it consists of some 200 acres of land, about 20 acres of which is in camp ground, and on which there is a stand of approximately 4,000,000 feet of first class timber. They also advised that the park contains a mineral spring as well as a good supply of water for domestic purposes; that numerous trails have been constructed throughout the area providing easy access to a number of waterfalls and sightseeing points.

Senator Garland presented the principal arguments. He advised that the park is owned by a Mr. Giesendorfer, who is an elderly gentleman and heavily in debt, there being a \$12,000 mortgage against this park. He further advised that the park can be purchased from Mr. Giesendorfer for approximately \$15,000 but the state will have to pay considerably more than that in the event the mortgagee forecloses, which, indications are, he will do shortly. He asked the Commission to make a thorough investigation of the park and to purchase the same as soon as possible, in the event it is found desirable and the state can finance it, so they can dedicate it at the same time that the Santiam Highway is opened and dedicated this fall. Senator Garland's remarks were endorsed by the other members of the delegation. The Commission ordered an investigation of the property and advised the delegation that its decision would be rendered as soon as possible.

A delegation from Clatsop County, consisting of County Judge Guy Boyington and County Commissioners James Elliott and John Slotte; Tom Cuning, Secretary of the Astoria Chamber of Commerce; G. Clifford Barlow, Guy N. Hickok, Fred Ransom, and F. G. Mauser, appeared before the Commission in regard to the proposed road between Elsie and Fish Hawk Falls, connecting the Wolf Creek Highway and the Nehalem Secondary Highway, as a shortcut road from Portland to Astoria. Mr. Barlow headed the group.

He advised that the members of the Astoria Chamber of Commerce are unanimously in favor of the location recommended in the report of the state's locating engineer, J. F. Waller, and urged the Commission to adopt such route as the permanent location for this road. He alleged that when the former Highway Commission adopted the Wolf Creek Highway location there was a mutual understanding that "when the Wolf Creek Highway was completed first consideration would be given to the construction of a connecting road between Elsie and Fish Hawk Falls", and the purpose of their meeting with the Commission now is simply to remind the Commission of this understanding and to urge the construction of this connecting road as quickly as possible, financing the same as a W.P.A. project, or otherwise.

Judge Boyington gave as his belief that the matter of constructing this proposed cutoff was settled at the time that the Wolf Creek Highway was placed on the state highway system. He recalled the meeting of the Highway Commission in the Multnomah Hotel, Portland, several years ago, when "Portland's short road to the sea" was discussed and arguments were presented in behalf of two alternate routes, and advised that at such meeting Mr. Merle Chessman, Astoria, spoke in favor of the Wolf Creek route and asserted that the people of Astoria would be satisfied with such route if the Commission also approved a connecting road from Fish Hawk Falls to Elsie. He declared that the Commission at that time committed itself to the construction of such connecting road, as is evidenced by the fact that this road was shown on all of the maps that were prepared at that time as exhibits in connection with that controversy. Judge Boyington endorsed the method of financing the project as suggested by Mr. Barlow and advised that he has been informed by W.P.A. officials that when the Wolf Creek Highway is completed some other project must be started in order to take care of W.P.A. labor that has been employed on the Wolf Creek road. However, he said, the delegation is not asking the Commission to build the road immediately but is simply asking that the route be adopted and a definite location surveyed so that the right of way can be secured.

Chairman Cabell advised that he was not a member of the Highway Commission when the Wolf Creek Highway was placed on the state system, so he is not familiar with the arguments presented at that time, but it would be logical to assume that the Elsie-Fish Hawk Falls cutoff was considered, although it is his understanding that no definite commitment was made in regard thereto. He further advised that, in his opinion, the Commission must finish the Wolf Creek Highway before it undertakes another project, so the prospects of early construction of the Elsie-Fish Hawk Falls Section are not very promising, although the Commission will be pleased to bear it in mind in the formulation of future highway programs.

Mr. C. T. Gates, Portland, came before the Commission in regard to his property in Oregon City which is needed by the state in connection with the construction of the new highway in this town. Mr. Gates's property is situate at the northwest corner of the intersection of Main Street with Fifth Street and is needed in order to provide standard width highway right of way along Fifth Street, and it appears that the Commission's Right of Way Department has not been successful in reaching a satisfactory settlement with him for this property. Mr. Gates said that this property represents his life savings and is the only means he has of providing a "meal ticket"; that his present tenant pays \$90 per month rent, and that he has an offer from a prospective tenant who will pay him \$100 per month rental and will also pay for all repairs that are needed for his accommodation. He said that he absolutely does not wish to dispose of his property, but, if he is forced to do so, he will not take less than \$13,500 for the same. He suggested, as a compromise settlement, that the state take off 3 feet from the sidewalk along Fifth Street, which, he thought, would provide a roadway width that would meet the Commission's standards, and advised that he would much prefer the narrowing of the sidewalk to the disposal of his holdings. He agreed to offer no objection to such narrowing of the sidewalk if the Commission would let him keep his property and would remove a certain telephone pole opposite his building. After considerable discussion, the Commission advised Mr. Gates that his proposition would be taken under advisement and a decision rendered after further investigation and report by the Right of Way Department and the Chief Engineer.

A delegation from Lane County, consisting of County Judge Clinton Hurd, County Engineer P. M. Morse, and Honorable Earl Hill, Cushman, came before the Commission at this time in regard to the improvement of the Siuslaw Highway in the vicinity of Cheshire and Triangle Lake. They alleged that the present road is very crooked, narrow, and contains steep grades and, in general, is far below the standard that is required for the volume of traffic that passes over it, particularly in the Lake Creek district. Judge Hurd advised that there are about ten billion board feet of standing timber in this district, consisting principally of fir, that must be trucked to market over this road, inasmuch as there is absolutely no other way for it to be taken out, and the need for the improvement of this highway is imperative. He urged the Commission to authorize a survey of this section to determine the cost of construction, and to rebuild the section at the earliest possible time if that is feasible.

Mr. Hill endorsed the remarks of Judge Hurd. He also pointed out that the improvement of the Siuslaw Highway by the elimination of curves will reduce the mileage from Coquille to Portland considerably, making the Siuslaw road comparable to other routes in that respect. He also pointed out that it will be many years before the so-called "Route F" Highway between Eugene and Florence is completed, and, in the meantime, it is imperative that improvements be made on the present Siuslaw Highway, especially on account of the logs that have to be trucked over it, and to eliminate the hazard of such operations under present conditions.

Chairman Cabell expressed a sympathetic attitude with respect to the marketing of the timber but questioned the economics of the reconstruction of

the road. If the cost of construction, he said, is small, then probably the logical thing to do would be to build it, but if the cost is great, then there is a question whether the Commission would be justified in going ahead with the work. He added that the Commission is without definite cost figures at this time, so cannot make a decision, but will discuss it as soon as figures are available. The Engineer was thereupon instructed to render a cost report on this project at the next meeting.

At 3:30 o'clock p. m. the Engineer announced the following awards of contracts, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Baker-Biggs Ranch Section of the Baker-Unity Highway, in Baker County. 6.07 miles oiling. The Commission received 4 bids for this project, two of which were identical, being those of Norris Bros., Burlington, Washington, and Babler Bros., Portland, each in the sum of \$4,850.50. Inasmuch as this was the lowest amount bid, the Commission has decided to select the successful bidder by lot." (Representatives of Norris Bros. and Babler Bros. were then called to the rostrum and a drawing was made in their presence. The name drawn was that of Norris Bros., and, by arrangement, such contractor was declared to be the successful bidder. The Engineer thereupon announced the results of the drawing and declared Norris Bros. the successful bidders for this project.)

"Third Street Undercrossing on The Dalles-California Highway in the city of Bend, Deschutes County. Reinforced concrete and structural steel undercrossing structure, and grading, surfacing, and oiling approaches thereto. Birkemeier & Saremal, Milwaukie, submitted the low bid of \$116,577.00. The next low bid was submitted by C. J. Montag & Sons, Portland, at \$123,915.25. There were 3 higher bidders. The Commission awards this contract to the low bidders, Birkemeier & Saremal, at their bid of \$116,577.00.

"Provolt-Williams Section of the Williams Secondary Highway, in Josephine County. 5.82 miles grading and 6.49 miles surfacing and oiling; also furnish 2,300 cu. yds, crushed gravel in stock piles. The low bid for this project was that of Newport Construction Company, Portland, in the amount of \$32,999.99. The next low bid was that of R. I. Stuart & Sons, Medford, at \$33,722.50. There were 4 higher bidders. The Commission awards this contract to Newport Construction Company at its low bid of \$32,999.99.

"Bridge over East Fork Illinois River on the Illinois Valley County Road, in Josephine County. 60-foot I-beam span on concrete pier. J. F. Johnston of Newberg submitted the low bid of \$12,928.00 for this project. Tom Lillebo of Reedsport submitted the second-low bid of \$13,373.00. There were 6 higher bidders. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder, J. F. Johnston, when certain conditions have been fulfilled.

JUN 22 1939

"Santiam Junction Maintenance Station on the Santiam Highway, in Linn County. Construction of two frame dwellings and one frame maintenance building, with gas pumps, tanks, and canopy. The low bid received for this project is that of Odom Construction Company, Oregon City, in the amount of \$26,117.00. The next low bid is that of Tom Lillebo, Reedsport, in the amount of \$26,568.50. There were 5 higher bidders. The Commission awards this contract to Odom Construction Company at its low bid of \$26,117.00.

"Salem-Middle Grove Section of the Pacific Highway East and Silverton County Road. 0.3 mile grading and paving and 2.5 miles pavement widening and resurfacing. The apparent low bidder on this job was J. C. Compton, of McMinnville, with his bid of \$34,958.50, and Warren Northwest, Inc., Portland, second-low, with their bid of \$36,921.90. There were 3 higher bidders. However, both of these contractors also bid on the Wheatland Junction-Salem Section, which bids have a bearing on the award of this job. Therefore, I will read the bids on that job also at this time.

"Wheatland Junction-Salem Section of the North River County Road, in Marion County. 1.2 miles grading and paving and 2.8 miles pavement widening and resurfacing. The apparent low bidder on this job was J. C. Compton with his bid of \$65,745.50. The second-low bidder was Warren Northwest, Inc., Portland, at \$66,625.00. However, in the combination bid on this job and the Salem-Middle Grove project, Warren Northwest agreed to deduct \$5,000 from the total amount bid for the two jobs if awarded both contracts, which leaves \$98,546.90 as the net total of their combination bid on both jobs. J. C. Compton made no reduction for the award of both jobs, which leaves him the second-low bidder on the combination with a net total of \$100,704.00 for the two projects. There were 4 higher bidders on the Wheatland Junction-Salem Section. The Commission awards the contracts for both these jobs on the basis of the low combination, and therefore both contracts are awarded to Warren Northwest, Inc., who submitted the low combination bid of \$98,546.90 for the two jobs.

"Sandy Boulevard Section (44th Avenue to 74th Avenue Unit) of the Columbia River Highway, in Multnomah County. 1.72 miles pavement widening and resurfacing. Edlefsen-Weygandt Company, Portland, submitted the low bid of \$112,952.30 for this project. Theodore Arens, Portland, submitted the second-low bid at \$114,596.00. There were 3 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Hillsboro Airport-Ray's Ranch Section of the Hillsboro-Cornelius Pass County Road, in Washington County. 1.0 mile grading, surfacing, and oiling. The low bid received for this project was that of McNutt Bros., Eugene, at \$18,283.50, using road oil, and \$18,281.00, using tar. The second-low bid was that of Saxton, Looney & Rialley, Oak Grove, at \$19,994.00, based on the use of tar. This firm did not

submit a bid based on the use of road oil. There was only 1 higher bidder. The Commission awards this contract to McNutt Bros. at their low bid of \$18,281.00, based on the use of tar.

The School Board of the town of Manning, represented by C. P. Tolke, J. E. Hiatt, George Saxton, and Bruce F. McCann, Clerk of the Board, was present in regard to settlement for right of way that is needed for the Wolf Creek Highway at Manning, involving the moving and re-establishment of the Manning School. The Assistant Attorney explained that the Commission several months ago authorized the moving and re-establishment of this school building on a site located across the highway from its present location, but the site selected did not meet with the approval of the school board so an alternate site was selected which also did not meet with the approval of all of the members of the Board, in view of which it was thought best to present the problem to the Commission again. He recited details of the original plan which included the moving of the present building to a new site across the highway, the making of necessary repairs, new water and sewer connections, et cetera, and provided an allowance of 5 per cent of the cost of re-establishing the building to pay the expense of supervising the work.

Mr. Hiatt gave as his thought that the 5 per cent allowance for supervision is not enough and requested 7 per cent allowance for such purpose, advising that, in his opinion, it would cost the district that amount even if the work consisted of only moving and repairing the present building. Mr. Saxton stated that he objected to the original site because it was in low ground in close proximity to a slough and that he objected to the alternate site because it is so far removed from the center of their school district.

The question also arose as to what disposition the Commission intends to make of that portion of the present school site that is not required for right of way. The members of the School Board expressed their disapproval of the use of such property for commercial purposes. They were informed that the Commission has no intention of commercializing this extra land, and, if necessary, would approve the insertion of a clause in the deed to that effect. After considerable discussion the Commission referred this matter back to the Attorney for further study. He was authorized by the Commission to assist the School Board in condemning a satisfactory site should that be necessary.

Mr. Saxton then mentioned a personal matter. He advised that the Wolf Creek Highway is to be constructed across his land in a location that will result in some of his buildings being on one side of the highway and some on the opposite side. Further, that the highway will be in a 13-foot cut at such point. He said that he would like to have all of his buildings on one side of the highway, but, in order to do so, considerable material will have to be removed. He offered to give this material to the state for use in constructing the highway embankment nearby if the state wants it, which would facilitate the preparation of the new site for his buildings. The Commission referred this matter to the Engineer for investigation.

At 4:30 o'clock p. m. the Commission adjourned to Room 210, Congress Hotel, for the consideration of routine matters, all Commissioners being

JUN 22 1939

present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

County Judge A. R. Bowman, of Crook County, was present in regard to the reconstruction of the Ochoco and Warm Springs Highways in Prineville in connection with which the Commission held a public hearing in Prineville on May 17. He urged the Commission to at least acquire the right of way for this proposed improvement, which he thought could be purchased now for considerably less than later on. He particularly urged the acquisition of right of way between the civic center and the Crooked River bridge, a short distance west of the city limits. The Commission instructed the Attorney to secure options for such right of way as soon as he can spare a man for the purpose.

The Attorney reported on the investigations conducted by him relative to the acquisition of right of way across the Knapp property at Port Orford. He said that the state will need about 20 acres of Mr. Knapp's land, for which he is asking the sum of \$824, which is at the rate of \$40 per acre. He explained that this matter has come up at this time because Mr. Knapp proposes to subdivide the property and is desirous of platting his land in conformance with the proposed highway. Chairman Cabell pointed out that the Commission does not have funds available to build this section now, although it will probably be one of the first projects to come up for construction in the near future. In view of the circumstances, the Commission by unanimous vote authorized and instructed the Attorney to secure an option from Mr. Knapp for this right of way.

The Engineer brought up for discussion the matter of the selection of an advertising agency to handle publicity matters during the ensuing year, in connection with the Commission's Travel and Information Department. He pointed out that this matter should be decided upon soon because whatever company is given the business will need all of the time possible between now and the first of the year for the preparation of material for its campaign. The Commission discussed this matter at considerable length but deferred action thereon pending a recommendation from the Advisory Committee on Publicity matters, which committee expects to meet soon.

The Assistant Attorney rendered a brief report on the 1939 right of way budget. He advised that the Commission approved an expenditure of \$550,000 during 1939 for right of way purposes and that up to the present time \$283,000 has been obligated. The Commission took no action on this report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful consideration, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other

material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney requested authority to condemn the following parcels of land that are needed for right of way or quarry purposes:

1. Right of way for the Cushman Ranch-Trail Section of the Tiller-Trail Secondary Highway across the properties of Willard F. Horn and Irwin H. Howe, in Jackson County.
2. Right of way for the Provolt-Williams Section of the Williams Secondary Highway across the property of Albert Bigelow, in Josephine County.
3. Right of way for the Washington State Line-Shelton Canyon Section of the Enterprise-Lewiston Highway across the property of Elmer W. Applegate, in Wallowa County.
4. Quarry site from W. K. Verling for use in surfacing the Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway, in Lake County.
5. Quarry site from H. E. Smidth for use in surfacing the Drews Valley Section of the Klamath Falls-Lakeview Highway, in Lake County.

He explained that he has been unable to contact the owners of the property needed for the Tiller-Trail Highway right of way, that condemnation is necessary to clear title to the right of way needed for the Wallowa County project, and that he has been unable to reach a satisfactory settlement with either of the quarry site owners, hence his request for condemnation.

After discussion the Commission approved the request and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Cushman Ranch-Trail Section of the Tiller-Trail Highway
Provolt-Williams Section of the Williams Highway
Washington State Line-Shelton Canyon Section of the Enterprise-Lewiston Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Cushman Ranch-Trail Section of the Tiller-Trail Highway
7027-Willard F. Horn and Gertrude Horn
7032-Irwin H. Howe and Rena Howe
Provolt-Williams Section of the Williams Highway
6857-Albert Biglow
Washington State Line-Shelton Canyon Section of the Enterprise-Lewiston Highway
6560-Elmer W. Applegate

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

JUN 22 1939

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway

Drews Valley Section of the Klamath Falls-Lakeview Highway

land and property owned by or in the possession of the following parties and/or persons, to wit:

Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway

6897-W. K. Verling

Drews Valley Section of the Klamath Falls-Lakeview Highway

5532-H. E. Smidth

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall

be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Assistant Attorney brought up for discussion the proposed settlement with Mr. Rex E. Rose for the right to take water from an unnamed spring on Mr. Rose's property near Manning, Oregon, for domestic use, et cetera, at the Wolf Creek Highway W.P.A. camp located at Manning, and for use at the state's maintenance headquarters which is to be established on the site of the W.P.A. camp when such camp is discontinued.

He advised that Mr. Rose has prior rights to the water from this spring but has agreed to transfer his rights to the state upon the payment of \$500, which sum is made up of the following items: \$250 for the use of the water by the W.P.A. camp during its lifetime, which is estimated at not less than 40 months; \$200 for granting to the state the permanent right to use the water from this spring in the state's maintenance headquarters; and \$50 for a permanent easement to the state to maintain a pipe line across Mr. Rose's land to convey the water from the spring to the W.P.A. camp and the maintenance headquarters.

He gave as his thought that this settlement is as good as can be obtained from Mr. Rose, particularly in view of the fact that the pipe line has already been constructed by W.P.A. forces and that the water from this spring is now being used in the W.P.A. camp, and for the further reason that there is no other suitable water supply available in the vicinity. After considerable discussion, the Commission approved such settlement by unanimous vote.

The Assistant Attorney requested authority to insure the building recently acquired from L. E. Dayton on the proposed new location for the Pacific Highway just south of Grants Pass. He said that this is a store and residence building which is being rented at the present time for \$35 per month,

and, in his estimation, it would be advisable for the Commission to insure it for \$2,000 inasmuch as it is not eligible for state insurance. The Commission approved the suggestion by unanimous vote.

The Commission had under consideration a number of claims that have been filed against the state as a result of a fire that got beyond the control of the State Highway Department sectionmen in the process of burning grass along the right of way of the John Day Highway near Arlington, in Gilliam County. The Engineer advised that these sectionmen, in the course of their regular duties, are required at times to burn grass along the highway right of way, and, in this particular instance, it so happened that the fire got beyond control and burned over considerable acreage of privately-owned pasture land which is valued highly by the respective owners. It was his thought, inasmuch as the state employees were responsible for the fire, that the owners should be reimbursed for their losses. The Commission concurred in the viewpoint of the Engineer and, after discussion, instructed the Attorney to contact a number of responsible land owners in this vicinity and ascertain the value of the burned-over land as a basis upon which to negotiate settlements with the owners of the property. He was instructed to secure such information immediately and report his findings at the next meeting of the Commission.

The Attorney reported the results of negotiations with a number of property owners for the acquisition of several small recreational sites along the Wolf Creek Highway between Sunset Camp and Elsie. He advised that C. W. Parker, Right of Way Agent, contacted representatives of the Sunset Logging Company, the Oregon American Lumber Company, the Rupp Realty Company, and others, with respect thereto and was unable to secure any satisfaction whatsoever, and it appears that if the Commission wants to acquire these tracts it may be necessary to resort to condemnation. He referred particularly to the four parcels belonging to the Sunset Logging Company, consisting of 23.79 acres, .95 acre, 10.18 acres, and 7.21 acres, respectively, which he valued at \$7,000. After considerable discussion, the Commission instructed the Attorney to negotiate further with the owners of all of the tracts under discussion and to secure options, if possible, for each. He was authorized to condemn the four tracts owned by the Sunset Logging Company, if necessary.

The Engineer brought up for discussion the matter of assisting further in the financing of the Wolf Creek Highway W.P.A. project. He pointed out that the Commission heretofore authorized an expenditure not to exceed \$10,000 to finance non-labor items so that this work could be carried on during the month of June when it was expected that additional W.P.A. funds would be authorized. However, the new W.P.A. funds have not yet materialized; so, unless the state advances additional moneys for non-labor items, it will probably be necessary to close down the work. In view of the circumstances, the Commission voted unanimously to advance state funds in an amount not to exceed \$5000 to carry on the work during the month of July. The Attorney was instructed to prepare an appropriate agreement covering the matter. (Agreement was prepared and signed on July 6, 1939.)

The Engineer requested authority to submit to Mr. C. C. Hockley, Public Works Administrator for Oregon, when called for, the projects heretofore

tentatively approved by the Commission for the new P.W.A. program. He predicted early approval of the new P.W.A. program by Congress and gave as his thought that the Highway Commission should be ready to submit its projects to the P.W.A. authorities upon short notice. After discussion, the Commission approved the request by unanimous vote.

The Commission discussed and approved, by unanimous vote, a salary increase of \$25.00 per month for the Secretary, H. B. Glaisyer.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Washington County, providing for county maintenance of the Hillsboro-Cornelius Pass County Road when reconstructed by the state.

Agreement with Marion County, providing for county maintenance of the Salem-Silverton County Road when reconstructed by the state.

Agreement with Marion County, providing for county maintenance of the North River County Road when reconstructed by the state.

Agreement with Edward L. Dimmitt relative to Vista House concession at Crown Point.

Agreement with Ralph Billings, Ashland, relative to the construction of steps and retaining wall on the Pacific Highway in front of his premises just north of Ashland.

Agreement with Josephine County, providing for the improvement of a portion of the Illinois Valley County Road by the construction of a bridge over the East Fork of the Illinois River and grading and surfacing a section between Engineer's Stations 83+00 and 113+60, 0.58 mile in length.

Agreement with Josephine County, providing for county maintenance of a 0.58-mile section of the Illinois Valley County Road, in Josephine County, including a bridge, being Project F.A.S. 42-A(1), after construction of the same by the state.

Agreement with Coos Bay Construction Company disposing of its claim for extra compensation arising out of its contract with the Commission for the construction of the Elsie-Nehalem River Section of the Wolf Creek Highway, State Highway Contract No. 1949.

Agreement with Clackamas County, covering the subject of stairway construction from the Pacific Highway East to the Willamette River, in Oregon City.

Bargain and Sale Deed, conveying unto Frits Luscher and May Vivian Tohl certain land situate adjacent to the Upper Columbia River Highway, in Multnomah County.

There being no further business to come before the Commission at this time, the meeting was adjourned at 6:30 o'clock p. m.

R. H. Baldock
State Highway Engineer

Commissioner
Huron W. Clough
Commissioner

John Day, Oregon, July 18, 1939

The State Highway Commission met in special session at 9:00 o'clock p. m. at the Oliver Ranch, near John Day. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
Herman Oliver, Commissioner to be appointed
R. H. Baldock, State Highway Engineer
H. G. Smith, Construction Engineer
J. N. Bishop, Maintenance Engineer
W. C. Williams, Division Engineer

The Commission approved the tentative letting for August 31, 1939, the projects to consist of the following:

1939 Federal Aid Program

Wolf Creek Bridges (3)	\$ 35,000
Nehalem Secondary, Surface and Oil	71,000
Salem, South, Grading and Paving	100,000
Dundee-West Dayton, Grading and Paving	100,000
Clackamas County Line-Hubbard, Paving	150,000
Albany Section, Grading and Paving	220,000
Bear Canyon, Unit 3, Grading	50,000
North Roseburg, Roadside Improvement	5,000
Butte Falls Road, Surface and Oil	20,000
Blalock-Arlington, Grade, Surface, and Oil	155,000

Authorization was given for the transfer of the \$30,000 heretofore set up for the Jimmy Creek-North Powder Section, to augment the Blalock-Arlington allocation.

JUL 18 1939

1940 Federal Aid Program

Arch Cape Tunnel, Lining and Paving	\$ 50,000
Albany Section, Grade and Pave	81,000
Siskiyou Mt., Grading	200,000
Owyhee River-Tudor Ranch, Grading	133,000
Buchanan-Juntura, Surface and Oil	160,000
Pendleton-Adams, Grading and Topping	100,000

1938 Federal Aid Program

Cow Hollow Creek-Owyhee School, Grade and Top	\$ 15,000
---	-----------

The Commission also authorized the following projects for the October 5, 1939, letting, or as soon as they can be conveniently prepared:

1939 Federal Aid Program

Siletz Secondary, Grade, Surface, and Oil	\$ 30,000
Oregon City, South Unit, Grade & Pave	160,000
Troutdale-Dodson, Grading	216,000
Petersburg-Fairbanks, Grade, Surface, and Oil	16,000
Moro-Hay Canyon, Grade and Surface	10,000
Summer Lake, Roadside Improvement	5,200
Muddy Creek-Haines, Grade and Surface	120,000
Stanfield-Pendleton, Roadside Improvement	3,000
North Powder-Muddy Creek, Roadside Improvement	4,800

1940 Federal Aid Program

Denver Avenue, Paving	\$ 25,000
Neahkahnie Mountain, Grade, Top, Bridge, and Walls	150,000
Siskiyou Summit-California Line, Surface and Oil	120,000
Grants Pass-Green Creek, Grade and Pave	105,000
Bunker Hill-Marshfield, Bridge and Paving	100,000
Cottage Grove, South Unit, Grade and Pave	73,000
Reedsport Section, Paving	30,000
Klamath Agency-Modoc Point, Surface and Oil	100,000
Warren-Scappoose, Grade and Pave	100,000

Some discussion was given to the projects scheduled for letting in November and later, and the Commission authorized the transfer of funds from the Troutdale Grade Separation to the Tigard Grade Separation in order to advance the construction of the Tigard Grade Separation and defer the Troutdale Grade Separation so that it would not be built greatly in advance of the remainder of the road.

The Commission also definitely authorized the John Day-Prairie City project to be contracted in November. The remaining projects for November and later were authorized to be contracted in an orderly manner as funds were available.

OCT 10 1939

Some discussion was had of the P.W.A. projects. The Commission authorized the inclusion of the rebuilding of a reclamation flume on the Lost River project, and the increase of the Grant County Line-Patrol Station project from \$60,000 to \$85,000.

The Engineer recommended and the Commission approved the following increases in the maintenance and minor betterment budgets:

Bridges:

Coos Bay Bridge, Extra Painting	\$13,000
Yaquina Bay Bridge, " "	4,000
Wolf Creek Highway Detour Bridges, Repairs	1,600
Days Creek Bridges on Tiller-Trail Highway, Repairs	2,500
Cottonwood Creek Bridge, Repairs	2,500

Buildings:

Extend Storage Building at Medford	\$ 1,500
Extend Storage Building at Enterprise	<u>1,500</u>

Total \$26,600

Non-skid Surfacing:

Newberg-Woodburn Highway, 5.5 miles	\$ 6,000
North Santiam Highway, 11.4 miles	<u>12,000</u>

Total \$18,000

The Commission also approved the following oiling and extra-maintenance projects:

Oiling:

Havana-Helix Secondary Highway, in Umatilla County	\$ 6,000
Lafayette Secondary Highway, in Yamhill Co.-3.2 mi.	3,200
Bellevue-Amity Secondary Hwy., Yamhill Co.-6.2 mi.	6,200
Crawfordsville-Holley Sec., Halsey-Sweet Home Sec. Hwy.	3,500
Kings Valley Secondary Highway, Polk County, 4.4 mi.	4,500

Extra Maintenance:

Wolf Creek Highway	<u>\$ 2,500</u>
--------------------	-----------------

Total \$25,900

Grand Total Authorized \$70,500

The Commission discussed the advisability of conducting a location survey to determine a permanent route for the Pacific Highway between Grants Pass and Roseburg, particularly the Sexton Mountain Section thereof. It was the decision of the Commission that such survey should be made in the near future and it was so ordered.

JUL 18 1939

There being no further business to come before the Commission at this time, the meeting was adjourned at 11:30 o'clock p. m.

Commissioner

Enroute Bend to Eugene, July 26, 1939

The State Highway Commission disposed of the following routine matters enroute Bend to Eugene during the afternoon of this day. Present and participating in the discussions were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

The Engineer reported the results of the investigation conducted to determine the losses claimed by several ranchers by reason of a fire started by highway department maintenance forces along the John Day Highway about 8 miles south of Arlington, in Gilliam County. He said that arrangements have been made for settlements with Arthur Wickland for \$181.00; L. L. Montague Estate for \$19.50; Richard S. Hendricks, Jr., \$4.60; Smythe Brothers, \$26.00; Gilliam County, \$3.75; Charles A. Bartalemay, \$8.00; and Everett Bartalemay, \$6.00; which amounts total \$253.85. He recommended payment of these claims in view of the fact that highway department employees were responsible for the setting of the fire. The Commission approved the recommendation.

The Engineer also reported the cost to construct a light oil surface on the Thomas Creek Section of the Albany-Lyons Secondary Highway, in Linn County, as has been requested by residents of that district. He estimated that such improvement, which is 1.62 miles in length, would cost \$1,620.00. The Commission approved the project for construction in next year's program.

The Commission discussed the Engineer's report on the cost to improve the Siuslaw Highway over the summit of the Coast Range, as has been urged by Lane County citizens. The Engineer estimated that to construct this section, which is 2.1 miles long and includes a tunnel, would cost about \$388,000. However, at a cost of about \$363,000 a satisfactory grade could be constructed, substituting an open cut for the tunnel, although such plan would necessitate the lengthening of the section to be constructed about 1½ miles. This estimate, he said, is based on a reconnaissance survey of the entire Siuslaw Highway. The Commission decided to inspect this road before taking definite action on this improvement.

JUL 26 1939

The Engineer rendered a report on the cost to open the Mount Hood Highway from its junction with the Wapinitia Highway to Cooper's Spur Road on May 1 of each year, as previously instructed by the Commission. He estimated that it would cost \$4,250 to open the road on such date, commencing snow removal operations on April 1, as compared with a cost of \$1400 if the opening date were delayed until May 27, which indicates that it would cost the state approximately \$100 for each day that the highway is opened before May 27. He also estimated that approximately 100 cars per day would use this highway between May 1 and May 27, and on that basis the cost would be about \$1.00 per day per car for snow removal operations only during such period. After considerable discussion, the Commission decided, as a trial proposition, to open the highway on May 15 of each year, and so ordered. The Secretary was instructed to transmit this information to the parties interested.

The Secretary presented a letter from County Judge Hugh McLain, of Coos County, requesting the elimination of what is known as "Deadman's Curve" on the Cape Arago Secondary Highway, in Coos County. The Engineer advised that this is a meritorious improvement and that he would like to conduct a stabilization experiment thereon, using Portland Cement as a binder. The Commission indicated its willingness to conduct such experiment but deferred its decision pending a report from the Engineer as to what it will cost to do the work on such basis.

A letter was presented from J. D. Perry, Deer Island, urging construction of the Farr's Corner-Scappoose Section of the Lower Columbia River Highway, in Columbia County, and further requesting an audience with the Engineer to discuss a number of highway matters. The Engineer advised that this project is in the construction program and that right of way for the same has all been acquired with the exception of that needed across a certain cemetery. He was instructed by the Commission to advertise the portion that does not involve the cemetery for bids to be received in either August or September. The Attorney was instructed to obtain the right of way for the cemetery section. It was also decided that Chairman Cabell and the Engineer would call upon Mr. Perry in the near future to discuss the matters that he has in mind.

A letter was presented from the Brownsville Chamber of Commerce requesting the oiling of the $3\frac{1}{2}$ -mile section of the secondary highway between Brownsville and Crawfordville. The Commission approved this project for next year's program.

A petition was presented from numerous users of the Territorial Secondary Highway in Benton and Lane Counties, requesting the oiling of this road from Monroe to the Douglas County line. The Commission denied the request for immediate undertaking in view of the fact that there are no state oiling crews available to do the work and no funds with which to finance it. In this connection the Commission discussed the advisability of extending this secondary highway from its present terminus at the Lane-Douglas County line to a connection with the Pacific Highway near a place known as Anlauf. It appeared logical to the Commission to extend this secondary highway if the constructed road meets the secondary highway requirements. The Commission decided to inspect the road before taking definite action.

A request was presented from Mr. Ben C. Flaxel, attorney, North Bend, Oregon, on behalf of certain residents of Bunker Hill District, Marshfield, requesting the construction of a stairway from the end of the improved portion of Mullen Street to a connection with the Oregon Coast Highway. The Commission indicated a favorable attitude toward this request but deferred definite action thereon pending completion of the construction on the new highway through this district and the correction of slide conditions that now obtain at this place.

A letter was presented from Timber School Board, Timber, Oregon, requesting the construction of a sidewalk on one side of the Nehalem River Bridge at Timber for the benefit and safety of pedestrians, particularly school children who are obliged to cross this structure daily. The Engineer estimated the cost of such sidewalk at \$350.00. The Commission approved the project by unanimous vote.

The Secretary presented a telegram from Mayor G. H. Hanson, of Paisley, Oregon, requesting the oiling of the Fremont Highway full width for a distance of two blocks through the Paisley business district. The Engineer estimated the cost of such oiling work at \$600.00. He pointed out that there is no state highway department oiling crew in that vicinity, which could do the work and that there is no oiling work under way within a reasonable distance. He recommended, in view thereof, that the work be deferred until next year and that investigation be conducted looking toward a more permanent type of improvement. The Commission approved the recommendation.

The Engineer reported that the present contract with Julius Gunnell for the furnishing of free ferry service across Coos River at Enegren Ferry expires on September 30, 1939. He pointed out that the present contract contains provision for extending the contract for a period of two years or any portion thereof and that the Highway Commission has already exercised this privilege, this contract having been extended for a 2-year period from September 30, 1937, to September 30, 1939. He also pointed out that the present contract provides for 16-hour ferry service, whereas numerous requests have been received for service of greater length. He requested instructions as to whether or not to advertise for bids for the continuation of this service and whether or not the Commission desires to render more than the 16-hour service that is covered by the present contract. After discussion, the Commission decided to take alternate bids at its next meeting for the furnishing of 18-hour and 20-hour free ferry service at this location and instructed the Engineer to prepare proposal forms on such basis.

The Commission had under discussion the matter of authorizing the construction of a Rural Electrification Administration power line along the southerly side of the McKenzie Highway between Vida and McKenzie bridge, a distance of about 25 miles. It was pointed out in the discussion of this matter that the highway for the most part along this section lies very close to the McKenzie River and that the maintenance of poles between the highway and the river would detract greatly from the scenery and the best appearance of the highway. The question arose whether or not the pole line should be allowed on such location and whether or not it should be allowed on the

northerly side of the highway, which is now partially occupied by a telephone pole line. The Commission discussed this matter at considerable length and took cognizance of the situation enroute to Eugene over this highway. A decision in the matter was deferred pending further investigation, and report by the Engineer.

The question of granting blanket permits of 30 days' duration for the movement of farm machinery over state highways had the attention of the Commission. The Commission decided unanimously, as a trial proposition, to grant such permits. The Secretary was authorized to issue permits for the time being, subject to the condition that such authority would be rescinded immediately if it were found that the provisions of the permits are being abused and that the movements of such machinery are working adversely to the interests of the general public.

The Commission had under discussion claims against R. A. Wernich, Coquille, in the amount of \$8.31; Sam Houser Chevrolet Company, McMinnville, in the amount of \$1.40; and Bertha Poetsch, Rainier, in the amount of \$1.00; totalling \$10.71. The Engineer advised that certain purchases were made from the concerns represented by the above-mentioned people and it so happened that in each instance a credit accrued to the state which it was intended to take advantage of in connection with subsequent purchases; but, in the meantime, the firms went out of business, which eliminates any possibility of taking advantage of the credits unless they are paid in cash. Repeated requests for such cash settlements, he said, have been refused and it appears that the accounts will have to be declared closed unless the Commission desires to institute suit to collect. In this connection a letter was presented from the Attorney in which he pointed out that the claims are all in small amounts and it is his belief that the Commission is not justified in going to much effort or expense in collecting them. Further, that in his estimation it would cost the state more to institute suit than it would realize therefrom if the case were decided in the Commission's favor. After considerable discussion, and it appearing to the Commission that these bills are uncollectible, the Engineer was instructed to do whatever is necessary to clear the accounts in the records and to relieve the individuals who conducted the transactions out of which the credits developed from any personal responsibility.

The Engineer reported that in conformance with authority previously granted him by the Commission he awarded contracts as follows, the conditions of the awards having been satisfied:

Grading, surfacing, and oiling the Strebin Road-Hosner Road Section of the Troutdale-Sandy Road, in Multnomah County. Bids received May 19, contract awarded July 13, 1939, to H. L. Rice, who submitted the low bid therefor, based on the use of tar.

Pavement widening and resurfacing on the Sandy Boulevard Section (44th Ave. to 74th Ave.) of the Columbia River Highway, in Multnomah County. Bids taken June 22, contract awarded June 26, 1939, to Edlefsen-Weygandt Company, Portland, who submitted the low bid therefor.

The Commission approved the award of such contracts as reported.

The Engineer requested authority to purchase the following equipment:

- 1 - pneumatic-tired lawn mower, estimated cost \$250, for use at the state highway shops in Salem
- 1 - 7000 gallon-per-hour gravity centrifugal pump with 2½ h.p. motor, estimated cost \$250, for use in connection with the making of investigations preparatory to the construction of drainage tunnels, etc.
- 1 - dragline boom, bucket, and necessary cable, estimated cost \$1,350, for use in connection with W.P.A. work on the Wolf Creek and Wilson River Highways and in other localities.

The Commission approved the purchase of this equipment.

The Commission discussed and approved the request from the Attorney to publish a highway pamphlet containing laws applicable to state and county roads. It was explained that heretofore such pamphlet has been published by the Secretary of State in accordance with legal authority but the law requiring this publication was repealed, hence the pamphlet containing the road laws is no longer available; further, that, because of the value of this information to employees of the State Highway Department and to county officials, it would be desirable to publish the laws under the name of the State Highway Commission, which it was thought would cost about \$300.

The Commission also considered the matter of continuing the maintenance of the Elsie-Jewell County Road, in Clatsop County, which has been used for some time past as a state highway detour pending construction of the Wolf Creek Highway. Definite action on this matter was deferred by the Commission pending consultation with the Clatsop County Court. The Engineer was instructed to discuss the matter with County Judge Guy Boyington of that county.

A request was presented from the Richfield Oil Company for permission to use, in the advertising of its products, a picture showing state highway department equipment being serviced by a Richfield Oil Company tank truck. The Commission offered no objection to the use of pictures of this kind for such purpose but declared positively that it would not sign any form of release waiving any claim for consideration or compensation for the use of such pictures, nor authorize anyone to sign such a release or a testimonial.

The Commission had under discussion the adoption of a policy with respect to the removal of gravel from ocean beaches, over which it has control according to law. It was the Commission's decision that individuals desiring to obtain gravel in small quantities from the beach areas for use in connection with the construction of private driveways or foundations for private buildings should be permitted to do so for their own use without permit, but that contractors engaged in the furnishing of gravel for commercial purposes or otherwise shall not be allowed to take such material from the ocean beach

areas except under permit from the State Highway Commission and upon payment of 3 cents per cubic yard for the material taken. Further, that the taking of such material from the ocean beach by contractors and individuals shall be limited to places indicated by the State Highway Commission or its authorized representative. The Engineer was instructed to select the points where such materials may be removed and the Attorney was instructed to prepare a form of permit for approval by the Commission at its next meeting. The Secretary was instructed to bring the Commission's action to the attention of all state highway contractors and local contractors along the Oregon Coast Highway.

The Commission had under discussion the matter of designating as a secondary state highway the county road which extends from the Mount Hood Highway westerly through the towns of Odell and Summit to a connection with the Hood River Secondary Highway, as has been requested by the Hood River County Court. Action on this matter was deferred by the Commission for two or three months, when the Commission expects to give consideration to the placing of several important county roads throughout the state on such system. The Secretary was instructed to so inform the Hood River County Court.

The Commission discussed the matter of granting an easement to the United States Government to construct its Bonneville power transmission pole line over and across 5 tracts of state-owned land in Multnomah and Hood River Counties between Bonneville and Hood River, for a consideration of \$400. It was the Commission's decision that such easement should be granted and accordingly the Attorney was authorized to accept, on behalf of the Commission, the Government's offer in regard thereto.

A letter was presented from the Salem Convention Commission of the American Legion requesting state aid in the construction of a temporary bridge over a drainage ditch on the county road in front of the Salem Airport, to be used during the progress of an air circus which is to be conducted at such place on August 10. The Engineer explained that the Convention Commission anticipates a large crowd at the air circus and is fearful that the present facilities for the handling of traffic will prove inadequate, so have decided to provide another entrance into the grounds if they can secure donations of material and/or labor from some source to assist in the work. He pointed out that the road in front of the airport is not a state highway, hence the Commission does not have legal authority to expend state funds thereon; however, he added, if the Highway Commission wants to aid in this matter, it could do so by loaning materials salvaged from an old bridge nearby, which probably would help out to some extent and would not be an infraction of the law. The Commission concurred in the Engineer's viewpoint and thereupon authorized the loan of such materials to the American Legion.

A letter was presented from the North Lincoln Chamber of Commerce requesting relief from the present auto-parking congestion at Depoe Bay adjacent to the Oregon Coast Highway, in Lincoln County. The Commission referred this matter to the Engineer for investigation and report by the State Parks Superintendent as to whether or not there are suitable parking facilities available adjacent to the highway south of the Depoe Bay bridge structure.

The Commission had under discussion a request from Mr. Paul T. Erb for permission to conduct placer mining operations in an abandoned state-owned gravel pit in Jackson County, said gravel pit being more particularly situate in Lots 7 and 8 of Section 11, Township 36 S., Range 3 W., W. M. The Commission denied the request as a matter of policy; however, instructed the Engineer to ascertain whether or not this gravel pit is of any value for state purposes and if not, if it is valuable for mining purposes. In the event such investigation reveals that the pit is of no value to the state but is of value for mining, then the Commission will consider the sale of the property by auction.

The Secretary presented a letter from the Roseburg Chamber of Commerce with respect to the landscaping of the area within the "wye" formed by the connection of the Pacific Highway with the county road at the north city limits of Roseburg. It was urged in such communication that the Commission make provision in the landscaping project for the construction of a building for use in the dissemination of tourist information. The Commission denied the request because the building cannot be financed with federal funds and because the financing of the same with state funds would establish a precedent that would eventually result in an expenditure of state funds far in excess of the amount the Commission could afford. The Engineer was instructed to so inform the Chamber of Commerce.

The Commission discussed a letter from the City of Bandon urging the early construction of the Bandon Section of the Oregon Coast Highway on the proposed new alignment. The Engineer advised that this project is not included in the Commission's 1940 program, although a goodly portion of the right of way has already been acquired. The Commission decided to give this project serious consideration for construction in an early future program and instructed the Attorney to proceed with the acquisition of the balance of the right of way.

Letters were presented from Mr. Carl Schamoni and Mrs. Julia Lowert of Tigard, protesting the route heretofore selected by the Highway Commission as the permanent route for the Pacific Highway West through the town of Tigard. After discussion the Commission decided not to make any change in its previous decision and instructed the Secretary to so inform Mr. Schamoni and Mrs. Lowert.

A letter was presented from Mr. F. R. Schanck, Consulting Engineer, Portland, urging the improvement of the Oxbow Tunnel Section of the Robinette-Homestead Secondary Highway, in Baker County. The Engineer advised that this tunnel is approximately 4,000 feet long, that portions of the same have caved in, and that the tunnel generally is in a very unsafe condition. To repair the tunnel so that it would be safe for traffic, he said, would cost an enormous sum of money; in fact, far more than is justified by the volume of traffic that would use it. He pointed out that the Commission has already approved an expenditure of \$2,500 to finance the improvement of the road leading over the tunnel so that it can be kept open during the winter season, and an additional \$500 for the improvement of the section between Homestead and Ballard's Landing Bridge, which, in his estimation, should provide a satisfactory road for the people of this district. The Commission decided, in view of the

JUL 25 1939

report, not to make any repairs to the tunnel at this time and instructed the Secretary to so inform Mr. Schanck.

The Commission had under discussion a letter from Mr. Frank T. Morgan, Secretary of the Nyssa Chamber of Commerce, Nyssa, Oregon, suggesting that, when the location for the proposed railroad grade separation structure in Nyssa has been determined from an engineering standpoint, the Commission base the selection of the site upon the wishes of the majority of the property owners affected. He gave as his thought that 80 per cent of the property owners would prefer that the structure be located on Main Street. The Secretary was instructed to inform Mr. Morgan that the Commission's decision in matters of this kind is not made until the Engineer's report on the project has been rendered and given careful study from all standpoints, and that such procedure will be followed in connection with the selection of a site for the proposed grade separation structure in the town of Nyssa.

The Commission considered and ordered filed a letter from J. E. Stanton, Oakland, California, suggesting that the Commission give consideration to the collection of small tolls to secure funds with which to finance state highway construction.

The Secretary reported receipt of a request from the Silverton Lions Club for the loan of the services of the Highway Commission's artist to prepare plans for gateways which the club has in mind to erect at the main highway entrances into the city of Silverton. The Commission denied the request as a matter of policy. The Secretary was instructed to inform the Lions Club of the action taken and to state further that if the club proceeds with its plans for the gateways notwithstanding its inability to obtain the services of the Highway Commission's artist, the Commission will appreciate it if they will arrange to construct their gateways upon the highways within the corporate limits of Silverton rather than outside the corporate limits, in view of the fact that the erection of such gateways on the highway outside the city limits is illegal and it is strictly contrary to the established policy of the Commission to grant permits for the maintenance of same at such locations.

A letter was presented from the Albany Post, American Legion, requesting the erection of "No Trespass" signs on state highway property located adjacent to the Albany Airport, where an air circus is to be conducted on Saturday, August 5, 1939, so that the people who are inclined to view the airport from such vantage points without charge will be required to pay admission to the airport grounds if they wish to view the exhibition. The Commission decided not to erect the signs as a special favor to the American Legion; however, considered it advisable to maintain permanent "No Trespass" signs on its property, and accordingly instructed the Engineer to see that such signs are erected at once.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts authorized for each. After due consideration, the Commission authorized and instructed the Engineer to make such location surveys on various

sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Plans - - - - -	1-2816	- Black Bridge-Richland Section, Baker-Homestead Hwy., Baker County.	1st authorization - \$800.00
Plans - - - - -	1-2817	- N. Powder-Muddy Creek Section, Old Oregon Trail, Baker County.	1st authorization - \$200.00
Plans - - - - -	202-2818	- Albany North Section, Albany-Buena Vista (Co. Rd.) Benton County.	1st authorization - \$600.00
Location - - - -	3-2823	- Tualatin-Marion County Line Section, W. Portland-Hubbard Hwy., Clackamas County.	1st authorization - \$3,000.00
Plans - - - - -	204-2826	- Coast Highway-Fort Stevens Section, Fort Stevens (Co. Rd.) Clatsop Co.	1st authorization - \$500.00
Right of Way -	4-2827	- Seaside-Gearhart Junction Section, Oregon Coast Hwy., Clatsop Co.	1st authorization - \$50.00
Right of Way -	5-2817	- Clatsop County Line-Clatskanie Section, Columbia River Hwy., Columbia County	1st authorization - \$125.00
Plans - - - - -	5-2816	- Rainier Section, Columbia River Highway, Columbia County.	1st authorization - \$600.00
Plans - - - - -	105-2818	- Clatskanie-Mist Section, Clatskanie-Mist Highway, Columbia County.	1st authorization - \$200.00
Stock Pile & Quarry -	7-2809	- Redmond-Prineville Section, Ochoco Highway, Crook County.	1st authorization - \$450.00
Aerial Survey -	8-2811	- Gold Beach-Brookings Section, Oregon Coast Highway, Curry County.	1st authorization - \$200.00
Plans - - - - -	9-2824	- Bend-Horse Ridge Section, Central Oregon & Century Drive Hwys., Deschutes County.	1st authorization - \$600.00
Plans - - - - -	209-2825	- Butler Market Road, Deschutes County.	1st authorization - \$620.00
Park - - - - -	10-2824	- Camas Mt. State Park, Coos Bay-Roseburg Hwy., Douglas County.	1st authorization - \$200.00
Location - - - -	111-2809	- Lone Rock Junction-Rock Creek Section, Wasco-Heppner Hwy., Gilliam County.	1st authorization - \$1,200.00

Bridge - 12-2818 - Goose Creek Bridge, John Day Highway, Grant County.
 1st authorization - \$700.00

Location - - 112-2819 - Kimberly-Dry Creek Section, Monument Highway, Grant Co.
 1st authorization - \$1,800.00

Recon. - - 114-2814 - Dee-Parkdale Section, Hood River Secondary Hwy., Hood
 River County. 1st authorization - \$300.00

Plans - - - 15-2817 - Siskiyou Station-Bear Canyon Section, Pacific Highway,
 Jackson County. 4th authorization - \$1,500.00
 Total to date \$7,500.00

Plans - - - 116-2807 - Agency-Vanora Section, Warm Springs Highway, Jefferson
 County. 1st authorization - \$125.00

Plans - - - 17-2802 - Grants Pass-Green Creek Section, Pacific Highway, Jo-
 sephine County. 4th authorization - \$500.00
 Total to date \$4,500.00

Stock Pile - 18-2837 - Beaver Marsh-Ft. Klamath Section, The Dalles-Californ-
 & Quarry nia Highway; Diamond Lake-The Dalles-California Hwy.
 Junction, Diamond Lake Highway; Park Boundary-Ft.
 Klamath Section, Crater Lake Highway; Park Boundary-
 The Dalles-California Hwy. Junction, Sand Lake Hwy.
 1st authorization - \$1,000.00

Stock Pile - 18-2836 - Chiloquin-Klamath Falls Section, The Dalles-California
 & Quarry Highway, Klamath Co. 1st authorization - \$500.00

Plans - - - 19-2820 - Summer Lake Section, Fremont Highway, Lake County.
 1st authorization - \$200.00

Bridge - - - 121-2832 - Nashville Bridge, Eddyville-Blodgett Road, Lincoln
 County. 1st authorization - \$150.00

Bench Mark - 24-2825 - Salem-Neil Creek Section, Pacific East, Marion County.
 1st authorization - \$200.00

Plans - - - 124-2824 - Pacific Hwy.-Clackamas County Line Section, Woodburn-
 Mt. Hood Hwy. 1st authorization - \$800.00

Plans - - - 228-2807 - Wasco-Fulton Canyon Section, County Road, Sherman Co.
 1st authorization - \$400.00

Plans - - - 29-2830 - Neahkahnie Mt. Section, Oregon Coast Highway, Tillamook
 County. 1st authorization - \$600.00

Plans - - - 30-2826 - Stanfield-Pendleton Section, West Unit, Old Oregon
 Trail, Umatilla County. 1st authorization - \$200.00

Plans - - - 33-2819 - Shaniko-Cow Canyon Section, Sherman Highway, Wasco Co.
 1st authorization - \$1,000.00

The Engineer also reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration, the Commission approved the respective surveys as reported, and adopted the following resolution in regard thereto:

WHEREAS, The State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED, that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highway involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
5B23-9	102-2816	Benton	Location	Willamette R.Br.	Corvallis-Eastside
5B23-11	30-2824	Umatilla	Location	Milton South	Oregon-Washington
5B23-10	30-2817	Umatilla	Location	Adams Connection	Oregon-Washington

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Goes Bay Dredging Company, Contract No. 2062, for grading the Lobert-Modoc Point Section of The Dalles-California Highway, in Klamath County, requested an extension of time from November 30, 1938, to May 21, 1939, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that the failure

JUL 26 1939

of the contractor to complete the contract within the specified time limit was due to extra work, increase in quantities, delay in securing price agreement for the excavation of solid rock and talus topping materials and delay in securing an adjustment with the Lamb Lumber Company for revision of its private utilities. Operations in connection with this contract, he said, were temporarily discontinued between September 13 and October 30, pending a special agreement with respect to solid rock excavation, and, as a result, work extended into the winter season, when it was necessary to close it down entirely until spring. He further advised that the public has not been inconvenienced by the delay because the road is on the cutoff section and is not open to travel. He recommended, in view of the circumstances, that the extension requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Roy L. Houck, Contract No. 2081, for grading, surfacing, and oiling the Lombard Street-Killingsworth Street Section of the Northeast Portland Secondary Highway, in Multnomah County, requested an extension of time of 30 days, from June 15, 1939, to July 15, 1939, within which to complete this project. He pointed out that the specifications prohibited the laying of asphaltic concrete pavement under this contract before May 15, 1939, and that bad weather conditions from May 15 to July 1 prevented the performance of such work during that period, all of which accounted for the fact that the job was not completed within the specified time limit. The Engineer advised that rainy weather during May and June interfered materially with the work on this project and caused unavoidable delay; also, considerably more materials were required to be excavated than was anticipated. Traffic, he said, has not been inconvenienced, and engineering expense in connection with the job has not been materially increased because the crew was engaged on other work at the same time. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Babler Bros., Contract No. 2137, for surfacing and oiling the Grant County Line-Unity Section of the John Day Highway, in Baker County, requested an extension of time from July 31 to September 15, 1939, within which to complete this project. They attributed their failure to complete the contract within the specified time limit to bad weather conditions which interfered with their crushing operations. The Engineer advised that Babler Bros. were delayed in the erection of their crushing plant by deep snow, which prevailed until late in March over the section of the highway that was to be resurfaced; also, that they were forced to change their plans for the crushing of rock for reasons that were apparently beyond their control. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, concurring therein. The Commission approved the recommendation unanimously.

Schmeer, Williams & Gentemann, Contract No. 2142, for furnishing crushed rock in stock piles for the Horse Ranch-Chewaucan Narrows Section of the Fremont Highway, in Lake County, requested an extension of time of 30 days, from June 15 to July 15, 1939, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to encountering materials of a nature that required the operation of their plant at half capacity, with stops approximately each hour for cleaning the screens. The Engineer advised that the contractor had considerable difficulty with his crushing operations, particularly during the winter season, in that the fine sand from the pit would freeze under the screens and cause frequent closing down of operations, there being a particularly large quantity of such fine material to be wasted in the pits in which the operations were carried on. The contractor has worked two shifts at all times that it has been possible for him to do so, he said, and, in order to hasten completion of the project, is now operating three shifts. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. C. Compton, Contract No. 2188, for oiling the Elsie-Balm Grove Section of the Wolf Creek Highway and county roads, in Clatsop, Columbia, Tillamook and Washington Counties, requested an extension of time of 45 days, from July 15 to August 30, 1939, within which to complete this project. He alleged that his failure to complete this project within the specified time limit was due to the uncertainty of W.P.A. labor which was employed in the manufacture of surfacing material. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct and recommended that the extension requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2062, 2100, 2109, 2115, 2122, 2131, 2135, 2148, 2182, and 2194, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2062, with Coos Bay Dredging Company, for grading and topping the Lobert-Modoc Point Section of The Dalles-California Highway, in Klamath County. Completed May 21, 1939.

JUL 25 1939

Contract No. 2100, with F. C. Dillard, for clearing the Salt Creek Section of the Willamette Highway, in Lane County, Completed July 10, 1939.

Contract No. 2109, with E. C. Hall Company, for grading, surfacing, and oiling the Brothers-Harney County Line Section of the Central Oregon Highway, in Deschutes and Lake Counties. Completed June 24, 1939.

Contract No. 2115, with Norris Bros., for surfacing, oiling, and furnishing crushed rock on the Richland-Halfway Section of the Baker-Homestead Highway, in Baker County. Completed June 30, 1939.

Contract No. 2122, with E. F. Altree, for furnishing crushed rock for the Newport Section of the Oregon Coast and Corvallis-Newport Highways, in Lincoln County. Completed June 29, 1939.

Contract No. 2131, with Leonard & Slate, for grading, surfacing, oiling, construction of 2 timber bridges, and furnishing crushed rock on the Jamieson-Lancaster Section of the John Day Highway, in Malheur County. Completed June 30, 1939.

Contract No. 2135, with M. L. O'Neil & Son, for grading and oiling the Pendleton-State Farm Section of the Oregon-Washington Highway, in Umatilla County. Completed July 14, 1939.

Contract No. 2148, with Chester T. Lackey, for oiling and furnishing crushed rock and gravel on the Juntura-Cairo Section of the Central Oregon and John Day Highways, in Malheur County. Completed June 30, 1939.

Contract No. 2182, with Babler Bros., for oiling the Flat Creek-John Day Section of the John Day Highway, in Grant County. Completed June 15, 1939.

Contract No. 2194, with Norris Bros., for oiling the Baker-Gibbs Ranch Section of the Baker-Unity Highway, in Baker County. Completed July 10, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The meeting was declared adjourned at 7:00 o'clock p.m.

Harmon W. Clungh
Commissioner

JUL 25 1939

Portland, Oregon, July 27, 1939

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for state highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room:

COLUMBIA RIVER HIGHWAY
WARREN CREEK SECTION

GRADING, BITUMINOUS MACADAM SURFACING, REINFORCED CONCRETE BRIDGE

E. C. Hall Company	\$ 47,755.00
Leonard & Slate	53,163.50
Newport Construction Company	60,563.90
McNutt Bros.	65,792.00

PACIFIC HIGHWAY
JUNCTION CITY-EUGENE SECTION - ROADSIDE IMPROVEMENT

Blair T. Alderman	\$ 5,988.72
D. L. Ashton	6,854.50
Eugene Sand & Gravel Company	8,502.80
Ed Walder	8,650.50
River Bend Sand & Gravel Company	9,038.25

COLUMBIA RIVER HIGHWAY
EAST UNIT, TROUTDALE-CORBETT SECTION AND BRIDAL VEIL-BENSON PARK SECTION
CLEARING, GRADING, 1.95 MILES ROCK TOE EMBANKMENT CONSTRUCTION

Morrison-Knudsen Company	\$ 89,930.00
E. L. Gates	98,340.00
Roy L. Houck	99,216.00
Leonard & Slate	101,592.00
E. C. Hall Company	104,337.00
White's Trucking Company	109,888.00
Jacobsen-Jensen Company	111,104.00
Alex Besoloff	128,885.60
Newport Construction Company	138,744.60
Natt McDougall Company	148,661.00
McNutt Bros.	191,902.00

JUL 27 1939

A delegation from Lane County, consisting of Representative Earl Hill, Cushman; Mayor W. J. Kyle, of Florence; R. F. Bowman and George Nelson, also of Florence; County Judge Clinton Hurd and County Commissioner W. J. Holland, of Lane County; Charles Nelson and Bard Nelson, of Junction City; Julius P. Hult, of Horton; Fred M. Brenne, J. E. Turnbull, I. J. Rossman, and Hugh Ford, all of Eugene, conferred with the Commission. Mr. Hill headed the group. He asked, on behalf of the people of the town of Florence, for state cooperation in the construction of an approach to the Oregon Coast Highway from the Florence business district, which road would enter the highway on an extension of Lincoln Street, at a point several blocks north of the present approach, near the north end of the Siuslaw River Bridge. He alleged that the present highway connection is unsatisfactory in that it contains a very abrupt turn at the end of the bridge, which cannot be seen by motorists crossing the bridge from the south, and an unsafe condition exists for those coming from that direction who desire to visit the business district of their town. The proposed connection, he said, will provide a comparatively easy and safe entrance to the business district. He further stated that the city has already acquired the right of way and cleared the same for this road and that the city has funds available in the amount of approximately \$1,000 from its recent bond issue to apply on the cost of the work; but such amount, in their estimation, is insufficient to finance the project in its entirety, hence their request for aid from the State Highway Commission. He estimated that there are approximately 12,000 cubic yards of sand to be moved in order to provide a satisfactory grade and urged the Commission to assist the city in this matter because the city is not able to finance it alone and the improvement is a vital necessity for the future welfare of the business interests of the town of Florence.

Chairman Cabell advised that the Commission expects to visit the town of Florence in the near future and will inspect this project at that time. He advised that before the Commission can make a definite decision with respect thereto, the Commission must know what the project will cost and whether or not the Commission has legal authority to spend state funds in connection therewith, but that the Commission will endeavor to pass on the matter at its next regular meeting. The Engineer was thereupon instructed by the Commission to make investigation, as necessary, to determine the cost of the project and the Attorney was instructed to advise the Commission of its legal authority to contribute state funds for this purpose.

This delegation then brought up for discussion the matter of the improvement of the Siuslaw Highway through the Lake Creek District and across the summit of the Coast Range, involving the construction of a tunnel. Mr. Hill advised that this improvement is very necessary because, under present conditions, there exists a serious bottleneck that is not only unsafe for travel but is a considerable detriment to the port of Siuslaw. He strongly urged the rebuilding of this road, particularly the Lake Creek Section, including the tunnel, in order to eliminate the numerous sharp curves in the present road at this point.

Chairman Cabell advised that the Commission is somewhat confused as to just what the people of Lane County consider as their major highway project

inasmuch as there are proponents, not only for the Siuslaw improvement, but also for the construction of what is known as "Route F" from Eugene to the sea. Judge Hurd stated that both projects are important to Lane County and, while they do not in any way want to minimize the importance of the "Route F" road, they feel that the completion of this highway will not be accomplished for a long time and, in the meantime, the Siuslaw Highway must be improved in order to take care of the great amount of tonnage that has to be taken over it from the Lake Creek district. Chairman Cabell then explained that the Commission is not in position to pass definitely on this matter at this time because figures are not available as to the cost of the entire improvement, but the Commission will very likely have such information before its next meeting and, if so, will be pleased to consider these, and will inspect the project in company with the members of the Lane County delegation within the next two or three weeks. The Engineer was thereupon instructed to make a reconnaissance survey of this entire road to augment information previously obtained with respect to the improvement of the Summit Section only.

Mayor K. J. Franklin and City Manager J. H. Fasnacht, Bandon, were present and urged the early construction of the Bandon Section of the Oregon Coast Highway along the line of the permanent route recently adopted by the Commission. They declared that the people of this town cannot proceed with the development of their properties until they know just what the Highway Commission intends to do relative to right of way and grades, and urged the Commission to give the matter immediate consideration. They advised that the city owns considerable property along the adopted route and that offers have been received for the purchase of some of it but the city does not want to dispose of such property without first giving the State Highway Commission an opportunity to secure what it needs. They were informed by Chairman Cabell that the Bandon project is not included in the Commission's current construction program and it is very doubtful that the Commission will be able to place the work under contract this fall. However, the Commission will endeavor to include the project in an early future program. The only thing that can be done now, he said, is to acquire the right of way, which the Commission will do as rapidly as possible. The Attorney was thereupon authorized and instructed to complete the acquisition of right of way for this project at once. The Engineer was instructed to arrange to set line and grade stakes to enable the people of this town to develop their properties in accordance therewith.

Mr. Arthur B. Allen, Manager, Timberline Lodge, came before the Commission in regard to the placing of signs upon highway rights of way within a 50-mile radius of Timberline Lodge, directing tourists to the Lodge. He advised that tourists now have difficulty in finding the Lodge and frequently take the wrong road, necessitating retracement and the traveling of considerable mileage farther than is absolutely necessary. It was his thought that the maintenance of appropriate signs at important highway connections within a reasonable distance of the Lodge would remedy this situation, and asked the Commission to approve the same. After considerable discussion, the Commission approved the request and referred to the Engineer the matter of selecting locations for the signs. It was agreed that the standard finger-board sign would be satisfactory for this purpose and that the inscription on the sign, in order to be consistent with the Commission's policy in this regard, should be limited to the word "Timberline".

JUL 27 1939

Messrs. Robert W. Sawyer, E. B. McDaniel, and Ed Miller, representing the Advisory Committee on Publicity Matters, appeared before the Commission at this time with respect to the selection of an advertising agency to take charge of the Commission's publicity campaign during the year 1940. Mr. Sawyer headed the group. He advised that the members of the Advisory Committee held a meeting on Tuesday, July 25, 1939, all members being present, for a discussion of this matter, and interviewed at such meeting representatives of a number of such agencies having headquarters in Portland and also inspected exhibits submitted by each agency. Further, that as a result of these interviews, the Committee decided unanimously to recommend to the Highway Commission the retention of the services of Botsford, Constantine, and Gardner, inasmuch as the committee members felt that the state would receive more value for expenditures made through this agency than through another agency not familiar with the Commission's setup. Such recommendation, he added, is being made to the Highway Commission at this time orally and will be confirmed by written recommendation later.

After discussion, the Commission, by unanimous vote, approved and adopted the recommendation of the Advisory Committee and thereupon ordered renewal of the contract with Botsford, Constantine, and Gardner for the year 1940.

The Commission discussed with Mr. Sawyer matters pertaining to the improvement of the Cascade Lakes Forest Highway between Bend and Elk Lake, in Deschutes County. Mr. Sawyer gave as his thought that past agreements with respect to the improvement of this road should be carried out whether or not such agreements were in writing, and that in this particular instance moneys available for this highway should be spent at the north end of the road, in view of the fact that construction at the southerly end between Diamond Lake and Crater Lake is completed. It was his belief that the selection of the type of improvement should be left to the Highway Commission and its Engineers although, in his estimation, a high type of improvement is not justified at this time, and no improvement at all would be preferable to the simple oiling of the existing road. He suggested the construction of a good travelable road as a compromise and predicted that with such a road into this recreational area travel would increase greatly.

Chairman Cabell advised that the Commission also feels that a high type of improvement on this road is not justified and that the oiling of the present road would prove unsatisfactory. Further, that the Commission is inclined to the belief that a satisfactory road could be obtained by constructing a roadbed with maximum 8 per cent grades and maximum 10 degree curves, and by oiling a narrow roadway. However, a definite decision with respect thereto cannot be made until a conference has been held with the Government authorities, inasmuch as this is a federal project. Such conference, he added, will be held in the near future.

The Commission by unanimous vote approved the minutes of the meetings held on March 2 and 3, March 21, April 5, 6, and 7, and April 21 to 25, inclusive, 1939.

The Commission discussed a report from Louis L. Crosby pertaining to the collection of fines for motor vehicle violations. The Attorney advised that Mr. Crosby is employed by the State Treasurer to check with Justices of the Peace relative to the collection of fines, and in connection with such work has unearthed other information which indicates that improvement could be made with respect to the reporting of fines collected. He suggested a standard form for such purpose, which suggestion was approved by the Commission by unanimous vote.

The Engineer reported the need to secure the approval of the United States War Department before proceeding with the proposed widening and reconstruction of the bridge across the entrance to Depoe Bay on the Oregon Coast Highway approximately 14 miles north of Newport, in Lincoln County. He requested authority from the Commission to present the plans of this structure to the War Department for such approval. The Commission approved the request by unanimous vote.

The Attorney reported the results of a cruise made by Mr. Walsh, of Brown & Brown, Inc., Portland, of timber growing on the Louis W. Hill land adjacent to the McKensie Highway, near the town of Sisters, which property the Commission contemplates purchasing for state park purposes. He advised that Mr. Walsh's cruise indicates that the property contains 587,000 board feet, which is considerably in excess of the amount of the timber indicated by a cruise made by Mr. Whitten for the State Parks Department, two cruises by Mr. Keene for the Hill interests, and a cruise by the U. S. Forest Service. After discussion, the Commission decided to purchase the property on the basis of the low cruise made by the cruiser for the Hill interests.

The Attorney reported receipt of an offer from Mr. B. L. Eddy, Roseburg, on behalf of a client, to sell to the state certain property that is needed as right of way for the Pacific Highway in Roseburg. He advised that he valued this property at \$100 but Mr. Eddy is demanding the sum of \$200 for his clients. He recommended rejection of Mr. Eddy's offer and that the property be acquired by condemnation in the event the owner will not accept \$100 for the same. The Commission approved the recommendation unanimously.

The Attorney also reported that an unsatisfactory condition exists with respect to land that the Commission acquired from George Joseph, Jr., as right of way for the Columbia River Highway, near Crown Point, in Multnomah County. He said that when this land was purchased the Commission did not contemplate immediate construction of the highway, and agreed, by lease, to let Mr. Joseph use this property for pasture land until it was needed for highway purposes; but it appears that an adjoining property owner, a Mr. Luscher, continually leaves certain gates open, allowing his cattle to go through and graze upon the land that is under lease to Mr. Joseph, and, in order to remedy this situation, Mr. Joseph has asked permission to lock the gates. The Commission by unanimous vote approved of the locking of the gates provided it does not interfere with the use of the property by the state.

The Attorney brought up for discussion the matter of acquisition of certain land adjacent to the Wolf Creek Highway that the Commission desires to purchase from the Oregon American Lumber Company for state park purposes. He said that a satisfactory agreement had been reached with the timber company

whereby the state purchases the land and the company retains title to the timber; but the company has requested permission to delete from this deal a certain 40-acre tract across which the company operates its logging railroad and which they expect to use in their logging operations for a long time to come. The Commission by unanimous vote agreed to such deletion as a temporary proposition with the understanding that the state will eventually acquire this 40-acre tract when the company has discontinued the use of its railroad across the same. The Attorney was instructed to prepare an appropriate agreement with the company covering the matter.

In this connection the Attorney reported the results of interviews with the various timber owners along this highway for the acquisition of additional recreational sites. Detailed information with respect to each site was presented, including costs, which he said total approximately \$22,000. The matter was discussed at considerable length. Chairman Cabell gave as his thought that it would be advisable to acquire these tracts in order to prevent their being commercialized. Commissioners Aldrich and Clough concurred. The Attorney was thereupon authorized and instructed to proceed with the taking of options on the basis of his report. He was also authorized to secure options for all other properties along this highway that can be acquired at a price not to exceed \$5.00 per acre.

The Attorney reported an offer from Mr. A. G. Beattie, Oregon City, attorney for Mrs. Annie Busch, for the settlement of Mrs. Busch's claim for damages arising out of a change in the grade of 11th Street necessitated by the construction of the new highway in Oregon City. He advised that Mrs. Busch has agreed to withdraw her claim if the Commission will deed to her that portion of the new highway right of way that lies between her property line and the toe of the new highway fill. The Commission deferred a decision in this matter pending completion of the highway, when it will be ascertained whether or not the state has use for such property.

A letter was presented from Mr. Alden E. Miller, City Attorney, Oregon City, advising that the city has been approached by private interests with respect to the purchase of a portion of Lots 7 and 8, in Block 9, Oregon City, which was acquired by the city some time ago as right of way for the old diagonal roadway along 11th Street, connecting Main Street with Water Street. It was Mr. Miller's thought that this property is of no further value to the state, due to the fact that the Highway Commission has constructed a new approach between Main Street and Water Street (Pacific Highway East), so the Commission probably would have no objections to its sale, although the city wants to know definitely if this is the case before selling it. The Commission deferred a decision in this matter pending completion of the highway.

The Attorney requested instructions relative to the case of the state versus Security and Investment Company, Oregon City, pertaining to right of way needed for the Oregon City Section of the Pacific Highway. He said that if a change of venue were requested in this case on the grounds that the jurors were prejudiced against the plaintiff, then it would be necessary for the Commission to adopt a resolution requesting such change. However, it is quite likely that a change would considerably delay the trial. He requested

instructions in regard thereto. The Commission decided unanimously not to ask for a change of venue and to let the matter take its natural course.

The Attorney requested instructions with regard to the removal of a church building from the right of way of the Pacific Highway West in the town of Tigard. He said that inquiry has been made by Mr. W. G. Hare, attorney, Hillsboro, on behalf of the trustees of the church, whether or not the state would assume the responsibility for the moving of this church edifice because it is a matter entirely foreign to these people and they would much prefer that the state assume such responsibility in view of its experience in such matters. The Attorney pointed out that the Commission adopted a policy some time ago to leave such matters entirely in the hands of the owners of the buildings, and if the Commission assumes the responsibility in this instance, it would be deviating from such policy. However, he recommended such deviation in view of the fact that the building to be moved is a church and that the church officials are not prepared to handle matters of this kind. The Commission approved the recommendation subject to the condition that the state is put to no extra expense under the settlement previously agreed upon.

The Commission approved settlement heretofore made by the Attorney with the Klamath Indian Agency for right of way acquired for the Cushman Ranch-Trail Section of the Tiller-Trail Secondary Highway, in Jackson County, involving an expenditure of \$1,150 for 11.78 acres of land.

The Attorney requested authority to purchase fire insurance for buildings recently acquired from Mr. Duane Gibson, Salem, for right of way for the Salem South Section of the Pacific Highway, in Marion County. He advised that the improvements on this property cost the state \$4,100 and that the owners have been carrying \$3,200 insurance on the same. He further advised that the improvements are in first class condition, and, in his estimation, are worth being insured for a similar amount in view of the fact that they are not eligible for state insurance. The Commission approved the request by unanimous vote.

The Attorney brought up for discussion the matter of preserving the approach to Boone's Ferry at Wilsonville when the new highway between West Portland and Hubbard has been constructed. In the discussion of this matter it was pointed out that the proposed bridge over the Willamette River will be located some little distance down stream from the ferry but there are possibilities of developing a state park at this location. In view thereof, the Commission decided to retain the approach until the bridge is completed and then to investigate the state park possibilities. The matter was referred to the State Parks Superintendent for investigation and report.

The Commission discussed a request from the Episcopal Church people in Oregon City for a change in the plans for state highway improvement along Water Street as it affects the church property. It appears that when Water Street was selected as the route of the state highway through Oregon City, the church people made a tentative arrangement with the Clackamas County Court for the sale of the church property to the county, but the deal was not consummated and the church people now want the State Highway Commission to

revise its plans for this improvement to include the construction of an approach to the highway along 9th Street, past the church property, which would necessitate the elimination of guard rail that is proposed along this particular section. The Engineer recommended against such change on account of the traffic hazard that would be created thereby. The Commission approved the recommendation and decided unanimously to adhere to the original plan for this highway improvement.

Reconsideration was given by the Commission to the matter of sale of an old gravel pit situate adjacent to the Pacific Highway about 2 miles south of Junction City. It was explained that the Oregon Electric Railroad lies between this pit and the highway and that the pit is of no value for state purposes inasmuch as all material valuable for state highway construction has been removed, and it was recommended that the property be sold. The Commission ordered that it be offered to other state departments, to Lane County, and to the original owner, in the order mentioned, and if none are interested in the property, then the Attorney is authorized to sell it at a reasonable price to anyone desiring the same.

The Attorney requested instructions relative to securing title insurance in connection with future real property purchases. He pointed out that the present policy is to secure title insurance if the purchase does not involve an expenditure of more than \$500, but since such policy was established the title insurance companies have raised their rates about 25 per cent, which brings up the question whether or not the Commission desires to change its policy. The Commission deferred action on this matter until the next meeting.

The Secretary presented a resolution from Westmost Grange No. 884, Bandon, Oregon, in which the Commission was urged to create a state park at a place known as Crofts Lake, near Bandon, in Coos County. The matter was referred to the State Parks Superintendent for investigation and report.

The Engineer requested authority to post the Elsie-Necanicum Junction Section of the Wolf Creek Highway for a 35-mile-per-hour speed limit and to also post this highway where it passes the Bear Creek Camp for the same speed limit, due to the heavy traffic that this road is now carrying and the hazardous condition that obtains during the highway construction operations. The Commission approved the request by unanimous vote.

The Engineer reported on the cost to conduct snow-removal operations on the Weston-Elgin Secondary Highway, in Umatilla and Wallowa Counties, in order to keep this highway open for traffic throughout the winter season. He estimated that such work would cost from \$10,000 to \$12,000 and advised that if the Commission ordered the work done it would be necessary to purchase additional snow-removal equipment. The Commission considered that this expense is not justified by the traffic that would use the road during the winter months and accordingly denied the request of the Wallowa Community Service Club that this road be kept open for travel throughout the entire year.

The matter of adopting a permanent route for the Umpqua Highway through the town of Reedsport, Douglas County, in connection with which matter

a public hearing was held in Reedsport on June 21, had the attention of the Commission. The Commission selected the route that was suggested at the hearing and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, pursuant to notice given by Section 44-120, Oregon Code 1935 Supplement, the Commission met in the Council Chambers of the Reedsport City Hall at the hour of 11 A. M. on the twenty-first day of June, 1939, for the purpose of conducting a hearing as provided for in said law with respect to the proposed change in the point or place of entrance of the Umpqua Highway into the City of Reedsport and the proposed change of a portion of the route in and through said City; and

WHEREAS, said meeting was called to order by Henry F. Cabell, Chairman of the State Highway Commission, who explained to those assembled the purpose of the meeting and the proposed change with respect to the point of entrance of said highway into said City and the proposed change of a portion of the route in and through said City, and the Chairman then invited discussion with respect to said matters and extended to all persons present an opportunity to be heard for or against the said proposed change; and

WHEREAS, after all who evidenced a desire to be heard had entered their names in the records and minutes of the meeting and had declared their approval or disapproval of said proposed change, the Chairman of the Commission announced that said matter would be taken under advisement by the Commission and a decision made and announced at a later date; and

WHEREAS, after due and full consideration of said matter and of the arguments and declarations made for and against the said proposed change at said public hearing, both with respect to the point of entrance of said highway into said City and with respect to the change of route in said City; and the Commission now being fully advised with respect to all of said matters, it is the opinion and judgment of the Commission that the interests of the State at large will be best served by the adoption of said proposed change of the route of said highway in and through said City and the change with respect to the point of entrance to said City, all of which changes will in the judgment of the Commission make possible a better alignment and a more serviceable, convenient and safe thoroughfare into and through said City, and therefore, it is the opinion of the Commission that the route and alignment of said highway should be altered and modified and the point of entrance into said City and the route in and through said City should be changed and fixed and determined all as in said notice announced and at said hearing heard and discussed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively voting, as follows:

JUL 27 1939

1. That the said route and location of the Umpqua Highway as the same enters the City of Reedsport and the route in and through said City shall be and the same hereby is located along a route and streets defined and described as follows:

Beginning at the southerly city limits of the City of Reedsport, said point of beginning being approximately 330 feet east of the south quarter corner of Section 36, Township 21 South, Range 12 West, W. M.; thence in a northwesterly direction along old route to Winchester Avenue; thence continuing in a northwesterly direction to "L" Street near 15th Street; thence westerly along "L" Street to about 12th Street; thence in a northwesterly direction to a connection with the Oregon Coast Highway near the intersection of 9th and Holliday Streets.

2. That the said above described route, location and alignment be and the same hereby is adopted as the route and location of said highway between the termini as defined and described above.

3. That the Engineer be and he is hereby instructed to definitely locate and establish said highway by proper monuments and markers and make proper record thereof in the records of the Highway Commission, and erect proper signs on the street or streets over which said highway is routed, and proceed with the permanent improvement and maintenance of said highway along the route herein defined and in harmony with plans and specifications by this Commission approved.

4. That this resolution be entered in the records and minutes of the Highway Commission, and a duly certified copy thereof mailed to the Mayor of the City of Reedsport and a like copy to the County Court of Douglas County.

The Commission also discussed the subject of the use of highway rights of way in connection with the conduct or operation of a business located on abutting property. The following resolution with regard thereto was offered and was adopted by the Commission by unanimous vote:

WHEREAS, the volume of traffic which moves over and uses the highways of the State is steadily increasing, thereby demanding wider highways and improved alignments; and

WHEREAS, as quickly as highways are improved abutting properties are developed for the conduct of business and industries of various types; and

WHEREAS, there has been a growing tendency upon the part of abutting property owners whose properties have been devoted to the conduct of business or industry to so arrange their properties as to require portions of the right of way of the highways for the parking

of cars in connection with the conduct of the business conducted upon the abutting property; and

WHEREAS, in the opinion of the Commission, the use of any portion of the right of way of a highway either for the parking of cars or for other purposes in connection with the conduct of a business interferes with the proper construction and maintenance of the road, impairs the width of right of way, in some instances interferes with sight distance and otherwise tends to inconvenience the traveling public; and

WHEREAS, it is the judgment and opinion of the Commission that an abutting property owner proposing to conduct on his property any commercial activity should so arrange his plant or buildings that it will not be necessary for persons using the public highway and patronizing the said business to park or stop upon any portion of the right of way of the highway, but provision should be made by the property owner whereby such patrons may entirely leave the right of way for the transaction of business, and thereafter at a convenient place return again to the highway; and

WHEREAS, the Commission is of the opinion that it is without authority to dictate to an abutting property owner how or in what respect he may use his property or where on such property he may place improvements or structures, but the Commission believes that it nevertheless does have authority to, by rule and regulation, prohibit the use of any portion of the right of way of a highway for the conduct of or in connection with the conduct of a business or commercial activity;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission as follows:

1. That the parking of cars on the right of way of any primary or secondary highway for service at a gasoline service station or for the transaction of business carried on on property abutting upon the right of way of such highway, or for any other purpose other than the normal and fundamental use of such highway, hereby is declared to be against public interests and interferes with the proper construction and maintenance of such highway and oftentimes becomes a hazard to the motoring public, and, therefore, in the judgment of the Commission any such use or practice should be prohibited.

2. That the State Highway Engineer be and he hereby is instructed and directed to report to the Commission any property owner who is using any part of the right of way of a primary or secondary state highway for the parking of cars or for other use in connection with the conduct of a business carried on upon property abutting upon said highway.

JUL 27 1939

3. That the said Engineer be and he hereby is instructed to inform and advise all property owners who contemplate the construction of a business or commercial institution on property abutting upon the highway, and all persons who are now operating or conducting a business abutting upon such highway, that the parking of cars on the right of way for service or for the transaction of business in connection with such commercial activity shall be and is prohibited by the Highway Commission.

In this connection the Engineer was instructed to prepare a short form letter covering the matter for distribution among Highway Department employees concerned and people who are now conducting, or propose to conduct, a business of some kind adjacent to state highway rights of way.

The Commission had under consideration resolutions from the County Court of Crook County requesting the rerouting of the Warm Springs Secondary Highway between Prineville and the Jefferson County line, in accordance with the plan proposed at the public hearing held by the Commission in the town of Prineville on May 17, 1939. After discussion the Commission approved the request and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Crook County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Warm Springs Secondary Highway No. 260; and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Crook County Court of the State of Oregon, to eliminate and remove from the system of secondary state highways, under the provisions of Chapter 196, Oregon Laws of 1935, the hereinafter described section of the Warm Springs Secondary Highway No. 360; and

WHEREAS, it is mutually understood and agreed by the State Highway Commission, the Crook County Court, and the City of Prineville of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Warm Springs Secondary Highway No. 360 shall, under the provisions of the Laws of Oregon, become a city street and county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the

city authorities of Prineville for that portion of the secondary highway lying within the City of Prineville; and that portion beginning at the north city limits of Prineville and extending to the Jefferson County line shall be exclusively under the jurisdiction of the County Court of Crook County;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described section of the Warm Springs Secondary Highway No. 360 is hereby eliminated from the secondary state highway system, to wit:

A Section of the Warm Springs Secondary Highway No. 360:

Beginning at the intersection of A (Main) Street and Third Street in the City of Prineville; thence northerly along A (Main) Street and via former Market Road No. 4 to the Jefferson County line, a distance of 10.70 miles.

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall, for that portion within the City of Prineville, become a city street, and for that portion beginning at the north city limits of Prineville and extending to the Jefferson County line, the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the city authorities of the City of Prineville and the County Court of Deschutes County, respectively, as provided by law.

3. That the resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Crook County and to the City Recorder of the City of Prineville.

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Crook County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore

adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Crook County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Warm Springs Secondary Highway No. 360:

A relocation of the Warm Springs Secondary Highway route described as follows: Beginning at the intersection of A (Main) Street and Third Street in the City of Prineville; thence westerly along Third Street to a point near Park Boulevard; thence in a northwesterly direction to the Jefferson County line, a distance of 10.55 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

The Engineer reported that a portion of the Cape Arago Secondary Highway within the town of Charleston has been reconstructed on new alignment rendering valueless for state highway purposes a portion of the old road at this place. He recommended that the old portion be abandoned in favor of Coos County and presented a map showing such portion. After due consideration, the Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Cape Arago Highway, otherwise designated as Secondary Highway No. 240, in Coos County; and

WHEREAS, by reason of said relocation and the reconstruction of said section of said highway there was eliminated and made unnecessary as a part of the completed highway a certain section which is more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of the Commission the purpose and the plan of the Commission to abandon as a

part of the Cape Arago Highway and therefore as a part of the secondary highway system, the fragment or portion of the right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of said secondary highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, the majority of the members being present and affirmatively participating, as follows:

1. That the section or portion of Cape Arago Highway which lies along a route and over real property hereinafter particularly described, which route was formerly a part of the said secondary highway and which said real property was formerly within the limits of the right of way of said highway, but which real property is now without the limits of the right of way of said secondary highway as the same has been relocated, and which route is no longer a part of said secondary highway, be and said section of highway hereby is abandoned as a part of the route of the said secondary highway and as a part of the right of way of the same, and said route and right of way hereby is left to revert to Coos County for right of way and public highway purposes.

2. The portion of said secondary highway which now is abandoned by the State Highway Commission as a section or part of the Cape Arago Highway is described as follows:

All of that certain Section of the old right of way of the Cape Arago Highway No. 240 lying in the Town of Charleston and in use prior to 1934 which lies North of a line 40 feet North of and parallel to the center line of the reconstructed highway and between approximately Engineer's Station 264+80 and the East shore of South Slough and including such portions of the old South Slough Bridge as are now in use as an approach to the wharf and log dump on the East shore of South Slough.

In addition to the foregoing description of said abandoned route and right of way there is attached hereto a print or map marked "Exhibit 'A'" and by this reference made a part hereof, upon which map there is shown shaded in red the abandoned section of said highway which for identification purposes bears the signature of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and bears date of June 1, 1939. *

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic

from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway. If it is the purpose of the County Court of Coos County to continue to maintain for public travel the said abandoned section of the said secondary highway and maintain a connection between said abandoned section and the route of said secondary highway as relocated, then upon satisfactory showing by the Court that said abandoned road is to be maintained by the County as a county road, the Engineer may discontinue the maintenance of the barricade heretofore ordered.

4. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Coos County, together with a copy of said exhibit, and said County Court by this resolution is requested to take official action with respect to the abandoned section of the route of said secondary highway and enter such action in its records and furnish the State Highway Commission with a certified copy thereof, by which action or resolution the County Court is requested to advise and inform the Commission with respect to the County's purpose to maintain for public travel the abandoned section of said secondary highway. In the event the County Court does not disclose its purpose to maintain for public traffic the abandoned section of said secondary highway, then the State Highway Engineer is authorized to erect necessary barriers or barricades at the point where said abandoned section of said highway connects with the relocated route or line of the said secondary highway, to the end that traffic using the newly located secondary highway may not have access to said abandoned section of said secondary highway.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful study, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Clackamas County Section - Wainitia Highway</u>				
1272-Donohue, A. P.	R/W	2.10	\$20 per a.	Schannep

The Attorney requested authority to condemn the following properties that are needed for highway improvements:

Quarry site from Ralph Chambers and the State Land Board (transaction No. 6495), from which to secure materials for the construction of the Buchanan Ranch-Juntura Section of the Central Oregon Highway. Amount offered \$5.00 per acre.

Right of way needed for the Salem-Pringle Creek Section of the Pacific Highway East, Marion County, from Benjamin Franklin Federal Savings and Loan Association and L. C. Harkey (transactions Nos. 5782 and 5783). Also right of way needed from A. E. Heasley for the Salem-Pringle Creek Section (transaction No. 5916). Respective offers, \$1,000 and \$650. Demand of former, \$1,750. No price set by Mr. Heasley.

Right of way needed for the Service Creek-Burton Canyon Section of the John Day Highway, in Wheeler County, from School District No. 7 (right of way transaction No. 6745). This is a friendly condemnation.

Right of way needed for the St. Helens Section of the Columbia River Highway, in Columbia County, across property of Erickson Dairy Products Company (transaction No. 5725). Amount of offer, \$700. Amount demanded, \$1,210.

Right of way needed for the Warren Creek Section of the Columbia River Highway across the property of John Lawler and Eleanor Lawler, his wife, Hood River County, (transaction No. 6465). No offer made, as efforts to contact owners have failed.

After discussion, the Commission approved the request and by unanimous vote adopted the following resolutions with respect thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there

JUL 27 1939

is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Buchanan Ranch-Juntura Section of the Central Oregon Highway

real property owned by or in possession of the following parties and /or persons, to wit:

6495-Ralph Chambers-State Land Board

and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Salem-Pringle Creek Section of the Pacific Highway East
Service Creek-Burton Canyon Section of the John Day Highway
St. Helens Section of the Columbia River Highway

real property owned by or in possession of the following parties and/or persons, to wit:

JUL 27 1939

Salem-Pringle Creek Section of the Pacific Highway East
 5782, 5783-Benjamin Franklin Federal Savings and
 Loan Association and L. C. Harkney
 5916-A. E. Heasley
 Service Creek-Burton Canyon Section of the John Day Highway
 6745-School District No. 7 of Wheeler County
 St. Helens Section of the Columbia River Highway
 5725-Erickson Dairy Products Company

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes, for highway drainage and drainage tunnel purposes, and for the appropriation, acquisition, and manufacture of roadbuilding materials in connection with the permanent location, construction, improvement, and maintenance of the Warren Creek Section of the Columbia River Highway land and property owned by or in possession of John Lawler and Eleanor Lawler, his wife, and Hood River County described as follows, to wit:

Parcel 1

A parcel of land lying in Government Lot 5 of Section 4, Township 2 North, Range 9 East, W. M., Hood River County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Lawler and Eleanor Lawler recorded in Book 22, Page 439, of Hood River County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land of variable width on the south side of the center line of the Columbia River Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 685+73.5 to Station 693+68.7, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 685+73.5, at which point the said relocated center line intersects the westerly line of said property, said point being 208 feet south and 1838.9 feet east of the northwest corner of Lot 5, Section 4, Township 2 North, Range 9 East, W.M.; thence North $79^{\circ} 27'$ East a distance of 26.4 feet; thence on a spiral curve to the right (the long chord of which bears North $81^{\circ} 27'$ East) a distance of 400.0 feet; thence on a 1909.86 foot radius curve to the right (the long chord of which bears North $86^{\circ} 32'$ East) a distance of 72.2 feet; thence on a spiral curve to the right (the long chord of which bears South $89^{\circ} 02'$ East) a distance of 296.6 feet to Engineer's Station

JUL 27 1939

693+68.7, opposite and 50 feet distant from which station the southerly line of said strip of land intersects the north and south center line of said Section 4.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Width on south side of center line
685+73.5	685+99.9 P. S.	50
685+99.9 P.S.	689+99.9 P.S.C.	60
689+99.9 P.S.C.	693+68.7	50

The parcel of land to which this description applies contains 1.00 acre, of which 0.36 acre lies within the existing right of way and 0.64 acre lies outside of the existing right of way.

Parcel 2

A parcel of land lying in Government Lot 5 of Section 4, Township 2 North, Range 9 East, W.M., Hood River County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Lawler and Eleanor Lawler recorded in Book 22, Page 439, of Hood River County Record of Deeds; the said parcel being described as follows:

Beginning on the westerly line of said Lawler property at a point which is 50 feet distant southeasterly from (when measured at right angles to) the relocated center line of the Columbia River Highway at Engineer's Station 685+74.3; said point also being South 257.0 feet and East 1848.8 feet from the northwest corner of said Government Lot 5; thence South $11^{\circ} 28'$ East along said west property line a distance of 70.0 feet, more or less, to the easterly bank of Warren Creek; thence following said creek bank in a southerly direction to the south line of said Lot 5; thence east along said South line a distance of 100.0 feet; thence North $13^{\circ} 00'$ East a distance of 400.0 feet; thence North $59^{\circ} 46'$ West a distance of 544.0 feet, more or less, to the point of beginning; containing 2.34 acres.

Parcel 3

A parcel of land lying in Government Lot 5 of Section 4, Township 2 North, Range 9 West, W.M., Hood River County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Lawler and Eleanor Lawler recorded in Book 22, Page 439, of Hood River County Record of Deeds; the said parcel being described as follows:

Beginning on the east line of Government Lot 5 of Section 4, Township 2 North, Range 9 East, at a point which is 50 feet distant southerly from (when measured at right angles to) the relocated

center line of the Columbia River Highway at Engineer's center line Station 693+68.7; said point also being South $1^{\circ} 07'$ East a distance of 182.2 feet along the easterly line of said Government Lot 5 from the northeast corner of said Lot 5; thence continuing along said easterly line South $1^{\circ} 07'$ East a distance of 720 feet, more or less, to the southeast corner of said Lot 5; thence West along said south line a distance of 420 feet, more or less, to a point 100 feet east of the easterly bank of Warren Creek; thence North $13^{\circ} 00'$ East a distance of 400 feet; thence North $59^{\circ} 46'$ West a distance of 544 feet to the westerly line of said Lawler property at a point which is 50 feet distant southeasterly from (when measured at right angles to) said highway center line at Engineer's Station 685+74.3; thence North $79^{\circ} 27'$ East parallel to and 50 feet distant from said center line a distance of 25.6 feet; thence South $10^{\circ} 33'$ East a distance of 10 feet; thence parallel to and 60 feet distant from said center line on a spiral curve right (the long chord of which bears North $81^{\circ} 27'$ East 393.3 feet) a distance of 393.7 feet; thence North $4^{\circ} 33'$ West a distance of 10 feet; thence parallel to and 50 feet distant from said center line on an 1859.9 foot radius curve to the right (the long chord of which bears North $86^{\circ} 32'$ East 70.3 feet) a distance of 70.4 feet; thence on a spiral curve right (the long chord of which bears South $88^{\circ} 23'$ East 291.7 feet) a distance of 291.8 feet to the point of beginning; containing 7.52 acres.

And this Commission does hereby declare further that Parcel 1 hereinabove described is needful and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain the said portion of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety; and this Commission does hereby declare further that Parcel 2 hereinabove described is needful and the acquisition thereof will be of advantage to the State of Oregon for highway drainage and drainage tunnel purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion of the state highway system in accordance with the standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety; and this Commission does hereby declare further that Parcel 3 hereinabove described is needful and the acquisition thereof will be of advantage to the State of Oregon for the appropriation, acquisition and manufacture of roadbuilding materials in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion and other portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcels of land required for such purposes and prepare proper and adequate descrip-

JUL 27 1939

tions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

4. That this resolution be entered in full in the minutes and records of this Commission.

A delegation representing the Metropolitan Association, Portland, came before the Commission on behalf of the reconstruction of Front Street, Portland, as an arterial route. The delegation consisted of the following: Chester A. Moores, President; Mayor Joseph E. Carson, Jr.; Frederick H. Strong, member Executive Committee; and U. L. Upson, Secretary.

Mr. Moores stated that they have only one object in appearing before the Commission at this time and that is simply to urge the Commission's earnest and serious consideration of this project so that it can go forward expeditiously. He also said that they have no objections to offer as to how the matter is to be handled but want something done at once to improve present conditions, which, he alleged, are a disgrace to the City of Portland.

Mayor Carson stated that this project is the most necessary highway improvement in Portland today. He asked the Commission to choose the route and handle it the same way as the Union Avenue project was handled rather than to leave the choice of the route to the people. If it is left to the vote of the people, he said, there is a possibility that the project will be voted out, whereas, if the Highway Commission handles it exclusively, that can be avoided. He pointed out that property values in this part of Portland are now particularly low and predicted that the improvement of Front Street would revive these values; furthermore, it would be of great benefit to the City of Portland as a whole. He offered full cooperation from the Portland City Council in every way possible and advised that the city is not asking the state to pay the cost of all of the right of way but simply a just proportion of the same on a basis comparable to purchases made by the Commission in other parts of the state.

The City of Portland, he added, must raise its funds by assessment, which will require the formulation of an assessment district. He concluded the presentation by stating that the traffic situation in Portland's Westside district can never be handled properly until the completion of the Front Street project, and strongly urged the Commission to do something about it at the earliest possible time.

Mr. Strong alleged that it is wrong to tie up traffic in the city of Portland as is now being done by the use of inadequate arterial routes. He declared that it takes nearly as much time, under present conditions, for people to go where they want to within the city limits as it does to reach the city from upstate towns.

Chairman Cabell advised that the Commission realizes the desirability of having an arterial highway through the city of Portland and that it is the generally accepted thought now that the motorist should pay more for arterial routes in cities than in the past. The Highway Commission, he said, is interested in the adoption of an arterial route through Portland's Westside district, as is evidenced by the fact that studies are now being made of the alternate routes, one of which is along Front Street, and added that, as a citizen of Portland, he would like to see Front Street improved for such use, not only from the utility standpoint but also for the development of the recreational area along the river front. He declared that there are two groups that would be benefited particularly by the Front Street improvement, the property owners along Front Street and those as far west as 5th or 6th Streets. He referred to the next allocation of federal funds and expressed a hope that a plan could be worked out that would be satisfactory to all concerned, whereby a limited portion of such funds could be applied to finance a project in Portland. He reiterated that the Commission is now making a thorough study of conditions and routes and when the plans and estimates have been prepared the Commission will be pleased to discuss them with the Metropolitan Association. Commissioners Aldrich and Clough concurred in the remarks of the Chairman. This concluded the conference.

Mrs. James Drury, Portland, came before the Commission relative to the use of the ocean beach by motorists, with particular reference to Agate Beach, in Lincoln County. She declared that the driving of motor vehicles upon the beach creates an undue hazard for pedestrians, especially children, and that someone will be injured sooner or later if the practice is not stopped. She urged the Commission to take action as may be necessary to prohibit such use of the beach areas and suggested the establishment of automobile parking zones on the beach at points where roadways enter the same. The Attorney advised that the ocean beach has been declared by the Legislature to be a public way and, in his estimation, the Commission has authority to close it to motor traffic if, in its opinion, such traffic creates an undue hazard. The suggestion was made that signs be erected at certain places, bearing the wording "No Motoring Beyond This Point". After discussion, the Commission adopted the suggestion and instructed the Engineer to see that signs so worded are placed on the beach between Newport and Agate Beach.

Messrs. W. R. Shaw and George M. Brookbank, Portland, representing

JUL 27 1939

the Pacific Topographic Service, were present in regard to furnishing the Commission with a scale relief map of the State of Oregon. They offered to construct such a map, based upon topographic data available at the present time, for approximately \$3,000. Discussion brought out the question whether or not such a map prepared from information now available would be obsolete in a short time by reason of other surveys that are contemplated by the Federal Government or other departments. In view thereof, the Commission deferred its decision in the matter pending advice from Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, relative thereto. The Engineer was instructed to secure Mr. McArthur's opinion in the matter.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Warren Creek Section of the Columbia River Highway, in Hood River County. 0.69 mile grading and bituminous macadam surfacing; also construction of reinforced concrete bridge. The low bid received for this project was that of E. C. Hall Company, Eugene, at \$47,755.00. The next low bid was that of Leonard & Slate, Multnomah, at \$53,163.50. There were 2 higher bidders. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Junction City-Eugene Section of the Pacific Highway, in Lane County. 11.5 miles roadside improvement. The low bidder for this project was Blair T. Alderman of Eugene, with his bid of \$5,988.72. The next low bidder was D. L. Ashton of Lebanon, at \$6,854.50. There were three higher bidders. The Commission awards this contract to Blair T. Alderman, the low bidder, at his bid of \$5,988.72.

"East Unit, Troutdale-Corbett Section and Bridal Veil-Benson Park Section of the Columbia River Highway, in Multnomah County. 4.13 miles clearing; 0.6 mile grading; 1.95 miles rock toe embankment construction. Morrison-Knudsen Company of Boise, Idaho, submitted the low bid of \$89,930.00 for this project. E. L. Gates, Crater Lake, submitted the next low bid of \$98,340.00. There were 9 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled."

County Commissioner E. H. Lindsey, of Tillamook County, was present and requested the loan of the services of an engineer to set line and grade stakes for a county road project extending from the Oregon Coast Highway up Cook Creek, along what is known as the old "Ridge Route" that was considered at one time by the Commission as the route for Portland's short road to the sea. He advised that two C.C.C. camps are now operating in this vicinity and it would be possible to secure the services of the men employed in these camps to construct this road if engineering is provided, and all that they want is the services of one competent engineer to supervise the work, particularly the first 10 miles at the west end of this road.

Chairman Cabell advised that the Commission is reluctant to furnish engineering service for roads that are not on the state highway system, there also being a question whether or not the Commission has legal authority so to do. The Attorney advised that, under the new law passed by the 1939 Legislature, the Commission can furnish such service if it so desires. In view thereof the Commission indicated that it might approve Mr. Lindsey's request in the present instance if it can spare an engineer. The matter was referred to the State Highway Engineer for investigation and report at the next meeting.

Messrs. Eugene Marsh and H. T. Allison, McMinnville, came before the Commission and asked for the oiling of a 3-mile section of the Lafayette Secondary Highway from Amity Junction north to what is known as Schroeder's Place, which, they said, would complete the oiling of this highway throughout. The Engineer advised that the Commission has already authorized this improvement with state forces and that the work would be done within the next month.

Mr. Marsh also asked the Commission to designate as a secondary state highway the county road which extends easterly from the Lafayette Secondary Highway, at a point about $1\frac{1}{2}$ miles south of the Threemile Lane Secondary Highway, into the Webfoot Grange community. He alleged that this is an important county road which would provide a short route into McMinnville for the people of this district. He also said that this road is one of the county's preference projects for secondary highway funds. The Commission took the matter under advisement.

Mr. Henry Berk, engineer for the West Coast Power Company, came before the Commission in regard to the leasing of a small tract of state-owned land 40'x 40' in dimension, adjacent to the road leading from the Oregon Coast Highway to the town of Glasgow, in Coos County, upon which to construct and maintain one of the company's substations. The State Highway Engineer explained that this tract does not abut on the state highway, although it is located in a corner of the state park at the north end of the Coos Bay Bridge. He offered no particular objection to selling the tract to the power company if it did not interfere with the park plans. Mr. Berk stated that his company would rather lease the property than purchase it and that they would like to have the use of it for approximately 25 years. The Commission refused to lease the tract and deferred its decision with respect to the sale of the property pending a report as to whether or not it is needed for the state park. The Commission thereupon referred the matter to the Right of Way Department to set a value on the property and to ascertain from the State Parks Superintendent whether or not there are objections to its sale from the park standpoint.

A delegation from Columbia County, consisting of County Judge J. B. Wilkerson, County Commissioner Wm. Pringle, Sr., Lester Sheeley, Vernonia; J.W. Nichols, Secretary, Vernonia Chamber of Commerce; and County Judge H. D. Kerkman of Washington County, came before the Commission and asked for the designation as a secondary state highway of the county road which extends southwesterly from the Nehalem Secondary Highway, at a place known as Trebarne, to a connection with the Wolf Creek Highway at Sunset Camp. They alleged that this is an important connection to the Wolf Creek Highway from the Vernonia District, and, in their estimation, should be on the state highway system.

Further, that the road carries a large volume of traffic and that the counties do not have sufficient funds to properly maintain it. Speaking on behalf of the project were Judge Wilkerson, Judge Kerkman, Mr. Sheeley, and Mr. Nichols. The Commission took the matter under advisement.

Mr. and Mrs. L. Siegenthaler, Portland, came before the Commission in regard to a settlement for right of way that is needed for the Wolf Creek Highway across their property near Cedar Mills. They advised that some time ago the Highway Commission took an option for this right of way and that they were given to understand that the Commission would purchase it in a short time; but the option has never been taken up, which leaves them in a quandary as to how to proceed with certain improvements that they contemplate on the balance of their holdings. Mr. Siegenthaler said that he operates a small mill on his land and that he has plans to reconstruct this building but cannot do so until he knows definitely what the Highway Commission intends to do about the right of way. Also, that the delay of the Commission in closing this deal has inconvenienced him considerably in the planting of crops, and for these reasons they would like to have the matter disposed of as soon as possible.

Chairman Cabell explained that the Commission budgeted this year a certain amount of money for the acquisition of right of way, a portion of which was allocated to the Wolf Creek Highway, but expenditures from this fund were so large that it was necessary for the Commission to change its policy with respect to purchases; so now right of way is not acquired until just prior to construction, unless an emergency exists, or, in special cases where the Commission can save money by purchasing the right of way in advance. The Attorney advised that the option taken from Mr. and Mrs. Siegenthaler provided for the payment of \$3,500 for the right of way and the construction of an approach roadway, and that Mr. Siegenthaler was to clear the right of way and to do certain other things of minor nature. This matter was discussed at considerable length but a definite decision thereon was deferred until the next meeting. The Attorney was instructed to make further investigation and report at that time.

Mr. Allan R. Hunter, Resident Agent for the United States Fidelity and Guaranty Company, appeared before the Commission at this time in regard to the contract awarded by the Commission to Edwin C. Gerber for the construction of a bituminous macadam surfacing on the Necanicum-Nehalem River Section of the Wolf Creek Highway, in Clatsop County, Contract No. 2155. The Engineer advised that this contract was awarded by the Commission on January 26, 1939, and that the date of completion specified therein was September 30, 1939, but Mr. Gerber has made very poor progress on the work and it does not now appear that he will complete it within the specified time. He recommended that, if Mr. Gerber does not make a satisfactory showing by August 16, 1939, the contract be taken away from him and turned over to the United States Fidelity and Guaranty Company to complete, as that company is surety on the bond furnished under this contract. Mr. Hunter advised that Mr. Gerber is finishing up his oiling contract on the Santiam Highway today and is transferring all his equipment to the Wolf Creek Highway project; further, that it is his intention to rush this project so that by September 1 it should be fairly well along toward completion. After further discussion the Commission by unanimous vote approved

the Engineer's recommendation, it appearing to the Commission that Mr. Gerber has failed to comply with the provisions of his contract, notwithstanding that it has been called to his attention repeatedly. Mr. Hunter was asked to transmit this information to Mr. Gerber.

Messrs. Charles MacElhanney and Parry Walbridge, representing the Oregon Mutual Life Insurance Company, came before the Commission and presented a plan for furnishing group insurance for State Highway Department employees whereby such employees could benefit to the extent of 5 per cent in premiums under that paid for individual insurance, it being understood that the premium with each policy would be paid monthly by deductions from the highway department pay rolls. They presented a brief, outlining their proposition in detail. After discussion, the Commission indicated a willingness to accept the proposition in order to give the employees the benefit of the discounts even if it means more work for the Commission's auditing department. The matter was referred by the Commission to the Attorney to work out the details.

The Engineer brought up for discussion matters pertaining to the proposed improvement of the Pacific Highway West through the town of Tigard. He advised that the design of the railroad grade separation structure is now being prepared and the question has arisen whether or not to make provision for the passage of vehicular traffic under the end of the structure for the convenience of people residing in a small community on the opposite side of the highway from the business district. Such a passage-way, he said, has been urgently requested by the people of this district. He presented three plans, one costing about \$8,000, which involves the securing of an easement from the railroad company and the introduction of two curves in the highway alignment; the second plan, estimated to cost \$18,000, provides for straight alignment and an easement from the railroad company; and the third plan, costing about \$25,000, provides for a crossing at Pine Street. He stated his preference for the third alternate, but advised that, in his estimation, the expense is not justified because very few people are concerned. After considerable discussion the Commission approved plan No. 1, modified so as to require only one curve, costing \$8,000, provided the people of Tigard will secure the easement from the railroad company.

The Engineer reported receipt of a request from Mr. J. W. Ferguson, State Forester, for blanket authority to use the ocean beaches in Curry County as landing fields for Forestry Department airplanes. The Commission voted unanimously to grant this permission in extreme emergency cases only, subject to the condition that the Forestry Department will apply for and secure a permit from the State Highway Commission in accordance with legal requirements. The Engineer was instructed to investigate the beaches of Curry County and determine at once which could be used as aircraft landing fields without causing too great a hazard to people who use the beaches for recreation. He was also instructed by the Commission to investigate the situation at Seaside where the beach is used continually as a landing field for airplanes.

The Engineer also reported receipt of information from the W.P.A. officials to the effect that the Wolf Creek Highway W.P.A. project will have to be closed down after the 30th of July because there are no W.P.A. funds

available with which to finance non-labor items, unless the state will advance additional funds to pay these costs. He estimated that the amount required to pay such expense during the month of August would not exceed \$3,500 and recommended approval of an expenditure not to exceed such amount. The Commission approved the recommendation by unanimous vote and ordered that the matter be covered by appropriate agreement.

A letter was presented from the Oregon City Territorial Days' Committee requesting that the new highway now under construction in Oregon City be opened to traffic between 14th Street and 5th Street during the progress of their celebration, which is to be held August 17 to 19. The Engineer advised that the new highway will not be ready for use by traffic at that time and accordingly recommended denial of the request. The Commission approved the recommendation.

The Commission discussed the setting of a date for its next regular meeting for the receiving of bids and decided to hold such meeting in Portland on August 31 and September 1, 1939. The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building for such meeting.

The Commission also discussed its proposed inspection of the Sinuslaw Highway in Lane County, and decided to make this trip on Wednesday, August 17, 1939, and to hold a special meeting on the following day in Salem to dispose of accumulated routine matters. The Commission ordered that the Lane County delegation be advised to that effect.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Jackson County relative to the improvement of the Butte Falls County Road as a federal aid secondary highway.

Agreement with Jackson County providing for county maintenance of the Butte Falls Road after improvement by the state.

Agreement with Southern Pacific Company relative to easement for railroad encroachment near Shady Point on the Pacific Highway south of Roseburg.

Agreement with contractors Leonard & Slate extending for a period of one year, until July 1, 1940, their contract for the furnishing of free ferry service across the Willamette River at Wilsonville.

Agreement with Union Pacific Railroad Company relative to the construction of the Troutdale-Corbett and Bridal Veil-Benson Park Sections of the Columbia River Highway, in Multnomah County, particularly the railroad crossing at Corbett. (Agreement revised later.)

Agreement with A. A. Godwin, Grants Pass, providing for a lease by Mr. Godwin of certain state-owned property in Lot 7 of Section 19, Township 36 S., Range 5 W., W. M., Josephine County, which property lies adjacent to the Grants Pass-Green Creek Section of the Pacific Highway, being Right of Way Transaction No. 6626.

Easement agreement with the Southern Pacific Company whereby the company is granted the right to construct, operate, and maintain a railroad wye track and appurtenances on state-owned property in Albany, particularly property situate in Block 39 and in Lots 5, 6, 7, and 8, of Block 46, Hackleman's Second Addition to Albany - Right of Way Transaction No. 5151.

Bargain and Sale Deed conveying unto Hood River County 22.73 acres of land situate in Section 2, Township 1 North, Range 10 East, W. M., Hood River County - Right of Way Transaction No. 6224.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:00 o'clock p. m.

OREGON STATE HIGHWAY COMMISSION

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner

R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1939	
9013	Aug. 17	Tillamook County. Request of County Court granted for loan of services of engineer to make location survey and supervise construction of county road extending from Oregon Coast Highway up Cook Creek.
		Group insurance. Entering into agreement with Oregon Mutual Life Insurance Company discussed. Decision deferred.
9014		Pacific Highway East. Plans for dividing north- and south-bound traffic at south city limits of Albany discussed.
		Vouchers. New procedure approved for handling of vouchers and voucher lists, involving change in method of signing.
		Land-purchase vouchers and vouchers not in excess of \$200 to be kept separate from larger vouchers.
		American Association of State Highway Officials. Henry F. Cabell, E. B. Aldrich, Huron V. Clough, R. H. Baldock, C. B. McCullough and J. M. Devers authorized to attend annual meeting in Richmond, Virginia.
		Construction program. Changes in program approved.
9015		Proposed state projects for contracting in fall of 1939 and spring of 1940. Tentative approval of 1941 federal aid program switched from P.W.A.
9016		Railroad grade separation program. Projects approved for 1938, 1939, 1940, and 1941 program.
9019		One-way traffic. Resolution adopted posting Necanicum River Bridge on Oregon Coast Highway for one-way traffic.
9021	Aug. 18	Minutes approved of meetings held May 17, 18 and 19 and June 5 and 6, 1939.
		Edwin C. Gerber. Discussion of violations of labor provisions in connection with Mr. Gerber's contract for Necanicum-Nehalem River Section of Wolf Creek Highway.
		New prequalification statement to be presented hereafter by Mr. Gerber with each request for plans and proposal forms.
		Siuslaw Highway. Lake Creek Section. Improvement discussed.
		Florence. Oregon Coast Highway. State cooperation in construction of approach to highway along extension of Lincoln Street denied.
9022		Poles along highways. Clause to be inserted in pole line permits providing for painting of poles in wooded districts.
		Pole lines. Requirements with respect to span length of lines over and across highways modified.
		Maryhill Ferry road. Reconditioning and oiling of county road extending from Columbia River Highway to Maryhill Ferry approved for next year's construction.
9023		Audit report. Report of Secretary of State concerning highway department for period, Oct. 1, 1937, to Dec. 31, 1938, discussed.
		Liability of State Highway Engineer with respect to handling of funds. Attorney General's opinion to be secured.

Page Date
1939

Subject

9023 Aug. 18

Gravel pit. State-owned pit in Jackson County not to be sold. Paul T. Erb denied privilege of conducting mining operations. Gold. Payment for gold recovered in state gravel pit by R. I. Stuart & Sons in connection with contract No. 2129, in Jackson and Josephine Counties, discussed.

Depoe Bay. Securing of additional parking space adjacent to Oregon Coast Highway discussed. Cost of area, if purchased, to be charged against state parks budget.

Ochocho Highway. Request for additional rock on section between Jones Mill and forest boundary denied.

9024

Pacific Highway. Construction of oiled walk along highway from north city limits of Roseburg to Garden Valley Road discussed.

Wheeler County. Improvement of county road extending from John Day Highway to Kinsua approved. To be substituted for grading and topping of Shaniko-Fossil Secondary Highway.

Cascade Lakes Forest Highway. Improvement between Willamette Highway junction and Crescent Lake urged.

Traffic beacons. Flashing-type installations approved as follows: Beaverton, Canby, and Fairgrounds Road in Salem.

Installation of beacon in Harrisburg denied.

Over-time pay. Low salaried employees only to be paid time and one-half for time worked in excess of eight hours per day.

9025

Claims. Earl Littrell Supply Company and Buxton's Central Planning Mill. Attorney to endeavor to secure Secretary of State's approval for payment of these claims now over two years old.

Klamath Falls undercrossing. Sale of foundation piling cutoffs to H. G. Wallace approved.

Fines for traffic violations. Lewis P. Crosby resigns as collector. To be handled through Attorney's office hereafter.

Oregon Trail Memorial Association. Commission not to be represented at annual meeting in Sacramento, August 27-29, 1939.

Commission not to be represented in caravan from Salt Lake City to Sacramento at time of meeting.

9026

Travel and Information Department. Increasing membership of Advisory Board on Publicity Matters deferred.

Committee not to be appointed to study Oregon conditions tending to affect tourist travel.

Umatilla and Morrow Counties. Designation, as state secondary highway, of county road extending from Lexington-Echo Secondary Highway to Pine City taken under advisement.

Willamette Valley Flood Control Project. W. L. Finley opposes construction of proposed dam on Upper Willamette River.

Survey. L. M. Lepper requests survey of proposed road extending from Wamic to Bear Paw Quarry, in Wasco County.

Old military road. Construction as highway to provide shortest distance between Astoria and Portland requested.

Territorial Secondary Highway. Oiling between Veneta and Crow urged.

Oregon City. Clipping from Oregon City Banner-Courier regarding Water Street project ordered filed.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1939	
9026	Aug. 18	Claim. Payment of John A. Laing's claim for cleaning paint off automobile approved.
9027		Cascade Lakes Forest Highway. Bend-Elk Lake Section. Engineer's letter to W. H. Lynch outlining plan agreed upon for construction approved by Commission.
		Pratt Park. Purchase of additional area deferred.
		Park. Proposed park near Hunters Creek, Curry County. Purchase of area deferred. Attorney to secure options.
		Cascadia. Inspection to be made of privately-owned park.
		Umpqua Lighthouse State Park. Request that park be named in honor of late George K. Quine denied.
9028		Albany-Lyons Secondary Highway. Oiling of section east of Crabtree, section east of Scio, and section in town of Lyons approved.
		Real property. Resolution authorizing acquisition.
9031		Pacific Highway. Siskiyou Mountain Section. Richfield Oil Company beacon and service station located on proposed highway line. Acquisition of right of way discussed.
		Condemnation. Resolution authorizing condemnation as follows:
		Newberg-McMinnville Section, Pacific Highway West,
		Bertha W. Shannahan, Wm. H. Cutting, Seth and Ethel Maud Clarkson, Roy L. Campbell, Ziba and Evelyn Chamberlain, Jesse Glen and Caroline Ellen White;
		Tigard Section, Pacific Highway West;
		Russel Raun-MacCormac Snow.
9034		Gravel pit and hauling road. For use in construction of State Fair-Adams Section of Oregon-Washington Highway. Lease of properties authorized.
		Harney County. Acquisition of property included in the connection of Lakeview-Burns and Central Oregon Highways deferred.
		Manning. Selection of site for school building to be moved resulting from construction of Wolf Creek Highway discussed.
9035		Sale of buildings. Commission approves emergency sale of buildings on Bunker Hill slide, Marshfield.
		Oregon Coast Highway. Skipanon-Seaside Section. Acquisition of right of way across John O. Albertson property discussed.
		Gravel pit. Sale of pit situate near Pacific Highway south of Junction City authorized.
		Surveys. List of surveys ordered since last meeting.
		Resolution approving completed survey of Flagstaff Hill-Middle Bridge Section of the Baker-Homestead Highway.
9037		Extensions of time, as follows:
		L. H. Hoffman, bridge over Quartz Creek;
9038		Barham Bros., bridge over O.W.R.R. & N tracks on Airport Road, Portland;
		Edwin C. Gerber, Umapine-Sunnyside Section;
9039		Mountain States Construction Co., Brownsville Section;
		H. L. Rice, Rock Creek-Morrow County Line Section;
		Chester T. Lackey, Sisters and Horse Ridge-Brothers Sections;
9040		Saxton, Looney & Risley, Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections;

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1939	
9040	Aug. 18	Extensions of time (continued): Norris Brothers, Mt. Vernon, Weston, and Service Creek Sections.
9041		Contracts completed and accepted, as follows: Airport Road Overcrossing, Portland, Barham Brothers; Lombard Street-Killingsworth Street Section, Roy L. Houck; Umapine-Sunnyside Section, Edwin C. Gerber; Brownsville Section, Mountain States Construction Company; Rock Creek-Morrow County Line Section, H. L. Rice; Horse Ranch-Chewaucan Narrows Section, Schmeer, Williams and Gentemann;
9042		Sisters and Horse Ridge-Brothers Sections, Chester T. Lackey; Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections, Saxton, Looney & Risley; Abernethy Creek Bridge, Odom Construction Company; Jericho Lane-Bloucher Section, E. C. Hall Company; Poe Valley Section, E. L. Rigdon; Falls City-Fern Corner Section, Warren Northwest, Inc.; Dixonville-Mud Hollow Section, Clifford A. Dunn; Division No. 1 Oiling Project, R. O. Dail & Warren Bros. Inc.; Elsie-Balm Grove Section, J. C. Compton; Division No. 2 Oiling Project, J. C. Compton.
9043		Date for meeting, following that scheduled for August 31, and September 1, 1939, set for September 28 and 29, 1939. Agreements, et cetera, signed, as follows: Rex E. Rose, acquisition of water right for W.P.A. Camp and future highway department maintenance headquarters on Wolf Creek Highway near Manning; Portland General Electric Company, Portland Electric Power Company, and Southern Pacific Company, with respect to pole lines and "K" line on Ross Island-Schiller Street Section of East Portland-Oregon City Highway; Idaho Power Company, furnishing of electrical energy for lighting Ontario underpass; Works Progress Administration, advance of \$3,500 for non-labor items for August, 1939; E. B. Gresham and Anna Gresham, lease or purchase of tract of land in Tillamook County for CCC Camp site. Clatsop County, use of county's quarry at Northrup Creek; United States Department of Interior, Division of Grazing, construction of Rome-Princeton Secondary Highway; O.W.R.R. & N Company and Union Pacific Railway Company, additional encroachment of Columbia River Highway on railroad right of way at Lindsey;
9044		Jacob J. Hoffard and wife, lease of building and grounds at Timber; O.W.R.R. & N Company and Union Pacific Railway Company, construction of temporary underpass at railroad mile post 30.6 between Multnomah Falls and Oneonta.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1939	
9044	Aug. 31	Bids, as follows, opened and read:
9045		Smith Point-Youngs Bay Bridge Section, roadside improvement;
		Jewell-Banzer Bridge Section, surfacing and oiling;
		North Roseburg Section, roadside improvement;
		North Unit, Siskiyou-Bear Canyon Section, grading;
		South Unit, Siskiyou-Bear Canyon Section, grading;
9046		Owyhee River-Tudor Ranch Section, grading and bridge;
		West Fork Dairy Creek and Nehalem River, bridges;
		Glenwood Undercrossing;
		Enegren Crossing, ferry service;
		Manning, re-establish school building;
		Obsolete equipment and scrap materials at highway shops.
9047		North Umpqua County Road. Additional improvement urged.
		Pacific Highway. Turkey Hill-Rice Hill Section. Reconstruction requested.
		Siuslaw Highway. Lake Creek Section. Improvement requested.
		Territorial Secondary Highway. Extending highway from Lane-Douglas County line to connection with Pacific Highway, near Anlauf, requested.
		Grass Valley-Shearers Secondary Highway. Construction from Buck Hollow Bridge northerly two miles requested.
		Wasco-Heppner Secondary Highway. Improvement of Sherman County Section, particularly near Cottonwood Bridge, requested.
		Sherman County. Improvement of short section of Hay Canyon Market Road requested.
9048		Pacific Highway. Eugene. Rerouting of highway through city discussed. Commission to meet with delegation in Eugene.
		Crusher site. Adjacent to Hood River Secondary Highway near Dee. To be advertised for sale if not wanted by other state departments or County Court of Hood River County.
		Wolf Creek Highway. Payment of \$3,500 for non-labor items for September authorized.
		Discussion of difficulties encountered with power shovel operators as result of reduction in wage rates.
		Condemnation. Resolutions authorizing condemnation as follows:
		Siskiyou Station-State Line Section, Pacific Highway,
		Bessie West;
		Owyhee River-Scotts Butte Section, I.O.N. Highway,
		J. O. Blackwill, Oliver Davis, I. Blatt, Leslie Edson,
		Mrs. E. H. Crim, Mrs. A. A. Graham, and Malheur County.
9050		Owyhee River-Scotts Butte Section, (gravel pits)
		Coast Land Company and J. O. Blackwill.

Buildings. Construction of maintenance headquarters building at John Day approved.

9165

Construction of office building and addition to maintenance headquarters building at Medford approved.

Engineer presents list of other needed maintenance buildings. Provision to be made in 1940 budget for maintenance buildings at Cascade Summit and Blue Mountain Summit.

Wolf Creek Highway. Payment of \$4,200 for November and a like amount for December for non-labor items authorized.

Oregon Road Laws. Expense of printing to be charged to general administration account.

9166

Advisory Board on Publicity Matters. Acceptance of appointment on Board presented by Palmer Hoyt and W. D. B. Dodson.

Oregon-Washington Highway. Washington improvement deferred until Oregon Section to be constructed.

Siuslaw Highway. Improvement over summit. Suggestion made that hearing regarding improvement be held in Junction City.

Junction City. City inquires as to attitude of Commission with respect to establishing business zones.

Snow removal. Request for snow removal on South Santiam Highway denied.

Klamath Falls. Traffic survey authorized.

9167

Harrisburg. Commission to cooperate in city beautification project. Commission to donate trees.

Tiller-Trail Secondary Highway. Improvement discussed.

Surveys. List of surveys ordered since last meeting.

9168

Extensions of time, as follows:

R. I. Stuart & Sons, Diamond Lake Section;

Berke Bros., Coquille-Clausen Section;

9169

A. C. Greenwood, Arch Cape-Beach Creek Section;

C. J. Montag & Sons, Bridge over Umpqua River;

9170

Fisher Bros., Eagle Creek-Wade Corner Section;

Rogers Construction Co., Scotch Creek-Castor Ranch Section;

Leonard & Slate, Service Creek-Mule Shoe Creek Section;

9171

J. F. Johnston, Bridge over Sheep Creek;

S. S. Montague, Read Creek-Wren Section;

Pacific Bridge Painting Company, Interstate Bridge painting;

9172

Newport Construction Co., Provolt-Williams Section.

Contracts completed and accepted, as follows:

Diamond Lake Section, R. I. Stuart & Sons;

Coquille-Clausen Section, Berke Bros., Inc.;

9173

North Unit, Bear Canyon-State Line Section, Harold Blake;

Umpqua River Bridge Section, C. J. Montag & Sons;

South Unit, Bear Canyon State Line Section, Harold Blake;

Devils Garden-Quartz Mountain Section, J. C. Compton and Rogers Construction Company;

Scotch Creek-Castor Ranch Section, Rogers Construction Co.

Service Creek-Mule Shoe Creek Section, Leonard & Slate;

Lamb Creek-Sheep Ridge Section, J. F. Johnston;

Dean Creek-Prairie City Section, Edlefsen-Weygandt Company;

Date for special meeting set for December 20, 1939, in Salem, followed by inspection of Wolf Creek and Wilson River Highways.

9260

Salem, Oregon, August 17, 1939

The State Highway Commission met in the office of the State Highway Engineer, Room 325, State Office Building, at 8:30 o'clock p.m., for the disposal of accumulated routine matters. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission discussed the request of the Tillamook County Court for the loan of the services of a competent engineer to make a location survey and supervise construction of a county road extending from the Oregon Coast Highway up Cook Creek, which road was at one time considered as the route of Portland's short road to the sea and is known as the Ridge Route. The Engineer advised that he has a locating engineer available who could be loaned to the County Court if the Commission so desired. The question arose whether or not the County Court expected the state to pay this engineer's salary, which it was estimated would amount to about \$1,300, the established policy in such cases being to require the counties to assume such expense. The Engineer was instructed to consult the County Court in regard thereto and report on the following day. (The Engineer reported on the following day that he consulted with the County Court and ascertained that they want the state to furnish this engineer at state expense. After discussion, the Commission approved the request subject to the condition that it would not establish a precedent in such matters and that it would not commit the Commission in any way to the designation of this particular road as a state highway at any future time, it being the Commission's thought that it is now spending as much money in this particular district as the district is entitled to and that it would be inadvisable to incur additional obligations.)

The Commission discussed the matter of entering into an agreement with the Oregon Mutual Life Insurance Company for furnishing group insurance covering state highway department employees. The Engineer questioned the advisability of entering into such an agreement because of the expense involved in auditing the accounts, which he did not believe was justified by savings that would accrue to the employees. The Commission indicated a desire to help the employees as much as possible if the cost of auditing is not excessive and provided it would not be necessary to carry accounts with too many insurance companies. The suggestion was made that the number of companies could be kept at a minimum if each were required to submit at least 50 applications for group insurance coverage as a condition precedent to the opening of an account. The suggestion was tentatively approved, provided the Commission decides to enter into agreements of this kind. The matter was discussed at considerable length but definite decision thereon was deferred until the August 31 meeting of the Commission. The Attorney was instructed to consult in the meantime with the State Insurance Commissioner as to the standing of the various companies which are seeking the privilege of writing such group insurance coverage.

AUG 17 1939

The Engineer discussed with the Commission the proposed location of the Pacific Highway East at the south city limits of Albany, plans for which involve the dividing of north-bound traffic and south-bound traffic by a parkway at the point where the new highway will enter the existing highway. He exhibited a blueprint map showing the layout and particularly pointed out that some special means of safeguarding traffic at this point must be provided because of the flat angle at which the new highway will join the old one. The Commission approved in general the plan submitted but instructed the Engineer to give the matter further study with a view of improving it if possible.

The Commission had under consideration the adoption of a procedure for the handling of vouchers for the payment of claims against the state highway fund under the Oregon State Highway Code as adopted by the 1939 legislature, which provides that the Commission need not sign each individual voucher unless it so desires, but may signify its approval of the payment of claims as a group if properly prepared and verified. The following procedure for the handling of such vouchers and voucher lists was approved by the unanimous vote of the Commission: When a group of vouchers is ready for approval by the Commission, a list of the same shall be prepared in duplicate as provided by law, and such list shall bear the signature of the Secretary to the Commission and the State Highway Engineer or Assistant State Highway Engineer as to the correctness of each of the claims. This list shall be presented to the Chairman of the State Highway Commission, together with the original vouchers. When the said Chairman has satisfied himself as to the correctness of the claims, he will indicate his approval by signing the prepared list, which will then be forwarded to either one or both of the other Commissioners for further approval, the vouchers being returned to the Salem office of the Commission for transmittal to the Secretary of State with the approved list of vouchers bearing the names of not less than two members of the Commission.

In this connection it was decided that land-purchase vouchers shall be kept separate from other vouchers and that vouchers for amounts not in excess of \$200 shall be kept separate from those in larger amounts. The Engineer was authorized and instructed to put such procedure into effect as quickly as possible.

The Commission had under discussion the matter of attending the annual meeting of the American Association of State Highway Officials, which is to be held in Richmond, Virginia, October 9 to 13, 1939. The following members of the Commission and staff were authorized to attend such meeting at state expense, provided same is approved by Governor Sprague: Henry F. Cabell, Chairman; E. B. Aldrich, Commissioner; Huron W. Clough, Commissioner; R. H. Baldock, State Highway Engineer; C. B. McCullough, Assistant State Highway Engineer; and J. M. Devers, Attorney.

The Commission considered and approved certain changes in the highway construction program as suggested by the Engineer, such changes being necessary on account of failure of Congress to provide additional funds for P.W.A. projects. The Commission also approved the contracting of certain projects in the fall of 1939 and in the spring of 1940, and tentatively approved certain projects for the 1941 federal aid program, which projects it was originally

contemplated would be financed with P.W.A. funds. There follows a tabulation of such changes, et cetera:

SUGGESTED PROGRAM CHANGES

Add to	1939 Federal Aid	Black Bridge	\$ 25,000
Subtract from	" " "	Troutdale-Dodson	25,000
Add to	1940 Federal Aid	Devils Fork Bridge	115,000
" "	" " "	Depoe Bay Bridge	75,000
Subtract from	" " "	Nehalem-Sunset Camp, oiling	90,000
" "	" " "	Troutdale-Dodson	40,000
" "	" " "	Illashe South	60,000

Proposed state projects to be contracted in fall of 1939 and spring of 1940

*Corvallis Bridge	\$ 20,000
Special maintenance projects	400,000
Brothers-Harney County line, oiling	35,000
Warm Springs Agency, oiling	45,000

The Engineer requested authority to post the Necanicum River Bridge on the Oregon Coast Highway at M.P. 28.18 for one-way traffic. He explained that this is an 80-foot steel span with three 19-foot and one 17-foot timber approaches and that it is only 15 feet 4 inches wide between felloe guards,

AUG 17 1939

which presents an extremely hazardous condition in view of the increased volume of traffic that passes over it since the opening of the Wolf Creek Highway. It was his thought, in view of the circumstances, that the bridge should be restricted to one-way traffic in the interests of safety. The Commission concurred in the Engineer's viewpoint and thereupon, by unanimous vote, adopted the following resolution providing for one-way traffic on this bridge and authorizing the erection of appropriate signs at each end thereof:

WHEREAS, the Necanicum River Bridge on the Oregon Coast Highway at Mile Post 28.18 south of Astoria is a bridge on the state highway system of the State of Oregon under the jurisdiction and control of the Oregon State Highway Commission; and

WHEREAS, the said structure has a clear width of only 15 feet 4 inches between fellow guards, which restricted width presents a hazard and danger to two-way traffic simultaneously occupying said structure; and

WHEREAS, it is deemed and is the judgment of the State Highway Commission, and the said Commission hereby finds, that it is and will be in the best interests of public safety and convenience to restrict traffic upon the said structure to one-way traffic;

NOW, THEREFORE, the premises being in part as above stated, it is hereby ordered that the said Necanicum River Bridge on the Oregon Coast Highway at Mile Post 28.18 south of Astoria be restricted to one-way traffic, and it is further ordered that appropriate signs be constructed and maintained at each end of the said structure giving warning and notice to the traveling public that only one-way traffic is permissible on and across the said structure.

IT IS FURTHER ORDERED that these rules and regulations, as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect until modified, annulled, or voided by order of the State Highway Commission.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the County Clerk of Clatsop County and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Commission adjourned at 10:45 o'clock p. m. until 9:00 o'clock the following morning in the same room.

Salem, Oregon, August 18, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building, with

AUG 17 1939

all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Commission by unanimous vote approved the minutes of the meetings held on May 17, 18, and 19, and on June 5 and 6, 1939.

Mr. C. H. Gram, State Labor Commissioner, was present and conferred with the Commission in regard to certain violations of the labor provisions in connection with the Edwin C. Gerber contract, No. 2155, with the State of Oregon for the construction of a bituminous macadam surfacing on the Necanicum-Nehalem River Section of the Wolf Creek Highway, in Clatsop County. Ray Webster, Labor Relations Engineer for the State Highway Department, was also present and entered into the discussion of this matter. It appears that Mr. Gerber has been working his men overtime on this contract without proper compensation, as is required by law, and when he was approached by the Labor Relations Engineer with respect thereto agreed to pay these men the extra amounts due them, and later forwarded to the Labor Relations Engineer checks covering such amounts, with the request that they be delivered to the proper parties. After considerable discussion of this matter it was agreed by all that Mr. Gerber should pay his men direct, particularly in view of the fact that the State Highway Department has no way of definitely knowing whether or not the checks tendered are for the correct amounts. Mr. Gram stated that he expected to confer with Mr. Gerber on the following day in Astoria, in view of which it was arranged that Mr. Gerber's checks should be returned to Mr. Gerber at that time, in Mr. Gram's presence. The Labor Relations Engineer was instructed to deliver the checks to Mr. Gerber with an appropriate letter of transmittal.

The advisability of permitting Mr. Gerber to bid on future highway construction work in view of the above-mentioned labor violations, and the fact that he has been dilatory in carrying out the provisions of previous contracts, was also discussed. The Commission decided unanimously to require Mr. Gerber hereafter to submit a new prequalification statement each time he requests plans and proposal forms to bid on state highway work. Whether or not Mr. Gerber will be permitted to submit a bid on such construction work will depend upon the action taken by the Commission on such statements.

The Commission discussed briefly the matter of improving the Lake Creek Section of the Siuslaw Highway, in Lane County, as has previously been urged by numerous citizens of that county. An inspection of this project was made by the Commission on the previous day and as a result thereof the Commission instructed the Engineer to render a report at its meeting on August 31, 1939, on the cost to construct an improvement that would be satisfactory although not up to primary highway standards, the Commission being unable financially to undertake a standard improvement, which the Engineer estimated would cost in excess of \$400,000.

The Commission also discussed the Engineer's report on the cost to construct a new approach to the Oregon Coast Highway along an extension of Lincoln Street, in Florence, as has been requested by the citizens of that town. This project was also inspected by the Commission on the previous day in company with members of the Florence City Council. The Engineer advised that the

AUG 18 1939

project would cost about \$5,300, toward which expense the city has offered to contribute the sum of \$1,000. After considerable discussion the Commission decided not to cooperate in this improvement for the following reasons: first, there now exist several other connections with the Oregon Coast Highway in Florence, and the Commission considers that the construction of the new approach is entirely a city concern; second, the Commission has no legal authority to expend state highway funds in the construction of such approach; third, if the state should build this approach it would establish an undesirable precedent which probably would embarrass the Commission in the disposal of similar requests in the future and would involve the Commission in enormous expenditures that it can ill afford. The Engineer was instructed to convey such information to the Florence City Council.

The Commission had under discussion the matter of requiring poles that are erected on state highway rights of way to be painted a color that will blend with the background and will render the poles less visible from the highway. The Engineer advised that investigation reveals that poles treated with creosote are much less visible from the highway than unpainted poles and would be less objectionable from the aesthetic standpoint. He recommended that hereafter pole line companies be required to either treat the poles with creosote before erection or paint them with creosote after they have been installed. He suggested that perhaps the painting of the poles after installation would be preferable because of objections offered by the company linemen who allege that raw creosote exudes from the poles, particularly in hot weather, if the poles are given the creosote pressure treatment, which makes it difficult for them to climb the poles and perform their necessary duties. Chairman Cabell suggested that a pole painted forest green would be less visible in certain localities where there is a background of green foliage. After considerable discussion the Commission ordered that hereafter a clause be inserted in all permits for pole line construction upon state highway rights of way providing for the painting of poles with creosote where the poles are installed in wooded districts and where bare tree trunks form the main background. In cases where green foliage forms the background the poles are to be painted a forest green to harmonize and blend with such background. In the event that the poles are erected in open country, no treatment of poles shall be required.

The Commission had under consideration the modifying of its requirements with respect to the span lengths of pole lines that are built over and across state highways. It was pointed out that such spans are now limited to 130 feet except in unusual cases which may be approved by the Commission. The Engineer gave as his thought that the fixing of the limit as to span length is not necessary if the pole line companies will install poles and fixtures heavy enough to safely carry longer spans, and will provide the proper clearance over the highway. He recommended, therefore, that the present limit of 130-foot spans be eliminated and that each application for pole line crossings be referred to the Bridge Department for an analysis of the stresses involved and recommendations as to the size of the wire and spacing of poles. The Commission approved the recommendation unanimously.

The Engineer reported on the cost to recondition and oil the county

road which extends from the Columbia River Highway to the Maryhill ferry. He advised that the road is 0.32 mile in length and estimated that it would cost about \$1,000 to improve it to a condition satisfactory for state maintenance. The Commission approved the expenditure for next year's construction.

The Commission discussed briefly matters pertaining to the audit report of the Secretary of State concerning the State Highway Department, covering the period October 1, 1937, to December 31, 1938.

In this connection the question arose as to the liability of the State Highway Engineer with respect to the handling of state highway funds, particularly with reference to the loss incurred by reason of the Moorman defalcation. The Attorney was authorized to secure, if possible, an opinion from the Attorney General with respect thereto and report to the Commission at its next meeting on August 31.

The Engineer reported on investigations that have been made of a state-owned gravel pit in Jackson County, in which Mr. Paul T. Erb, Woodburn, wishes to conduct mining operations. He advised that the pit in question is needed for future operations by the State Highway Department and recommended the denial of Mr. Erb's request and that the property be not sold. The Commission approved the recommendation by unanimous vote.

In this connection a letter was presented from Contractors R. I. Stuart & Sons giving reasons why they believe that they should not be required to pay to the state the value of gold recovered by them in a state gravel pit which they used in connection with the performance of their state highway contract No. 2129 for the construction of the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways, in Jackson and Josephine Counties. The Commission discussed this matter at considerable length but deferred its decision in regard thereto until its next meeting.

The Commission discussed the matter of providing additional parking space for automobiles adjacent to the Oregon Coast Highway at Depoe Bay. This matter was referred to the Right of Way Department to negotiate for such area, it being understood that if a suitable tract is purchased the cost thereof shall be charged against the state parks budget.

A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, in which complaint was made of the condition of the Ochocho Highway between Jones Mill and the forest boundary, and suggesting the placing of additional rock on this section in order to make it adequate as an all-weather road until such time as the Commission is able to finance the reconstruction of the same. The Engineer advised that during the greater part of the year the road is kept in excellent condition for travel but for about one month during the wet season it is somewhat slippery. He estimated that to construct a temporary surfacing on this section, which is 20 miles in length, would cost between \$20,000 and \$30,000, and questioned the justification of such expenditure. The Commission decided unanimously not to make this improvement in view of the high cost and the scarcity of funds with which to finance it.

AUG 18 1939

The Engineer reported on the cost to construct an oiled walk along the Pacific Highway from the north city limits of Roseburg a distance of 0.4 mile to the Garden Valley Road. A decision in this matter was deferred by the Commission pending report of a pedestrian traffic count. The Engineer was instructed to report thereon at the next meeting.

The Secretary presented a letter from the County Court of Wheeler County urging improvement of the county road which extends from the John Day Highway to Kinsua, in Wheeler County. After discussion, the Commission by unanimous vote approved this improvement in the 1940 federal aid secondary highway program, substituting the same for the grading and topping of the Shaniko-Fossil State Secondary Highway project, in Wheeler County, for which an amount of \$15,000 was originally budgeted.

The Commission considered and ordered filed a resolution from the County Court of Klamath County urging the improvement of the Cascade Lakes Forest Highway between the Willamette Highway junction and Crescent Lake.

The Commission considered and upon recommendation of the Engineer approved the installation of flashing-type traffic beacons at the following locations:

One beacon at the intersection of the Tualatin Valley Highway with Cedar Street in the town of Beaverton.

Two flashing beacons over the Pacific Highway East in the town of Canby, one at A Street and the other at E Street, estimated cost \$500.

One flashing beacon at the intersection of the Pacific Highway East with the Fairgrounds Road in Salem.

The Commission denied the request of the City of Harrisburg for the installation of a flashing beacon at the intersection of the Pacific Highway East with Smith Street in that town.

The Commission had under discussion the adoption of a policy with respect to paying state highway department employees who are required to work more than 8 hours per day. The Attorney advised that, under the new law enacted by the 1939 Legislature, employees paid on a monthly rate and serving in the capacity of civil engineer, inspector, supervisor, superintendent, checker, foreman, watchman, or timekeeper, cannot, if required to work more than 8 hours a day, ask the State Highway Department to pay them overtime, and are denied the right to claim or ask overtime. However, the question of whether or not the Highway Commission pays men so employed and so classified for overtime is a matter of contract between the State Highway Commission and the employees. Further, that it is entirely a matter of agreement and contract between the Commission and the employees as to whether or not the Commission pays for overtime work and what the wage per hour for such overtime shall be; and should such an agreement be made the Commission would lose none of the protection which it has under the statute, nor would the employee's position

be changed in any way or his rights in any way modified or altered. The Commission discussed this matter at considerable length and decided to pay time and one-half for all time worked by employees of the State Highway Department in excess of 8 hours per day, provided that only the low-salaried employees shall receive the benefits of such overtime payments. The Engineer was instructed to prepare a list of employees in this category.

The Commission had under discussion the matter of paying the claims of the Earl Littrell Supply Company, Marshfield, in the amount of \$17.70, and Buxton's Central Planing Mill, Corvallis, in the amount of \$7.50, which claims represent transactions which took place more than two years ago and in connection with which the question arises whether or not the Secretary of State would honor the claims inasmuch as the statute of limitations applying to the payment of claims against the state has expired. It was the Attorney's contention that these claims can be paid if the date upon which they were audited, approved, and allowed by the Commission is within the past two years. In view of the Attorney's opinion the Commission referred the claims to him with instructions to discuss them with the Secretary of State and endeavor to secure his approval for payment, if possible, so that it would not be necessary to hold them over for action by the 1941 Legislature.

The Engineer reported that in connection with the Klamath Falls undercrossing project approximately 5,250 linear feet of foundation piling cut-offs have been salvaged. He advised that these stubs are of no value except for fuel and that he has received two bids for the purchase of the same, one being that of H. G. Wallace at \$0.01 per foot, and the other that of Ralph F. Neubert at \$0.0038 per foot; further, that he has accepted the offer of Mr. Wallace. The Commission by unanimous vote approved the sale of this material to Mr. Wallace as reported.

A letter was presented from the Honorable Walter E. Pearson, State Treasurer, with respect to the continuation of the work heretofore performed by Mr. Lewis P. Crosby in connection with the collection of fines for traffic violations. Mr. Pearson advised that Mr. Crosby has presented his resignation effective August 1, 1939, and that his place will not be filled unless the State Highway Commission considers that the work that he has been doing is of sufficient importance to justify the employment of another man. The Attorney advised that, as previously instructed by the Commission, he is now preparing a standard form for the reporting of fines collected by the Justices of the Peace, and with such forms he believes that the carrying on of investigations could be satisfactorily handled by assistants in his office. The Commission approved the handling of this matter in such manner as a trial proposition and ordered that the State Treasurer be so informed.

A letter was presented from the Honorable Joseph K. Carson, Jr., Mayor of the City of Portland, advising that the Oregon Trail Memorial Association, Inc., is to hold its annual meeting in Sacramento, California, on August 27, 28, and 29, 1939, and in connection therewith will conduct a caravan over the Pony Express Trail from Salt Lake City to Sacramento; also, that the Association is desirous of having the State of Oregon well represented at this meeting and in the caravan, and suggesting that it might be possible for the

AUG 18 1939

State Highway Department to furnish a car with official representatives, which would be of considerable value in publicizing the State of Oregon. The Commission called into conference Mr. Harold B. Say, Director of the Travel and Information Department, who advised that in his estimation the State of Oregon could receive more benefits by the expenditure of its funds in other ways at this time of the year. In view thereof the Commission decided unanimously not to be represented either at the meeting or in the caravan.

The Commission discussed briefly but deferred action on the matter of increasing the membership of the Advisory Board on Publicity Matters.

The Commission also discussed briefly the appointment of a special committee to study Oregon conditions tending to affect tourist travel, and decided definitely not to appoint such committee.

The Commission considered and took under advisement requests from the County Courts of Umatilla and Morrow Counties for the designation as a state secondary highway of the county road which extends southeasterly from the Lexington-Echo Secondary State Highway, up Butter Creek to a place known as Pine City, a distance of about 3 miles.

The Commission considered and ordered filed letters as follows:

Letter from W. L. Finley in opposition to the construction of proposed dams on the Upper Willamette River and its tributaries in connection with the Willamette Valley Flood Control Project.

Letter from L. M. Lepper, Portland, requesting a survey of a proposed road extending westerly from Wamic to a connection with the Wapinitia Highway at Bear Paw Quarry, in Wasco County.

Letter from H. L. Stokes, Nome, Alaska, recommending construction of the old military road as a highway to provide the shortest distance between Astoria and Portland.

The Commission discussed a letter from Mrs. Frances Goldson, Crow Stage, Eugene, Oregon, urging the oiling of the Territorial Secondary State Highway, Lane County, between Veneta and Crow so as to allay the dust. First-hand information in regard to this road was secured by the Commission on the previous day when the Commission inspected the road in person. The Engineer at that time was instructed to render a report to the Commission at its next meeting on the cost to oil certain portions of this road.

The Commission discussed and ordered filed a clipping from the Oregon City Banner-Courier of August 8, 1939, with respect to the construction of the Oregon City project.

Consideration was given by the Commission to a claim presented by Mr. John A. Laing, Portland, in the amount of \$10, for the cleaning of his automobile which he alleges was spattered with paint while crossing one of the Coast Highway bridges on August 1, 1939, because of the carelessness of

state highway workers who were painting the bridge at that time. The Commission approved the payment of the claim by unanimous vote and ordered that precautions be taken to the end that there be no repetition of the occurrence.

The Commission considered and approved the State Highway Engineer's letter of August 8, 1939, directed to W. H. Lynch, District Engineer, Public Roads Administration, Portland, outlining the plan agreed upon at a conference in Mr. Lynch's office with respect to the construction of the Bend-Elk Lake Section of the Cascade Lakes Forest Highway, in Deschutes County, which plan provides for the following standards of construction: maximum 10° curves; 20-foot roadbed exclusive of ditches; ditches not to exceed 3 feet in width where required; application of 1,000 cu. yds. run-of-bank gravel per mile, 16 feet in width, giving a compacted thickness of approximately 4 inches; application of a dust palliative oil 12 feet in width, to be followed within 2 years by an oil treatment similar to the O-36 specification used by the State Highway Department.

The Commission adjourned at 1:00 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, all members being present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park projects:

Addition to Pratt Park adjacent to the Oregon Coast Highway at Lincoln-Lane County line; and proposed park near Hunters Creek, in Curry County:- The Parks Superintendent advised that a Mr. Dickinson owns 170 acres of land at this location, which he will sell to the state for the sum of \$3,000. He recommended purchase of this area or another one containing 327 acres, of equal importance from the state parks standpoint, located adjacent to the Oregon Coast Highway about 1½ miles south of Hunters Creek, in Curry County, there being insufficient funds available in this year's budget to finance both of them. It was his thought that the latter area, which is owned by Mildred K. Calvin, could be purchased for about \$4,000, and indicated a preference for this one because a portion of it will be needed as right of way for a proposed revision of the highway at this location. The Commission deferred its decision with respect to both parks until it is known definitely how much the owner wants for the Curry County property. The Attorney was authorized and instructed to secure an option for the purchase of the Curry County tract.

Acquisition of privately-owned park at Cascadia:- The Parks Superintendent inquired as to the wishes of the Commission with respect to the inspection of Cascadia Park, which the people of Linn County are particularly desirous of having included in the state parks system. The Commission decided to inspect the property as soon as possible after the meeting scheduled for September 1, 1939.

Name for Umpqua Lighthouse State Park, in Douglas County:- The Parks Superintendent reported a request from County Judge Morris C. Bowker, of Douglas County, that the Umpqua Lighthouse Park be named in honor of the

late George K. Quine, who was formerly County Judge of Douglas County. It was the thought of the Commission that state parks should retain the names that they were originally and commonly known by and that if some particular person is to be honored, that could be taken care of by the erection of a monument or a fountain in the park as a memorial to such person. The Parks Superintendent was instructed to discuss the matter with Judge Bowker from that standpoint.

The Engineer reported several requests for the oiling of three short sections of the Albany-Lyons Secondary Highway, in Linn County, particularly a section east from Crabtree, a section east of Scio, and a section in the town of Lyons. He estimated that for about \$3,000 a dust palliative could be applied to these sections, which would allay the dust and probably would be satisfactory until sufficient funds become available to construct a standard improvement over the unoiiled sections. He recommended approval of such expenditure for this year's construction. The Commission approved the recommendation unanimously.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel, or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney brought up for discussion the matter of acquiring right of way that is needed for the revision of the Pacific Highway at the summit of the Siskiyou Mountains, in Jackson County, on which property there

AUG 18 1939

is now being maintained a Richfield Oil Company beacon owned by Highway Communities Corporation, Ltd., and leased to the Richfield Oil Company at a monthly rental rate of \$112. There are also a service station and several other buildings and structures on the property, owned by Mr. W. B. Norris. It appears that the beacon and buildings are directly on the proposed highway line and will have to be purchased or moved. Further, that the beacon is on the property under lease from the owner, which said lease does not expire until July 15, 1940, and that the company is demanding the amount of \$2,423 from the state to cover its losses, including the cancellation of its lease. This matter was discussed by the Commission at considerable length but no decision was reached. The Attorney was instructed to bring the matter to the attention of the Commission again at its next meeting.

The Attorney requested authority to institute condemnation proceedings to acquire right of way that is needed for the Newberg-McMinnville and Tigard Sections of the Pacific Highway West across the property of the following owners:

NEWBERG-McMINNVILLE SECTION

Transaction No.	Owner	Attorney's Estimate	Owner's Demand
7108	Bertha W. Shannahan	\$200	Refused to state
7113	Wm. H. Cutting	110	" " "
7117	Seth Clarkson and Ethel Maud Clarkson	75	\$ 350
7118	Roy L. Campbell	410	2,500
7119	Ziba Chamberlain and Evelyn Chamberlain	250	2,000
7125	Jesse Glen White and Caroline Ellen White	No contact	

TIGARD SECTION

6945	Russel Raun-MacCormac Snow	Condemnation to clear title
------	----------------------------	--------------------------------

The Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Newberg-McMinnville Section of the Pacific Highway West
Tigard Section of the Pacific Highway West

real property owned by or in possession of the following parties and/or persons, to wit:

Newberg-McMinnville Section of the Pacific Highway West
7108-Bertha W. Shannahan
7113-William H. Cutting
7117-Seth Clarkson and Ethel Maud Clarkson
7118-Roy L. Campbell
7119-Ziba Chamberlain and Evelyn Chamberlain
7125-Jesse Glen White and Caroline Ellen White

Tigard Section of the Pacific Highway West
6945-Russell Raun-MacCormac Snow

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission had under discussion the leasing of a gravel pit and a hauling road on Indian lands in Umatilla County for use in connection with the construction of the State Farm-Adams Section of the Oregon-Washington Highway, in Umatilla County. The Attorney explained that the gravel pit contains 3.71 acres and can be leased for a 3-year period beginning July 1, 1939, for a consideration of \$50; also that the hauling road, which is to be 30 feet wide and contains 0.91 acre of land, can be leased for a 3-year period beginning July 1, 1939, for a consideration of \$25. The Commission by unanimous vote approved the lease of such properties and authorized the Engineer to execute the lease forms as the Commission's agent.

The Attorney requested instructions relative to the acquisition of the property included in the wye connection of the Lakeview-Burns Highway and the Central Oregon Highway, in Harney County. He advised that the tract contains 1.02 acres of land and that it is owned by Mr. C. A. Summers, Port Angeles, Washington, who demands a price of \$500 for the same. It was his thought that the Commission might want to acquire the tract so as to eliminate any possibility of its being commercialized. The Commission decided that there is no justification in acquiring the tract at this time and accordingly deferred further consideration of the matter until such time as conditions render purchase advisable.

The Attorney brought up for discussion matters pertaining to the moving of the school building in the town of Manning, Washington County, necessitated by reason of the construction of the Wolf Creek Highway at this place. He pointed out that the Commission earlier in the session approved an arrangement with the Manning Social Club for the use of its rooms, temporarily, as a school until the Manning schoolhouse has been rehabilitated, but there still exists a question of a new site for the school building and whether or not the building should be moved to an entirely new site or to another location on the present school grounds. He pointed out that the Commission is now

advertising for bids to be received at its meeting on August 31 for the removal of the school building to a new location. The Commission decided to take no action on this matter until the bids for the moving of the school building have been received and studied.

The Attorney reported emergency sales of residence buildings on the the Bunker Hill slide, Marshfield, as follows:

Transaction No. 7093	- P. J. Pruitt property	Amount paid	\$40
"	" 7094 - Robert McGee property	"	" 10
"	" 7100 - Ira and Doshia Sturdivant	"	" 17
"	" 7101 - Orville R. Watkins property	"	" 16

In view of the emergency and necessity of immediate disposition on account of slide conditions, the Commission ratified the sales by unanimous vote.

The Attorney reported on the matter of acquiring right of way 80 feet wide across the John O. Albertson property on the Skipanon-Seaside Section of the Oregon Coast Highway, at Camp Clatsop. He gave as his opinion that the damages to the property were not sufficient to justify the expense involved in moving back the buildings and suggested that the right of way width to be acquired be reduced from 40 feet to 30 feet on that side of the highway. The matter was referred to the Engineer for report as to the desirability of acquiring only a 30-foot width.

The Attorney reported on investigations relative to the sale of an abandoned state-owned gravel pit situate near the Pacific Highway about 2 miles south of Junction City. He said that as previously instructed by the Commission he has contacted numerous state departments and the County Court of Lane County and ascertained that none of them have any use for this property. In view of this report the Commission authorized the sale of the property to anyone desiring it, provided a reasonable offer is secured.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts authorized for each. After due consideration, motion was made by Commissioner Aldrich that the State Highway Engineer be authorized and instructed to make such surveys on various sections of highways of this state, which said sections of highways and the amounts authorized for survey expenditures are as follows:

Reconn. - - - 5-2819	- Rainier-Goble Section, Columbia River Highway, Columbia County.	1st authorization - \$950.00
Plans - - - 5-2820	- Scappoose-Multnomah County Line, Columbia River Highway, Columbia County.	1st authorization - \$2,000.00
Stock Pile - 6-2818	- Reedsport Rock Production, Oregon Coast Highway, Coos Co.	1st authorization - \$200.00
Stock Pile - 6-2819	- North Bend Rock Production, Oregon Coast and Cape Arago Secondary Highway.	1st authorization - \$100.00

AUG 18 1939

Recon. - - - 6-2820 - Reedsport-Coos Bay Section, Oregon Coast Highway, Coos County. 1st authorization - \$1,200.00
 Stock Pile - 8-2812 - Gold Beach Rock Production, Oregon Coast Highway, Curry County. 1st authorization - \$300.00
 Location - - 10-2825 - Gardiner Section, Oregon Coast Highway, Douglas County 1st authorization - \$1,400.00
 Gravel Pits - 11-2401 - Lang Canyon-Arlington Section, Columbia River Highway, Gilliam County. 1st authorization - \$50.00
 Plans - - - - 113-2810 - Wrights Point-The Narrows Section, Frenchglen Secondary Highway, Harney County. 2nd authorization - \$600.00
 Total to date \$2,100.00
 Plans - - - - 17-2802 - Grants Pass-Green Creek Section, Pacific Highway, Josephine County. 4th authorization - \$500.00
 Total to date \$4,500.00
 Location - - 17-2810 - Smith Hill-Grants Pass Section, Pacific Highway, Josephine County. 1st authorization - \$27,600.00
 Stock Pile - - 20-2838 - Cape Creek-Douglas County Line Section, Oregon Coast Highway, Lane County. 1st authorization - \$250.00
 Stock Pile - - 20-2839 - Cushman-Camp Creek Section, Siuslaw Highway, Lane County. 1st authorization - \$250.00
 Plans - - - - 20-2818 - Cottage Grove Section, Pacific Highway, Lane County. 4th authorization - \$460.00
 Total to date \$2,760.00
 Bridge - - - 21-2833 - Depoe Bay, Oregon Coast Highway, Lincoln County. 1st authorization - \$200.00
 Plans - - - - 24-2826 - Butteville Road-White School Section, West Portland-Hubbard Hwy., Marion Co. 1st authorization - \$100.00
 Plans - - - - 26-2837 - Oregon Slough-Columbia Boulevard Section, Pacific Highway West, Multnomah Co. 1st authorization - \$1,500.00

The motion was duly seconded by Commissioner Clough and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Engineer also reported that the location survey of the Flagstaff Hill-Middle Bridge Section of the Baker-Homestead Highway, in Baker County, heretofore authorized by the Commission, has been completed. After due consideration, the Commission approved the survey as reported, and adopted the following resolution in regard thereto:

AUG 18 1939

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make a survey on a certain section or portion of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said survey and has filed the map and plans of the said survey in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the map and plans of the said survey have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the survey hereinafter designated and described, together with its identifying location map file number, as shown in the map filing records of the State Highway Commission in its Salem office, be and it is hereby adopted and approved as the location survey of the portion or section of highway involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
5B 23-3 & 5B 23-4	1-2812	Baker	Location	Flagstaff Hill-Middle Bridge	Baker-Homestead

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said location as may improve the standards of alignment and grade not inconsistent with the general location of the section of highway involved.

Consideration was given by the Commission to the following requests for extensions of time within which to complete certain highway construction projects:

L. H. Hoffman, Contract No. 1986, for the construction of a bridge over Quartz Creek on the Wolf Creek Highway near Elsie, in Clatsop County, requested an extension of time from May 31, 1938, to July 1, 1939, within which to complete this contract. He gave the following reasons for failure to complete the project within the specified time limit: delay of 19 days in receiving executed copy of the contract; delay of 23 days on account of being required to drive 1,150 lineal feet of piling in excess of that originally contemplated; delay of 113 days, from December 20, 1937, to April 12, 1938, due to adverse weather conditions and impassable condition of roads leading to the job, the Engineer having ordered the work closed down for this period; delay of 40 days due to defaulting of the painting subcontractor; delay of 149 days, from December 2, 1938, to May 1, 1939, because of adverse weather conditions which would not permit the painting work to be done properly, such close-

AUG 18 1939

down being ordered by the Engineer. The Engineer advised that during the winter of 1937-1938 he ordered the contractor to close down the work for 113 days because of bad weather conditions during that period. Further, that during the winter of 1938-1939 for similar reasons he ordered the contractor to again close down the work, this time being for a period of 150 days. He also said that 8 days were consumed by the contractor in the iriving of an extra amount of piling over that shown in the contract, which would make a total of 271 days, or until February 26, 1939, for which an extension of time should be granted without penalty. He recommended that the extension of time until February 26, 1939, be granted without penalty, but that the contractor be charged with the engineering expense incurred by the state in the supervision of this job subsequent to such date. A letter was presented from the Public Roads Administration concurring in such recommendation. The Commission approved the recommendation by unanimous vote.

Barham Bros., Contract No. 2078, for construction of a bridge over the O.W.R.R. & N. tracks on the Airport Road, Portland, Multnomah County, requested an extension of time from January 31 to July 9, 1939, within which to complete this contract, particularly the removal of the old bridge and the erection of barriers. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the contract provided that all work in connection with this job, with the exception of the removal of the old structure, should be completed on or before January 31, 1939, and that the contractor should remove the old structure within 15 days after notice to proceed with such work. On account of inclement weather, he said, the contractor was ordered to discontinue the painting work until suitable conditions prevailed in the spring, and such painting work was completed immediately upon the giving of such notification. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Edwin C. Gerber, Contract No. 2103, for grading, surfacing and oiling the Umapine-Sunnyside Section of the Umapine Secondary Highway, in Umatilla County, requested an additional extension of time, from June 30 to July 20, 1939, within which to complete this contract. He gave no reason for failure to complete the work within the specified time limit. The Engineer advised that Mr. Gerber's failure to complete the contract within the specified time limit was solely the result of his own negligence and failure to start the project when ordered to do so. He recommended, in view of the circumstances, that the extension of time now requested be granted, but that Mr. Gerber be charged with all engineering expense incurred by the state against the job since June 30, 1939. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Mountain States Construction Company, Contract No. 2111, for grading, surfacing, and oiling the Brownsville Section of the Halsey-Sweet Home Secondary State Highway, in Linn County, requested an extension of time of 7 days, from July 15 to July 22, 1939, within which to complete this job. They alleged that practically all of the work in connection with this contract was completed by July 12, 1939, and that all that remained was the application of the finish coat of oil and the cleanup work on the shoulders, which work, according to the specifications, could not be done until 7 days had elapsed after the application of the previous coat of oil. The Engineer advised that the contractor was hindered in completing this job within the specified time limit by reason of intermittent rainy periods during the month of June. All work in connection with the job, he said, with the exception of the application of the second seal coat was completed on July 11 and the contractor was not permitted to apply the second seal coat until July 18, in conformity with the provisions of the specifications. He recommended that the 7 days' extension of time now requested within which to complete the project be granted without penalty and submitted a letter from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

H. L. Rice, Contract No. 2117, for grading the Rock Creek-Morrow County Line Section of the Wasco-Heppner Secondary State Highway, in Gilliam County, requested an additional extension of time of 10 days, from June 20 to June 30, 1939, within which to complete this project. He gave no reasons for failure to complete the project within the previously extended time limit. The Engineer advised that Mr. Rice was required to excavate and place 5,000 cubic yards of topping material which was not provided for in his original contract and in view thereof the Commission granted him an extension of time to June 20 to do this work; however, Mr. Rice experienced considerably more difficulty in the performance of such operation than was anticipated and as a result was unable to complete the project within the extended time. He recommended, in view of the circumstances, that the 10-days' extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Chester T. Lackey, Contract No. 2114, for furnishing crushed materials in stock piles for the Sisters and Horse Ridge-Brothers Sections of the McKenzie, Central Oregon, and other state highways, in Deschutes County, requested an extension of time of 9 days, from June 15 to June 24, 1939, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to unfavorable weather conditions. The Engineer advised that the contractor carried on this project in a very satisfactory manner, but, for reasons stated by him, failed to complete it within the specified time. He recommended the granting of the extension of time now requested without penalty and

AUG 18 1939

submitted a letter from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Saxton, Looney, & Risley, Contract No. 2145, for furnishing crushed materials in stock piles for the Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections of the John Day Highway, in Grant and Wheeler Counties, requested an extension of time of 30 days, from June 30 to July 30, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to difficulties in securing satisfactory materials from the gravel pit used in their first set-up, it being necessary for them to abandon this pit and secure gravel from a bar in the John Day River, which source of material they also had to abandon because of high water conditions. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is only partially correct and, in his estimation, is not sufficient justification for the granting of an extension of time without penalty because the job required the operation of two plants, which were not installed until the job had been under way for some time. After the installation of the second plant, he said, the contractor encountered difficulty in securing suitable rock because of a large amount of dust that the pit contained, and in order to eliminate the dust and at the same time eliminate excessive mechanical trouble it was necessary to install a blower, which took time and also slowed down production. He also advised that part of the overrun in time limit was attributed to manufacture of additional materials under price agreement for use in connection with the construction of the Mule Shoe Creek Section of this highway. He recommended, in view of the circumstances, the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Norris Brothers, Contract No. 2189, for oiling the Mt. Vernon, Weston, and Service Creek Sections of the John Day Highway and the Weston-Elgin Secondary Highway, in Grant, Umatilla, and Wheeler Counties, requested a 30-day extension of time, from July 31 to August 31, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct, 12 days having been lost on account of rain and 7-days' time due to failure of the rock contractor to produce materials for use in connection with the Cove Secondary Highway improvement in Union County. The latter reason, he said, is not in itself a justification for the granting of the extension without penalty, but Norris Brothers were requested to oil the Cove job before proceeding to their work at Mt. Vernon, and they could not do this oiling work until the oil rock had been furnished by the Mountain States Construction Company,

which had the contract for the production of such material. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be charged with the engineering expense incurred by the state in connection with this job subsequent to August 19, 1939. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2078, 2081, 2103, 2111, 2117, 2142, 2144, 2145, 2153, 2166, 2167, 2169, 2175, 2187, 2188, and 2190, for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2078, with Barham Brothers, for construction of the Airport Road Overcrossing on Northeast 42nd Avenue over the O.W.R.R. & N. tracks on Northeast Portland Highway, Multnomah County. Completed July 8, 1939.

Contract No. 2081, with Roy L. Houck, for grading, surfacing, and oiling the Lombard Street-Killingsworth Street Section of the Northeast Portland Secondary Highway, in Multnomah County. Completed July 11, 1939.

Contract No. 2103, with Edwin C. Gerber, for grading, surfacing, and oiling the Umapine-Sunnyside Section of the Umapine Secondary Highway, in Umatilla County. Completed July 14, 1939.

Contract No. 2111, with Mountain States Construction Company, for grading, surfacing, and oiling the Brownsville Section of the Halsey-Sweet Home Secondary Highway, in Linn County. Completed July 19, 1939.

Contract No. 2117, with H. L. Rice, for grading the Rock Creek-Morrow County Line Section of the Wasco-Heppner Secondary Highway, in Gilliam County. Completed June 30, 1939.

Contract No. 2142, with Schmeer, Williams & Gentemann, for furnishing crushed rock in stock piles for the Horse Ranch-Chewaucan Narrows Section of the Fremont Highway, in Lake County. Completed July 8, 1939.

AUG 18 1939

Contract No. 2144, with Chester T. Lackey, for furnishing crushed rock in stock piles for the Sisters and Horse Ridge-Brothers Sections of the McKenzie, Central Oregon, and other highways, in Deschutes County. Completed June 24, 1939.

Contract No. 2145, with Saxton, Looney, & Risley, for furnishing crushed rock in stock piles for the Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections of the John Day Highway, in Wheeler and Grant Counties. Completed July 18, 1939.

Contract No. 2153, with Odom Construction Company, for widening the Abernethy Creek Bridge on the Pacific Highway East, in Oregon City, Clackamas County. Completed July 31, 1939.

Contract No. 2166, with E. C. Hall Company, for grading, surfacing, and oiling, and furnishing crushed rock in stock piles for the Jericho Lane-Bloucher Section of the Hood River Secondary Highway, in Hood River County. Completed July 12, 1939.

Contract No. 2167, with E. L. Rigdon, for grading and surfacing the Poe Valley Section of the Bonanza-Malin County Road, in Klamath County. Completed July 11, 1939.

Contract No. 2169, with Warren Northwest, Inc., for surfacing and oiling the Falls City-Fern Corner Section of the Falls City County Road, in Polk County. Completed July 26, 1939.

Contract No. 2175, with Clifford A. Dunn, for grading, surfacing, and oiling the Dixonville-Mud Hollow Section of the North Umpqua County Road, in Douglas County. Completed August 12, 1939.

Contract No. 2187, with R. O. Dail & Warren Bros., Inc., for surfacing and oiling in connection with Division No. 1 Oiling Project on three secondary highways, in Clackamas, Washington, and Yamhill Counties. Completed July 31, 1939.

Contract No. 2188, with J. C. Compton, for oiling the Elsie-Balm Grove Section of the Wolf Creek Highway and county roads, in Clatsop, Columbia, Tillamook, and Washington Counties. Completed August 2, 1939.

Contract No. 2190, with J. C. Compton, for oiling in connection with Division No. 2 Oiling Project on three secondary highways, in Linn, Polk, and Yamhill Counties. Completed July 18, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the setting of a date for its next regular meeting following that scheduled to be held on August 31 and September 1, 1939. It was decided to hold such meeting on September 28 and 29, 1939, in Portland. The Secretary was instructed to make the usual arrangements to hold such meeting in the auditorium of the Public Service Building.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Rex E. Rose covering acquisition of water right for use in connection with operation of the W.P.A. Camp and future state highway department maintenance headquarters on the Wolf Creek Highway near the town of Manning, Washington County.

Agreement with the Portland General Electric Company, Portland Electric Power Company, and Southern Pacific Company with respect to the power company's pole lines and the Southern Pacific Company's "K" line on the Ross Island-Schiller Street Section of the East Portland-Oregon City Highway, in Portland.

Agreement with the Idaho Power Company covering the furnishing of electrical energy for lighting the underpass on the Old Oregon Trail Highway, in Ontario.

Agreement with the Works Progress Administration providing for the advancement of state funds in a sum not to exceed \$3,500 to pay non-labor items on the Wolf Creek Highway W.P.A. project during the month of August, 1939.

Agreement with E. B. Gresham and Anna Gresham providing for the lease or purchase of an 11-acre tract of land in Tillamook County for a C.C.C. Camp site.

Agreement with Clatsop County with respect to the use of the county's quarry at Northrup Creek in connection with the construction of the Jewell-Banser Bridge Section of the Nehalem Secondary Highway.

Agreement with the United States Department of the Interior, Division of Grazing, with respect to the construction of the Rome-Princeton Secondary Highway, in Harney and Malheur Counties.

Agreement with the O.W.R.R. & N. Company and the Union Pacific Railway Company providing for additional encroachment of the Columbia River Highway on the railroad right of way at Lindsey.

AUG 18 1939

Agreement with Jacob J. Hoffart and wife providing for the lease of a building and grounds at the town of Timber for a period of 12 months at \$12 per month, for use in connection with highway maintenance work.

Agreement with the O.W.R.R. & N. Company and the Union Pacific Railway Company covering construction of a temporary underpass at railroad mile post 30.6 between Multnomah Falls and Oneonta for the purpose of transporting grade materials from the south to the north side of the railroad tracks in connection with the reconstruction of the Columbia River Highway.

There being no further business to come before the Commission at this time, the meeting was adjourned at 3:40 o'clock p. m.

Chairman
E. B. Aldrich
Commissioner
Huron W. Clough
Commissioner

Portland, Oregon, August 31, 1939

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. W. DeSousa, Assistant Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and furnishing of free ferry service were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 4:00 o'clock p. m. in the same room:

The Commission also received bids for the purchase of obsolete equipment and an accumulation of scrap materials stored at the Highway Department Shops at Salem, Klamath Falls, Coquille, and LaGrande, as previously advertised. These bids were all referred by the Commission to the Engineer with power to sell the various items to the high bidder in each instance if the bids compare

favorably with the appraised value of the items. Announcement to that effect was made by the Chairman, Henry F. Cabell.

A delegation from Roseburg, consisting of W. C. Harding, A. C. Masters, Senator C. W. Clarke, Harry Ellsworth, County Judge Morris C. Bowker, and County Commissioners H. B. Roadman and J. Ross Hutchinson, of Douglas County, came before the Commission and urged additional improvements on the North Umpqua County Road, particularly two short sections east of the section completed this year. They asked for this improvement as soon as possible and in any event during the 1940 season. They also asked for the reconstruction of the Turkey Hill-Rice Hill Section of the Pacific Highway.

Judge Bowker stated that the county is ready to proceed with the acquisition of the right of way for the North Umpqua improvement as soon as they know when the Highway Commission intends to start construction. Chairman Cabell advised that the Commission has both of these projects in mind and intends to give them careful consideration in the formulation of its next construction program but is not in a position today to make any definite commitment to either of them.

County Judge Clinton Hurd and County Commissioner W. J. Holland, of Lane County, came before the Commission with regard to the improvement of the Lake Creek Section of the Siuslaw Highway. They were informed that the Commission has not yet made a definite decision with respect to such improvement.

They also asked that the Territorial Secondary Highway, which now extends from the town of Monroe, in Benton County, to the Lane-Douglas County line, be extended a distance of about 5 miles to a connection with the Pacific Highway, near Anlauf. They were informed that the Commission has this matter under advisement.

The County Court of Sherman County, represented by County Judge George A. Potter and County Commissioner David R. Reid, came before the Commission and asked for the following improvements:

1. Construction of the Sherman County Section of the Grass Valley-Shearers Secondary Highway, particularly from Buck Hollow Bridge northerly a distance of about 2 miles.
2. Improvement of the Sherman County Section of the Wasco-Heppner Secondary Highway, particularly the narrow sections near the Cottonwood Bridge.
3. Improvement of the Hay Canyon farm-to-market road from its intersection with the Wasco-Heppner Secondary Highway southerly a distance of about $2\frac{1}{2}$ miles.

This request was endorsed by the County Court of Wasco County which was represented by County Judge G. G. Shults and County Commissioner A. H. McLeod and County Engineer John R. Nichols. They were informed that the Commission would be glad to bear these projects in mind in the discussion of future

AUG 31 1939

highway programs, although no definite commitments can be made now. The Commission thereupon referred the matter to the Engineer for investigation and report.

Messrs. Ed Turnbull and William Tugman, Eugene, and County Commissioner W. J. Holland, of Lane County, were present in regard to the rerouting of the Pacific Highway through Eugene. It was decided that Chairman Cabell, Commissioner Clough, and the Engineer would meet with the delegation in Eugene on Thursday of the following week for a discussion of this matter.

The Commission had under discussion the sale to the Lumber and Sawmill Workers, Dee, Oregon, of an old crusher site located adjacent to the Hood River Secondary Highway just north of Dee. The Engineer advised that this tract contains 3.83 acres and that it is of no further value for state highway purposes, hence he has no objection to the sale thereof. After discussion, the Commission instructed the Attorney to ascertain whether or not any other state department or the County Court of Hood River County desires this property. In the event that such investigation reveals that the property is not wanted by any state department or the County Court, then it is to be advertised for sale, bids to be received at the next meeting. However, the Attorney is to set a minimum price that the Commission will consider for the same and such information is to be forwarded to the prospective purchasers.

The question of whether or not to advance additional state funds to finance non-labor items in connection with the Wolf Creek Highway W.P.A. project was discussed. The Engineer advised that no additional W.P.A. funds have been authorized to pay the non-labor items on this job, and if the work is to proceed during the month of September it will be necessary for the state to advance approximately \$3,500. He recommended approval of such expenditure under the same arrangement as that under which funds were advanced to pay for these items during June, July, and August. The Commission approved the recommendation unanimously.

In this connection the Engineer reported difficulties in connection with the employment of men to operate power shovels on this job, it appearing that these men feel that they are underpaid inasmuch as they are not receiving union wages for such work, the W.P.A. wage scale having been reduced under new W.P.A. regulations. This matter was discussed at some length but no decision with regard thereto was reached. Chairman Cabell was authorized by Commissioners Aldrich and Clough to act for the Commission in the disposal of this and other matters pertaining to this W.P.A. project.

The Assistant Attorney requested authority to institute condemnation proceedings to acquire right of way needed for the Owyhee River-Scotts Butte Section of the I.O.N. Highway, in Malheur County, and for the Siskiyou Station-State Line Section of the Pacific Highway, in Jackson County. He explained that he is offering \$6.00 per acre for right of way needed for the I.O.N. Highway and that he has been unable to locate a Mrs. Bessie West, the owner of the property needed for the Siskiyou Station-State Line project, which he values at \$20. The Commission approved the Attorney's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantage to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Siskiyou Station-State Line Section of the Pacific Highway
Owyhee River-Scotts Butte Section of the I.O.N. Highway

real property owned by or in possession of the following parties and/or persons, to wit:

Siskiyou Station-State Line Section of the Pacific Highway
7179-Bessie West

Owyhee River-Scotts Butte Section of the I.O.N. Highway
6902-J. O. Blackwill
6907-Oliver Davis
6901-I. Blatt
6910-Leslie Edson
6913-Mrs. E. H. Crim
6915-Mrs. A. A. Graham
6196-Malheur County

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or

AUG 31 1939

which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission also by unanimous vote adopted the following resolution authorizing condemnation proceedings to acquire gravel pits on the property of the Coast Land Company and J. O. Blackwill, for use in connection with the construction of the Owyhee River-Scotts Butte Section of the I.O.N. Highway, in Malheur County, and approved the Attorney's offer of \$6.00 per acre for such gravel pits:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

AUG 31 1939

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Owyhee River-Scotts Butte Section of the I.O.N. Highway

real property owned by or in the possession of the following parties and/or persons, to wit:

6201-Coast Land Company
6903-J. O. Blackwill

and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said description may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be

AUG 31 1939

any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Assistant Attorney also brought up for discussion the matter of acquiring from the O.W.R.R. & N. Company two small parcels of land needed for right of way for the State Farm-Adams Section of the Oregon-Washington Highway in Umatilla County, said parcels being located on the railroad station grounds at Adams. It appears that the railroad company will not convey this property to the state unless the state, in turn, will construct certain guard fence and do other things for the benefit of the railroad company that were not mentioned at the time of the hearing conducted by the Public Utilities Commissioner, covering the matter of elimination of the railroad grade crossing at this point, and it may be necessary, in view thereof, to condemn the right of way across the company's property or to revise the plans for this project so as to use the existing county road connection at Adams, as was originally intended, notwithstanding that it would affect the highway alignment adversely.

The Engineer advised that the original plans for this highway improvement were altered somewhat as an accommodation to the railroad company, although the change also benefited the state. He suggested that, rather than to accede to the new demands of the railroad company, it would be advisable to construct the project under the original plan, using the county road connection as a temporary proposition, notwithstanding that it would shorten the highway improvement about one-half mile. He also suggested that it might be advisable to consult with the Public Utilities Commissioner relative thereto and to withdraw the petition for the railroad grade separation project, in the event the railroad company will not cooperate. The Commission tentatively approved the Engineer's suggestion but deferred a definite decision thereon pending receipt of the bids for this project, which are to be opened on the following day.

The Engineer reported the need to secure the approval of the United States War Department before proceeding with the construction of the proposed viaduct along the east bank of the Willamette River, between 8th Street and 9th Street, in Oregon City, in connection with the state highway improvement at that place, which project was previously authorized by the Commission for the 1939 Federal Aid Program. He requested authority from the Commission to

present the plans of this structure to the War Department for such approval. The Commission approved the Engineer's request by unanimous vote.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Assistant Attorney, and the Secretary present.

The Engineer reported on the cost to construct a sidewalk on the Pacific Highway from the north city limits of Roseburg to the Garden Valley Road, a distance of about 0.4 mile. He estimated that it would cost about \$1,025.00 to build a sidewalk on the east side of the highway, and on the west side of the road about \$1,675.00, or a total of \$2,700.00. He pointed out that the present highway is not on permanent alignment and there is a possibility that it will be reconstructed within the next three years, in view of which he questioned the advisability of spending any money at this time for sidewalk construction, inasmuch as the walk would have to be torn up when the new highway is built. He also questioned the justification of sidewalk construction on account of pedestrian traffic, explaining that a traffic count taken on Thursday, July 13, 1939, between 6:00 o'clock a.m. and 10:00 o'clock p.m., revealed that there were only 78 pedestrians using the west side of the highway and only 77 using the east side of the highway during that period. He recommended deferment of the sidewalk construction until the highway is rebuilt. The Commission approved the recommendation unanimously and asked Commissioner Clough to convey such information personally to the Roseburg Chamber of Commerce, which has urged the construction of such sidewalk.

The Commission had under discussion the report from the Engineer relative to the Rural Electrification Administration power line construction along the McKensie Highway, in Lane County. The Engineer advised that Mr. Charles Edwards, Attorney for the sponsors of this R.E.A. project, was contacted and it appears that there are many questions involved, particularly concerning the right of way through the timbered strips, which cannot be solved until a survey of the project has been made. Also, that the survey is to be financed with federal moneys which cannot be secured until the federal authorities have been assured that a permit will be granted by the State Highway Commission for the maintenance of poles on the highway right of way, for which reason Mr. Edwards has requested a letter from the Highway Commission stating that such permit will be granted subject to the condition that the final exact location is to be determined later. It was his thought that such letter should be written and he so recommended. The Commission approved the recommendation.

The Engineer also reported the cost to perform certain construction work needed in connection with the improvement of the 8th Street connection to the Oregon Coast Highway, in Reedsport, which improvement has heretofore been requested by the Reedsport City Council. He advised that inspection has been made of this project, which reveals that for the sum of \$600 a satisfactory connection can be made, the state's improvement being confined to the intersection property, the balance of the improvement being financed by the City of Reedsport. He recommended that the Commission join with the City of Reedsport in this undertaking. The Commission approved the recommendation unanimously.

AUG 31 1939

The Commission discussed briefly the matter of the use of the ocean beach at Seaside as an airplane landing field, it having been reported that this particular beach is being so used continually. The Assistant Attorney reported that a portion of the ocean beach at Seaside is owned by the city and is without the jurisdiction of the State Highway Commission, this being one of the few places on the Oregon Coast line where such a condition obtains. He was instructed by the Commission to ascertain definitely if the area that is now being used as a landing field at this place is within the limits of the city-owned property and to report his findings in the event such area is under state jurisdiction, in which case the Commission will take action on the matter.

The question of whether or not to permit the transportation of logs over the Wolf Creek Highway, involving the use of the detour road which passes under the approach to the Nehalem River Bridge, had the attention of the Commission. The Engineer explained that this bridge is now under construction and pending completion of same all of the Wolf Creek Highway traffic is required to use the detour, which contains a very sharp curve at the bridge end where the sight distance is very short. He gave as his thought that the transportation of logs around this curve should be prohibited in the interests of safety to other traffic, and that if log hauling is allowed under the bridge at all it should be limited to loads that originate along the old county road which crosses the highway at a point under the bridge approach where there is a clear view in each direction. He recommended adoption of such a ruling, to be effective until other arrangements can be made for the hauling of logs around the curve with safety. The Commission approved the recommendation unanimously. In this connection the Engineer reported on the feasibility of constructing a connecting road between the highway and the detour road, entirely on the north side of the highway. He estimated the cost of such connection at \$30,000, which amount he declared prohibitive. He suggested in lieu thereof the widening of the curve on the present road, which would cost only a nominal amount and would permit the hauling of logs under the bridge structure without undue hazard to other traffic, particularly if flagmen are maintained during the time logging operations are under way. The Commission approved the suggestion and authorized the widening work to be done with state forces.

A letter was presented from Mr. J. M. Adams, Superintendent of Schools, Powers, Oregon, requesting the oiling of the Powers Secondary Highway between Myrtle Point and Powers. The Commission denied the request for the time being on account of lack of funds with which to finance the work.

A letter was presented from County Judge U. G. Couch, Union County, requesting the following improvements at the earliest possible time:

1. Oiling, Union-Medical Springs Secondary Highway
2. Additional improvement to the Cove Secondary Highway
3. Additional improvements to the North Powder-North Powder River County Road

He also asked that the Starkey Secondary Highway be extended from its present terminus westerly to Ukiah, in Umatilla County.

A letter was also presented from Mr. Charles H. Reynolds, Chairman of the La Grande Commercial Club, requesting the following improvements:

1. Oiling of the Union-Medical Springs Highway
2. Improvement of the Hilgard-Starkey Secondary Highway and the extension of the same as a secondary state highway to the Umatilla County line
3. Improvement to the Wallowa Lake Highway between Elgin and Minam, particularly the Minam Hill Section

The Commission took these requests under advisement.

The Engineer requested authority to substitute certain oiling projects for the Lombard-Killingsworth paving project which was approved by the Commission at its meeting on August 17 for contracting in the fall of 1939 or the spring of 1940, as a state project, it having been determined that this project is eligible for the federal aid program and should be financed with federal funds. He advised that the transfer of this job to the federal aid program will release \$110,000 of state money for other projects in the state oiling program, and suggested the following:

<u>County</u>	<u>Highway</u>	<u>Section and Kind of Work</u>	<u>Amount</u>
<u>Division 2</u>			
Tillamook	Wilson River	Jordan Creek-McNamers - 10 Miles Surfacing and Oiling	\$25,000
<u>Division 3</u>			
Lane	Willamette	Dexter-Duval Creek - 15 Miles Surfacing and Oiling	43,000
<u>Division 4</u>			
Deschutes	Santiam	Sisters Section, Drainage, Surfacing and Oiling	2,000
<u>Division 5</u>			
Baker	Medical Springs	Missouri Flat-Miles Bridge - 8 Miles Surfacing and Oiling	15,000
Union	"	Union-Catherine Creek - 10 Miles Surfacing and Oiling	15,000

The Commission approved such substitution of projects, as recommended by the Engineer.

The Commission authorized an expenditure of \$50 as the sponsor's contribution in connection with the manufacture of furniture for use in the concession building at Silver Creek Falls State Park.

AUG 31 1939

The Engineer reported that in accordance with authority previously granted him by the Commission he awarded to Morrison-Knudsen Company, Boise, Idaho, on August 22, 1939, the contract for the construction of the East Unit, Troutdale-Corbett Section, and Bridal Veil-Benson Park Section of the Columbia River Highway, in Multnomah County, bids for which were taken by the Commission on July 27, 1939, the conditions of the award having been satisfied. The Commission by unanimous vote approved the award of this contract.

The State Parks Superintendent, S. H. Boardman, was present and reported on the following park matters:

Offer of Mr. and Mrs. Drew Barnum, The Dalles, to donate property for a state park adjacent to The Dalles-California Highway:- The Parks Superintendent advised that Mr. and Mrs. Barnum wish to present to the state, as a gift, a tract containing 7 acres situate adjacent to The Dalles-California Highway at a point about 6 miles south of the Columbia River Highway, in Wasco County. He recommended acceptance of the gift and that it be named Barnum Park in honor of the donors. The Commission approved the recommendation unanimously and ordered that an appropriate letter of thanks be sent to Mr. and Mrs. Barnum.

Complaint of Union Pacific Old Timers Club in regard to conditions in Emigrant Springs Park:- The Parks Superintendent advised that the Union Pacific Old Timers Club held a picnic in Emigrant Springs Park some time ago, which was attended by about 1,500 members, and in addition there were present in the park on that day about 4,000 others, making a total of over 5,000 people. He advised that this park has not been developed to handle such a crowd and gave as his thought, in view thereof, that the Old Timers Club has no cause for complaint. The Commission agreed with the Parks Superintendent and left it with Commissioner Aldrich to explain to the officers of the club.

Purchase of addition to Umpqua Lighthouse State Park, in Douglas County:- The Parks Superintendent advised that the Commission some time ago acquired from the Federal Government, by means of a revokable license, 110 acres of land in this lighthouse reserve, which were to be used as a state park, the thought being at that time that Congress would authorize the deeding of the area to the state upon payment of the sum of \$450. However, when Congress finally took action on the matter and authorized the sale, it increased the consideration to be paid from \$450 to \$1,000. He recommended purchase of the property at such figure on account of its desirability as an addition to the present state park. The Commission approved the recommendation unanimously.

Parking area adjacent to the Oregon Coast Highway at Depoe Bay:- The Parks Superintendent advised that he has investigated the parking strip heretofore dedicated for public use by the Sunset Investment Company along the ocean front on the south side of Depoe Bay and finds in reality that the state already owns the property, it being situate at the edge of the bluff below the highwater line, so there is no particular necessity to secure a deed from the county, although the County Court has stated its willingness to deed this area to the state, if necessary. The Sunset Investment Company, he said, still

owns Block "A" of this subdivision, which fronts on the highway just south of the Depoe Bay Bridge, but they are asking \$15,000 for this tract because, they allege, it is worth that amount as a hotel site, so it does not seem likely that it could be acquired at a reasonable figure for parking space for automobiles. Furthermore, the expense is hardly justified in view of the fact that it is such a small area and will not accommodate many cars.

In the discussion of this matter it was pointed out that the traffic congestion problem at Depoe Bay is serious and that a parking area for automobiles is a necessity. The Commission stated that it wants a parking place for automobiles as close to the highway bridge as possible. The suggestion was made that perhaps a certain 10-acre site about one-quarter mile north of the bridge would be satisfactory. The Commission instructed the Attorney to secure an option for the purchase of this tract if, in his estimation, it is the best one available for the purpose intended.

Purchase of timber tracts from the Louis Hill interests at Sisters:- The Commission by unanimous vote approved the purchase of this timber tract, which is located near the intersection of the McKenzie Highway with the Bend-Sisters Highway at the east city limits of Sisters, at the rate of \$4.00 per M., or a total of \$1,532.00, based on the timber cruise made by the cruiser employed by the Hill interests.

Request of Roman Kintz to secure a connection from the state-owned power line at the Silver Creek Falls State Park:- The Parks Superintendent advised that the Government has just completed this power line to serve the south section of the state park and that it was intended for state use only, but Mr. Kintz, who operates a soft-drink establishment at the entrance to the park, wishes a connection thereto. He gave as his thought, in view of the fact that the Commission has an established policy which will not permit the use of state-owned facilities by private individuals, that the request should be denied. The Commission concurred in the Parks Superintendent's viewpoint and thereupon denied the request.

In connection with this matter, the Assistant Attorney presented the claim of Fred A. Williams, Attorney at Law, Salem, Oregon, in behalf of his client, Roman Kintz, to the effect that a lease which his client had entered into with Fred Volz authorized an extension of five years after June 24, 1941. He advised that it was the opinion of the Legal Department that the lease contained no such provision, and, acting upon this advice, the Commission decided to refuse to recognize any extension of the lease.

County Commissioners H. B. Roadman and J. Ross Hutchinson, of Douglas County, came before the Commission at this time and urged the extension of the Territorial Secondary Highway from its present terminus at the Lane-Douglas County Line southerly to a connection with the Pacific Highway at a point near Anlauf, a distance of about 5 miles. Mr. Roadman stated that Douglas County has rebuilt this section to state secondary highway standards and gave as his understanding that the State Highway Commission would designate this a secondary state highway when the county work was completed. Mr. Hutchinson confirmed Mr. Roadman's statement. The Commission took the matter

AUG 31 1939

under advisement. (A resolution designating this secondary state highway was adopted later in the session.)

Mr. Hutchinson also asked for the oiling of the Elkton-Sutherlin Secondary State Highway and the Tiller-Trail Secondary Highway between Canyonville and Days Creek, which request was taken under advisement by the Commission.

A delegation from Nyssa, representing the Chamber of Commerce and consisting of Frank Morgan, Secretary; Dr. J. J. Sarazin; E. B. Norcott; Mayor R. A. Thompson; Bernard Frost, President of the Chamber of Commerce; and Berwyn Berke, Editor of the Gate City Journal, came before the Commission in regard to the proposed railroad grade separation project in Nyssa. Mr. Morgan headed the group. He urged the Commission to construct this project at the earliest possible time and advised that the Union Pacific Railroad Company has assured them that it will build a new depot in Nyssa as soon as the Highway Commission constructs the underpass. He further advised that Nyssa is a growing community and that a number of new industries are contemplated there, but are being held up until the matter of the underpass is definitely settled, because the prospective investors want to make certain that their developments are in conformance with the highway improvement. He also urged haste in building the underpass in order to relieve traffic congestion that now obtains on account of the Nyssa sugar factory, which, he said, is one of the largest industries in Eastern Oregon. He explained that there is heavy traffic to and from the sugar factory, all of which must cross over the main line of the O.W.R.R. & N. Company's tracks, and accidents frequently occur, some of which have been fatal.

The Engineer advised that the survey for this project has already been made and that the next step in the procedure is to secure options for the right of way. He recommended the project highly for the next railroad grade separation program, provided right of way can be obtained at reasonable cost, and that the Commission does not have to pay an exorbitant sum for damages on account of change in grade of city streets. This matter was discussed at considerable length, with the result that the Commission, by unanimous vote, authorized the securing of options for the right of way and submission to the city council of resolutions with respect to street grade changes. The Assistant Attorney was instructed to assign a right of way agent to this project as soon as possible.

The delegation then discussed with the Commission matters pertaining to the designation of U. S. Highway 30 North and U. S. Highway 30 South. They advised that under the present system of highway signing people become confused and go many miles out of their way before they realize that they are on the wrong road. They presented a plan to remedy this situation, which the Commission referred to the Engineer for thorough investigation, and report at the meeting on September 28, 1939. The matter is to be discussed at the Annual Meeting of the American Association of State Highway Officials which is to be held in October.

At 4:00 o'clock p. m. Chairman Cabell announced the following awards of contracts for highway construction projects and ferry service, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Smith Point-Youngs Bay Bridge Section of the Oregon Coast Highway, in Clatsop County. 1.66 miles roadside improvement. The low bid received for this project was that of D. L. Ashton, Lebanon, at \$4,920.00. The next low and only other bid was that of George F. Anderson, Astoria, at \$10,440.00. The Commission awards this contract to the low bidder, D. L. Ashton, at his bid of \$4,920.00.

"Jewell-Banser Bridge Section of the Nehalem Secondary Highway, in Clatsop and Columbia Counties. 12.5 miles surfacing and oiling, also furnish 5,200 cu. yds. crushed rock in stock piles and at bunkers. O. C. Yocom, of Willamina, was the low bidder on this project with his bid of \$63,746.00, using asphalt, and \$63,234.00, using tar. A. S. Wallace, Roseburg, was the next low bidder on this project, with his bid of \$64,098.00. He submitted no bid using asphalt. There were 9 higher bidders. The Commission awards this contract to O. C. Yocom at his low bid of \$63,234.00, using tar.

"North Roseburg Section of the Pacific Highway, in Douglas County. 0.74 mile roadside improvement. D. L. Ashton, Lebanon, submitted the low bid of \$4,592.25 for this project. The only other bidder was Blair T. Alderman, Eugene, who bid \$5,693.95. This contract is awarded to D. L. Ashton, the low bidder, at his bid of \$4,592.25.

"North Unit, Siskiyou-Bear Canyon Section of the Pacific Highway, in Jackson County. 1.01 miles grading. The low bid received was that of Roy L. Houck, Salem, at \$78,607.75. The next low bid received on this project was that of Colonial Construction Company, Spokane, Washington, at \$79,752.00. There were 8 higher bidders. The Commission awards this contract to the low bidder, Roy L. Houck, at his bid of \$78,607.75.

"South Unit, Siskiyou-Bear Canyon Section of the Pacific Highway, in Jackson County. 1.4 miles grading. Roy L. Houck, Salem, submitted the low bid on this project with his bid of \$136,421.50. Leonard & Slate, Multnomah, submitted the next low bid at \$144,264.00. There were 8 higher bidders. This contract is awarded to the low bidder, Roy L. Houck, at his bid of \$136,421.50.

"Owyhee River-Tudor Ranch Section of the I.O.N. Secondary Highway, in Malheur County. 18.07 miles grading and 81 lin. ft. pile trestle bridge. The low bid received on this project was that of M. L. O'Neil & Son, Eugene, at \$97,325.75. The next low bid was that of Leonard & Slate, Multnomah, at \$104,332.00. There were 2 higher bidders. The Commission awards this contract to M. L. O'Neil & Son at their low bid of \$97,325.75.

AUG 31 1939

"Bridges over West Fork Dairy Creek and Nehalem River on the Wolf Creek Highway, in Washington County. Construction of concrete bridge 182 feet long and 2 composite pile trestles, totaling 194 feet in length. The low bid received for this project was that of J. F. Johnston, Newberg, at \$27,563.25. The next low bid was that of Averill & Corbin, Portland, at \$27,749.00. There were 9 higher bidders. The Commission awards this contract to the low bidder, J. F. Johnston, at his bid of \$27,563.25.

"Glenwood Undercrossing on the Wilson River Highway, in Washington County. Furnish and deliver structural steel only for 85-ft. steel deck girder span. Minneapolis-Moline Power Implement Company, Los Angeles, California, submitted the low bid of \$4,067.20 for this project. Poole & McGonigle, Portland, submitted the next low bid at \$4,264.00. There was one higher bidder. This contract is awarded to the Minneapolis-Moline Power Implement Company at its low bid of \$4,067.20.

"Furnish ferry service at Enegren Crossing of the Coos River, on the Coos River Secondary Highway, in Coos County. Andrew Stambuck, Marshfield, was the low bidder for this ferry service at his bid of \$734.62 per month for 18-hour service and \$784.60 per month for 20-hour service. Leonard & Slate, Multnomah, submitted the only other bid. They bid \$1,000.00 per month for 18-hour service and \$1,080.00 per month for 20-hour service. This contract is awarded to Andrew Stambuck, the low bidder, at his bid of \$784.60 for furnishing 20-hour service.

"Move and re-establish school building and play shed in the vicinity of Manning, Washington County. The low bid received for this project is that of Odom Construction Company, Oregon City, at \$4,820.00. The next low bid is that of Caufield & Savage, Tillamook, at \$6,618.00. There was only one higher bidder. The award of this contract will be held until tomorrow pending certain investigations by the Commission in connection with right of way matters.

"Sale of scrap materials at Salem, LaGrande, Klamath Falls and Coquille shops of the Commission. The tabulation of bids received for the purchase of these materials requires further investigation, so they are all referred to the Engineer with power to award the sale to the high bidder in each instance, after the high bidder has been definitely determined."

The Commission adjourned at 4:45 o'clock p. m. to reconvene at 8:30 o'clock p. m. in the Benson Hotel for disposition of accumulated routine matters.

The State Highway Commission reconvened at 8:30 o'clock p. m. in Room 1205, Benson Hotel, all Commissioners being present and participating. Also present were the State Highway Engineer, the Assistant Attorney, and the Secretary.

AUG 31 1939

Mr. Roger Mything, District Sales Manager of the Oregon Culvert and Pipe Company, Portland, came before the Commission and urged careful investigation and study of the effects that the specifying of the use of creosoted timber pipe culverts, as an alternate for concrete and corrugated metal pipes in state highway construction would have on the pipe manufacturing industry in the State of Oregon, before the Commission takes any definite action with respect to such specification. He said that he represents both the concrete and metal pipe industries and that twenty plants are now operating in the state in the manufacture of such type of pipe, whereas there is only one plant in the State of Oregon that is authorized to manufacture timber pipe. It was his contention, in view of the circumstances, that it would be unfair to include the timber pipe in competition with concrete and metal and urged the Commission to give the matter very careful consideration before it makes its final decision. The Engineer advised that timber pipe as now manufactured compares favorably with concrete and metal pipe as to strength, and, from an engineering standpoint, he could see no reason why the timber pipe should not be included as an alternate, the question being simply one of policy to be established by the Commission.

Chairman Cabell advised that moneys available to the Commission for highway construction are furnished by the motorists, who expect the Commission to spend this money in a manner that will benefit the public to the greatest extent, including the saving of funds in so far as possible. He agreed with Mr. Mything that the matter should be given considerable study and investigation before a definite decision is rendered. After further discussion, the Engineer was instructed to make a thorough investigation and report back to the Commission.

Messrs. W. R. Shaw and George M. Brookbank, Portland, were present in regard to furnishing the State of Oregon a relief map. The Engineer advised that, as previously instructed by the Commission, he made inquiry of Mr. Lewis A. McArthur, President of the Oregon Geographic Board, as to whether or not a relief map constructed on the basis of information available at this time would become obsolete within a comparatively short time by reason of additional topographic surveys throughout the state, and that Mr. McArthur advises that a good map can be prepared now and will be correct for a long time to come. He said that he would like to have such a map in his office because of its value from an engineering standpoint, provided other state departments could be prevailed upon to join in the cost of same. Mr. Shaw estimated the cost of the base map at \$3,800 and the cost of castings from the original at \$400 to \$700, depending upon the amount of lettering required on them. After considerable discussion the Commission authorized an expenditure of \$1,500 toward the cost of the original base map. Mr. Shaw was advised that such amount is the maximum that the Highway Commission will contribute and that it would be up to him to secure the necessary balance from other sources. The Engineer was instructed to prepare specifications for the map and submit the same for approval to the Commission at the next meeting. The entire arrangement is to be covered by appropriate agreement between Mr. Shaw and the Commission.

The Assistant Attorney reported the status of the 1939 right of way

AUG 31 1939

budget. He advised that the Commission budgeted \$600,000 for right of way purchases this year and up to the present time approximately \$550,000 has been obligated. Present indications, he said, are that right of way expenditures this year will not exceed the budgeted amount. The Commission approved the report.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Necanicum-Elsie Section - Wolf Creek Highway</u>				
7044-Crown-Zellerbach Corporation	Park	10.83	\$100 per a.	Parker
<u>Sunset Camp-Elsie Section - Wolf Creek Highway</u>				
2072-Inman-Poulsen Lumber Co.	R/W	4.2	Gratis	Gardiner
<u>Lombard Street-Killingsworth Street Section - N.E. Portland Highway</u>				
6056-Decker, Beatrice (Correction)	R/W	54 sq.ft.	5¢ sq.ft. plus moving building. (Est'd cost \$915.96)	Parker

The Commission had under discussion the bids received at the morning session for the moving of the school building at Manning, and decided unanimously to award this contract to the Odom Construction Company, which submitted the low bid therefor, public announcement of such award to be made on the following day. In view of this decision, the Commission approved an agreement with the Manning School District with reference to the moving of the school building, and an agreement with the Manning Social Club providing for the use of its club rooms for school purposes pending re-establishment of the school building on the new site.

The Commission authorized the Engineer to sign a lease agreement, as its agent, for the acquisition of a gravel pit on the Umatilla Indian Reservation, which pit is to be used in connection with the surfacing of the State Farm-Adams Section of the Oregon-Washington Highway.

The Commission also authorized the Engineer to sign a lease agreement, as its agent, providing for the acquisition of a stock pile site on property owned by the Siletz Indian Reservation near Roads End, in Lincoln County.

The Commission had under discussion the adoption of a policy with respect to the construction of right of way fences along sections of state highways that have been acquired by county court resolutions, and decided unanimously not to assume any responsibility for fence construction along sections so acquired.

The Commission considered and referred to the State Parks Superintendent for report a letter from John Plebuch, Willamina, with respect to the establishment of a state park adjacent to the Columbia River Highway at a place known as Little Jack Falls.

The Engineer reported that fire recently destroyed the buildings that were being used by highway department maintenance forces at Madras, and that he has been unable to rent suitable quarters elsewhere in that town. He suggested that it would be advisable for the Highway Department to own its own maintenance buildings at this place, and requested authority to acquire a site from Jefferson County at a cost of about \$440. The Commission by unanimous vote authorized the acquisition of such site, which is described as Lots 1, 2, 3, 4, 5, 6, 12, 13, 14, 15, 16, 17, and 18, of Block 1, First Addition to Palmain, Madras.

The Commission discussed the request of G. W. Engeman and Glen Peck,

AUG 31 1939

Foster, Oregon, that they be permitted to maintain a small building on the right of way of the South Santiam Highway, about one-half mile east of Tombstone Summit, during the coming winter and up to July 31, 1940. The Engineer advised that the building referred to is 18' x 20' in dimension and is not yet completed; further, that due to a misunderstanding the owners inadvertently placed it on the highway right of way but stopped construction activities when notified that they were building it on state property. He further stated that the owners would like to complete the building and operate it during the present winter, with the understanding that they will prepare a new site and move the building back outside of the 100-foot right of way as soon as snow conditions will permit next spring. The Commission decided, in view of its established policy, which will not permit encroachments upon highway rights of way, not to grant the permission requested, and instructed the Engineer to order the removal of the building at once.

The Engineer reported receipt of a communication from the State Parks Superintendent to the effect that he has no objections to the sale to the West Coast Power Company of a small portion of the state park located at the north end of the Coos Bay Bridge, inasmuch as it will not interfere with the use or development of the park. He also reported receipt of a communication from the Attorney recommending a nominal charge for this property, \$15 or \$20, in the event the Commission elects to sell it. In view of the report, the Commission decided unanimously to sell the parcel, which is 40' x 40' in dimension, for the sum of \$15.00.

The Commission had under discussion an agreement with the Miami Corporation providing a method of payment for timber strips recently acquired from this corporation, adjacent to the Salmon River Highway. The Commission approved the method of settlement, with the understanding that vouchers covering the second and third payments shall neither be retained by the corporation nor presented to the Secretary of State until the amounts represented thereby are due and payable. (Agreement was signed on the following day.)

The Assistant Attorney reported the need to make certain repairs, particularly repairs to the plumbing facilities, in one of the houses owned by the Commission at Pendleton, which house is now being rented to private parties. The Commission approved the repairs and ordered that the expense be shown on the Highway Department's books in such way that no misunderstanding or confusion will develop later in regard thereto.

The Commission had under discussion the matter of ordering the removal of the building from the state highway right of way at the intersection of Union Avenue and Denver Avenue, Portland. The Engineer advised that the building referred to is a Standard Oil Company service station and that it encroaches upon Denver Avenue (Pacific Highway West) for a distance of approximately 20 feet, which cannot be permitted under the Commission's established policy. He further advised that no effort has been made heretofore to eliminate this encroachment because of the proposed construction of a grade separation structure or traffic circle at this point. He recommended that appropriate action be taken to remove the building now because it does not appear that the traffic circle will be built for a long time. In the discussion of

this matter the question arose as to the ownership of the property on which the building is located. In view thereof, the Commission deferred its decision and referred the matter to the Attorney for investigation and report at the September 28th meeting of the Commission.

The Commission considered and ordered paid the claim of the City of Sheridan, in the amount of \$15, for services rendered by the city's fire department in extinguishing a fire on a state highway department truck, near Valley Junction, on August 2, 1939.

A letter was presented from Mr. Forrest Cooper, Secretary of the Lakeview Chamber of Commerce, requesting the loan of the services of Mr. Ralph Gifford, highway department photographer, for a short period of time, to secure some pictures of scenes along the Fremont Highway, which are to be used as an exhibit before the California State Highway Commission with a presentation for the improvement of the Fremont Highway extension into the State of California. The Commission approved the request unanimously.

The Commission had under discussion a controversy with the Richfield Oil Company with respect to the price which is to be paid by the state for service station delivery of gasoline. The Engineer advised that the State Board of Control entered into a contract with the Richfield Oil Company for the furnishing of gasoline to be used in state-owned equipment, which contract provided a certain price for tank wagon deliveries and another price for service station deliveries. Further, that since the contract was executed the Richfield Oil Company, in accordance with one of the provisions of the contract, reduced tank wagon deliveries 1 cent per gallon but did not reduce the unit price of service station deliveries. He gave as his thought that the reduction by the company of 1 cent per gallon for tank wagon deliveries automatically reduces the contract price an equal amount for service station deliveries, which is contrary to the contention of the Richfield Oil Company. He pointed out that both the original contract and the modified agreement were executed by the Secretary of the Board of Control, but there is a question whether or not such secretary had the power to bind the Board, and particularly to execute the modification agreement, in view of the fact that such modification was accepted on June 19, 1939, five days after the new highway code adopted by the 1939 Legislature went into effect. The Commission discussed this matter at some length and referred it to Chairman Cabell with power to act.

The Commission had under discussion a letter from W. H. Lynch, District Engineer, Public Roads Administration, relative to snow removal operations on the Santiam and North Santiam Highways during the coming winter. Mr. Lynch advised that snow removal operations during the winter of 1938-1939 on these highways cost a total of \$17,138, of which amount \$8,531 was paid by the state for operations on the Santiam Highway; \$1,027 was paid by Marion County on the North Santiam Highway; and \$7,580 was paid by the Public Roads Administration on the North Santiam Highway. He inquired as to the adoption of a policy with respect to snow removal on these roads during the coming winter and in the future, in view of the costs, which appear to be rather excessive, considering the small amount of traffic that would be benefited thereby. He

AUG 31 1939

advised that if the Public Roads Administration is to undertake a program of snow removal during the coming winter it will be necessary for them to purchase heavy-duty snow-removal equipment from forest highway funds, which would of necessity decrease the amount of funds available for forest highway construction elsewhere in this state.

The Engineer advised that the grading of the Santiam Highway between Cascadia and the North Santiam Highway junction will be completed this fall; however, the grade will not be surfaced and will not be in condition to withstand traffic. He suggested, in view thereof, that the Commission enter into an agreement with the Public Roads Administration and the County Court of Marion County for snow removal on the Santiam and North Santiam Highway between Suttle Lake and Detroit on the same basis as that on which last year's snow-removal operations were carried on. The Commission approved the recommendation unanimously and instructed the Engineer to contact Mr. Lynch and the Marion County Court relative thereto and to have the matter covered by appropriate agreement, if the arrangement is satisfactory to all.

The Commission adjourned at 11:10 o'clock p. m., to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, September 1, 1939

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building, with all members present and participating. Also present were the State Highway Engineer, the Assistant Attorney, and the Secretary.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 o'clock p. m. in the same room:

The County Court of Klamath County, represented by County Judge U.E. Reeder and County Commissioners William Chase and Jack Benner, also County Engineer Frank Z. Howard, came before the Commission with respect to several highway matters. Mr. Howard was spokesman for the group. He gave as their understanding that the Highway Commission regularly allocates a certain amount of forest highway funds to Klamath County, and urged, now that the Willamette Highway and Klamath Falls-Lakeview Highway forest projects are nearing completion, that Klamath County's share of such funds be allocated to additional forest highways in that county. He suggested the following projects:

1. Construction of the Cascade Lakes Forest Highway from its junction with the Willamette Highway southerly to Crescent Lake.
2. Construction of the Forest Highway Section of the West Side Klamath Lake Secondary Highway, beginning at the southerly end and working north.

He asked that provision be made for these improvements in the 1941 allocation of forest highway funds. He also asked for an allocation of federal aid secondary highway funds to oil the section of the Poe Valley County Road that was graded and surfaced last year. He said that this road is going to pieces and needs the oil to preserve it. He also asked the Commission for the construction of the Dairy Section of the Klamath Falls-Lakeview Highway.

Chairman Cabell advised that first consideration must be given by the Commission to the completion of the connecting links in existing forest highways, such as the Willamette and Santiam Highways and the highway between Crater Lake and Diamond Lake, before commencing new projects, but the Commission will be glad to give due consideration to their request at the proper time. The Engineer pointed out that the oiling work that is being done on the Willamette Highway is of a temporary nature and if it does not hold up will have to be rebuilt to better standards, which will take a large share of the forest highway funds as they become available.

Mr. Howard then inquired as to the status of federal aid secondary highway funds, which was explained to him by Chairman Cabell who advised that the federal aid secondary highway program has been held up by the Federal Government which is asking for considerably more information in regard thereto than was originally anticipated. To assemble such information, he said, will take considerable time, and in view thereof it is not likely that the Commission will be able to secure the approval of the federal aid secondary highway system for several months.

As to the construction of the Dairy project, Chairman Cabell advised that this job was one of those that the Commission expected to finance with P.W.A. funds, but Congress did not see fit to appropriate additional funds for P.W.A. projects, so, necessarily, the program had to be revised. He added that the Commission is endeavoring now to include this project in some other program. As to the Klamath Falls-Lakeview Highway, he said that funds have been provided to complete the reconstruction of this entire road except a section outside of the forest boundary, which will cost approximately \$200,000, and this section the Commission contemplates finishing just as fast as money can be provided to finance the work.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and conferred with the Commission with regard to the Timberline Forest Highway project, a portion of which is to be constructed this year. He said that on September 8, 1939, he will receive bids for the construction of this project but cannot award the contract until an agreement has been reached with the state to maintain the road after completion. He pointed out that, if the Government maintained this road, it would be necessary to purchase expensive snow-removal equipment, which they wish to avoid if possible, and suggested that the state cooperate in the snow removal operations under the same arrangements under which such work was carried on last year. The Commission by unanimous vote approved Mr. Lynch's suggestion and thereupon instructed the Engineer to work out the details with Mr. Lynch.

The Commission adjourned at 11:15 o'clock a.m. and reconvened at 2:00 o'clock p.m. in the same room, with all Commissioners present and participating. Also present were the State Highway Engineer, the Assistant Attorney, and the Secretary.

The Commission had under discussion the order of the Federal Works Administration abolishing the regional office of the Public Works Administration in Portland and transferring such office to San Francisco. It was the opinion of the Commission that such change would cause the State Highway Department serious inconvenience and considerable expense and in view thereof the Commission authorized the following telegram sent to the Honorable John M. Carmody, Federal Works Administrator, Washington, D. C.:

THE OREGON STATE HIGHWAY COMMISSION RESPECTFULLY REQUESTS YOUR RECONSIDERATION OF THE RECENT ORDER ABOLISHING THE REGIONAL OFFICE OF THE PUBLIC WORKS ADMINISTRATION IN PORTLAND STOP THE HIGHWAY DEPARTMENT HAS CARRIED ON PWA PROJECTS IN THE PAST AND HOPES TO CONTINUE IN THE FUTURE STOP THE ABOLISHMENT OF THE PORTLAND OFFICE WILL CAUSE THIS DEPARTMENT SERIOUS INCONVENIENCE AND CONSIDERABLE EXPENSE STOP WE PRAY YOUR RECONSIDERATION OF THIS ORDER

The question of permitting certain insurance companies to write group accident and health insurance for State Highway Department employees had the attention of the Commission. The Engineer advised that applications have been received from the Oregon Mutual Life Insurance Company, the California Western States Life Insurance Company, and the American National Insurance Company to write such insurance, premiums for which would be deducted from the Highway

SEP 1 1939

Department's monthly pay rolls. He recommended denial of the applications because it would involve considerable expense in the Auditing Department and for the further reason that a new accounting system is being installed and such an innovation will further complicate the situation at this time. The Commission approved the recommendation unanimously, with the understanding that the matter would be revived later if that is considered advisable.

The Commission also considered and denied, at least for the time being, the application of the California Western States Life Insurance Company for an extension of its arrangement with the Commission with respect to furnishing group accident, health, and sickness insurance so as to cover salaried employees as well as those paid on an hourly basis.

The Engineer requested instructions relative to the payment of the claim of the United Railways Company, in the amount of \$6.81, representing the cost of repairing a telegraph pole line that was damaged by reason of blasting operations carried on by W.P.A. forces on the Wolf Creek W.P.A. project, near Manning, in Washington County. He gave as his thought that the state is not liable for the payment of this claim in view of the fact that the W.P.A. workers are not under the control of the state and the state is not responsible for the acts or negligence of such workers. He recommended denial of the claim and that the United Railways Company be advised to present the claim to the W.P.A. Administration for Oregon. The Commission approved the recommendation.

The Commission had under discussion the request of certain property owners of Douglas County for the improvement of a privately-owned drainage ditch adjacent to the Pacific Highway just south of the South Umpqua River Bridge. The Engineer advised that this ditch was excavated a number of years ago but it appears that it was not deep enough to drain all of the property intended and the property owners now want the state to deepen the ditch some two feet, and allege that such deepening is necessary by reason of state highway construction. He gave as his thought that the state is not obligated in any way to do this deepening work and that it is an entirely cooperative project among the property owners who would be benefited by the drainage. If the ditch were on the highway right of way, he said, that would be an entirely different matter, but under the circumstances he could not recommend an expenditure of state funds for this purpose. After discussion, the Commission deferred its decision pending further investigation and study and referred the matter to Commissioner Clough with authority to act.

The Secretary presented a resolution from the County Court of Douglas County requesting the selection and designation as a secondary state highway of the county road which extends southerly from the Lane-Douglas County line a distance of about 5 miles to a connection with the Pacific Highway near Anlauf, being an extension of the Territorial Secondary State Highway. The Engineer advised that this road has been rebuilt by the county to state secondary highway standards and recommended approval of the county's request. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution placing this road on the state secondary highway system:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Douglas County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Douglas County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Territorial Secondary Highway No. 200:

Beginning at a point on the Lane-Douglas County line at the south end of the Territorial Secondary Highway No. 200 in Lane County; thence in a southerly direction to the Pacific Highway near Anlauf, a distance of approximately 5.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; and amendments thereof.

The Commission also adopted by unanimous vote the following resolution abandoning the West Lake Section of the Oregon Coast Highway, in Clatsop County, which section is no longer of value from the state highway standpoint inasmuch as the highway has been rebuilt on new alignment:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the West Lake Section of the Oregon Coast Highway in Clatsop County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the West Lake Section of the Oregon Coast Highway in Clatsop County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Clatsop County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Skipanon-West Lake Section of the Oregon Coast Highway lying on the easterly side of the right of way required for the reconstructed Oregon Coast Highway between Mile Post 13 and Mile Post 15 of said highway, the beginning and ending points of said section with reference to the engineer's stations of the reconstructed highway being Station 256+00 on the northerly end and Station 280+65 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated August 8, 1939, upon which map* or

Map filed in Right of Way Abandonment and Retention File - No. 65

exhibit there is reflected the above described parcel of land by showing the same shaded in red.

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Clatsop County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Clatsop County and beyond any responsibility or supervision by the State Highway Commission.

The Engineer requested authority to purchase a motion picture camera for the use of the Travel and Information Department. He estimated that it would cost about \$750.00. The Commission approved the purchase by unanimous vote.

A letter was presented from Mr. Robert W. Sawyer, Bend, with reference to a plan that has been proposed to provide funds for a program of county road surfacing and oiling, in Deschutes County. Mr. Sawyer inquired, if such plan is adopted, whether the State Highway Department would cooperate by assuming the management of the work, including the letting of the contracts. He also inquired to what extent the state might be willing to cooperate with respect to the particular roads, some of which would be secondary state highways. The Commission indicated a favorable attitude toward such plan provided the county would agree to pay the engineering costs; however, deferred a definite decision in the matter pending receipt of additional information. The Engineer was instructed to ascertain from Mr. Sawyer whether or not the county would assume the expense for surveys and engineering costs for supervising the contracts; also, what roads are to be included in the program, particularly with reference to secondary state highways. The Attorney was instructed to contact Mr. Sawyer with respect to certain questions regarding legal features.

The County Court of Jackson County, consisting of County Judge Earl B. Day, County Commissioners Ralph Billings, and William Perry, and County Engineer Paul B. Rynning, came before the Commission in the interests of the

Butte Falls County Road. Judge Day recited the history of this road and recalled that improvement of the same was at one time included in the Highway Commission's program as priority project No. 2, it being second only to the Sams Valley Secondary Highway improvement. Further, that some 18 months ago, upon completion of the Sams Valley Road, the Commission promised to allocate funds for the improvement of the Butte Falls Road, but as yet the state has done nothing, although the county has fulfilled its part of the agreement by constructing the grade, which will not be passable this winter unless surfacing rock is applied thereto. He urged the Commission to provide such surfacing rock at the earliest opportunity.

Chairman Cabell advised that the State Highway Commission is not altogether to blame for the delay in placing this project under contract. This project, he said, was included in the 1939 federal aid secondary highway program, but before it could be placed under contract the Federal Government altered its requirements with respect to this class of road and refused to approve any more of them until it was furnished additional information, which is requiring considerable time to assemble, but which the Commission is gathering as rapidly as possible. He acknowledged the Commission's obligation to Jackson County and declared that the work would be placed under contract at the September 28 meeting of the Commission if any way can be found to finance it. The Engineer was thereupon instructed to write Mr. W. H. Lynch, District Engineer, Public Roads Administration, outlining the facts in connection with this project and requesting approval of the same notwithstanding the new requirements of his department. Judge Day requested definite information as soon as possible as to whether the Commission would be able to surface this road before winter, so as to give the county sufficient time to surface the weak spots in the event the state is unable to contract the surfacing. He was assured that such information would be given to him at the earliest opportunity.

At 3:30 o'clock p.m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Arch Cape Tunnel Section of the Oregon Coast Highway, in Clatsop County. 588 lin. ft. tunnel enlargement and timber tunnel lining; also 1,227 lin. ft. paving. McNutt Brothers, Eugene, were the low bidders on this project, with their bid of \$59,036.00, using creosote-petroleum treatment, and \$54,286.00, using Wolman salts treatment. The next low bid was that of A. C. Greenwood Company, Inc., Portland, at \$61,521.00, based on the use of creosote-petroleum treatment. They did not submit a bid based on the use of Wolman salts treatment. There were 4 higher bidders. The Commission awards this contract to McNutt Brothers, at their low bid of \$54,286.00, using Wolman salts.

"Concrete bridge over Lang Canyon, about 5 miles west of Arlington, on the Columbia River Highway, in Gilliam County. Denton & Young, Nampa, Idaho, submitted the low bid of \$7,500.00 for this project. Averill & Corbin, Portland, submitted the next low bid of \$7,777.00. There was one higher bidder. The Commission has referred

the bids to the Engineer with power to award the contract to the low bidder, Denton & Young, when certain matters have been cleared up.

"Buchanan-Juntura Section of the Central Oregon Highway, in Harney and Malheur Counties. 2.64 miles grading and 33.43 miles surfacing and oiling. The low bid received for this project was that of A. Milne, Portland, at \$126,034.00. The next low bid was that of Leonard & Slate, Multnomah, at \$128,395.50. There were 17 higher bidders. This contract is awarded to the low bidder, A. Milne, at his bid of \$126,034.00.

"Eagle Point-Hog Creek Section of the Crater Lake Highway, in Jackson County. 0.5 mile regrading and paving. R. I. Stuart & Sons, Medford, submitted the low bid for this project, their bid being in the amount of \$21,327.00. The United Contracting Company, Portland, submitted the next low bid in the sum of \$25,253.75. There was only one higher bidder. This contract is awarded to the low bidders, R. I. Stuart & Sons, at their bid of \$21,327.00.

"State Farm-Adams Section of the Oregon-Washington Highway, in Umatilla County. 4.59 miles grading. The low bid submitted for this project was that of Roy L. Houck, Salem, at \$71,884.50. The next low bid was that of Clifton & Applegate, Spokane, Washington, at \$74,833.00. There were 12 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"West Unit, Stanfield-Pendleton Hill Section of the Old Oregon Trail, in Umatilla County. 8.86 miles roadside improvement. The Commission received only two bids for this project, that of the River Bend Sand & Gravel Company, Salem, being low, at \$3,990.00. The other bid was that of J. Chas. Thonney, Dixie, Washington, at \$4,300.00. The Commission has rejected both bids received on this project and has ordered the project readvertised.

"Dundee-West Dayton Section of the Pacific Highway West, in Yamhill County. 1.94 miles grading and paving. The low bidders for this project were McNutt Brothers, Eugene, with their bid of \$105,704.90, using asphalt, and \$103,978.10, using tar. The next low bid was that of Jacobsen-Jensen Company, Portland, at \$103,722.47, based on the use of tar. They did not submit a bid based on the use of asphalt. There were 2 higher bidders. The Commission has referred all bids to the Engineer with power to award the contract to the low bidders, McNutt Brothers, when certain conditions have been fulfilled."

Chairman Cabell also made the following announcement of the award of the contract for the moving of the school building at Manning, bids for which were taken on the previous day:

"Moving and re-establishing school building and play shed in the vicinity of Manning; install equipment in community hall for temporary school quarters; construct septic tank, water pipe line and tile drains. Odom Construction Company, Oregon City, was the low bidder with its bid of \$4,820.00. The second low bidder was Caulfield & Savage, Tillamook, at \$6,618.00. This contract is awarded to Odom Construction Company, the low bidder, at its bid of \$4,820.00."

Mr. A. A. Hendricks, Manager, American National Insurance Company, Portland, came before the Commission at this time relative to his application for the privilege of writing group insurance covering State Highway Department employees. He made a strong plea for such privilege and urged reconsideration by the Commission of its previous action denying the same. The Commission voted unanimously not to alter its previous decision but gave Mr. Hendricks to understand that it might do so in a year or so, if it seems advisable at that time.

The Assistant Attorney brought up for discussion the settlement with Mr. Louis Siegenthaler for right of way needed for the Wolf Creek Highway near Cedar Mills, in Washington County. He advised that Mr. Siegenthaler is demanding \$3,500 for his property and would like to settle with the state now because he has plans for the development of the balance of his holdings, including the remodeling of certain buildings. He recommended purchase of the property at such figure, giving as his belief that it would cost the state considerably more later on after Mr. Siegenthaler's development work has been completed. In the discussion of this matter the question arose whether or not in the right of way negotiations consideration has been given to the acquisition of freeway rights, this feature being considered very important due to the fact that the Wolf Creek Highway, when completed, will carry a large volume of traffic between Portland and the coast. It appeared that such consideration had not been given, whereupon instructions were given to the Engineer to ascertain whether or not right of access to the highway should be restricted in front of Mr. Siegenthaler's property. He was also instructed to investigate the possibilities of limited access to the highway for the entire distance from the Barnes Road connection to the town of Banks. The Commission thereupon approved the purchase of the Siegenthaler property at the price quoted subject to the condition that freeway rights are not needed at this place. The Assistant Attorney was authorized to include this right of way settlement in the real property resolution heretofore adopted by the Commission on this date.

A letter was presented from the Bilyeu Clan, Albany, requesting that a certain stream in Linn County, shown on the state highway map as "Neil Creek", be named "Bilyeu Creek" in honor of the Bilyeu family which pioneered in this district. The Commission ordered the matter referred to Mr. Lewis A. McArthur, President of the Oregon Historical Society, for recommendation.

A letter was presented from Mr. George L. Govro, Yachats, requesting permission to remove 550 cubic yards of smelt sand from the ocean beach

at Yachats for use in the construction of a bridge over the Alsea River, on the Alsea Highway, east of Waldport. The Commission denied the request.

A letter was also presented from the Coca Cola Bottling Company, Salem, requesting permission to install a Coca Cola vending machine in the state highway shops at Salem. The Commission denied the request as a matter of policy.

The Secretary presented a letter from Mr. E. A. Densmore, Executive Secretary of the Allied Heavy Construction and Highway Crafts Union, Portland, requesting that Contractor Roy L. Houck, Salem, Oregon, be debarred from bidding on future state highway construction work because of certain violations of the Oregon labor laws committed by him in connection with his contract, No. 2159, for grading and paving the Albany Overcrossing Section of the Pacific Highway East, in Linn County. In this connection the Engineer read aloud a letter from Mr. Houck explaining the circumstances which necessitated the working of his men overtime on this project. According to Mr. Houck's statement, he encountered considerable difficulty in securing operators for certain equipment known as "Tournapulls", which were used on this job, such equipment being the first of its type to be used in the Northwest, and it was necessary at times to work the experienced operators overtime so they could train men who were without experience in handling this type of equipment. He further stated that this situation has now been remedied by the employment of less skilled men and that all demands for overtime, et cetera, have been settled in full. The Engineer advised that these violations have been thoroughly investigated by the Highway Department's Labor Relations Engineer, Mr. Ray Weber, who gave as his opinion that the reasons given by Mr. Houck for the same are substantially correct and that they were committed at a time of extreme emergency.

This matter was discussed by the Commission at considerable length, and, from the facts presented, it was the Commission's belief that Mr. Houck committed the violations only in desperation and at a time when a serious emergency existed; further, that this is an isolated case and should not be considered sufficient cause for the debarment of Mr. Houck from bidding on future state highway work. However, the Commission considered that the case should not be overlooked and that Mr. Houck should be reprimanded and ordered not to repeat the violation. The Engineer was instructed to so write Mr. Houck and also to advise Mr. Densmore of the action taken by the Commission on this matter, sending copies of both letters to Mr. C. H. Gram, State Labor Commissioner, who is interested in the matter.

The Engineer reported on the progress that is being made by Edwin C. Gerber in connection with his contract for the construction of bituminous macadam surfacing on the Necanicum-Nehalem River Section of the Wolf Creek Highway, in Clatsop County, Contract No. 2155. He advised that Mr. Gerber is making every effort to complete this job at the earliest possible time but will not be able to complete the bituminous macadam work before next year. The Commission expressed regrets that this job could not be completed in its entirety during this year's working season but decided not to take any drastic action against Mr. Gerber at this time.

The Commission had under discussion a report to the effect that representatives of a certain political party are soliciting funds from employees of the State Highway Department for the support of such party. The Commission confirmed its policy, heretofore adopted, with respect to such matter, and by unanimous vote approved the following statement with reference thereto. (See Circular Letter No. 143, dated September 19, 1939.) The Engineer was instructed to send a copy of such statement to each highway department employee for his information and guidance:

"Information has been brought to the attention of the Commission to the effect that employees of the Highway Department are being solicited for funds to be used, as represented by the solicitors, for the support of a political party.

"The Commission has on several occasions expressed its policy with respect to political party affiliations and political activities. It appears, however, that the present activity of political party representatives or alleged representatives makes appropriate a reiteration of the Commission's policy with respect to such matters.

"The Highway Department is a nonpolitical agency of the State of Oregon. No inquiry has ever been made nor is any record kept concerning an employee's political affiliations any more than his religious or fraternal affiliations. The Commission has always been and is now concerned only with the professional qualifications or special fitness of an employee and his ability efficiently and honestly to perform the duties of the position or job to which he may be assigned.

"What financial contribution a highway employee may make to the political party of his choice is a personal matter concerning which the Commission makes no inquiry and with which the Commission is not concerned so long as the action is legal and does not interfere with the duties of his position. Should an employee of the Highway Department choose to refrain from making contributions to any political party, he may do so with complete assurance that his job or position will in no way be jeopardized thereby.

"The holding of office in political parties, the personal solicitation of political funds, and all active participation in political affairs, by employees of the department, are not permitted because such overt acts will, in the end, identify the department with one political party or the other and destroy its nonpartisan status.

"The Commission believes that, in addition to reiterating its policy and rules as stated above, it should call the attention of all employees to the following statute:

(See next page)

'No holder of a public position or office other than an office filled by the voters, shall pay or contribute to aid or promote the nomination or election of any other person to public office. No person shall invite, demand or accept payment or contribution from such holder of a public position or office for campaign purposes.' (Section 36-2420, Oregon Code 1930.)

"This act has never been interpreted by the courts to the knowledge of the Commission, and its application to contributions by employees of the State Highway Department is not clear and well defined. Each case must be considered by the individual employee concerned upon its individual merits."

The Engineer reported that Contracts Nos. 1986, 2126, 2160, 2174, and 2189, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are ready for acceptance. The following resolution accepting the above jobs was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 1986, with L. H. Hoffman, for bridge construction over Quartz Creek, near Elsie, on the Wolf Creek Highway, in Clatsop County. Completed July 1, 1939.

Contract No. 2126, with McNutt Bros., for grading, surfacing, and oiling, and bridge construction, on the Ochoco Dam-Marks Creek Section of the Ochoco Highway, in Crook County. Completed August 26, 1939.

Contract No. 2160, with Mountain States Construction Company, for surfacing and oiling and furnishing crushed rock in stock piles, on the Clatskanie-Summit Section of the Mist-Clatskanie Secondary Highway, in Columbia County. Completed August 19, 1939.

Contract No. 2174, with J. C. Compton, for grading, surfacing, and oiling on three county roads in Tillamook County. Completed August 5, 1939.

Contract No. 2189, with Norris Bros., for 40.20 miles of oiling on the Mt. Vernon, Weston, and Service Creek Oiling Project in Grant, Umatilla, and Wheeler Counties. Completed August 23, 1939.

SEP 1 1939

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with School District No. 44, Manning, Oregon, covering acquisition and preparation of a new site for the Manning school building, moving of the existing school buildings, et cetera.

Agreement with Manning Social Club providing for rental of the social club building for school purposes during the re-establishment of the Manning school.

Stipulation with the U. S. Department of the Interior with respect to the use of a stock pile site on government property adjacent to the Coos Bay-Roseburg Highway at the top of Camas Mountain, in Douglas County.

Quitclaim deed conveying unto H. B. Easley and wife certain property adjacent to the Columbia River Highway, in Georgetown Addition to St. Helens.

Agreement with H. B. Easley and wife providing a method of procedure to be followed in clearing title to the property referred to in the above paragraph.

Agreement with the Works Progress Administration relative to the advancement of not more than \$3,500 of state funds to finance non-labor items on the Wolf Creek Highway W.P.A. project during September, 1939.

Agreement with Miami Corporation providing a method of payment for timber strips acquired by the state from the corporation along the Salmon River Highway.

Agreement with Mr. Edward L. Dimmitt with respect to the payment of bills for the furnishing of electrical energy used in connection with his concession at Crown Point.

Agreement with Senator Samuel M. Garland, Lebanon, with respect to the cancellation of a lease of a gravel pit on Mr. Garland's property in Linn County.

Bond release and cancellation notice in favor of the Metropolitan Casualty Insurance Company of New York relieving the company from further liability in connection with the old bond covering the State Highway Engineer, which bond was cancelled on June 15, 1939, having been replaced by a new bond.

SEP 1 1939

Bargain and Sale Deed conveying unto E. D. Bahrke and wife 322 sq. ft. of land situate in Lot D, Bryan's Addition to Albany, Right of Way Transaction No. 5509.

Bargain and Sale Deed conveying unto the Southern Pacific Company 5,562 sq. ft. of land situate in Lots 4, 5, 6, 7, and 8, of Block 20, Hackleman's Second Addition to the City of Albany, Right of Way Transaction No. 5151.

The Commission had under discussion the setting of a date for its first regular meeting following that scheduled for September 28, 1939, for the receiving of bids on highway construction projects, and decided to hold such meeting on Thursday and Friday, November 2 and 3, 1939, in the auditorium of the Public Service Building, Portland. The Secretary was instructed to make the usual arrangements for the use of this room.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:00 o'clock p. m.

R. H. Baldock
State Highway Engineer

H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

E. B. Aldrich
Commissioner

Huron W. Clough
Commissioner

Portland, Oregon, September 27, 1939

The State Highway Commission met in regular session at 4:00 o'clock p. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Attorney discussed with the Commission the compromise settlement with Mr. J. A. Fox for right of way needed for the Viaduct Section of the Pacific Highway in Albany. He advised that Mr. Fox will agree to deed this property to the state for the sum of \$550 and recommended acceptance of this offer in order to avoid condemnation. The Commission approved the recommendation unanimously.

SEP 27 1939

The Attorney reported receipt of an offer from James Anderson, Junction City, to pay \$25.00 for the abandoned state-owned quarry site located near the Pacific Highway about two miles south of Junction City. He advised that he contacted other state departments and the County Court of Lane County and ascertained that the property is not wanted by any of them. He recommended acceptance of Mr. Anderson's offer because the land is of no value whatsoever for state highway purposes. The Commission approved the recommendation unanimously.

The matter of continuing the maintenance of the Elsie-Jewell county road as a state highway detour was brought up for discussion. The Engineer pointed out that during the construction of the Wolf Creek Highway this entire road was used as a highway detour but since the Wolf Creek Highway has been completed west of Elsie only a portion of the road has been needed for this purpose and that portion will not be needed after the first of the year when the Nehalem River Bridge is completed. The Commission voted unanimously to continue the maintenance of the entire Elsie-Jewell Road for the time being.

The Engineer reported the results of investigations with respect to the recovery of gold from a state-owned gravel pit by contractor R. I. Stuart and Sons in connection with their contract, No. 2129, with the Commission for the construction of the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways. He submitted an affidavit from the First National Bank of Portland, Medford Branch, to the effect that the bank sold for R. I. Stuart and Sons \$833.00 worth of gold which was mined in conjunction with their state highway contract. He also presented a letter from R. I. Stuart and Sons stating that they expended \$1,035 in the recovery of this gold. He recommended, in view of the showing made, that the state's claim for the recovered gold be withdrawn. The Commission approved the recommendation unanimously.

The Engineer also reported that at a recent bid opening the District Engineer of the Public Roads Administration received a bid of \$35,951.45 for the oiling of the McDougall's Camp-Tollgate Section of the Weston-Elgin Secondary State Highway, a forest highway project, which is nearly \$10,000 less than the amount budgeted for such work in the 1940 Forest Highway Program. He pointed out that at a joint meeting of the Commission and representatives of the Public Roads Administration and the Forest Service, on June 22, 1939, the Commission agreed to contribute \$10,000 of state funds to augment the programmed amount of \$45,000 because it was thought at that time that the project would cost approximately \$54,000. It was his thought that the state should be relieved of this obligation in view of the fact that the bid received is well within the budgeted amount. The Commission concurred in the viewpoint of the Engineer and thereupon instructed the Secretary to point out the facts to Mr. Lynch, District Engineer, Public Roads Administration, and to ask him to release the state funds so they can be used to finance other desirable work.

The Engineer requested authority to increase the budget for state highway force account work on the Wolf Creek Highway W.P.A. project in the amount of \$90,000 for oiling work required between the Nehalem River and Davies, such work to consist of the application of 12 miles of bituminous

binder, construction of an asphalt concrete leveling course on 28 miles, and application of bituminous seal coat on this 28-mile section. He pointed out that no provision has been made in the W.P.A. budget for 1939 or 1940 for such work which, in his estimation, should be accomplished as soon as possible in order to place this road in condition for general public use. After discussion, the Commission approved the Engineer's request, by unanimous vote, with the understanding that \$50,000 of such sum shall be charged to the 1940 allocation made to districts No. 1 & 2 and \$40,000 shall be charged to such districts in the 1941 allocation.

The Commission also discussed the matter of advancing additional state funds to pay the non-labor items in connection with the Wolf Creek Highway W.P.A. project during the month of October 1939, it appearing that state funds must be advanced if this work is to proceed inasmuch as the new W.P.A. project has not yet been approved. The Engineer estimated that it would be necessary to advance about \$4,500 of state funds for such purpose and recommended approval of the allocation. After discussion, the Commission approved the recommendation by unanimous vote and ordered the matter covered by appropriate agreement between the State Highway Commission and the W.P.A. authorities.

Reconsideration was given by the Commission to the request of certain Douglas County property owners for state aid in the deepening of a drainage ditch located on private property adjacent to the Pacific Highway south of the Winston Bridge in Douglas County. Commissioner Clough reported that he has investigated this matter thoroughly and, in his estimation, the deepening of this ditch is not a responsibility of the state, particularly in view of the fact that the ditch is privately-owned and is located on private property. He recommended that the request be denied. The Commission approved the recommendation unanimously.

The Engineer reported on the request of certain citizens of Malheur County for the re-signing of U. S. Highway No. 30 North and U. S. Highway No. 30 South, in the vicinity of Ontario. He said that, while the present system of signing these highways may not be the best, in his estimation it should not be changed because there is a possibility that the State of Oregon would lose benefits that it now enjoys on account of the present system and particularly because it would leave the town of Ontario off the national highway route. In view of the Engineer's report the Commission decided unanimously to take no action in this matter at this time, although it is to be discussed at the annual meeting of the American Association of State Highway Officials in October of this year.

The Attorney reported on the conference with Mr. Robert W. Sawyer, Bend, relative to a proposal by Deschutes County to finance certain county road and state secondary highway construction in that county. He explained the plan in detail and advised that the Commission has authority to cooperate in the matter if it so desires. Further, that if the county should ask the state to prepare the plans for the work the Commission would have to do so according to the law, although the Commission would not have to pay out of state funds the engineering costs for supervising construction. He further advised

SEP 27 1939

that, according to Mr. Sawyer, the plan is still in the embryonic stage and that the Commission need do nothing further about it until definite action thereon has been taken by the county court. The Commission took no action on the matter.

A letter was presented from County Judge Bert Johnson of Morrow County requesting the following improvements:

Improvement of the Patterson Ferry Road, which extends from the Columbia River Highway to the Columbia River, near the town of Irrigon and the designation of this road as a state secondary highway.

Complete the reconstruction of the West Unit of the Heppner-Rhea Creek Section of the Wasco-Heppner Secondary State Highway.

Reconstruct the Wasco-Heppner Secondary State Highway between Rhea Creek and Hardman.

Improve the Rhea Creek-Rock Creek Section of the Heppner-Condon Secondary State Highway.

It was pointed out that the Patterson Ferry Road is not on the state highway system, hence the Commission is without authority to expend state funds for the improvement of the same. In view thereof, the Commission declined to approve this request and instructed the Secretary to so inform Judge Johnson.

The Commission decided that it could not make any definite commitment to the other projects at this time in view of the shortage of funds and the requirements of the Federal Government with respect to the allocation of federal aid secondary highway funds which class of funds were used to finance the improvement of the East Unit of the Heppner-Rhea Creek Section. The Secretary was instructed to so inform Judge Johnson and to advise him further that the Commission will bear these projects in mind in the formulation of future highway construction programs.

The Commission had under discussion a letter from the University Park Community Club, Portland, urging the improvement of Lombard Street, Portland, (state highway route) between Greeley Street and St. Johns. The Commission indicated that it might undertake this improvement at some future date when funds can be spared to finance it because it is a desirable project but declined to make any definite commitment thereto at the present time. The Secretary was instructed to so inform the community club.

A letter was presented from Mr. Frank Taylor, Tangent, Oregon, requesting construction of a roadway entrance from the Pacific Highway into a public archery range about one mile north of the town of Tangent. In this connection the Commission discussed the adoption of a policy with respect to the construction of private roadway entrances into state highways and decided unanimously upon the following procedure for future projects of this kind:

Where such roadway entrances involve the installation of culvert pipe 18 inches in diameter, or less, the property owner shall be required to furnish the culvert pipe F. O. B. the job at no cost to the state but the state shall pay the cost of installing such pipe, including the construction of a fill over the same and the necessary graveling of the roadway within the highway right of way limits. In the event that the diameter of the pipe to be installed is greater than 18 inches, then the state shall pay the cost of the pipe over and above the cost of an 18-inch pipe and shall also pay the cost of constructing the fill and graveling the roadway so far as it lies within the highway right of way limits.

The Engineer was instructed to inform Mr. Taylor of this new policy and to advise him that the state will be pleased to cooperate with him in the construction of his driveway in accordance therewith.

A letter was presented from Mr. Lacey V. Murrow, Director of Highways, State of Washington, advising that it is the plan of the Washington Highway Department to carry out the improvement of the Washington Section of the Oregon-Washington Highway at such time as the work may be coordinated with the proposed improvement of this highway in the State of Oregon between Milton and a common point on the Oregon-Washington state line, and requesting information as to when the State of Oregon contemplates construction of its section of this road so as to enable him to make definite plans for the Washington State improvement. The Engineer pointed out that the location survey for the Oregon Section has not as yet been made, it being contrary to the policy of the Commission to undertake location surveys and the acquisition of right of way until the project is authorized and, in this particular instance, it does not appear that funds will be available to finance construction for some time to come, either on the new location or along the present road. The Commission decided, in view of the shortage of funds and the fact that considerable construction work is now underway on this highway between Pendleton and Adams, that it would be advisable to defer construction between Milton and the Washington state line for a year or two. The Engineer was instructed to ascertain whether or not such procedure will fit in with the proposed improvement of this road in the State of Washington.

In this connection the Secretary presented a petition signed by numerous citizens of Freewater, Oregon, who own property along the present highway between Freewater and the Oregon-Washington state line, suggesting a location for the new highway between these points and offering free right of way for the same, except that they would expect the state to pay the cost of moving buildings and appurtenances. A letter was also presented from the Freewater Chamber of Commerce urging the retention of the present route and requesting an opportunity to be heard by the Commission in regard thereto before a definite location has been decided upon. The Secretary was instructed to inform the petitioners that the Commission has not as yet decided upon a permanent location for this highway; furthermore, the location survey has not yet been made and none is contemplated in the near future but, when the time arrives for the settling of this matter, the Commission will be pleased to

SEP 27 1939

give the people of Milton and Freewater an opportunity to be heard; further, that it is not likely that any consideration will be given to this project until the work now underway between Pendleton and Adams is completed.

The Commission discussed and approved the following "notice" to persons who contemplate operating any business abutting upon any state highway, prohibiting the parking of cars on the highway or the use of the highway right of way for any other commercial purpose, the provisions of such notice being in conformance with the policy of the Commission as adopted by resolution on July 27, 1939:

Since the use of any portion of a highway right of way for parking cars or other commercial purpose interferes with the proper maintenance of the road, obstructs sight distance, and interposes traffic hazards, the State Highway Commission of Oregon has instructed its Engineer to advise all persons who contemplate operating any business abutting upon any highway, that the parking of cars on the right of way, for service or for the transaction of business in connection with such commercial activity, shall be and is prohibited.

The above rule applies not only to new installations but also to the remodeling of any existing facility unless, in the latter case, topographical conditions render it impossible to comply.

The Commission ordered this notice printed and distributed to all parties concerned.

The Engineer requested authority to purchase the following equipment:

- 12 automobiles of the Ford and Chevrolet class and 1 automobile of light Buick class to replace a like number of old cars that are to be traded in - part purchase price - estimated cash outlay \$8,500;
- 20 trucks of the Ford and Chevrolet class to replace 20 old trucks which are to be traded in on purchase price - estimated total cash outlay \$17,000;
- 1 rotary snow plow, known as Rotoblade, - estimated to cost \$4,000;
- 6 push-type snow plows - estimated total cost \$2,007;
- 1 250-watt radio transmitter for installation at Roseburg division headquarters - estimated cost \$1,500;
- 1 shaker screen for use in connection with state-owned crushing plant which is being operated on Wolf Creek Highway W.P.A. work - estimated cost \$240;

SEP 27 1939

1 stamp vending machine - estimated cost, single model \$35.00.

After considerable discussion and it appearing to the Commission that this equipment is needed in connection with the proper operation of the State Highway Department, the Commission by unanimous vote authorized the purchase of the same through the State Purchasing Agent.

The Secretary presented a copy of a resolution adopted by the Coos County Court in which the Court elects to preserve for public use a fragment of the old right of way of the Cape Arago Secondary State Highway in Coos County that has been abandoned by the state by reason of the reconstruction of the highway on other alignment, said fragment being described as follows:

All of that certain Section of the old right of way of the Cape Arago Highway No. 240 lying in the Town of Charleston and in use prior to 1934 which lies North of a line 40 feet North of and parallel to the center line of the reconstructed highway and between approximately Engineer's Station 264-80 and the East shore of South Slough and including such portions of the old South Slough Bridge as are now in use as an approach to the wharf and log dump on the East shore of South Slough.

The Commission approved the resolution by unanimous vote and ordered the same filed in the department records.

The Engineer reported that in conformance with authority previously granted him by the Commission he has awarded the following contracts, the conditions of the awards having been satisfied:

Construction of Warren Creek Section of the Columbia River Highway, in Hood River County. Bids taken July 27, contract awarded September 9, 1939, to E. C. Hall Company, the low bidder.

Construction of Dundee-West Dayton Section of the Pacific Highway West, in Yamhill County. Bids taken September 1, 1939, contract awarded September 13, 1939, to McNutt Bros., low bidders.

The Commission, by unanimous vote, confirmed the awards as reported.

The Engineer also reported that as previously authorized by the Commission he has sold to the high bidder in each instance the obsolete equipment, scrap material, et cetera, for which bids were taken on August 31, 1939. The Commission, by unanimous vote, confirmed the action taken by the Engineer in this matter.

The Engineer requested authority for the Bridge Engineer, Mr. G. S. Paxson, to attend a "Soil School" which is to be conducted by the Public Roads Administration in Washington, D. C., from November 20 to December 2,

SEP 27 1939

1939. The object of this course, he said, is to acquaint the participants with the procedures for the surveying, sampling, and testing of soils, to explain the latest developments in testing soils for special purposes, to develop the methods used by the Administration in applying the results of tests on soils to highway design, construction and maintenance problems, et cetera. He gave as his thought that the Oregon Highway Department should keep up to date on matters of this kind and that the information that would be gleaned from such school would be of inestimable value in connection with highway work in this state. He recommended that Mr. Paxson be permitted to attend this school at state expense and estimated that it would cost about \$300.00. After discussion, the Commission approved the recommendation unanimously, subject to the condition that the expense is also approved by Governor Charles A. Sprague.

The Secretary presented a letter from the Redwood Empire Association inviting the members of the Commission and its staff to be its guests at the Nineteenth Annual Convention and Banquet which is to be held on Treasure Island, San Francisco, on Friday, October 13, 1939. The Commission decided not to be represented at this meeting.

The Attorney reported receipt of a letter from Campbell, Smith and Goodman, Inc., Portland, with respect to the insurance coverage protecting the State of Oregon, the State Highway Commission and the Union Pacific Railroad Company, et al, from liability for accidents arising out of snow removal operations on the Upper Columbia River Highway. It appears from past performances under the protection of this policy, which was written by Lloyds of London, that the state is entitled to a credit of 10 per cent of the amount of the premium, amounting to \$640, and can receive full benefit of this credit if it will purchase a new policy at this time for a three-year period. The Attorney inquired as to whether he should order a new policy now or wait until the present policy expires on October 1, 1940. The Commission decided, after discussion, to take advantage of the credit and thereupon authorized the Attorney to secure the new policy and arrange for the cancellation of the old one.

Commissioner Aldrich brought up for discussion at this time the matter of extending the Kimberly-Monument Secondary State Highway, in Grant County, from its present terminus at Monument to a connection with the Pendleton-John Day Highway at Long Creek. He advised that he has again been approached by the Grant County Court in this regard and that the court is very anxious to have the state assume jurisdiction over this road. It was the consensus of opinion of the Commissioners that this road should be on the state secondary highway system and accordingly the Attorney was instructed to prepare the customary resolution for adoption by the Commission at its next meeting.

The Commission had under discussion a request from the City of Estacada and the Estacada High School District for a letter from the Commission, directed to the W.P.A., Portland, advising that the Commission has no objections to the improvement of the Woodburn-Sandy Secondary State Highway in front of the high school grounds in Estacada, as a W.P.A. project sponsored by

the city and the school district. It was explained that this procedure is necessary in order to secure the approval of this W.P.A. project. The Commission decided to offer no objections to such improvement provided the use of the highway by the general traveling public is not interfered with and provided precautions are taken for the proper safeguarding of traffic and pedestrians. The Secretary was thereupon instructed to write such letter.

The Attorney requested instructions with respect to the controversy with the Maryhill Ferry Company concerning a sign maintained by the company at the junction of the Sherman Highway with The Dalles-California Highway, in Wasco County, concerning which complaints have been received because it bears erroneous information for the traveling public. It appears that the company is reluctant to make any change in its sign, alleging that the complaints which the Highway Commission has received in regard thereto are simply efforts to discredit the Sherman Highway. The Attorney advised that the sign under discussion is illegal in view of the fact that it purports to direct traffic, whereas, under the Oregon statutes, the duty and responsibility for maintaining directional signs along state highways rests solely upon the State Highway Commission. Furthermore, it is his belief that the intent of the Legislature was to vest in the State Highway Commission exclusive authority with respect to such matters so that the general public will get authentic information and will not have to be subject to inconvenience and delay by reason of community jealousies. This matter was discussed by the Commission at considerable length and it was decided to let the Maryhill Ferry Company maintain its sign at this location if it will remove therefrom the information of illegal character. In the event the company will not revise its sign to meet the legal requirements, then the sign is to be removed by state highway forces. The Attorney was instructed to convey such information to the owners of the sign.

The Secretary presented a letter from the Great American Indemnity Company requesting evidence to show that the Commission's Secretary had authority to sign the cancellation certificates terminating the old bonds furnished by the State Highway Engineer, which bonds have been replaced by entirely new bonds under the provisions of Chapter 529, Oregon Laws of 1939. The Commission, by unanimous vote, approved the signing of such cancellation certificates by the Secretary and, thereupon, adopted the following resolution in regard thereto:

WHEREAS, under the terms and provisions of Chapter 529, Oregon Laws, 1939, effective June 14, 1939, the State Highway Engineer is required to furnish a bond in the sum of Two Hundred Thousand Dollars (\$200,000) in favor of the State of Oregon, conditioned upon the faithful and honest handling and disposition of all funds coming within the jurisdiction or under the control of the said State Highway Engineer; and

WHEREAS, the said State Highway Engineer has furnished the said bond as required by the said section of the statute; and

WHEREAS, said Chapter 529 repealed all prior statutes

SEP 27 1939

requiring the furnishing of bonds by the State Highway Engineer, and it is and has been necessary to cancel the bonds issued under the said prior statutes as of June 14, 1939;

NOW, THEREFORE, BE IT RESOLVED that the Secretary of the State Highway Commission be and he hereby is authorized to execute on behalf of the Commission any and all cancellation notices required in connection with the cancellation of the said prior bonds.

BE IT FURTHER RESOLVED that all prior acts of the Secretary in executing the said cancellation notices be and the same hereby are ratified and confirmed.

The Commission discussed and ordered filed a letter from C. H. Furell, State Highway Engineer of California, advising that the California State Highway budget for the present biennium contains an approved project covering the grading and surfacing of the Bailey Summit-Oregon State Line Section of the Pacific Highway on revised location, 1.4 miles in length; further, that the plans and specifications for this project are now being prepared and that the work will be contracted in sufficient time to meet the completion date of the Oregon Section, September 1, 1940.

The Commission discussed a letter from Mr. Charles Wiley, Redmond, Oregon, forwarded from the office of Governor Sprague, in which Mr. Wiley suggests that a monument bearing the names of Oregon pioneers who participated in the blazing of the first wagon road over the South Santiam Pass, now the route of the Santiam Highway, be erected and maintained upon the right of way of such highway. There was also presented in connection with this matter letters from Mr. Lewis A. McArthur, President of the Oregon Historical Society, and Mr. Robert W. Sawyer, Bend, each of whom expressed the thought that the erection of some sort of a memorial or marker to these pioneers, and particularly to Mr. Andrew Wiley, who was the discoverer of the Santiam route in the year 1859, would be proper and appropriate. The Commission approved the placement of such marker or monument on the state highway right of way provided funds other than state funds are secured to finance it.

The Commission discussed a letter from the Diamond Lake Summer Home Association urging that every effort be made to keep the Diamond Lake Highway from Union Creek to The Dalles-California Highway free of snow and open for general public use during the winter months. The Engineer estimated that it would cost approximately \$13,000 to keep this road open during the winter season which, he said, lasts about four months, such estimate being based upon average winter conditions. He questioned the justification of such expenditure in view of the small volume of traffic that would use the road during this period. The Commission decided unanimously not to attempt to keep this road open to travel during the winter months on account of the expense involved.

A petition was presented from numerous property owners and people

SEP 27 1939

residing along the old Pacific Highway between Eugene and Junction City asking that the fingerboard signs in Eugene and Junction City, which direct travel along the Eugene-Junction City Secondary Highway to Santa Clara, be replaced with signs directing travel to Junction City and Eugene, respectively, so that the traveling public would know that there is an alternate route available between these two places, which would work to the advantage of people residing along this route who depend largely upon tourist business to dispose of the products of their land. The Commission considered it inadvisable to change the signs as requested because of the confusion that it would cause to tourists who depend entirely upon signs erected by the State Highway Department to direct them from one point to another via the most direct and safest route which in this instance would not be over the old highway because it contains a number of railroad grade crossings. Accordingly, the Commission decided unanimously not to change the existing signs and instructed the Secretary to so inform the petitioners.

The Commission considered and ordered filed a letter from Oscar L. Bussell, Eugene, with respect to the adoption of a permanent route for the Pacific Highway through Eugene.

A petition was also presented from users of the Tiller-Trail Secondary State Highway in Douglas County urging immediate improvements to this road, particularly the section between Canyonville and the Jackson County line. The Engineer was instructed to make an investigation of this road and report his findings at the next meeting.

The Engineer brought up for discussion matters pertaining to the proposed improvement of the Blachly-Long Tom River Section of the Siuslaw Highway, in Lane County. He advised that as previously instructed by the Commission he has completed an investigation of this section with a view to providing a temporary improvement which might prove satisfactory until funds are available to rebuild the road to modern standards. The section investigated, he said, is 3.52 miles in length and passes over the Low Pass Summit. He estimated that to widen, surface, and oil this section would cost between \$50,000 and \$60,000. The Commission approved the report but took under advisement the matter of committing funds to the project. It was decided to discuss this matter with the Lane County citizens who are proponents of the project upon the Commissioners return from the annual meeting of the American Association of State Highway Officials in Richmond, Virginia, next month.

The Engineer brought up for discussion matters pertaining to the Wilson River Highway W. P. A. Project, particularly the question of employment of shovel operators. He advised that under a new W.P.A. ruling operators of power shovels now receive considerably less salary than they did heretofore for the same work, and much dissatisfaction has developed among the men who refuse to work at the reduced rate. As a consequence, he said, progress of the project is being greatly retarded, it being very difficult to find experienced operators who will work at the lower salary and it being uneconomical to employ men without experience in handling this type of equipment. He further advised that a delegation is to appear before the Commission on the following day which will ask the Commission to hire the shovel runners and

SEP 27 1939

carry them on the state pay roll. It was the Commission's thought that the employment of shovel runners by the state would act adversely to the state's best interests and accordingly, after considerable discussion, it was decided not to hire these men and to so inform the delegation when it appears.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - -	101-2818 - Miles Bridge-Baker Section, Medical Springs Secondary Highway, Baker County.	1st authorization - \$300.00
Plans - - - -	1-2819 - Baker-Gibbs Ranch Section, Baker-Unity Highway, Baker County.	1st authorization - \$150.00
Plans - - - -	4-2828 - Nehalem River-Sunset Camp Section, Wolf Creek Highway, Clatsop County.	1st authorization - \$700.00
Bridge - - - -	206-2902 - Myrtle Point Section, County Road, Coos County.	1st authorization - \$150.00
Quarry - - - -	19-2818 - Lakeview Section, Fremont Highway, Lake County.	2nd authorization - \$100.00
	Total to date \$400.00	
Stock Pile & Quarry - - - -	20-2839 - Cusiman-Camp Creek Section, Siuslaw Highway, Lane County.	2nd authorization - \$150.00
	Total to date \$400.00	
Plans - - - -	20-2840 - Blachly-Long Tom River Section, Siuslaw Highway, Lane County.	1st authorization - \$535.50
Right of Way -	121-2834 - Kernville-Forest Boundary Section, Siletz Secondary Highway, Lincoln County.	1st authorization - \$600.00
Location - - -	22-2818 - Foster-Bryant Hill Section, Santiam Highway, Linn County.	3rd authorization - \$1,500.00
	Total to date \$11,500.00	
Location - - -	23-2817 - Brogan-Jamieson Section, John Day Highway, Malheur County.	2nd authorization - \$250.00
	Total to date \$2,200.00	

Plans - - - - 228-2807 - Wasco-Fulton Canyon Section, County Road, Sherman County. 2nd authorization - \$545.00
Total to date - \$945.00

Plans - - - - 131-2817 - Union-Catherine Creek Section, Medical Springs Secondary Highway, Union County. 1st authorization - \$250.00

Test Pits - - - 33-2815 - Seufert-Dufur Section, The Dalles-California Highway, Wasco County. 3rd authorization - \$ 38.00
Total to date - \$334.00

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

O. C. Yocom, contract No. 2134, for the grading, surfacing and oiling of the Sheridan-Polk County Line Section of the Sheridan-Lincoln County Road, in Yamhill County, requested an extension of time of 15 days, from July 31 to August 15, 1939, within which to complete this project. He alleged that his failure to complete the project within the specified time limit was due to extra work that the state required him to do under Price Agreement No. 1, being for the furnishing and placing of reject materials on macadam surface or binder course. The Engineer advised that the reason given by the contractor for failure to complete the job within the specified time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

E. C. Gerber, contract No. 2149, for grading, surfacing and oiling and also furnishing crushed materials in stock piles on the Shaw Junction-Gates Section of the Silver Creek Falls and North Santiam Highways, in Marion County, requested an extension of time of 3 days, from July 30 to August 2, 1939, within which to complete this project. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that, in his estimation, there is no valid reason why Mr. Gerber could not have completed this job within the specified time. He recommended that the extension of time now requested be granted subject to the condition that Mr. Gerber be charged for the extra engineering expense incurred by the state subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Warren Northwest, Inc., contract No. 2180, for construction of the Deschutes Oiling Project on the Central Oregon, Fremont and Century Drive Highways, in Deschutes, Klamath and Lake Counties, requested an extension of time of 20 days, from July 31 to August 20,

SEP 27 1939

1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to unfair weather conditions for the carrying on of the oiling work in the vicinity of Lakeview during the month of June. The Engineer advised that, in his estimation, this contract should have been completed within the specified time limit and he knows no valid reason that could be given by the contractor for failure to do so. He recommended in view thereof that the extension of time now requested be granted subject to the condition that the contractor be required to reimburse the state for the extra engineering expense incurred in connection with this job subsequent to the specified date of completion. The Commission approved the recommendation unanimously.

The Commission had under consideration the question of a formal extension of the time limit for completion under contract No. 2003 awarded to Minneapolis-Moline Power Implement Company on August 12, 1937, in connection with the supplying of materials for the Whiteson Grade Separation Project. It appears that the contract provided that the completion date should be November 27, 1937, but carried the further provision that the material should be held by the fabricator thereof until shipping instructions were given by the State Highway Department. These shipping instructions were not issued until December 10, 1937, and in accordance with said instructions the materials were shipped and were received and accepted in Portland on December 25, 1937. After consideration, the Commission ordered the entry of a formal extension of time on the contract from November 20, 1937, to December 25, 1937, without penalty.

The Engineer reported that Contracts Nos. 2067, 2113, 2121, 2134, 2137, 2149, 2152, 2161, 2180, 2200, and 2201, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2067, with Leonard & Slate, for grading the Sheep Ridge-Toll Creek Section of the Santiam Highway, in Linn County. Completed September 12, 1939.

Contract No. 2113, with Roy L. Houck, for grading, surfacing and oiling the Crooked Creek-Lobert Section of The Dalles-California Highway, in Klamath County. Completed August 17, 1939.

Contract No. 2121, with Fisher Brothers, for surfacing and oiling and furnishing crushed rock on the Odell Lake-

Walker Mountain Section of the Willamette Highway, in Klamath County. Completed September 21, 1939.

Contract No. 2134, with O. C. Yocom, for grading, surfacing and oiling the Sheridan-Polk County Line Section of the Sheridan-Lincoln County Road, in Yamhill County. Completed August 12, 1939.

Contract No. 2137, with Babler Brothers, for surfacing and oiling and furnishing crushed rock in stock piles on the Grant County Line-Unity Section of the John Day Highway, in Baker County. Completed August 30, 1939.

Contract No. 2149, with Edwin C. Gerber, for grading, surfacing and oiling and furnishing crushed rock in stock piles on the Shaw Junction-Gates Section of the Silver Creek Falls and North Santiam Highways, in Marion County. Completed August 2, 1939.

Contract No. 2152, with Leonard and Slate, for grading and paving the North Unit of the Oregon City Section of the Pacific Highway East, in Clackamas County. Completed September 8, 1939.

Contract No. 2161, with Roy L. Houck, for grading the Lobert Section of The Dalles-California Highway, in Klamath County. Completed August 4, 1939.

Contract No. 2180, with Warren Northwest, Inc., for the Deschutes Oiling Project on the Central Oregon, Fremont and Century Drive Highways, in Deschutes, Klamath and Lake Counties. Completed August 19, 1939.

Contract No. 2200, with McNutt Bros., for grading, surfacing and oiling the Hillsboro Airport-Ray's Ranch Section of the Hillsboro-Cornelius Pass County Road, in Washington County. Completed September 6, 1939.

Contract No. 2201, with Edlefsen-Weygandt Company, for pavement widening and resurfacing of the Sandy Boulevard Section (44th Ave. to 74th Ave.,) of the Columbia River Highway, in Multnomah County. Completed September 23, 1939.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

SEP 27 1939

The Commission discussed the scheduling of its regular meeting in December and decided to hold such meeting in Portland on Thursday, December 7, 1939. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

The Commission adjourned at 7:40 o'clock p. m. and reconvened at 9:15 o'clock p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Commission had under discussion the request from the Committee in charge of the McLoughlin Memorial Home, in Oregon City, for the placement of fingerboard signs on the highway right of way in Oregon City directing the public to the McLoughlin Home; also, for the erection of historical markers at the north and south entrances to the city containing authentic pioneer information with reference to the McLoughlin Home. The Commission, by unanimous vote, approved the installation of fingerboard signs, as requested, but deferred for future consideration the matter of permitting the other signs to be maintained on the highway right of way. The Secretary was instructed to convey such information to Ray Conway, Manager of the Oregon State Motor Association, who presented this matter on behalf of the McLoughlin Home Committee.

The Assistant Attorney reported the status of the 1939 right of way budget. He advised that of the \$600,000 budgeted for this purpose there has been obligated for right of way and real property purchases the sum of \$582,000 which indicates that expenditures for this year will not exceed the budgeted amount. The Commission approved the report.

The Attorney requested authority to purchase numerous parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful consideration, the Commission approved the request and, by unanimous vote, adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Warren-Scappoose Section - Columbia River Highway</u>

The Assistant Attorney reported an offer from Mr. Charles Childs, Albany, to purchase, for the sum of \$10.00, an old building located on the newly-acquired right of way of the Pacific Highway East, in Albany. The Commission decided not to sell this building to Mr. Childs, in view of the fact that it was purchased from him in the first place, and to let the contractor dispose of it as he sees fit.

The Attorney brought up for discussion the matter of purchase from the Sunset Logging Company of an 80-acre tract of green timber situate adjacent to the Wolf Creek Highway about one mile west of the Washington-Tillamook County Line, more particularly situate in the north half of the southeast quarter of Section 2, Township 3 North, Range 6 West, W.M. He advised that the state already owns the land on which this timber is located but the timber is still owned by the Sunset Logging Company which plans to start cutting it within the next two weeks. He gave as his thought that the state should own this timber which would be in accordance with the Commission's policy with respect to the preservation of the natural beauty of this road and advised that the Sunset Logging Company will sell it to the state at the rate of \$3.50 per MFBM, which would amount to about \$5,000, there being about 1,500,000 feet of timber on the tract. The Commission indicated that it would acquire this timber in the event the purchase is recommended by the State Parks Superintendent. The Assistant Attorney was instructed to ascertain the Parks Superintendent's attitude with respect thereto. (This matter was reconsidered by the Commission on the following day at which time the Assistant Attorney reported that, while the State Parks Superintendent would like to acquire this timber, he could not recommend purchase now because there are other tracts along this highway west of the town of Elsie for which he would rather spend the money. He suggested, in view of the circumstances, that it might be possible to arrange an exchange of properties with the Sunset Logging Company, the state to secure title to the timber on the tract under discussion and to deed to the Sunset Logging Company a 40-acre tract of timber land nearby which is situate a considerable distance from the highway, the exchange to be made on the basis of timber at \$3.50 per MFBM, and an allowance being made to the Sunset Logging Company for the extra cost of logging the timber from the state's 40-acre tract over the cost of logging the timber from the tract that the state is acquiring. The Commission approved the suggestion and authorized the Assistant Attorney to discuss the matter with the officials of the Sunset Logging Company on such basis.)

The Assistant Attorney requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for various highway improvements. The Commission granted the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the state acquire for right

SEP 27 1939

of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Salem-Pringle Creek Section of the Pacific Highway East
 Davies-Vadis Section of the Wolf Creek Highway
 Muddy Creek-Lakeview Section of the Klamath Falls-Lakeview Highway
 Warren-Scappoose Section of the Lower Columbia River Highway
 Albany Section of the Pacific Highway East

real property owned by or in possession of the following parties and/or persons, to wit:

Salem-Pringle Creek Section of the Pacific Highway East
 5915A-Ethel T. Allison and Ira R. Thomas
 Davies-Vadis Section of the Wolf Creek Highway
 6276-Lester Sell
 Muddy Creek-Lakeview Section of the Klamath Falls-Lakeview Highway
 4157-A. C. Kingman and C. B. Ledgwick
 4176-E. L. Ford
 Warren-Scappoose Section of the Lower Columbia River Highway
 7159-Erickson's Dairy Products Co.
 Albany Section of the Pacific Highway East
 6377-Charles Childs and A. K. McMahan
 6379-Ruth Nelson
 6381-Roy W. Nutting and Winnifred Nutting
 6388-Walter Chance, Jr., et al.
 6392-Mary C. Goodwin and Unknown Heirs of Harrison
 O. Chance, deceased.

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Assistant Attorney reported on investigations with respect to a service station that encroaches upon the Pacific Highway West (Denver Avenue) at its intersection with the Pacific Highway East (Union Avenue) in North Portland. He said that inspection of the records in the Multnomah County Engineer's office reveals that on December 22, 1926, the Board of County Commissioners granted to the Standard Oil Company of California a revocable permit authorizing the occupancy by this building of the right of way of Denver Avenue, which permit contained a clause that the permit is revocable at any time in the future upon 30 days' notice to the county. He further advised that subsequent inquiry reveals that this service station is now under the control of Standard Stations, Inc., and that it was stated to him by officials of such corporation that they do not contest the legal authority of the State Highway Commission now to revoke the permit originally granted by Multnomah County. In fact, their lease of the property, which runs for a 5-year period ending June 30, 1943, contains a provision to the effect that, if the lessee is required to vacate the public right of way, the lessee then shall have the right to cancel its lease upon 30 days' notice to the lessor. He gave as his opinion that the right of the State Highway Commission to cancel the permit

SEP 27 1939

and to require that the public right of way be cleared appears definite and incontestable, although the officers of the corporation indicated that they might desire to be heard by the Commission in the matter, in the event the Commission orders the removal of the building. In view of this report, the Commission decided to adhere to its policy with regard to matters of this kind and to require the removal of the building at the earliest possible time. The Secretary was instructed to send formal notice to the corporation on the action taken and to ask them to move this service station off of the state's property within the next 90 days, which was considered a reasonable length of time within which the company could act.

The Commission had under consideration the application of Mr. C. P. Henkel to purchase two fractional lots at Estacada outside of the standard right of way limits, for which an offer of \$60 was made. After consideration, the Commission decided to deny the request to purchase, and instructed the Attorney to so advise Mr. Henkel.

The Commission then gave consideration to the sale generally of excess properties, title to which is held by the Commission. In view of the expense involved in making examinations, it was decided that no sales will be made unless a cash offer of at least \$250 is made for the property involved. In the event of such an offer being received the Commission ordered that the State Highway Engineer and the Attorney make personal examinations and submit affirmative recommendations before consideration will be given to the sale by the Commission.

The Commission had under discussion the matter of acquiring a small triangular-shaped parcel of privately-owned land on the west side of McLoughlin Boulevard (Pacific Highway East) in Portland, so as to prevent the parcel from being put to commercial use. The Attorney advised that this property lies in Block 7, Riverside Homestead Addition to Portland, and borders on S.E. 8th Avenue as well as on the highway south of S.E. Cora Street. Further, that Mr. John Jordan, who owns the property and conducts a service station business on the opposite side of the highway at this point, contemplates the construction of another service station on this small tract, and, to this end, is attempting to have the zone classification changed. It was his thought that a service station at this location would be objectionable from a traffic standpoint and would also detract from the appearance of the highway, for which reason he inquired whether or not the Commission would be interested in the purchase of the area, which he valued at approximately 25¢ per square foot. In this connection the Secretary presented a letter from the Portland City Planning Commission advising that the City Council has been petitioned by Mr. Jordan to change the zone classification from Zone No. 1 to Zone No. 3, in order to permit the operation of a service station on the site, and advising that the City Planning Commission is of the opinion that it would not be to the best interests of the public to allow any more commercial developments at this point, and that the freeway characteristics of this thoroughfare should be preserved. They suggested the acquisition of the property by the State Highway Commission for roadside beautification and park purposes. After considerable discussion, the Commission decided not to acquire this property, but went on record as being opposed to any change in the present zone classification.

Division Engineer E. A. Collier was authorized by the Commission to represent the Commission before the City Planning Commission when this matter comes up for discussion.

The Commission discussed and signed two state highway fund vouchers calling for the last two payments to the Miami Corporation for timber strips recently purchased from the corporation along the Salmon River Highway, each voucher being in the sum of \$12,930.40, it being understood that the vouchers shall not be presented to the Secretary of State for payment prior to the time the payments are due, August 25, 1940, and August 25, 1941, respectively.

A report was rendered by the Assistant Attorney with respect to the ocean beach at Seaside, which is being used as a landing field for airplanes. He advised that investigation reveals that the area being so used is in the ownership of the state and is, therefore, a public highway, specifically under the jurisdiction and control of the State Highway Commission. It was the thought of the Commission that the use of the beach for this purpose is detrimental to the best interests of the general public and, if possible, should not be allowed. However, the question arose as to whether or not the City of Seaside has any particular interest in the use of the area for the purpose mentioned. The Secretary was instructed to ascertain whether or not the city has any such interest and to request the city officials, if no such interest exists, to take action as may be necessary to discourage and stop the landing of airplanes on this beach, and to advise the city officials, if the city does have an interest in such activities, that it is the feeling of the Highway Commission that the use of the beach as a landing field should be properly applied for in accordance with the legal requirements. The Engineer was thereupon authorized to erect appropriate signs on the property in the event the city's reply is favorable.

The Commission had under discussion the resignation of Honorable Robert W. Sawyer, Bend, as a member of the committee appointed to act in an advisory capacity to the Commission with respect to the activities of its Travel and Information Department. The members of the Commission expressed regret that Mr. Sawyer feels that he can no longer serve on this committee and has seen fit to resign therefrom. It was with reluctance that the Commission accepted the resignation, because Mr. Sawyer has rendered valuable service to the state and to the State Highway Commission during his incumbency, which service is sincerely appreciated. The Commission thereupon signed the following letter with respect thereto and ordered it entered in the records of this meeting:

Judge Robert W. Sawyer
Bend Bulletin
Bend, Oregon

Dear Judge Sawyer:

This note is to express the regret that the Commission feels over your resignation as a member of the Travel and Information Advisory Committee on which you have served as Chairman since its

SEP 27 1939

creation. The Highway Commission has felt that this committee has done an outstanding work and guided us in a field which could have presented many difficulties.

We feel that this undertaking of the Commission has been highly productive and one that has met with general favor throughout the state. Results have been due, in a substantial measure, to the deep interest, wisdom and guidance of the Advisory Committee members.

We thoroughly appreciated your service on the committee and again repeat that it is with sincere regret that we received your resignation.

Yours sincerely,

STATE HIGHWAY COMMISSION

Henry F. Cabell (signed)
Chairman

E. B. Aldrich (signed)
Commissioner

Huron W. Clough (signed)
Commissioner

The Commission then discussed the appointment of two new members to the Advisory Committee, one to take the place of Mr. Sawyer, resigned, and the other to take the place of the late Raymond B. Wilcox. After discussion, it was decided unanimously to ask Mr. E. B. Hoyt, Publisher of the Morning Oregonian, Portland, and Mr. W. D. B. Dodson, Executive Vice President of the Portland Chamber of Commerce, to serve on this committee. The Secretary was instructed to direct a letter to each of these gentlemen requesting their acceptance of the appointment.

The Commission adjourned at midnight, to reconvene the following morning in the auditorium of the Public Service Building.

Portland, Oregon, September 28, 1939

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Deven, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the sale of land were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 o'clock p. m. in the same room:

SALE OF 3.8-ACRE TRACT NEAR DEE, OREGON

The only offer received for this land is that of H. C. McGurdy, of Dee, who submitted a bid deposit of \$50.00 for the same, which indicates to the Commission that it was his intention to offer \$250.00 for this property, in view of the fact that the Commission requires a deposit in an amount not less than 20 per cent of the amount of the bid.

A delegation from Roseburg, consisting of W. C. Harding, Secretary, Chamber of Commerce; A. C. Marsters, President, North Umpqua Highway Improvement District; Harry Ellsworth, Editor, Roseburg News-Review; Senator C. W. Clark; and H. B. Roadman, County Commissioner, came before the Commission and urged additional construction on the North Umpqua County Road, particularly a 1½-mile section extending easterly from the project completed this year to a connection with the present road. They urged this improvement at the earliest possible time and advised that Douglas County will acquire the needed right of way as soon as the Commission approves the project for construction. They were informed that the Commission has this project in mind and will be pleased to give it due consideration at the proper time, although no definite commitment of funds can be made now.

A delegation from Tillamook, Washington, and Multnomah Counties, representing various organizations that are interested in the Wilson River Highway W.P.A. project, came before the Commission with respect to such work. Mr. Claude W. Barrick, City Attorney, Tillamook, headed the group, which consisted of the following: County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson and County Engineer W. Stanley Coates, all of Tillamook County; Jack Aschim, Secretary, Tillamook County Chamber of Commerce; Louis Hammer, Postmaster, Tillamook; A. J. Swett, Oscar Effenberger, and George D. Riechers, representing the Tillamook City Council; County Judge H. D. Kerkman, and County Commissioners James Lewis and J. W. Hughes, of Washington County; F. L. Shull, C. A. Bigelow, and O. V. Badley, representing the Board of County Commissioners of Multnomah County; George Buck, Multnomah County Roadmaster; Gilbert Finney, Rockaway; S. G. Reed, Nehalem, representing the North Tillamook County Chamber of Commerce; L. G. Apperson, City Engineer, Portland; and L. M. Lepper, Director, Eastside Commercial Club, Portland.

Mr. Barrick alleged that progress on construction of the Wilson River Highway W.P.A. project is practically at a standstill, that nothing much has been done for some time, and that about 500 men who are employed on this

work are standing around with very little to do because of trouble experienced with the operation of power shovels, it appearing that serious difficulty has arisen with respect to the employment of shovel runners, who would rather not work at all than work for the salaries that are now paid for such work under the new W.P.A. regulations. He urged the Commission to hire the operators of this equipment and to carry these men on the state payroll at standard rate of pay for men in this class of employment, and declared that unless the Highway Commission does something to alleviate present conditions completion of the Wilson River Highway will be delayed for years.

County Commissioner Lindsey stated that the people of Tillamook County are very much disappointed in this year's progress of the work on this highway. He asserted that there is only one power shovel in operation on this job and that it is laid up a large part of the time for repairs. The inefficiency of the operation of this shovel, he said, is holding up all other work on this project; in fact, because of the trouble experienced with the shovel and with the securing of men to operate it, the efficiency of the entire Wilson River project is far below that of last year, such efficiency being now 30 per cent, whereas last year it was 80 per cent. He urged the Commission to assign another shovel to this job; also, to place a topping course of rock on the section where the grade is finished, and to expedite construction of a certain channel change in the Wilson River. He gave as his thought that the state should not only add another shovel to this project but should also hire the men to operate the shovels, which, in his estimation, would increase the efficiency of the work to a considerable extent. Tillamook County, he said, feels that it is entitled to this improvement, which it understood would be completed in 1940 but which, at the present rate of progress, will not be completed until a long time after that.

County Judge Kerkman, of Washington County, concurred in the remarks of Mr. Barrick and Mr. Lindsey. He also advised that Washington County has expended a large amount of money in the interest of the Wilson River project, notwithstanding that the money could have been used to excellent advantage on other road projects. He urged the Commission to take charge of the work, which he declared would never be completed if the W.P.A. is depended upon to finish it.

Mr. Apperson endorsed the remarks of the other speakers and advised that the City of Portland is ready and willing to cooperate in the project in any way that it possibly can. He gave as his thought, however, that this is a problem that the Highway Commission must work out with the W.P.A. officials. Mr. Shull also endorsed the remarks of the other speakers and suggested that the Commission confer with Mr. E. J. Griffith, State Administrator, W.P.A., in regard to this matter.

Mr. Lepper declared that the original plan for this highway was to complete the grading work in 1940 and the surfacing and oiling in 1941. He urged action to that end. Mr. Reed also urged the completion of the project so that it would be available for general public use in 1940. Mr. Riechers spoke on behalf of the project, as a member of the Tillamook City Council. Mr. Aschin gave as his thought that the state would eventually have to take

over this project as a state job and suggested that the State Highway Commission take charge now because it would not only help out the present situation but would undoubtedly save the state considerable money. Mr. Buck volunteered the information that Multnomah County does not rely at all upon the W.P.A. for men to operate and keep in condition equipment used on the county's W.P.A. work. In fact, he said, the operation of county-owned equipment by W.P.A. help is not tolerated.

Chairman Cabell advised that the State Highway Commission is now spending from \$150,000 to \$175,000 annually on the Wilson River Highway and on the Wolf Creek Highway and, naturally, is very anxious to see this money spent in the most efficient manner; but the question is, how is that to be accomplished. He further stated that the members of the Highway Commission have given considerable study to the matter of power-shovel operation and are of the unanimous opinion that the state should not furnish state operators for such equipment used on W.P.A. work. The Commission is as anxious as anyone, he said, to obtain the greatest efficiency possible in connection with these operations and contemplates discussing the matter thoroughly with the W.P.A. authorities as soon as a convenient time can be arranged. Also, that the Commission will try to keep the work on the Wilson River Highway and the Wolf Creek Highway equalized to the best of its ability and will also try to work out a solution for the present difficulty at the earliest possible time. The State Highway Engineer agreed to look into the matter of providing a satisfactory shovel for the Wilson River Highway operation.

County Judge J. H. Allen, of Grant County, was present and discussed briefly with the Commission the matter of extending the Kimberly-Monument Secondary Highway from its present terminus at Monument to a connection with the Pendleton-John Day Highway at Long Creek. He was informed that the Commission has this matter in mind and contemplates taking definite action thereon in the near future.

Judge Allen then extended to the members of the Commission and its staff an invitation to attend a venison dinner as the guests of the Grant County Court on a date in the near future to suit the convenience of the Commission. The Commission tentatively accepted the invitation, with thanks.

The Commission conferred with the following federal officials in regard to the point of connection of the proposed Timberline Lodge Road with the Mt. Hood Highway near Government Camp: W. H. Lynch, District Engineer, H. D. Farmer, Senior Highway Engineer, representing the Public Roads Administration; Lyle F. Watts, Regional Forester; and James Frankland, Regional Engineer, representing the U. S. Forest Service.

The question involved was whether the proposed road shall connect with the Mt. Hood Highway at a point where the east leg of the present road now enters this highway, or should connect with the Mt. Hood Highway at a point about $1\frac{1}{2}$ miles westerly thereof. It was explained that the cost of constructing the road at the latter-mentioned location would be about \$10,000 more than the other but would have advantages to offset the extra cost in that it would provide a connection nearer to Portland, would contain less

curvature, and would be at a higher elevation which would tend to reduce the grade line on the Timberline Lodge Road. After discussion it was mutually agreed to adopt the route that would connect with the Mt. Hood Highway $1\frac{1}{2}$ miles west of the present (east leg) connection.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Senator F. M. Franciscovich of Astoria headed a delegation from Gearhart and Seaside which requested the construction of a sidewalk along the Oregon Coast Highway between these two towns. Other members of the delegation were Mrs. Lesley Miller and Mrs. J. M. Waterhouse, members of the Gearhart City Council; Mayor Carl R. Lolk and Mrs. Lolk, of Gearhart; Mrs. James Murphy, Gearhart; and City Attorney Irving C. Allen, Seaside.

Senator Franciscovich presented the arguments, which were endorsed by Mrs. Miller. The Commission appeared favorably inclined toward this project but advised that it could not render a definite decision in the matter until an investigation of conditions has been made. The Engineer was thereupon instructed by the Commission to make such investigation and report his findings, including the cost of constructing the sidewalk, at his early convenience. He was also instructed to send a copy of his report to Senator Franciscovich as soon as it is prepared, regardless of whether or not the report has been acted upon by the Commission.

Mr. James O. Convill, City Manager, Astoria, came before the Commission in regard to the moving of buildings from the right of way of the proposed Astor Street revision of the Oregon Coast Highway in Astoria. In this connection the Attorney advised that bids have been received for the moving and/or reinstating of all of the buildings on the north side of the street, the low one being in the amount of \$4,780 if all are moved, or \$4040 if all but one are moved, and that one is cut off to suit the convenience of the owner. Mr. Convill advised that the owners of the buildings on the south side of the street have agreed to contribute the sum of \$2,400 toward the cost of moving the buildings on the north side of the street, provided their buildings are not molested and the city will vacate in their behalf the 20-foot strip on which their buildings now encroach. They feel, he said, that the people on the north side of the street should pay the difference. He further stated that all but two of the property owners on the north side of the street are willing to contribute toward this expense but there still remains an amount of \$1200 unaccounted for, a portion of which the city is asking the state to contribute because it cannot finance the project alone, having only \$600 available to apply thereon. He further advised that, unless funds can be supplied to pay the entire cost of the moving of the buildings, it will probably be necessary to settle the matter in court, which they dislike to do because there is a question whether or not the decision would be favorable to the city. After considerable discussion the Commission voted unanimously to assume the payment of 50 per cent of this excess cost, approximately \$600. The Attorney was authorized by the Commission to render legal service to the city as may be required.

County Judge David F. Graham, of Malheur County, was present and urged the Commission to retain in its construction program provision for the improvement of the Vale-Adrian County Road and to construct this project at the earliest possible time. He was informed that this project is still in the program and that it will be placed under contract as soon as it is approved by the federal authorities and funds are available to finance it.

Judge Graham also asked for the improvement of the Vale West Secondary State Highway and urged the Commission to replace on the state secondary highway system the portion of the Nysse-Jordan Valley Road that was removed therefrom a year or two ago.

Mr. Roy W. Nutting, Albany, came before the Commission in regard to a right of way settlement involving his home in Albany. It appears that the new highway takes off a small portion of Mr. Nutting's front yard and he alleges that the loss of this property and the presence of the highway in front of his residence has decreased greatly the value of his home. He valued his home at \$5,000 and advised that the state has offered him \$1,000 for the land taken, including damages, which he cannot accept, but is willing to settle for \$2,000. He presented a letter in support of his oral contentions. The Assistant Attorney advised that this matter has been investigated very carefully and that he cannot recommend payment of more than \$1,000 to Mr. Nutting.

Chairman Cabell informed Mr. Nutting that the Commission uses its best judgment in determining what is a fair price to pay for property in all cases, and bases such judgment upon the recommendation of the Right of Way Department, which employs experts in this work, and when the Highway Commission cannot reach an agreement with the property owner, then the only alternative left is to let the matter go to court for a decision by a jury. The Commission dislikes to pursue such course, he added, and will not do so unless a satisfactory settlement cannot be reached otherwise.

Mr. Nutting stated that he also wished to avoid court proceedings and thought that perhaps he could reach a satisfactory settlement by talking to the members of the Commission. However, it appears that the Commission is not inclined to increase the amount of its offer, so he is willing for the court to decide the case inasmuch as he cannot reduce the amount of his demand. The Commission thereupon authorized the Attorney to proceed with condemnation of the property.

A delegation from Crescent Lake, Oregon, consisting of Miss Leah Collins, Fred Hall, and Messrs. Hammersly and Wallace, came before the Commission and urged the construction of a 3-mile section of the Cascade Lakes Forest Highway extending from the Willamette Highway southerly to Crescent Lake. Mr. Earl C. Reynolds, Secretary of the Klamath County Chamber of Commerce, Klamath Falls, accompanied the group and acted as spokesman. He urged the Commission to give this project serious consideration in the formulation of the next program for forest highway funds and also urged an allocation of such funds to construct the project so that it will be available for general public use at the earliest possible time.

Others speaking on behalf of this project were Mr. Fred Hall, who conducts a store at Crescent Lake, and Miss Collins, who operates a guest camp for girls at this place. Miss Collins alleged that the road under discussion is unlike others leading into resort districts in the Cascade Mountains in that it not only is needed as an accommodation to people going to the resorts for pleasure but also is needed from the commercial standpoint, inasmuch as there is quite a settlement of permanent residents at Crescent Lake needing this road throughout the entire year, whereas roads to the other resorts are utilized only during the summer months.

Chairman Cabell advised that this road is not eligible for state money and that the only money, other than county money, that can be used to finance the improvement of the same is the forest highway money, in the allocation of which the State Highway Commission has only one vote, it being necessary to have the unanimous vote of the State Highway Commission, the Public Roads Administration, and the U. S. Forest Service. He further stated that the members of the State Highway Commission are cognizant of the importance of this road and feel that its improvement is desirable; wherefore, the Commission will keep the project in mind and will endeavor to work out a satisfactory solution for it if that can be done without interference with the forest highway program that has already been arranged.

Mr. Reynolds also discussed with the Commission the following highway improvements:

1. Widening of South Sixth Street in Klamath Falls:- He asked the Commission to authorize a survey of this project this fall so that information will be available for the Commission without delay when the Commission decides to go ahead with the work.
2. Lost River Bridge Section of The Dalles-California Highway:- Mr. Reynolds urged the Commission to authorize this improvement at the earliest possible time.
3. Improvement of The Dalles-California Highway at a point where the irrigation flume crosses over the same at the Semon's Place.
4. Construction of the Dairy Section of the Klamath Falls-Lakeview Highway.
5. Additional improvements to The Dalles-California Highway north of Klamath Falls:- Mr. Reynolds urged the Commission to undertake another project on this section next spring if at all possible.

He was informed by Chairman Cabell that the Commission has these projects all in mind and will endeavor to include them in future highway programs, although no definite commitment of funds thereto can be made at the present time.

County Commissioner William Baer, of Deschutes County, and Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, were present. They

SEP 26 1939

inquired what progress is being made toward securing approval of the improvement of the Century Drive Secondary Highway between Bend and Elk Lake, particularly the forest highway section. They were informed that plans for an 8-mile section of this project are now being prepared and that the project will probably be ready for contracting some time this fall or winter.

Mr. Peoples also brought up for discussion the matter of additional improvements on the Warm Springs Highway, and particularly urged that this road be placed on the federal aid system, which he thought would expedite the contracting of the work considerably and would advance the time of opening the road for general public use. He was informed that the Commission is reluctant to add any more roads to the federal aid system because of the limited amount of unallocated federal aid mileage available. However, the Commission will give the matter serious consideration.

Mr. Baer brought up for discussion matters pertaining to the improvement of the Butler Market Road. He inquired, if Deschutes County will give to the Commission an order on the Secretary of State for \$5,000, payable from the county's share of the motor vehicle and gasoline tax fund, to apply as county cooperation on this project, will the Commission accept this money even though it is not yet due? He was informed by Chairman Cabell that the proposition appears satisfactory but the Commission would like a little time to think it over before making a definite statement in regard thereto.

Mr. Jack Godfrey, Portland, representing the American Bonding Company of Baltimore, came before the Commission at this time in regard to the Commission's forgery bond. He advised that the National Surety Corporation, which wrote this bond, desires to be relieved of its obligation if the Commission is agreeable, and presented a letter from Mr. W. B. Gilham, Resident Manager of the National Surety Corporation, in support of such statement. He expressed a desire to secure this business for the American Bonding Company, subject to the same conditions, terms, and agreements that are contained in the bond furnished by the National Surety Corporation, which still has about one year to run. He said that the American Bonding Company would furnish a new bond, either for the balance of the term covered by the present bond or for a three-year period, as the Commission desires. However, he stated a preference for a three-year term bond. The Commission appeared favorably inclined to this proposition but deferred a decision thereon pending a recommendation from the Attorney.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Proposed park site at Brookings, Curry County:- The Parks Superintendent reported the offer of Mr. Elmer Bankus, Brookings, to donate to the state, for park purposes, a 5-acre tract of land fronting on the ocean beach at Brookings. The Commission deferred a decision in this matter pending an inspection of the property by a member of the Commission.

Proposed park at Blue Lake, adjacent to the Santiam Highway:- The Parks Superintendent advised that a Mr. W. P. Davidson, Prineville, owns 233

acres of land at Blue Lake, described as the SE $\frac{1}{4}$ and the S $\frac{1}{2}$ of the NE $\frac{1}{4}$ of Section 27, Township 13 S., Range 8 E., W. M., which property he offers to sell to the state for the sum of \$6,500. He pointed out that this land is surrounded by national forest property and that the U. S. Forest Service now maintains a recreational area at Suttle Lake nearby. It was his thought that Mr. Davidson's property would fit into the national forest picture much better than into the state parks picture, and he recommended, therefore, that the offer be declined. The Commission approved the recommendation.

Proposed recreational area adjacent to Neahkahnie Mountain State Park, in Tillamook County:- The State Parks Superintendent advised that Mr. C. C. Seeley, District Maintenance Superintendent in the employ of the State Highway Department, at Astoria, owns 120 acres of timber land adjacent to the Neahkahnie Mountain State Park, which property he has offered to sell to the state for the sum of \$12,000, if the state wants it. He also said that the tract would make a fine addition to the present park, but there are insufficient funds in the parks budget to finance it now; furthermore, there is a question in his mind whether or not the Highway Commission should purchase a tract from Mr. Seeley, inasmuch as he is an employee of the Highway Department. The Commission decided unanimously not to purchase this tract.

Proposed state park at Cascadia:- The Parks Superintendent requested authority for the Right of Way Department to secure options for the purchase of a portion of the Giesendorfer property located at Cascadia Springs, which property is being considered by the Commission for state park purposes. The Commission granted the request by unanimous vote, subject to the condition that the option should cover only the land lying on the north side of the river, and that fronting on the highway on the south side of the river so as to control the entrance to the park.

At 3:30 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were opened at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"North Powder-Muddy Creek Section of the Old Oregon Trail, in Baker County. 5.69 miles roadside improvement. Norris Bros., Burlington, Washington, submitted the low bid of \$5,485.00 for this project. The next low bid was that of Blair T. Alderman, Eugene, at \$7,453.50. There were 2 higher bidders. The Commission rejects all bids on this project and has ordered it readvertised.

"Remodel east approach to existing bridge over Willamette River and construct 372-foot concrete viaduct on Water Street Section of Pacific Highway East, in Oregon City, Clackamas County. The low bid received on this job was that of McNutt Bros., Eugene, at \$77,392.00. The next low bid was that of George H. Buckler, Portland, at \$78,279.86. There were 2 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Warren-Scappoose Section of the Columbia River Highway, in Columbia County. 3.09 miles grading and 2.63 miles asphaltic concrete paving. Porter W. Yett, Portland, was the low bidder on this project with his bid of \$84,537.00. Warren Northwest, Inc., Portland, submitted the second-low bid of \$89,994.50. There was only one higher bidder. The Commission awards this contract to Porter W. Yett, at his low bid of \$84,537.00.

"Construct double-leaf steel bascule bridge with 361 lin. ft. composite trestle approach, over Coalbank Slough, on the Oregon Coast Highway, in Marshfield, Coos County. The low bid received for this project is that of J. W. and J. R. Hillstrom, Marshfield, at \$89,962.50. The next low bid is that of Tom Lillebo, Reedsport, in the amount of \$94,499.00. There were 6 higher bidders. This contract is awarded to J. W. and J. R. Hillstrom, the low bidders, at their bid of \$89,962.50.

"Nye Junction-Long Creek Rock Production Project on the Pendleton-John Day Highway, in Grant and Umatilla Counties. Furnish 24,000 cubic yards crushed rock in stock piles. A. S. Wallace, Roseburg, submitted the low bid for this project, in the amount of \$37,370.00. F. R. Hewett, Spokane, Washington, submitted the next low bid, in the amount of \$37,630.00. There were 8 higher bidders. Mr. Wallace qualified his bid by stating that he would accept only one job at this letting. It proves to be to the interest of the state to award another job to him, and therefore this contract is awarded to F. R. Hewett, the second-low bidder, at his bid of \$37,630.00.

"Lang Canyon-Arlington Section of the Columbia River Highway, in Gilliam County. 5.63 miles grading, surfacing, and bituminous macadam; also furnish 1,500 cubic yards crushed rock in stock piles. The low bid received on this project was that of Leonard & Slate, Multnomah, in the amount of \$182,165.50. The next low bid was that of Clifton & Applegate, Spokane, Washington, in the amount of \$184,646.50. There were 12 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Butte Falls Section of the Butte Falls County Road, in Jackson County. 3.0 miles surfacing and oiling. Norris Bros., Burlington, Washington, submitted the low bid in the amount of \$21,986.50 for this project. R. I. Stuart & Sons, Medford, submitted the second-low bid, in the amount of \$22,738.00. There were 2 higher bidders. This contract is awarded by the Commission to Norris Bros. at their low bid of \$21,986.50.

"Cottonwood Creek-Lakeview Section of the Klamath Falls-Lakeview Highway, in Lake County. 4.1 miles grading and 6.1 miles surfacing and oiling. The low bid received on this project was the joint bid

of Rogers Construction Company and J. C. Compton, Dayton, Washington, in the amount of \$99,622.30. The next low bid was submitted by Homer G. Johnson, Portland, in the amount of \$116,193.50. There were 3 higher bidders. The Commission has awarded this contract to the low bidders, Rogers Construction Company and J. C. Compton, at their bid of \$99,522.30.

"South Unit, Albany Section of the Pacific Highway East, in Linn County. 1.2 miles grading. E. C. Hall Company, of Eugene, submitted the low bid in the sum of \$10,589.00. Leonard & Slate, Multnomah, submitted the next low bid in the amount of \$11,179.50. There were 5 higher bidders. The bid of E. C. Hall Company was qualified in that Mr. Hall stated that he would accept this project only if he were also awarded the contract covering the bridge and culvert construction on this section. Considering his bid on that project, it proved to be to the state's advantage to accept the bid of the second-low bidder, Leonard & Slate. The Commission therefore awards the contract to Leonard & Slate at their bid of \$11,179.50.

"Construction of 8 culverts and 1 bridge on the Albany Section of the Pacific Highway East, in Linn County. The low bid received on this job was that of Averill & Corbin, Portland, in the amount of \$35,858.40. The next low bid was that of Odom Construction Company, Oregon City, in the amount of \$38,297.00. There were 8 higher bidders. The Commission awards this contract to Averill & Corbin at their low bid of \$35,858.40.

"Salem-Pringle Creek Section of the Pacific Highway East, in Marion County. 1.59 miles grading and paving. Roy L. Houck, Salem, submitted the low bid on this project, such bid being in the amount of \$86,765.50. Leonard & Slate, Multnomah, submitted the next low bid which was in the amount of \$90,696.00. There were 6 higher bidders. The Commission awards this contract to the low bidder, Roy L. Houck, at his bid of \$86,765.50.

"West Unit, Stanfield-Pendleton Hill Section of the Old Oregon Trail, Umatilla County. 8.86 miles roadside improvement. The low bid received for this project was that of M. E. Meyers & Son, Echo, in the amount of \$2,270.00. The next low bid was that of Blair T. Alderman, Eugene, in the amount of \$3,060.00. There were 3 higher bidders. This contract is awarded to the low bidder, M. E. Meyers & Son, at their bid of \$2,270.00.

"Weston-Elgin Rock Production Project, in Umatilla and Union Counties. Furnish 15,400 cubic yards crushed rock in stock piles. F. R. Hewett, of Spokane, Washington, submitted the low bid for this work in the sum of \$24,240.00. A. S. Wallace, Roseburg, submitted the second-low bid in the sum of \$25,134.00. There were 3 higher bidders. This contract is awarded to F. R. Hewett, the low bidder, at his bid of \$24,240.00.

SEP 28 1939

"Maupin-Cow Canyon Rock Production Project, in Wasco County. Furnish 9,300 cubic yards crushed rock in stock piles. The low bid received on this project was that of A. S. Wallace, Roseburg, in the amount of \$12,476.00. The next low bid was that of Schmeer & Williams Bros., Portland, in the amount of \$13,177.00. There were 5 higher bidders. This contract is awarded to A. S. Wallace, at his low bid of \$12,476.00.

"Sale of 3.8-acre tract near Dee, Oregon. The only offer received for this land was that of H. C. McGurdy, of Dee, who submitted a bid deposit of \$50.00 for the same, which indicates to the Commission that it was Mr. McGurdy's intention to offer \$250.00 for this tract, inasmuch as the Commission specifies that a bid shall be accompanied by a deposit of not less than 20 per cent of the amount bid. The Commission, therefore, has instructed the Secretary to ascertain the facts, and, in the event the assumption is correct, this property is sold to Mr. McGurdy for the sum of \$250. Otherwise the bid is rejected."

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the City of Albany with reference to the construction of a drainage canal on the South Albany project.

Certificate to correct error in recording deed covering parcel of land purchased from Ed Saling and wife, in Union County.

Cooperative agreement with the United States of America covering construction of the Alsea River Bridge on the Alsea Highway, in Lincoln County, as a forest highway project, particularly with reference to the financing of the same.

Agreement with the O.W.R.R. & N. Company covering the matter of encroachment of the Oregon-Washington Highway on railroad company property in the town of Adams, Umatilla County.

Agreement with Henry K. Hardisty providing for the elimination of a cattle pass at Mile Post 46.10, on the John Day-Burns Highway, in Grant County.

Bargain and Sale Deed conveying unto James Anderson an abandoned state-owned borrow pit situate near the Pacific Highway about 2 miles south of Junction City.

Bargain and Sale Deed conveying unto Rufus C. Stonefield and wife 2.08 acres of land in Lot 1, Section 34, Township 16 South, Range 12 West, W. M., Lane County. Right of Way Transaction No. 6739A.

Bargain and Sale Deed conveying unto the West Coast Power Company

for \$15.00, 1,959 square feet of land situate in Government Lot 1, of Section 2, Township 25 South, Range 13 West, W. M., Coos County. Right of Way Transaction No. 1209.

Quitclaim deed conveying unto Carl G. Washburne and wife 2 parcels of land in Lane County, one containing .64 acre situate in Government Lots 1 and 2, Section 22, Township 16 South, Range 12 West, W. M., and the other containing .29 acre situate in Government Lot 2, Section 22, Township 16 South, Range 12 West., W.M., being Right of Way Transaction No. 7190.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:00 o'clock p. m.

Commissioner

Portland, Oregon, November 1, 1939

The State Highway Commission met with members of its Advisory Board on Publicity Matters at 7:00 o'clock p.m. in the Heathman Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Harold B. Say, Director of the Travel and Information Department, was also present. The Advisory Committee was represented by a subcommittee composed of Frank Jenkins, Chairman, E. P. Hoyt, and Charles Reynolds. Mr. Jenkins informed the Highway Commission that the Advisory Committee had elected Mr. Merle Chessman, of Astoria, one of its members, as Chairman of the Advisory Committee to succeed Mr. Robert W. Sawyer, of Bend, resigned. The Commission signified its approval.

Matters pertaining to the Highway Department's tourist promotion activities for the year 1940 were then discussed and in this connection Mr. Jenkins presented the following letter which he said is the Advisory Committee's recommendation with respect to such matters, having been adopted by the unanimous vote of the members thereof:

To the Oregon State Highway Commission

Gentlemen:

Your Travel and Information Department Advisory Committee in session October 31 after a comprehensive study of the Highway Department's tourist promotional activities of the year now closing transmits the following observations and recommendations to you:

We feel that the program followed this year has been basically sound and productive; that Oregon has benefited in a major way from increased revenue accruing through increased motor tourist traffic; that the return to the gasoline tax fund through added travel has more than compensated directly for the expenditure to produce it. Gain in traffic since the Commission entered the field of tourist promotional work has been approximately 50 per cent with private non-resident motor traffic now returning apparently over \$1,000,000 to the gasoline tax fund direct out of a gross motor tourist revenue of more than \$24,000,000.

Basically we recommend a continuation of the present program involving the use of magazines, newspapers and motion pictures as the primary media for conveying the story of Oregon's attractions to the motorists of the nation along with the distribution of appropriate literature, maps and kindred material.

We recommend the expenditure of \$100,000 for 1940 in carrying forward an adequate program involving employment of approximately \$65,000 in magazine and newspaper advertising and approximately \$35,000 for all other items, including distribution of motion pictures, production of literature, necessary photography, postage, express, and all other items of operation, including a modest increase in contact work with travel directing agencies and publications in various centers of Oregon's heaviest travel source regions.

Attached is a list of magazines and newspapers recommended for the 1940 campaign. In this connection we specifically recommend a joint endeavor with the Washington State Progress Commission and Province of British Columbia in presenting tourist attractions of the three units of the Pacific Northwest in Life magazine to the extent of approximately \$3,500.

In transmitting recommendations in connection with publications proposed, the committee recommends as in past years that the department director and advertising counsel be given authority for such

minor changes in schedule as may be necessary or may be found peculiarly desirable through circumstances that may develop.

In conclusion, the committee would inform the Commission that it has elected Merle Chessman chairman of the Advisory Committee to succeed Judge R. W. Sawyer, resigned.

Presented for the Advisory Committee
by the following subcommittee

Frank Jenkins, Chairman
E. P. Hoyt
Charles Reynolds

Members of the Advisory Committee present at the meeting October 31, 1939: R. R. Cronise, Charles Reynolds, Frank Jenkins, W.D.B. Dodson, Merle Chessman, Hugh Ball, Don Sterling, Ed. W. Miller, Dr. E. B. McDaniel, E. P. Hoyt.

	Detroit News

The members of the Highway Commission indicated approval of the recommendations but deferred definite action thereon pending consultation with Mr. Ray Conway, Manager of the Oregon Motor Association.

This concluded the conference, following which, at 8:00 o'clock p.m., the Commission met with members of the Portland City Council and the Portland City Planning Commission in the city council chambers for a discussion of matters pertaining to the proposed Front Street arterial highway in Portland. All members of the State Highway Commission were present at such meeting, as were also the State Highway Engineer, the Attorney, and the Secretary. The City Council was represented by Mayor Jos. K. Carson, Jr., and City Commissioners R. Earl Riley and William A. Bowes, and Ben Morrow, City Engineer.

NOV 1 1939

The City Planning Commission was represented by Harry D. Freeman, Planning Engineer. Mayor Carson presided.

The Front Street project was discussed at considerable length from the standpoint of need, engineering, and finance, and with particular reference to acquisition of right of way, but no definite decision was reached with respect to any of the points. The State Highway Engineer presented plans for the ultimate improvement and explained them briefly. He also advised the estimated cost of the project. Mr. Freeman made certain suggestions with respect to the improvement somewhat at variance with the plans as outlined by the State Highway Engineer. The conference was adjourned at 10:30 o'clock p.m. with the understanding that the State Highway Engineer would consult with the City Engineer and the Planning Engineer of the City Planning Commission relative to differences in engineering features, and with the further understanding that additional studies would be made and report rendered to the Highway Commission. The Highway Commission will then decide the maximum amount that the state can offer in financing the project and will transmit such information to the City Council, which will then ascertain the desires of the citizens of Portland with respect to the proposed improvement.

Harmon
State Highway Engineer

W. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

E. B. Aldrich
Commissioner

Huron W. Clough
Commissioner

Portland, Oregon, November 2, 1939

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner E. B. Aldrich was absent on account of illness.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p.m. in the same room:

NOV 2 1939

OLD OREGON TRAIL
MUDDY CREEK-HAINES SECTION
GRADING, SURFACING, OILING; ALSO FURNISH CRUSHED ROCK

+ The County Court of Tillamook County, represented by Commissioners E. H. Lindsey and E. G. Anderson, was present and inquired as to the plans of the Commission for further improvements on the Wilson River Highway and on the Nehalem Mountain Highway (Oregon Coast Highway). They particularly inquired as to when the Commission proposes to take bids for the construction of the Devils Fork Bridge, on the Wilson River Highway, near the summit of the Coast Range Mountains, and when the Commission proposes to build the log bridge on this highway at the third crossing of the Wilson River, east of Tillamook. They were informed that the Commission plans to take bids for the Devils Fork Bridge at its meeting in February, 1940, and that the materials for the log bridge at the third crossing of the Wilson River are now being assembled on the ground and it is expected that actual construction of the bridge will start shortly.

The County Court also asked for the construction of a footpath along the Nehalem-Manzanita Road, east of the Manzanita school, for the benefit of school children. They advised that the present road contains a number of sharp curves and deep cuts and that the road is too narrow to permit its use by pedestrians, with safety. In this connection, the Secretary presented a communication from the clerk of the Manzanita School District urging construction of such sidewalk. The Commission advised that it has many requests for improvements of this kind and considers that this project does not have priority over the others unless a particularly dangerous situation exists; further, that an investigation will be made and a decision rendered as soon as possible. The Engineer was thereupon instructed to conduct such investigation and to report informally thereon as to how much it will cost to do the work and how much traffic the road carries.

The County Court also inquired as to the possibility of securing additional federal aid secondary money for the oiling of county roads in Tillamook County. Chairman Cabell advised that the federal appropriation for 1940 and 1941 has been considerably reduced, and, according to federal requirements, first consideration for the allocation of such funds must be given to the counties that have not yet received benefits from funds of this class, so it does not appear possible at this time to allocate additional amounts to Tillamook County. However, the Commission will be pleased to keep in mind Tillamook County's roads in the allocation of funds as they become available.

Commissioner Anderson asked for the widening of a bridge on the Oregon Coast Highway at the town of Beaver. He said that many accidents occur at this point because of the narrowness of the present bridge and the fact that it is located on a sharp curve. It was his thought that the widening of the bridge about 15 feet would remedy the situation. The matter was referred by the Commission to the Engineer for investigation and report.

The Secretary presented a resolution from the Common Council of the City of Salem requesting the widening of State Street, Salem, between 12th Street and the east city limits. The Commission denied the request, there being no funds available to finance the improvement.

A resolution was presented from Vale Grange No. 696, Malheur County, requesting improvements to the Vale West Secondary State Highway (Graham Boulevard), particularly the elimination of dangerous curves at the hill approaching the west bench, 2 miles northwest of a place known as Hope, and at the hill west of the John Faw farm on the east bench. The Commission denied the request because of lack of funds to finance the work, but agreed to bear the project in mind in the formulation of future highway programs.

A letter was presented from Mr. W. W. Evans, Halfway, Oregon, urging additional improvements on the Baker-Homestead Highway, particularly the reconstruction of the Dry Gulch Section and the Ruckles Creek Section. The Engineer pointed out that the Commission has already budgeted funds for the resurfacing and oiling of the Dry Gulch Section, estimated to cost \$30,000, and that it is proposed to contract this work either in the fall of 1939 or the spring of 1940, but no provision has been made for the improvement of the Ruckles Creek Section. The Secretary was instructed to so inform Mr. Evans and to advise him further that, while the Commission is unable to finance the Ruckles Creek Section now, it will keep the project in mind for future consideration.

The Engineer reported on the request of the City of Wheeler for the graveling and oiling of the unimproved strips adjacent to the highway pavement through the town of Wheeler, particularly along the section where concrete sidewalks are to be constructed in the near future. The Engineer estimated that this work would cost approximately \$300. He pointed out that the oiling work could not be done until next spring when weather conditions are suitable. The Commission deferred a definite decision on the matter until next year's budget is arranged. The Secretary was instructed to so inform the City.

A petition signed by numerous residents of the town of Powers and vicinity, requesting the oiling of the Powers Secondary Highway, in Coos County, from Hoffman Bridge to Powers, had the attention of the Commission. In the discussion of this matter it was brought out that there are many highways throughout the state where conditions similar to those on the Powers road obtain; in fact, many of them need improvement more than the road to Powers; but the Commission does not have funds available to finance the work simultaneously. The Secretary was instructed to bring this to the attention of the petitioners and to inform them that the Commission plans to oil these roads as quickly as it can, in the order of priority.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with the same persons present and participating.

A delegation representing the Amity and Dayton Chambers of Commerce, and other organizations, came before the Commission in the interests of the Amity-Dayton Secondary State Highway. The delegation was headed by Mr. Carl Francis, attorney, Dayton, and included the following: Verle E. Cochran, Gus Abraham, Al Nubey, Glen Watts, Burt Humberger, Phil Meeker, and John Snodgrass, all of Amity; Harry Sherman, Al Wakefield and Clair Heider, of Dayton; J. R. Harland and W. W. Rowell, of Rickreall; P. W. Zumwalt, of Perrydale; F. E. Chambers, of Monmouth; County Judge Wm. O. Powell and County Commissioners Thos. Bockes and Harry F. Williams, of Yamhill County, and others.

Mr. Francis presented oral arguments for the widening, resurfacing and developing of this road, and in support thereof filed a brief giving five reasons, as follows, why they are asking this improvement: (1) The Dayton-Amity shortcut route represents a substantial saving in mileage from points south and west of Amity to Portland; (2) This road will eliminate considerable traffic congestion in the city of McMinnville; (3) Improvement will eliminate traffic hazards in the present road, particularly at the Dayton Junction and at one extremely bad curve in the present route; (4) The improvement is needed on account of the volume of traffic that has to be cared for and which will be augmented by reason of the Farm Security Administration's farm labor camp located adjacent to this road; (5) Investments already made by the state on this road will be greatly enhanced by the improvement of the uncompleted section.

County Judge Wm. O. Powell, of Yamhill County, endorsed Mr. Francis' remarks. He particularly urged the improvement from the standpoint of traffic, which, he said, is increasing on this road considerably. He advised that the Yamhill County Court is in favor of the project, and, if the Commission so desires, will present a resolution to that effect.

Mr. F. E. Chambers, representing the Monmouth Chamber of Commerce, urged the improvement from the standpoint of saving in time. Mr. Francis read aloud a letter from the Corvallis Chamber of Commerce requesting favorable consideration for the improvement of this road. Mr. W. W. Rowell, representing the Rickreall Chamber of Commerce, also urged the improvement from the time-saving standpoint, particularly with reference to the transportation of stock to the Portland market.

Mr. Verle E. Cochran and Mr. Phil Meeker, both of Amity, urged the improvement on behalf of truckers, as did also Mr. P. W. Zumwalt, of Perrydale. Mr. Francis advised that there are other organizations in favor of the improvement, which were to be represented at this hearing, but evidently they misunderstood the time of the meeting. He agreed to furnish letters of endorsement from each, particularly the Farm Security Administration. He filed with the Commission a brief supporting their oral arguments in behalf of this project. In conclusion, Mr. Francis stated that the Dayton Chamber of Commerce is particularly appreciative of the work that has been done in their neighborhood by the State Highway Commission, and, as evidence of such appreciation, they would like to entertain the members of the Commission and its staff at a dinner when the project that is now under way in their vicinity is completed, or at any time that is convenient for the Commission. Responding thereto, Chairman Cabell advised that the Commission will be pleased to accept this invitation, if possible.

Mr. Andrew Koerner, attorney for Standard Stations, Inc., and Mr. R. C. Stivers, Development Specialist for such company, appeared before the Commission in regard to the company's service station that encroaches upon the Pacific Highway West (Denver Avenue) at its intersection with Union Avenue, north Portland. Mr. Koerner was spokesman. He advised that his company has received notification from the State Highway Commission to remove its building from the state highway right of way, and will do so if absolutely necessary, notwithstanding the fact that the move will cost \$3,000 or more, but naturally would prefer to continue the arrangements for use of the present location which it has occupied for the past 21 years under permit from Multnomah County.

Chairman Cabell advised that there are two reasons why the Highway Commission has asked the company to vacate the highway right of way. First, the Commission does not believe in encroachments upon the right of way of public thoroughfares and is endeavoring to clear the rights of way of such encroachments as rapidly as possible; and, second, there is a question of hazard, the Commission being of the belief that every encroachment has a tendency to increase the hazard for the general traveling public. Mr. Koerner argued that, in his estimation, the traffic hazard would be increased by simply moving the building back onto private property.

The State Highway Engineer pointed out that the Commission is taking bids at this meeting for the widening of Denver Avenue for four lanes of traffic, and gave as his thought that the building in its present location would be entirely too close to the traveled roadway when this work is done and would constitute a serious traffic hazard. Mr. Koerner admitted the logic of the Engineer's statement but asked that the company be not required to move its building until it has had an opportunity to make a series of traffic counts, which will have considerable bearing on whatever change the company undertakes. The matter was discussed at considerable length but no definite action was taken except that the Commission ordered further investigation of the matter and report by the Engineer at the December meeting of the Commission, such report to include full information in regard to traffic conditions, hazards, and possible safeguards such as traffic lights, safety islands, et cetera.

A delegation from Bandon, representing the Bandon City Council, and consisting of Mayor K. I. Franklin, John H. Faanacht, City Manager, and Dick Fiske, came before the Commission in regard to the construction of the Bandon Section of the Oregon Coast Highway. They reiterated previous arguments presented on behalf of this project and particularly advised that the development of Bandon is being held up because of failure of this project to go forward. They urged the Commission to at least render its decision on the proposed location of the highway through their town because the delay is having an unhealthy effect upon the morale of the residents, who are very much discouraged.

The Attorney advised that difficulties have been encountered in acquiring needed right of way and that, out of 13 options taken, only 3 have been completed and that it has been necessary to defer the negotiations for the remainder pending the results of court action that is now under way, involving tax settlements and the cancellation of tax liens. The Commission decided, in view of the circumstances, that its decision with respect to the construction of this project must wait for the court's decision on the tax lien matter. However, the Attorney was instructed to rush to completion the settlements for right of way if the court's decision is favorable, so the Commission can consider the project in the formulation of its construction program next spring.

Mr. Jack Godfrey, Portland, came before the Commission in regard to the Commission's forgery bond, which matter was previously presented by him at the meeting held on November 3, 1939. The Attorney advised that the Commission has legal authority to transfer the liability of the National Surety Corporation to the American Bonding Company if it so desires. The Commission thereupon decided, in view of the fact that the National Surety Corporation has requested relief from its obligation, to cancel the existing bond and to secure a new bond from the American Bonding Company, same to be dated November 2, 1939, and to run for a 3-year period. It was understood that credit would be given the state for the unearned portion of the premium on the old bond and that a rider would be attached to the new bond including the members of the State Highway Commission and the State Highway Engineer as parties assured.

Mr. Godfrey also offered to write a form of schedule bond covering employees by position rather than by name. This matter was referred to the Attorney for investigation and report at the next meeting.

At 3:30 o'clock p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having having been previously approved by the Commission by unanimous vote:

"Muddy Creek-Haines Section of the Old Oregon Trail, in Baker County. 4.46 miles grading, surfacing, and oiling; also furnish 2,000 cu. yds. crushed rock in stock piles. The low bidder for this project was E. C. Hall Company, Eugene, at \$96,433.00. The next low bid was that of McNutt Bros., Eugene, at \$98,339.50. There were 11 higher bidders. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Construct 180-foot concrete bridge and roadway approaches over Necanicum River at Black Bridge, about 8 miles south of Seaside, on the Oregon Coast Highway, in Clatsop County. The low bid submitted for this project was that of George F. Anderson, Astoria, in the amount of \$19,713.00. The next low bid was that of Birkemeier & Saremal, Portland, at \$21,032.50. There were 9 higher bidders. The Commission awards this contract to the low bidder, George F. Anderson, at his bid of \$19,713.00.

"Brothers-Harney County Line Section of the Central Oregon Highway, in Deschutes and Lake Counties. Furnish 20,000 cu. yds. of crushed rock in stock piles. Chester T. Lackey, of Ontario, submitted the low bid for this project, in the amount of \$31,000.00. W.B. Hewett Company, Spokane, Washington, submitted the next low bid in the amount of \$34,075.00. There were 12 higher bidders. The Commission awards this contract to Chester T. Lackey at his low bid of \$31,000.00.

"Reedsport Section (12th Street to 15th Street) of the Umpqua Highway, in Douglas County. 0.22 mile of paving. Harry I. Hamilton, Eugene, was the low bidder on this project at \$28,352.00. R. I. Stuart & Sons, Medford, submitted the next low bid in the amount of \$28,589.50. There were 2 higher bidders. The Commission rejects all bids received for this project and has ordered it readvertised.

"Klamath Agency-Modoc Point Section of The Dalles-California Highway, in Klamath County. 0.14 mile grading; 12.58 miles surfacing and oiling; also furnish 8,800 cu. yds. crushed rock in stock piles. The low bid received for this project was that of Rogers Construction Company, Dayton, Washington, in the amount of \$103,662.00. The next low bid was that of McNutt Bros., Eugene, at \$117,604.00. There were 8 higher bidders. The Commission awards this contract to the low bidders, Rogers Construction Company, at their bid of \$103,662.00.

"Waldport Rock Production Project on the Oregon Coast and Alsea Highways, in Lincoln County. Furnish 6,000 cu. yds. crushed rock in stock piles. Gus Reichow, Forest Grove, submitted the low bid of \$10,928.80 for this project. H. L. Rice, Portland, submitted the next low bid in the amount of \$10,870.00. There were 7 higher bidders. The Commission has awarded this contract to the low bidder, Gus Reichow, at his bid of \$10,328.80.

"Butteville Road-White School Section of the West Portland-Hubbard Highway, in Marion County. 4.05 miles paving. The low bid received for this project was that of Roy L. Houck, Salem, in the amount of \$116,065.00. The next low bid was that of Frank Penepacker, Portland, in the amount of \$119,102.00. There were 5 higher bidders. The Commission awards this contract to the low bidder, Roy L. Houck, at his bid of \$116,065.00.

"Multnomah Falls-Oneonta Section of the Columbia River Highway, in Multnomah County. 1.97 miles rock embankment construction. G.D.

Lyon & Company, Spokane, Washington, submitted the low bid on this project in the amount of \$165,025.00. K. L. Goulter, Seattle, Washington, submitted the next low bid in the amount of \$172,825.00. There were 13 higher bidders. The Commission awards this contract to the low bidders, G. D. Lyon & Company, at their bid of \$165,025.00.

"Elgin-Rock Creek and Union-North Powder Rock Production Project, in Union and Wallawa Counties. Furnish 14,300 cu. yds. crushed rock in stock piles. F. R. Hewett, Spokane, Washington, submitted the low bid, in the amount of \$24,602.00, for this project. Clifton & Applegate, Spokane, Washington, submitted the next low bid in the amount of \$27,761.20. There were 2 higher bidders. This contract is awarded to F. R. Hewett, the low bidder, at his bid of \$24,602.00."

The County Court of Josephine County, consisting of County Judge W. A. Johnson and County Commissioners John Valen and Richard McElligott; and County Engineer H. B. Brown, came before the Commission in regard to the construction of the bridge over the East Fork of the Illinois River, on the Illinois Valley County Road. They advised that the county is unable to finance this bridge construction with county funds and unless funds are provided from some other source the road will have to be closed for traffic this winter. The Engineer advised that the Commission took bids for this project on June 22, 1939, and expected to finance the work with federal aid secondary highway funds, but as yet has been unable to secure the approval of the federal authorities. The contract cannot be awarded, he added, until such government approval has been obtained. He gave as his thought that the project is a meritorious one and advised that it is his intention to recommend this road to the Commission for designation as a federal aid secondary highway when that matter is discussed.

In view of the circumstances surrounding this project and the apparent need for the immediate construction of the bridge, the Commission decided that a special appeal shall be made to the Public Roads Administration for the approval of the same. The Engineer was thereupon instructed to direct a letter to Mr. W. H. Lynch, District Engineer, Public Roads Administration, urging early and favorable consideration.

Mr. George R. Van Vleet, Jewell, Oregon, was present and requested authority to truck logs 56 feet long over state highways. He said that he knew that the law limited to 50 feet the overall length of anything that could be transported over the public roads of this state, but he gets many orders for logs of greater length which he would like to fill, and, besides, it is much more economical to haul the long logs than the shorter ones, hence his request. The Commission advised that it does not have authority to grant permits for such movements except in cases where they are in isolated districts or an emergency exists, and it appears that the instant case does not meet the requirements. Furthermore, the Commission understands that the 1939 Legislature, by its refusal to pass a certain bill that would have increased the length of loads that could be hauled over the highways of this state, indicated that it did not want loads longer than 50 feet hauled on the public roads. In view thereof, the Commission denied Mr. Van Vleet's request; however,

decided to make a clear distinction between a log and a piling for use in connection with consideration of requests for permits that are received hereafter. This matter is to be reconsidered at the next regular meeting of the Commission. The Commission indicated that all permits for the transportation of logs involving loads longer than the law allows would be ordered cancelled and that the issuance of such permits shall be limited to poles and piling only.

A delegation representing the Southeast Portland Chamber of Commerce came before the Commission in the interest of the 82nd Street Highway (Cascade Secondary Highway). The delegation consisted of Mr. L. A. Mathiesen, Secretary; Wallace Telford, Chairman of the Clackamas County Planning Board; D. R. Holman, Charles H. Johns, S. C. Williams, and T. A. Roots. They urged the construction of the uncompleted section of this road between Portland and Oregon City, and particularly the elimination of the existing railroad grade crossing near Clackamas. They advised that they have no preference as to routes but are perfectly willing to leave the selection of same with the State Highway Commission and its engineers. Speaking on behalf of the improvement were Messrs. Mathiesen, Telford, and Holman.

They were informed that the Commission proposes to eliminate the existing railroad grade crossing north of Clackamas by the construction of an overhead structure to be financed with federal grade crossing elimination funds; also, that the program for such funds has already been arranged and sent to the Federal Government for approval and it is expected that the contract will be awarded some time next spring or summer; but, on account of lack of funds, the Commission has made no provision for additional improvements on this road.

Mr. Holman requested permission to erect a sign at the junction of the 82nd Street Highway and the Pacific Highway East at the Gladstone connection, directing northbound tourists to the Columbia River Highway via 82nd Street. The Commission denied the request because of the confusion that would develop were the Commission to grant all of the requests that it receives for similar privileges and it being considered inadvisable to grant one such request without granting all.

Mr. James O. Convill, City Manager of Astoria, was present in the interests of the proposed Astor Street improvement of the Oregon Coast Highway in Astoria. He urged the Commission to make provision in its 1940 budget for the construction of this project. The Engineer advised that this project is estimated to cost about \$50,000 and that, in his estimation, the right of way matter should be clarified before any definite allocation of funds is made. The Commission concurred. Mr. Convill advised that the city is having difficulties in securing the removal of the buildings. The Attorney was instructed to assist the city in this matter and to send a representative to Astoria next week to work with Mr. Convill.

Mr. Convill then asked the Commission for the loan of the services of its Landscape Engineer, Mr. George Otten, to assist the city in laying out a landscaping project in its city park, which consists of 100 acres of land and lies adjacent to the state highway near the south city limits. He said

that they would appreciate very much the benefit of Mr. Otten's advice on this matter. The Commission approved the request.

Messrs. E. C. Willard, Consulting Engineer, Portland, and H. D. Freeman, Planning Engineer, City Planning Board, Portland, came before the Commission in regard to the request of Mr. John Jordan, Portland, for a change in the zone classification of his property situate adjacent to McLoughlin Boulevard in Riverside Homestead Addition, Portland. They advised that Mr. Jordan's property, which is described as a part of Lot 7, is now in Zone 1 Special, which permits single family residences or duplex houses, but Mr. Jordan wants the classification changed to Zone 3 so as to allow the construction of a service station thereon. Further, that the City Planning Commission objects to the change because it wants to preserve the freeway characteristics of this thoroughfare, which they believe is in line with the ideas of the State Highway Commission. They pointed out that the state now owns the land adjoining Mr. Jordan's property on the south, which property has been landscaped, and suggested that the solution of the problem might be the acquisition of Mr. Jordan's tract by the state. The Attorney advised that the state paid 10 cents per square foot for other land in this vicinity. After discussion the Commission authorized the Attorney to offer Mr. Jordan 10 cents per square foot for his land.

In this connection, the Secretary presented a letter from Ivan Humason, real estate dealer, Portland, offering to purchase, on behalf of the Southern Pacific Railroad Company, the state-owned property lying just south of the Jordan tract, which property, he said, the company proposes to lease along with other railroad property to a restaurant man who wishes to conduct a restaurant business thereon. The Secretary was instructed to inform Mr. Humason that this property is not for sale.

Mr. Frank McKennon, of the State Department of Agriculture, came before the Commission in regard to the temporary parking of trucks on the right of way of The Dalles-California Highway, a short distance south of Klamath Falls, in connection with the inspection of potatoes which is conducted at that place. He explained that the Department of Agriculture has rented a building adjacent to the highway for use in connection with potato inspection and it so happens that this building is situate so close to the highway right of way line that trucks cannot park in front of the building without encroaching on the highway some 5 or 6 feet. He gave as his understanding that the Highway Commission does not permit such encroachments but urged special consideration in this particular instance because the potato inspection work is now under way and no other buildings are available for their use in this vicinity. He further stated that, if the Commission would permit such encroachment now, the Department of Agriculture will secure other quarters next year in order to avoid a repetition of the occurrence. After considerable discussion, in which the policy of the Commission was explained to Mr. McKennon, the Commission granted the request subject to the condition that the Department of Agriculture find other quarters prior to the starting of next year's inspection work. The Commission ordered the matter covered by appropriate letter.

The County Court of Deschutes County, represented by County Commis-

sioners Wm. Baer and E. E. Varco, conferred with the Commission relative to the improvement of the Butler Market Road. They presented a letter directed to the Secretary of State, signed by all three members of the Deschutes County Court, in which the Secretary of State was authorized to transfer to the State Highway fund \$5,000 of Deschutes County's share of the Motor Vehicle and Gasoline Tax Fund that is to be distributed to the several counties on December 15, 1939, as the county's contribution toward the cost of oiling the Butler Market Road. The Commission accepted the letter and instructed the Secretary to forward it to the Secretary of State.

Commissioner Baer then inquired as to the status of this project and was informed that it is a priority project for federal aid secondary highway funds and that the Commission hopes to place it under contract either this winter or in the spring.

Commissioner Baer also asked for the improvement of The Dalles-California Highway between Bend and Port Klamath, particularly urging such improvement from the accident-prevention standpoint. He gave as his thought that the highway should be widened and excessive crown in the pavement removed. The Commission took the matter under advisement.

Commissioner Baer inquired as to whether or not the State Highway Department could make use of rock that will be available from the excavation for the basement of the new Deschutes County courthouse in Bend. He advised that a large quantity of rock will have to be taken from this excavation and that the county will be glad to haul it to any point on state highways nearby if the state wants it. The Commission accepted the offer and instructed the Engineer to select a suitable place for the depositing of this material.

County Commissioner Baer brought up for discussion the matter of improving the sight distance at a "blind curve" located on the McKenzie-Bend Highway about one-quarter mile east of its junction with the old state highway that extends from Redmond to Bend. He said that a hazardous condition exists at this location, where the state maintains a large stock pile site which obstructs the view, and the County Court would like to have the situation improved for the benefit of traffic. The Engineer was instructed to investigate the conditions and report his findings along with an estimate of cost to do the work.

Mr. A. H. Edlefsen, Portland, appeared before the Commission in regard to right of way for the proposed improvement of the Oregon Coast Highway between Marshfield and Coquille and particularly the section immediately adjacent to the section that is now under construction at Bunker Hill. Mr. Edlefsen outlined plans that have been formulated for the improvement of private property at this location and urged the Commission to acquire the right of way for the highway improvement now so full consideration may be given thereto in the development of their plans for the use of such private property. The Commission took the matter under advisement and informed Mr. Edlefsen that the matter will be investigated and that he will be advised within a couple of days as to what the Commission could offer him for his land. (This matter was reconsidered by the Commission on the following day, at

which time the Commission authorized the Attorney to offer Mr. Edlefsen \$100 per acre for right of way across his property.)

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Salmon River Highway timber strip:- The Parks Superintendent advised that this timber strip lies on the north side of the highway east of the place known as Deer Creek Park, about 8 miles east of Otis, and is a part of the tract for which the Commission carried on negotiations with the Miami Corporation some time previously. He advised that he is in receipt of a letter from the Miami Corporation offering to sell this property now on the basis of 10 per cent cash and the balance payable in equal payments, without interest, in 1940, 1941, and 1942. He questioned the advisability of doing this because it would mean the doubling up of payments for Salmon River Highway timber strips, and for the further reason that a bill is now pending in Congress which provides federal funds to finance the acquisition of such timber strips adjacent to main highways. The Commission concurred in the viewpoint of the Parks Superintendent and instructed him to confer with Mr. L. H. Mills, representative of the Miami Corporation, regarding the matter and to secure from Mr. Mills, if possible, a letter to the effect that the Miami Corporation will not sell this timber for a year or so, and, in any event, will give the State of Oregon the first chance to purchase this property on the basis of his offer.

Churchill wayside timber strip along the Salmon River Highway:- The Parks Superintendent advised that Mr. N. D. Churchill, Portland, owns a 40-acre timber tract adjacent to the Salmon River Highway near the Tillamook County line, described as the northeast quarter of the southwest quarter of section 12, township 6 south, range 9 west, W. M., and that the timber on this tract north of the highway has been cut, but there remains a 300-foot strip of standing timber along the south side of the highway, which, in his estimation, should be preserved. He recommended purchase of this 40-acre tract, including the timber which is owned by a Mr. Ross, and suggested that the Right of Way Department be authorized to secure options for the same. The Commission approved the recommendation unanimously.

Furnishing of electrical energy for use in the Vista House, at Crown Point:- The Parks Superintendent advised that the agreement with Edward L. Dimmitt, concessionaire at Crown Point, provides that Mr. Dimmitt shall pay for the electrical energy that he uses. However, it appears that a reduction in rate can be secured if the Highway Commission will authorize the power company to deliver electricity at this place in the name of the state. He inquired whether or not the Commission would care to enter into an agreement with Mr. Dimmitt and the power company to secure this discount. The Commission decided not to enter into any such agreement, particularly in view of the fact that the state would not benefit by reason of the discount and would be assuming a responsibility that would not conform with the Commission's established policy with respect to such matters.

Acquisition of 40-acre tract near the Oregon Coast Highway south of

Newport:- The Parks Superintendent advised that the Highway Commission owns 8 parks near Newport which contain no timber of any kind for use as camp fuel, etc., but the Lincoln County Court has graciously offered to deed to the state without charge a 40-acre tract located near the highway about 1 mile south of Yaquina Bay, which will supply fuel for these parks for a long time to come. The Commission accepted the gift and ordered that an appropriate letter of thanks be directed to the County Court.

Addition to Ecola State Park, in Clatsop County:- The Parks Superintendent advised that the Crown Zellerbach Corporation owns considerable property fronting on the ocean north of Ecola Park and has made inquiry as to whether or not the state would be interested in purchasing this tract as an addition to the present park at this location. He further advised that the company is asking \$17,500 for this land, and pointed out that the Clatsop County Court is now working on a proposition for an exchange of county holdings for the same. He recommended that the corporation's offer be declined. The Commission approved the recommendation.

Saddle Mountain Game Reserve:- The Parks Superintendent advised that the Crown Willamette Paper Company owns considerable land surrounding Saddle Mountain State Park, in Clatsop County, which it is particularly desirous of placing in a game reserve so as to protect the elk which abound there, and the company wants the Highway Commission to join with it in asking the Game Commission to establish such reservation. He suggested that this would be a fine thing to do as it would not only protect the elk in the company's holdings but would also protect the many elk in the state park. The Commission approved the suggestion with the understanding that the reservation would include only a reasonable area outside of the state park boundaries rather than the entire holdings of the Crown Willamette Paper Company. The State Parks Superintendent was authorized to contact the Game Commission on such basis.

Natal Grange park site adjacent to the Nehalem Highway, in Columbia County:- The Secretary presented a letter from the Columbia County Land Utilization Committee recommending the establishment of a state park at this location. The State Parks Superintendent reported that acquisition of this property is still under negotiation by Mrs. Pearl Becker, Secretary of the Columbia County Pomona Grange, on the basis of payment of \$3,000 for the timber, for which the owners of the property, the Clark Wilson Lumber Company, are demanding \$6,000. The Commission took no action on this matter.

Proposed park site at Croft Lake, south of Bandon, Coos County:- The Secretary presented a petition from Westmost Grange No. 884, Bandon, urging the establishment of a state park at this location. The Parks Superintendent advised that he has under contemplation the acquisition of a park site at Floras Lake which also lies adjacent to the Oregon Coast Highway, near the site recommended by the Grange. It was his thought that the Floras Lake site is more suitable for state park purposes than the site at Croft Lake but said he would not be in a position to make a definite report to the Commission until he has looked into the matter further. The Commission deferred action on the Grange's request until the State Parks Superintendent's final report has been rendered.

Improvements to state park at Waldport:- The Secretary presented a letter from the Waldport Chamber of Commerce urging an allocation of funds for the development of the state park adjacent to the Oregon Coast Highway at Waldport. The Parks Superintendent estimated that to finance the improvements requested by the Chamber of Commerce would cost approximately \$20,000, which, in his estimation, is entirely too much to spend for the improvement of this area, which, he said, is merely a narrow strip along the highway. In view of the report, the Commission denied the request; however, instructed the Engineer to bear this project in mind as a possible one for the federal aid landscaping program some time in the future. It was understood, however, that any landscaping work that is done here should be confined to property adjacent to the highway right of way and should not extend to the beach.

Proposed park site at Little Jack Falls, Columbia County:- The Parks Superintendent reported on the recommendation of Mr. John Plebuch, Willamina, Oregon, that a state park be established adjacent to the Lower Columbia River Highway at a place known as Little Jack Falls. He said that it will cost a large sum of money to acquire and improve this area for state park purposes, and, in his estimation, the expense is not justified in view of the fact that the present highway at this location is not on permanent alignment and, when relocated, will probably be a considerable distance from the present highway and at a much lower elevation. He suggested, however, that when the proposed revision is constructed, provision be made for the use of the old road by people who desire to obtain the scenic view from this advantageous point, which would necessitate, he explained, the widening of the right of way somewhat for the parking of automobiles. In view of the report, the Commission decided not to establish a state park at this point but instructed the Engineer to keep in mind the Park Superintendent's suggestion relative to the retention of the old road for sight-seeing purposes when the proposed revision is completed.

Proposed state park on the north side of the Willamette River, near Wilsonville:- The Parks Superintendent recommended acquisition of suitable acreage at this location where it is proposed to construct a bridge across the Willamette River on the West Portland-Hubbard Highway, not only for park purposes but also as a protection for the proposed bridgehead. The Commission concurred in the viewpoint of the Parks Superintendent and instructed him to ascertain just how much land is needed. The Attorney was authorized to negotiate for the acquisition of such land and to secure options for the same.

State cooperation in establishment of central design office in Portland for State Park C.C.C. camps:- The Parks Superintendent advised that the National Parks Service has in mind the establishment of a central design office in Portland to serve Oregon, Washington, and Idaho, but definite arrangements for the same are contingent upon the State of Oregon contributing the sum of \$50 per month toward the rental of the offices, such sum being Oregon's share on the basis of pro rating the entire cost according to the number of C.C.C. camps in each of the three states. It was his thought that the maintenance of such central office in Oregon would be of considerable advantage to this state and he recommended approval of the expenditure. The State Highway Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

Furniture for recreational building at Silver Creek Falls State Park:- The State Parks Superintendent requested authority to spend approximately \$300 for construction of myrtlewood furniture, including tables, benches, et cetera, for use in this park. He explained that under the original setup it was planned to construct such furniture of fir, but there has been given to him without cost a considerable amount of myrtlewood timber which he would like to substitute, notwithstanding that to make it up into furniture would cost the state slightly more than to build the furniture of fir. He estimated the total cost of making the furniture at \$1,026.00, of which amount the state's share would be approximately \$300, the balance to be paid with W.P.A. funds. After discussion, the Commission voted unanimously to approve such project, based on the use of myrtlewood. The State Highway Engineer was thereupon authorized to sign the W.P.A. agreement relative thereto.

Proposed state park at Cascadia:- The Assistant Attorney reported on his study of the proposed acquisition of the Giesendorfer property at Cascadia, which has been offered and recommended to the Commission for state park purposes. He estimated the value of this property, exclusive of the soda springs and the hotel, but including some 228 acres of land and 4 M-FEM of timber, at \$17,375.00. He also advised that Mr. Giesendorfer is demanding the sum of \$25,000.00 for the property and that there is a mortgage of \$14,000 against it. He pointed out that an organization of Baptist Church people now maintains a building on the premises and that the same fronts on the Santiam River, which they use for baptismal purposes. He questioned the desirability of acquiring the Giesendorfer property unless some provision is made for removal of the church facilities. The State Parks Superintendent recommended acquisition of the area from Mr. Giesendorfer if it can be obtained for a reasonable amount and if the facilities of the Baptist Church can be eliminated. He declared this to be the finest site for a state park in Linn County. After considerable discussion, the Commission authorized and instructed the Attorney to negotiate with Rev. I. A. Fox, Salem, who represents the Baptist Church in connection with its activities at this point, relative to the vacation of the area that they are now using.

Proposed park budget for 1940:- The State Highway Engineer brought up for discussion the matter of increasing the state parks budget for the year 1940. He advised that the State Parks Superintendent feels that \$100,000 is insufficient to properly carry on the functions of his department, and has requested an increase to \$150,000. Action on this matter was deferred by the Commission until the next meeting, when the State Parks Superintendent is to present a budget itemizing the essentials for carrying on his work, including continuing obligations.

The Commission adjourned at 6:00 o'clock p. m., to reconvene at 9:00 o'clock on the following morning in the same room.

W. H. H. H.
State Highway Engineer

W. H. H. H.
Secretary

Henry F. Cabell
Chairman

John M. H. H.
Commissioner

NOV 2 1939

Portland, Oregon, November 3, 1939

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 Haron W. Clough, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p.m. in the same room:

MT. HOOD AND WAPINITIA HIGHWAYS
 MT. HOOD ROCK PRODUCTION PROJECT

E. C. Hall Company	\$27,394.00
Washington Hauling Company	28,812.00
H. L. Rice	29,744.00
R. O. Dail & Warren Bros.	30,387.00
A. S. Wallace	31,187.00
Saxton, Looney, & Risley	33,364.00
O. C. Yocom	35,396.00
Fisher Bros.	38,429.00
Newport Construction Company	38,914.00

OREGON COAST HIGHWAY
 SEASIDE-MECANICUM SUMMIT ROCK PRODUCTION PROJECT

Babler Bros.	\$ 9,270.00
Gus Reichow	9,450.00
Saxton, Looney, & Risley	9,909.00
A. S. Wallace	9,930.00
Tidepoint Company	10,620.00
O. C. Yocom	11,540.00
E. F. Altree	11,800.00
Dolan Construction Company	11,910.00
R. O. Dail & Warren Bros.	13,480.00

PENDLETON-JOHN DAY HIGHWAY and BEECH CREEK HIGHWAY
 MOUNTAIN REST-MT. VERNON ROCK PRODUCTION PROJECT

F. R. Hewett	\$10,370.00
A. S. Wallace	10,485.00
McNutt Bros.	14,400.00
Schmeer & Williams Bros.	14,860.00

GREEN SPRINGS HIGHWAY
SISKIYOU JUNCTION-KLAMATH COUNTY LINE ROCK PRODUCTION

R. I. Stuart & Sons	\$ 15,720.00
Saxton, Looney, & Risley	15,975.00
A. S. Wallace	17,100.00

PACIFIC HIGHWAY
WEST UNIT, GRANTS PASS-GREEN CREEK SECTION - GRADING AND PAVING

Parker-Schram Company	23,363.55

The Commission considered and by unanimous vote approved the minutes of the meetings held on June 21 and 22, July 18, July 26 and 27, and August 17 and 18, 1939.

The Commission discussed briefly matters pertaining to the bids received by the State Board of Control for the furnishing of gasoline and oil products for the year 1940 but deferred a decision thereon pending consultation with Mr. Dan Fry, Secretary of the Board of Control. The Engineer was instructed to ask Mr. Fry to be present during the afternoon session. (Mr. Fry conferred with the Commission in regard to this subject at 3:30 o'clock p. m.)

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties and prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the

owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission had under consideration the question of whether or not the amounts of offers in condemnation cases should be approved by the

NOV 3 1939

Commission before the offers are made; also, the question of whether or not the approved offers should be recorded in the minute book. It was the decision of the Commission that, in so far as possible, no offer in such cases shall be made until the Commission has approved the same, and that the Secretary should make a minute entry of all such approved offers.

The Commission discussed the offer of Mr. A. H. Edlefsen to sell to the Commission right of way needed for the improvement of the Oregon Coast Highway across his property between Marshfield and Coquille. The Attorney advised that Mr. Edlefsen's property consists largely of swamp land with no timber thereon. Further, that, in his estimation, Mr. Edlefsen would not be entitled to damages on account of severances. He valued the Edlefsen property at \$100 per acre and recommended purchase of the right of way at such rate. The Commission approved the recommendation unanimously.

The Attorney reported difficulties in acquiring certain parcels of real property that are needed for various highway improvements and requested authority to acquire such properties by condemnation. He submitted a list of such properties, together with the appraised value of each as determined by the Right of Way Department. After careful consideration, the Commission approved the following offers for such properties:

Transaction No.	Section	Owner	Approved Offer
<u>Needed for Gravel Pit</u>			
R7135	Tigard Sec	A. P. Ploeger and Zelda Ploeger	\$1,000
<u>Needed for Right of Way</u>			
R7203	Grants Pass-Green Creek	Jean Higgins	4,500
R7506	Scotts Butte-Jordan Valley	Hazel Breshears)	To clear up irrigation assessments
R7507	" " " "	Delos C. Foster)	
R7508	" " " "	William B. Packard)	
R7509	" " " "	Hazel Breshears)	
R7510	" " " "	Alfred C. Griffin)	
R3167	West Unit, Jordan Creek	Walter R. Bowden	\$240
R5642	Cottage Grove	Alvin C. Spriggs and J. H. Spriggs	200
R5697	" "	Frank Heck & Mary Heck	13,000
R5915-A	Salem-Pringle Creek	Albert L. Thomas and Ethel Thomas Allison	300

The Attorney was authorized and instructed to acquire such properties by condemnation in the event that the offers are rejected. The following resolutions in regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is

gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Northwest route of the Tigard Section of the Pacific Highway West
real property owned by or in possession of the following parties and/or persons, to wit:

R7135-Washington County - A. P. Ploeger and Zelda Ploeger

and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

NOV 3 1939

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Grants Pass-Green Creek Section of the Pacific Highway
 Scotts Butte-Jordan Valley Section of the I. O. N. Highway
 West Unit, Jordan Creek Section of the I. O. N. Highway
 Cottage Grove Section of the Pacific Highway
 Salem-Pringle Creek Section of the Pacific Highway East

real property owned by or in possession of the following parties and/or persons, to wit:

Grants Pass-Green Creek Section of the Pacific Highway
 R7203-Jean Higgins

(Continued on next page)

Scotts Butte-Jordan Valley Section of the I. O. N. Highway

R7506-Hazel Breshears
 R7507-Delos C. Foster
 R7508-William B. Packard
 R7509-Hazel Breshears
 R7510-Alfred C. Griffin

West Unit, Jordan Creek Section of the I. O. N. Highway

R3167-Walter R. Bowden

Cottage Grove Section of the Pacific Highway

R5642-Alvin C. Spriggs and J. H. Spriggs
 R5697-Frank Heck and Mary Heck

Salem-Pringle Creek Section of the Pacific Highway East

R5915A-Albert L. Thomas and Ethel Thomas Allen

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General for the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the

Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney brought up for discussion the offer of Mr. Nelson Hogan, Reedsport, relative to the remodeling of his garage building in Reedsport, necessitated by reason of the proposed improvement of the Umpqua Highway in that town. He advised that the Right of Way Department secured two bids for the remodeling of Mr. Hogan's building, one of which was in the amount of \$7,000 and the other in the amount of \$7,700; whereas the appraiser for the State Highway Department estimates that such remodeling work would cost approximately \$5,200, although it appears that several items were omitted at the time such estimate was made. He further advised that Mr. Hogan is particularly desirous of doing this remodeling work himself and will do the work at once for the sum of \$5,500 if that is agreeable to the Commission. The Commission considered the offer reasonable and desirable and thereupon voted unanimously to accept Mr. Hogan's offer.

The Assistant Attorney brought up for discussion the matter of acquiring a number of privately-owned lots on the Nehalem Sandspit, in Tillamook County. He advised that some of these owners do not reside in Oregon and have never seen their properties, which are desirable from the state's standpoint to fill out the state park at this location. He requested authority to secure the services of a commercial appraiser to set a value on the properties so he could advise the respective owners what the state is willing to pay for them. The Commission approved the request by unanimous vote subject to the condition that such expense do not exceed \$100.

The Commission discussed a letter and a telegram from the Redwood Empire Association requesting a revision in the Commission's plans for the reconstruction of the Pacific Highway between Grants Pass and Green Creek, in Josephine County, particularly the arrangements for the connection between this highway and the Redwood Highway. The matter was referred to the Engineer to work out.

The Attorney read to the Commission a letter over the signature of Paul Farrens, Attorney for the Mt. Hood Stages, in which letter Mr. Farrens reported that Timberline Lodge, Inc. has made demand on Mt. Hood Stages for a portion of its ton-mile tax due under the Motor Transportation Act, for use of the highway between Government Camp and Timberline Lodge. Mr. Farrens stated further that Timberline Lodge, Inc. claims that the U. S. Forest Service has assigned to Timberline Lodge its claim to the tax. The Attorney gave as his opinion that the highway in controversy is a public highway and therefore under the jurisdiction of the Commissioner of Public Utilities with respect to

the collection of the ton-mile tax. The Commission instructed the Attorney to bring the entire matter to the attention of the Public Utilities Commissioner to the end that funds be not diverted from the use to which they have been put heretofore.

The Commission had under discussion the adoption of a program for 1940 federal aid secondary highway funds, amounting to \$430,000. The Engineer submitted a list of desirable state secondary highway and county road projects that are eligible for such program, from which the Commission by unanimous vote selected the following as a partial program for such funds:

County	Project	Kind of Work	Estimated Cost
<u>PROJECTS ON STATE HIGHWAYS</u>			
<u>DIVISIONS 1 & 2</u>			
Columbia	Clatskanie-Mist	Surfacing & Oil	\$30,000
Marion	Woodburn-Molalla	Grade, Surf., & Oil	20,000
Washington	Campbells Bridge-Laurel Road	Grade, Surf., & Oil	25,000
			\$75,000
<u>DIVISION NO. 3</u>			
Jackson	Little Butte	Grade, Surf., & Oil	\$20,000
<u>DIVISION NO. 4</u>			
Crook	Warm Springs (Dry Creek-Prineville)	Grade & Surf.	\$20,000
Jefferson	Warm Springs (Lamonta-Pine Ridge School)	Grade & Surf.	20,000
			\$40,000
<u>DIVISION NO. 5</u>			
Gilliam	Wasco-Heppner (Lonerock Road-Sixmile Creek)	Grade, Surf. & Oil	\$15,000
Grant	Kimberly-East 3 mi.	Grade, Surf. & Oil	22,000
Harney	Frenchglen (Wrights Point)	Grading	15,000
Union	Catherine Creek Bridge		10,000
			\$62,000
<u>PROJECTS ON COUNTY ROADS</u>			
<u>DIVISIONS 1 & 2</u>			
Benton	Albany-North	Grade, Surf. & Oil	\$20,000
Clatsop	Ft. Stevens Road	Grade & Pave	20,000
Multnomah	To be selected	Grade, Surf., & Oil	53,000
			\$93,000
<u>DIVISION NO. 3</u>			
Lane	Veneta-Oak Hill (Route F)	Grade, Surf. & Oil	\$62,000
<u>DIVISION NO. 4</u>			
Deschutes	Butler Market Road	Grade, Surf. & Oil	\$25,000
Sherman	Wasco-Fulton Canyon	Grade & Surf.	12,000
			\$37,000
<u>DIVISION NO. 5</u>			
Wallowa	Enterprise-Joseph	Grade, Surf. & Oil	\$20,000
Wheeler	John Day Highway-Kinzua	Grade & Top	15,000
			\$35,000

(Partial program for federal aid secondary highway funds, continued:)

	<u>SUMMARY</u>	
	<u>Estimated Costs</u>	
	<u>Secondary Highways</u>	<u>County Roads</u>
Divisions 1 & 2	\$ 75,000	\$ 93,000
Division No. 3	20,000	62,000
Division No. 4	40,000	37,000
Division No. 5	62,000	35,000
	<u>\$197,000</u>	<u>\$227,000</u>
State-wide Planning Survey	<u>3,000</u>	<u>3,000</u>
	<u>\$200,000</u>	<u>\$230,000</u>

The Engineer was authorized and instructed to forward this program to Mr. W.H. Lynch, District Engineer, Public Roads Administration, for federal approval.

The Commission adjourned at 12:20 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the Engineer, the Attorney, and the Secretary present.

Mr. Ira Withrow, Grand Ronde, came before the Commission on behalf of the Miami Corporation, relative to timber strips adjacent to the Salmon River Highway which the Commission desires to acquire. Mr. Withrow stated that the corporation has a bona fide offer for the purchase of this timber and that the prospective buyer has plans to start cutting the timber about February, 1940. He inquired whether or not the Highway Commission is still interested in the acquisition of this tract. He was informed by Chairman Cabell that the Commission would like to purchase the tract if it can be acquired at reasonable cost but considers it best to defer further negotiations pending disposition of the bill now before Congress, which will allow the use of federal aid funds for purchases of this kind. He explained that if this bill becomes a law, then the Highway Commission will probably be justified in spending some state money along with the federal funds for the purchase of this tract; but there is a question whether or not state funds exclusively should be used in view of possibilities of criticism that might be aroused thereby. He inquired whether the Miami Corporation would consider the postponement of its final decision with respect to the sale of the timber to the private purchaser until about the first of June, 1940, when the outcome of this bill will be known. Mr. Withrow replied that he would do the best that he possibly could in that regard and promised the Commission that his company would not sell the property in any event without first coming before the Commission again to get its final decision.

Mr. Ray Conway, Manager of the Oregon State Motor Association, was present and discussed with the Commission matters pertaining to the Commission's advertising program. He presented arguments for concentrating the Commission's expenditures for advertising and publicity in the western states rather than for general advertising throughout the entire United States. The Commission thanked Mr. Conway for his presentation and advised him that the information given would be seriously considered.

Mr. A. R. Bowman, County Judge of Crook County, was present. He asked the Commission to increase the amount of its allocation for construction of the Warm Springs Highway north of Prineville because, he said, the work contemplated under the present setup will not be of much value until additional work has been done. He was informed by Chairman Cabell that, due to the limited amount of secondary highway money available, it does not appear possible to extend the work now contemplated, but the Commission will be pleased to look into the matter and will increase the allotment if it is possible to do so.

Mr. L. H. Bagley, representing the Richfield Oil Company, came before the Commission in regard to the pending contract with the state for furnishing gasoline, oil, et cetera, during 1940. He presented arguments on behalf of the award of this business to the Richfield Oil Company, and urged the Commission to recommend to the State Board of Control the acceptance of his company's offer, which, he declared, was the low one submitted. This matter was discussed at some length but decision was deferred pending a conference with Mr. Daniel Fry, State Purchasing Agent, later in the session.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Mt. Hood Rock Production Project on the Mt. Hood and Mapinitia Highways, in Clackamas and Wasco Counties. Furnish 15,900 cu. yds. crushed rock in stock piles. E. C. Hall Company, Eugene, submitted the low bid on this project, in the amount of \$27,394.00. Washington Hauling Company, Seattle, Washington, submitted the next low bid, in the sum of \$28,812.00. There were 7 higher bidders. This contract is awarded to E. C. Hall Company at their low bid of \$27,394.00.

"Seaside-Mecanicum Summit Rock Production Project, in Clatsop County. Furnish 6,000 cu. yds. crushed rock in stock piles. The low bid received for this project was that of Babler Bros., Portland, in the amount of \$9,270.00. The next low bid was that of Gus Reichow, Forest Grove, in the amount of \$9,450.00. There were 7 higher bidders. The Commission awards this contract to Babler Bros., at their low bid of \$9,270.00.

"Mountain Rest-Mt. Vernon Rock Production Project, on the Pendleton-John Day Highway and Beech Creek Highway, in Grant County. Furnish 5,700 cu. yds. crushed rock in stock piles. F. R. Hewett, Spokane, Washington, submitted the low bid on this project, in the amount of \$10,370.00. A. S. Wallace, Roseburg, submitted the next low bid in the amount of \$10,485.00. There were 2 higher bidders. The Commission rejects all bids received for this work and has ordered the project readvertised.

"Siskiyou Junction-Klamath County Line Rock Production Project, on the Green Springs Highway, in Jackson County. Furnish 7,600 cu.

yds. crushed rock in stock piles. The low bid received for this project was that of R. I. Stuart & Sons, Medford, in the amount of \$15,720.00. The next low bid was that of Saxton, Looney & Risley, Oak Grove, in the amount of \$15,975.00. The third low and only other bidder was A. S. Wallace of Roseburg, with his bid of \$17,100.00. All the bids received on this project have been rejected and the Commission has ordered the project readvertised.

"West Unit, Grants Pass-Green Creek Section of the Pacific Highway, in Josephine County. 2.71 miles grading and paving. Leonard & Slate, Multnomah, submitted the low bid for this project, in the amount of \$142,818.00. Berke Bros., Portland, submitted the next low bid, in the amount of \$149,704.00. There were 4 higher bidders. All bids for this project have been referred by the Commission to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Oregon Slough-Columbia Slough Section of the Pacific Highway West, in Multnomah County. 1.03 miles paving. Edlefsen-Weygandt Company, Portland, submitted the low bid, in the amount of \$18,885.70 for this project. Porter W. Yett, Portland, submitted the next low bid, in the amount of \$20,504.10. There were 2 higher bidders. This contract is awarded to Edlefsen-Weygandt Company, the low bidders, at their bid of \$18,885.70."

Chairman Cabell also made the following announcement: "In connection with the bids received for the Mt. Hood Rock Production Project, in Clackamas and Wasco Counties, a bid was received from R. O. Dail & Warren Bros., Inc., which would have been the fourth low bid on this project had the bid been regular. However, the contractor did not enter the unit price for one of the items, as is required, payments to the contractors in all cases being made upon the basis of the unit price bid for each item. In this particular instance the omission does not affect the award of the contract but it is being called to the contractors' attention at this time so that repetition of the mistake may be avoided in the future, inasmuch as the Commission might find it necessary some time to disqualify a low bid for this reason."

Mr. Daniel J. Fry, Secretary of the State Board of Control and State Purchasing Agent, came before the Commission at 3:15 o'clock p. m. in regard to the bids received by the Board of Control for the furnishing of gasoline and oil products to the state during the year 1940. He advised that a careful study of the bids received for this business reveals that of the Richfield Oil Company to be low, and, in his estimation, the Board of Control will have no alternative but to accept the bid of this company, and that will be his recommendation to the Board. After discussion, Mr. Fry was informed by the Commission that it approves the award of this contract to the Richfield Oil Company on the basis of its bid with the reduction subsequently authorized by telegram, and the Commission will so recommend to the Board of Control. The Engineer was thereupon authorized and instructed by the Commission to so advise the Board of Control, by letter, in accordance with the customary practice.

The Attorney brought up for discussion matters pertaining to the acquisition of right of way for the proposed railroad grade separation project in the town of Nyssa, Malheur County. This matter was discussed at considerable length but action thereon was deferred pending further study. The Attorney was instructed to negotiate with the Amalgamated Sugar Company and other owners relative thereto and to secure options, if possible, without definitely binding the Commission.

Reconsideration was given by the Commission to the recommendations presented by the Advisory Board on Publicity Matters for carrying on the activities of the Travel and Information Department during 1940. After discussion it was decided unanimously to adopt these recommendations and it was so ordered.

The Secretary presented a resolution from the County Court of Grant County, requesting the designation as a state secondary highway of the county road which extends from Monument to a connection with the Pendleton-John Day Highway at Long Creek, in Grant County. The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Grant County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Grant County be and the said market road, county road, highway, location or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Kimberly-Long Creek Secondary Highway No. 402:

Beginning at Monument in Grant County at the east end of the present designated Kimberly-Monument Secondary State

Highway No. 402; thence in an easterly direction through Hamilton to Long Creek on the Pendleton-John Day Highway, a distance of approximately 21.4 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; and amendments thereof.

The Engineer requested authority to purchase the following equipment:

- 1 3/8-yd. shovel for use on Wilson River W.P.A. project. Old shovel to be traded in as part purchase price - estimated cash outlay \$7,000
- 1 pump, 450 gal. per minute capacity, and 250 lineal feet of pipe, for use in connection with Wolf Creek Highway W.P.A. work - estimated total cost \$700
- 4 electric headlamp testers - estimated total cost \$720
- 4 tension wrenches for cylinder heads - estimated cost \$40
- 1 hydraulic brake drum gauge - cost \$90
- 1 bench grinder - cost \$30
- 2 cylinder boring bars - cost \$830
- 1 3-H.P., 220-volt, 60-cycle head electric motor and 1 reversing switch - estimated cost \$95
- 1 No. 5 Dumore highspeed tool post grinder - cost \$50
- 1 7-passenger 1939 automobile for use of the State Highway Commission - 1 Old 7-passenger Buick to be traded in as part purchase price thereon. Estimated cash outlay \$1,000
- 1 accounting machine - estimated cost \$1,100

After careful consideration the Commission approved the request by unanimous vote.

The Engineer reported that the bridges on the North Santiam Secondary Highway, which bridges have for some time past been posted for maximum loads of 10,000 pounds, have been repaired so that they will now carry legal weight loads. He recommended, in view thereof, the lifting of the reduced load limits. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 8th day of July, 1937, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following secondary state highway bridges, to wit:

(Listed on following page)

North Santiam Secondary Highway No. 162

<u>Bridge No.</u>	<u>Description</u>	<u>Total Gross weight</u>
162-30.10	1 - 13' timber span	6 tons
162-30.23	1 - 15' and 2 - 17' timber spans	6 "
162-30.70	1 - 15' timber span	6 "
162-31.33	3 - 16' timber spans	6 "
162-31.38	1 - 68' timber truss	6 "
162-31.71	3 - 11' timber spans	6 "
162-32.91	1 - 17' timber span	6 "

and

WHEREAS, subsequent to the passage of said resolution the said above named bridges have been repaired so that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolution;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridges, to wit:

North Santiam Secondary Highway No. 162

<u>Bridge No.</u>	<u>Description</u>	<u>Total Gross weight</u>
162-30.10	1 - 13' timber span	6 tons
162-30.23	1 - 15' and 2 - 17' timber spans	6 "
162-30.70	1 - 15' timber span	6 "
162-31.33	3 - 16' timber spans	6 "
162-31.38	1 - 68' timber truss	6 "
162-31.71	3 - 11' timber spans	6 "
162-32.91	1 - 17' timber span	6 "

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridges shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished the County Clerk of Marion County in which county said bridges are located; and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Engineer also reported the award of the following contracts, bids for which were previously referred to him by the Commission with authority to award the contracts to the low bidders in each instance when certain conditions had been fulfilled:

Grading the State Farm-Adams Section of the Oregon-Washington Highway, in Umatilla County. Bids taken September 1, 1939, contract awarded September 29, 1939, to Roy L. Houck, the low bidder.

NOV 3 1939

Remodel east approach to bridge over Willamette River at Oregon City, Clackamas County. Bids taken September 28, 1939, contract awarded October 4, 1939, to McNutt Bros., the low bidders.

Construct bridge over Lang Canyon on the Columbia River Highway, 5 miles west of Arlington, Gilliam County. Bids taken September 1, 1939, contract awarded October 28, 1939, to Denton & Young, low bidders.

Construct Lang Canyon-Arlington Section of the Columbia River Highway, in Gilliam County. Bids taken September 28, 1939, contract awarded October 28, 1939, to Leonard & Slate, the low bidders.

The Commission approved the awards as reported, by unanimous vote.

The Secretary reported on the bid received by the Commission on September 28, 1939, from H. C. McCurdy, Dee, Oregon, for the purchase of an abandoned state-owned gravel pit situate adjacent to the Hood River Secondary Highway, near Dee, in Hood River County. He advised that he interrogated Mr. McCurdy as instructed by the Commission and ascertained that in submitting his bid Mr. McCurdy intended to offer the sum of \$250.00 for this land, having furnished a bid deposit in the amount of \$50, or 20 per cent of the bid price, as required, although he neglected to state the full amount of his bid. In view of the explanation, the Commission decided unanimously to sell this land to Mr. McCurdy for the sum of \$250.00, and so ordered.

The Engineer submitted a plan for equalizing the mileage of state highways in each of the maintenance districts in Division No. 5, Eastern Oregon, thereby making for efficiency in maintenance supervision in this division. He explained that under the present setup Division No. 5 is divided into four districts, with headquarters at Pendleton, La Grande, Baker, and Burns, and that the mileage of highway varies in each district from a total of 377.43 in the La Grande district to 665.97 in the Burns district. Further, that the district maintenance superintendent operating out of La Grande has to travel 110.48 miles to reach the limit of his district as compared with 264 miles for the district maintenance superintendent operating out of Baker. By the new arrangement, he said, the total mileage in each district will be nearly equal as will also the distance to be traveled by the respective maintenance superintendents to the extremities of their districts, although it will necessitate establishing an additional district maintenance headquarters in the town of John Day. After considerable discussion the Commission approved the new arrangement by unanimous vote.

In this connection the Engineer pointed out that under the new setup it will be necessary to construct a maintenance headquarters building at John Day for use of the district maintenance superintendent to be located at such place. He estimated the cost of such building at \$3,300.00, and recommended the expenditure. The Commission approved the recommendation unanimously.

He also recommended an expenditure of \$11,000.00 for the construc-

tion of an office building and an addition to the existing maintenance headquarters building at Medford, which would be used not only by state highway department forces but also as office quarters for the local state police officers. He explained that the arrangement for the use of the Medford building by the Police Department would be on the condition that the Police Department pay for its own heat, light, and janitor service and also pay the Highway Department \$50 per month rental, which, he estimated, would amortize the cost of the building in about 10 years. After discussion the Commission approved the construction of such buildings, subject to the condition that the Department of State Police agree, in writing, to the arrangement made for the use of the building.

The Engineer then brought up for discussion the necessity to construct additional maintenance headquarters buildings throughout the state, particularly in locations where suitable buildings cannot be rented. He mentioned the following: (1) Blue Mountain Summit maintenance station on the I.O.N. Highway, in Malheur County, estimated cost \$21,800; (2) Princeton maintenance station on the Princeton-Rome Secondary Highway, in Harney County, estimated cost \$21,800; (3) Cascade Pass maintenance station on the Willamette Highway, in Klamath County, estimated cost \$27,500; (4) Seneca maintenance station on the John Day-Burns Highway, in Grant County, estimated cost \$19,500; (5) Condon maintenance station on the John Day Highway, in Gilliam County, estimated cost \$11,300; (6) Madras maintenance building on The Dalles-California Highway, in Jefferson County, estimated cost \$11,000; (7) Newport maintenance building on the Oregon Coast Highway, in Lincoln County, estimated cost \$10,000.

He advised that the maintenance buildings at Cascade Summit, on the Willamette Highway, and at Blue Mountain Summit, on the I.O.N. Highway, are the two most needed, and requested authority to take bids for the construction of these two buildings during 1940. The Commission approved the request by unanimous vote and ordered that provision be made for the same in the 1940 budget. It was also decided to give further consideration to the budgeting of additional funds in 1940 for the construction of the buildings at the other locations mentioned by the Engineer.

The Commission had under discussion the matter of advancing additional state funds to finance non-labor items in connection with the Wolf Creek Highway W.P.A. project during the month of November, 1939. The Engineer advised that if this work is to proceed as in the past, the state will have to advance about \$4,200 for such items during the month of November and a like amount during December. He recommended such payments so that this work will not have to close down. After discussion the Commission approved the recommendation by unanimous vote, subject to the condition that the December payment be not made until it is actually needed in that month.

The Commission considered the request from the Attorney for instructions as to what account number should be charged with the cost of printing the new Oregon Road Laws, which expense was heretofore authorized by the Commission and amounted to approximately \$300, it being the Attorney's thought that the entire expense should not be charged to the Legal Department. The

Commission decided that this expense should be charged to the general administration account.

The Secretary presented letters from Mr. Palmer Hoyt, Publisher of the Oregonian, and W. D. B. Dodson, Executive Vice President, Portland Chamber of Commerce, accepting appointments on the Highway Commission's Advisory Board on Publicity Matters. They were approved by the Commission and ordered filed.

A letter was presented from Mr. Lacey V. Murrow, Director of Highways, State of Washington, advising that the State of Washington had plans to construct the Washington Section of the Walla Walla-Milton Road (Oregon-Washington Highway) in 1940, funds having been budgeted for the same; but, since the State of Oregon will not be in a position to construct the Oregon Section simultaneously, they have decided to defer the Washington improvement until Oregon is able to meet it at the state line. The Commission approved such arrangement.

The Commission had under discussion a letter from the Junction City Lions Club inquiring as to when the Commission plans to discuss further with the cities of Lane County the improvement of the Siuslaw Highway over the summit of the Coast Range, and suggesting that such meeting be held in Junction City. The Commission decided to hold such meeting in Junction City within the next couple of weeks, a definite date to be set later. (The Commission subsequently set Monday evening, November 20, 1939, as the date for such hearing and also decided to hold a special meeting in the office of the State Highway Engineer on Monday and Tuesday, November 20 and 21, for disposal of accumulated routine matters.)

A letter was presented from the City Planning Commission, Junction City, inquiring as to the attitude of the State Highway Commission with respect to the establishment of a business zone along the state highway route through Junction City. The Commission decided to discuss this matter with the City Planning Commission at the time of the hearing in Junction City.

Letters were presented from the Sisters Chamber of Commerce, Toledo Lions Club, Lebanon Lions Club, and the East Linn Ski Club, Lebanon, urging snow removal operations on the South Santiam Highway, particularly this winter, so as to permit travel over this highway during the winter season. The Commission considered it inadvisable to spend any money for snow removal on this road this year on account of the fact that the new grade has just been completed and no surfacing work has been placed thereon and it is unlikely that the road would be suitable for travel even if the snow were removed. Accordingly, the request was denied.

A resolution was presented from Shasta View Grange, Klamath Falls, requesting a thorough study of traffic lanes entering Klamath Falls, especially from the north and south, with a view either to diverting traffic to new lanes of travel or to increasing the width of the present highways to 4 lanes. The Engineer advised that such survey would be advisable, particularly in view of the conditions obtaining along South Sixth Street, the route of The Dalles-

California Highway, and recommended that authority be granted him to make a survey as requested by the Grange. The Commission approved the recommendation.

A letter was presented from the Harrisburg Chamber of Commerce requesting permission to plant trees along the state highway route through the town of Harrisburg, as a beautification project; also requesting assistance from the State Highway Commission in such undertaking. The Engineer advised that he had the Landscape Engineer investigate this matter and it is his recommendation that the permission requested be granted provided the trees to be planted are suitable shade trees selected by the State Highway Department. He also suggested that the Commission cooperate with the City of Harrisburg in this undertaking by donating to the cause 35 shade trees now stored in the Highway Department's nursery near Portland. After discussion the Commission approved the recommendation and referred the matter to the Engineer for further handling.

The Engineer reported on the condition of the Tiller-Trail Secondary Highway, in Douglas County, and suggested certain work to improve the same. The matter was discussed briefly by the Commission but action thereon was deferred until the special meeting of the Commission in about 2 weeks.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he has ordered certain surveys since the last meeting. He submitted a list of such surveys and asked the Commission to approve them. After due consideration, the Commission by unanimous vote authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - -	2-2819 -	Mary's River Bridge-Airport Section, Pacific Highway West.	1st authorization - \$240.00
Plans - - - -	4-2829 -	Gearhart-Seaside Section, Oregon Coast Highway, Clatsop County	1st authorization - \$200.00
Right of Way -	4-2830 -	Warren-Hug Point Section, Oregon Coast Highway, Clatsop County.	1st authorization - \$25.00
Plans - - - -	209-2805 -	Butler Market Road Section, County Road, Deschutes County	2nd authorization - \$455.00
		Total to date \$1,075.00	
Plans - - - -	18-2834 -	Lapine-W. Forest Boundary Section, Fremont Highway, Klamath County	2nd authorization - \$500.00
		Total to date \$1,500.00	
Location - - -	116-2808 -	Madras-Cook County Line Section, Warm Springs Highway, Jefferson Co.	1st authorization - \$9,600.00
Test Pits - - -	17-2811 -	Sexton Mountain Section, Pacific Highway, Josephine County.	1st authorization - \$600.00
Right of Way -	18-2838 -	Olene-Dairy Section, Klamath Falls-Lakeview Highway, Klamath County.	1st authorization - \$350.00
Plans - - - -	18-2839 -	Dairy Overcrossing Section, Klamath Falls-Lakeview Highway, Klamath Co.	1st authorization - \$500.00

Plans - - - 20-2841 - Dexter-Dural Creek Section, Willanette Highway, Lane County. 1st authorization - \$300.00
 Plans - - - 20-2818 - Cottage Grove Section, Pacific Highway, Lane County 5th authorization - \$240.00
 Total to date \$3,000.00
 Right of Way - 21-2830 - Boyer-Rose Lodge Section, Salmon River Highway, Lincoln County. 2nd authorization - \$700.00
 Total to date \$1,700.00
 Right of Way - 21-3835 - Seal Rock Quarry, Oregon Coast Highway, Lincoln Co. 1st authorization - \$75.00
 Reconm. - - 23-2816 - Baker County Line-Ontario Section, Old Oregon Trail, Malheur County. 2nd authorization - \$1,000.00
 Total to date \$2,000.00
 Park - - - - 35-2810 - Painted Hills Section, County Road, Wheeler County 1st authorization - \$200.00

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

R. I. Stuart & Sons, contract No. 2007, for furnishing crushed rock in stock piles for the Diamond Lake Section of the West Diamond Lake Secondary Highway and the Crater Lake North Secondary Highway, in Douglas and Jackson Counties, requested an additional extension of time, from July 18 to August 26, 1939, within which to complete this project. They gave no reason for their failure to complete the project within the previously extended time limit. The Engineer advised that this contract was awarded on September 14, 1937, and that the date of completion specified in the contract was October 31, 1938. However, the contractor failed to complete the work within such period and the time limit was extended by the Commission to July 18, 1939, as it was thought the work would surely be completed by that time, but it was not completed until August 26, 1939. He further advised that he knows of no valid reason that can be given by the contractor for failure to complete the project within the time limit specified in the contract and accordingly recommended that the extension of time now requested be granted but that the contractor be required to reimburse the state for the extra engineering expense incurred subsequent to the specified date of completion. The Commission approved the recommendation unanimously.

Berke Bros., Inc., contract No. 2085, for grading, surfacing, and oiling the Coquille-Clausen Section of the Oregon Coast Highway, in Coos County, requested an extension of time to August 11, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to adverse weather conditions which did not permit the construction of the oiled surface, and also their inability to secure the proper kind of paint for painting the fog posts. The Engineer advised that

this contract was awarded June 15, 1938, and that the contractor started construction operations on June 21, 1938, and completed the grading and surfacing work December 1, 1938. He pointed out that the contract specified that the oiling work should not be started before June 1, 1939, and, as a matter of fact, due to bad weather conditions, such work was not started until June 26, but was completed on July 8 when all work in connection with the contract was finished with the exception of the installation of fog posts, which work was finished on August 11, 1939. It was his thought that the contractor should not be penalized for the 8 days' overtime that were required to complete the oiling work, in view of the fact that the delay was caused by conditions beyond his control. However, he should be charged with extra engineering expense incurred by the state subsequent to the completion of the oiling work, and he so recommended. A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, concurring therein. The Commission approved the recommendation unanimously.

A. C. Greenwood, Inc., Contract No. 2098, for grading the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties, requested an extension of time from October 31, 1939, to August 15, 1940, within which to complete this project. They alleged it is impossible to move earth and wet material such as exists on this section, at this time of the year, and indications are that it will take about 60 working days to complete the job during the season when such materials can be moved at reasonable cost and to the best advantage of the job, which would set the time for such completion as August 15, 1940. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, in view thereof, that the extension of time now requested be granted subject to the condition that the contractor be charged for the extra engineering expense incurred by the state in connection with this job subsequent to the specified date of completion, except that he should not be penalized for moving materials over and above the quantity specified in the contract. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

C. J. Montag & Sons, Contract No. 2128, for the construction of a bridge over the Umpqua River on the Pacific Highway, in Douglas County, requested an extension of time of 2 months, from September 4 to November 4, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to high water conditions in the Umpqua River which prevented the moving of the old bridge structure to a new location for use as a traffic detour pending completion of the new structure, until the high water had receded. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is substantially correct. He also advised that the construction work on the bridge was far enough advanced to

permit the opening of the structure for traffic use on September 18, 1939, and that the bridge has been in constant use by the traveling public since that time. He recommended, in view of the circumstances, that the extension of time now requested be granted without penalty. The Commission approved the recommendation unanimously.

Fisher Bros., Contract No. 2164, for grading, surfacing, and oiling the Eagle Creek-Wade Corner Section of the Eagle Creek-Firwood County Road, in Clackamas County, requested an extension of time from September 30, 1939, to July 1, 1940, within which to complete this contract. They attributed their failure to complete the project within the specified time limit to inclement weather, which interfered with the oiling work. The Engineer advised that this contract was awarded April 6, 1939, and provided that the work should be completed by September 30, 1939, which was considered ample time. However, Fisher Bros. were working on another contract and did not start the production of crushed rock for the contract under discussion until September 11, too late to complete the oiling work this season. He further stated that if the contractor had started work reasonably soon after the award of the contract he could have completed the job within the specified time limit. He recommended, in view of the circumstances, that the extension of time now requested be granted subject to the condition that the contractor be charged for the extra engineering expense incurred by the state subsequent to the specified completion date. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2173, for the grading, surfacing, and oiling of the Scotch Creek-Castor Ranch Section of the Hurricane Creek County Road, in Walla Walla County, requested an extension of time of 3 days, from September 15 to September 18, 1939, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the reason given by the contractor for overrun in time limit is correct and accordingly recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Leonard & Slate, Contract No. 2181, for grading, surfacing, and oiling, and also construction of a bridge on the Service Creek-Mule Shoe Creek Section of the John Day Highway, in Wheeler County, requested an extension of time of 10 days, from August 31 to September 10, 1939, within which to complete this job. They attributed their failure to complete the project within the specified time limit to rainy weather, which did not permit the accomplishment of the oiling work required. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct and recommended that the extension of time

requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. F. Johnston, Contract No. 2183, for construction of a bridge over Sheep Creek, on the Santiam Highway, near Cascadia, in Linn County, requested an extension of time of 22 days, from August 31 to September 22, 1939, within which to complete this job. He attributed his failure to complete the project within the specified time limit to increased quantities of material to be moved and his inability to remove a slide from the bridge site on account of late rains and muddy conditions. The Engineer advised that the contract called for the removal of 7,000 cu. yds. of slide material but the contractor was actually required to remove more than 20,000 cu. yds. of such material, which accounted for the fact that the job was not completed within the specified time limit. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

S. S. Montague, Contract No. 2184, for grading, surfacing, and oiling the Read Creek-Wren Section of the Kings Valley Secondary Highway, in Benton County, requested an extension of time from September 30, 1939, to July 1, 1940, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties encountered in securing a suitable quarry. He advised that suitable rock from the quarry now being operated has been exhausted, and, while sufficient material has been obtained therefrom to provide a satisfactory roadway for the traveling public, it will be necessary to move the crushing plant to a new location in order to obtain rock to fulfill the contract. It was his thought that it would require 90 days' time during a period when weather conditions are favorable, or until about July 1, 1940, to complete the project. The Engineer gave as his thought that it would not be necessary for Mr. Montague to move his plant in order to obtain suitable materials to finish this job, but, due to the fact that it took all of the month of October to complete the surfacing, it will be necessary to defer the oiling work until suitable weather conditions prevail, next spring or summer. He further stated that this contract was awarded on May 26, 1939, with a specified date of completion of September 30, 1939, which, in his estimation, was sufficient time within which to complete the job if the work had been carried on in the proper manner. He recommended that the extension of time now requested be granted but that the contractor be charged with the extra engineering expense incurred by the state subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Pacific Bridge Painting Company, Contract No. 2191, for painting the bridge over the Columbia River between Portland, Oregon, and Vancouver, Washington, on the Pacific Highway, requested an extension

of time of 6 days, from September 30 to October 6, 1939, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to the fact that they were required to do extra painting work and could not work during the week ending September 30 because of rain. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended, in view thereof, that the extension of time now requested be granted without penalty. The Commission approved the recommendation unanimously.

Newport Construction Company, Contract No. 2196, for grading, surfacing, and oiling the Provolt-Williams Section of the Williams Secondary Highway, in Josephine County, requested an extension of time of 15 days, from September 30 to October 15, 1939, within which to complete this job. They attributed their failure to complete the project within the specified time limit to failure of the power and telephone companies to remove their poles from the area to be graded, lack of right of way, and absence of engineering stakes. The Engineer advised that this contract was awarded on June 22, 1939, and that the contractor started construction operations on June 29, 1939, and from that date carried on the work in a vigorous manner without interruption. He also advised that the contractor was prevented from working at one end of the project because of fences and pole lines that had to be moved. Most of the work performed after the date of completion specified, he said, consisted of cleaning ditches and production of materials for stock piles. He recommended, in view thereof, that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2007, 2085, 2118, 2128, 2139, 2141, 2173, 2181, 2183, 2186, 2191, 2196, 2198, and 2199, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2007, with R. I. Stuart & Sons, for furnishing crushed rock in stock piles on the Diamond Lake Section of the West Diamond Lake and Crater Lake North Secondary Highways, in Douglas and Jackson Counties. Completed August 26, 1939.

Contract No. 2085, with Berke Bros., Inc., for grading, surfacing, and oiling the Coquille-Clausen Section of the Oregon Coast Highway, in Coos County. Completed August 11, 1939.

Contract No. 2118, with Harold Blake, for grading the North Unit, Bear Canyon-State Line Section of the Pacific Highway, in Jackson County. Completed September 30, 1939.

Contract No. 2128, with C. J. Montag & Sons, for construction of bridge and approaches on the Umpqua River Bridge Section of the Pacific Highway, in Douglas County. Completed October 21, 1939.

Contract No. 2139, with Harold Blake, for grading and culvert construction on the South Unit, Bear Canyon-State Line Section of the Pacific Highway, in Jackson County. Completed September 30, 1939.

Contract No. 2141, with J. C. Compton and Rogers Construction Company, for grading, surfacing, and oiling, also furnishing crushed rock in stock piles, on the Devils Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties. Completed September 1, 1939.

Contract No. 2173, with Rogers Construction Company, for grading, surfacing, and oiling, also furnishing crushed rock in stock piles, on the Scotch Creek-Castor Ranch Section of the Hurricane Creek County Road, in Wallowa County. Completed September 18, 1939.

Contract No. 2181, with Leonard & Slate, for grading, surfacing, and oiling, also construction of concrete bridge on the Service Creek-Mule Shoe Creek Section of the John Day Highway, in Wheeler County. Completed September 7, 1939.

Contract No. 2183, with J. F. Johnston, for construction of log span with trestle approach on the Lamb Creek-Sheep Ridge Section of the Santiam Highway, in Linn County. Completed September 22, 1939.

Contract No. 2186, with Edlefsen-Weygandt Company, for construction of three bridges and one culvert and extensions to seven culverts on the Dean Creek-Prairie City Section of the John Day Highway, in Grant County. Completed October 30, 1939.

Contract No. 2191, with Pacific Bridge Painting Company, for cleaning and repainting structural steel on the Interstate Bridge over the Columbia River between Portland, Oregon, and Vancouver, Washington. Completed October 6, 1939.

Contract No. 2196, with Newport Construction Company, for grading, surfacing, and oiling, also furnishing crushed gravel in stock piles, on the Provolt-Williams Section of the Williams Secondary Highway, in Josephine County. Completed October 5, 1939.

Contract No. 2198, with Warren Northwest, Inc., for grading, paving, and pavement widening and resurfacing on the Salem-Middle Grove Section of the Pacific Highway East and Silverton County Road, in Marion County. Completed September 26, 1939.

Contract No. 2199, with Warren Northwest, Inc., for grading, paving, and pavement widening and resurfacing on the Wheatland Junction-Salem Section of the North River Road, in Marion County. Completed September 26, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the setting of a date for its regular meeting in January 1940, and decided to hold such meeting in Portland on Thursday and Friday, January 11 and 12. The Secretary was instructed to make the usual arrangements for the use of the auditorium of the Public Service Building for such meeting.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Western Union Telegraph Company providing for the use of Western Union poles in connection with operation of remote radio receiver at Salem.

Agreement with City of Nyssa covering revisions to municipally-owned water system at site of Nyssa overcrossing.

Supplemental agreement with O.W.R.R. & N. Company, Union Pacific Railroad Company, and Baker County, with reference to revised easement across railroad station grounds at Haines.

Agreement with the Pacific Telephone and Telegraph Company providing for the use of a telephone pole at Fairgrounds Road and Myrtle Avenue, Salem, in connection with the installation and maintenance of a traffic signal near this location.

Agreement with B. Mildenhall and wife, Canby, Oregon, with respect to the construction of an entrance driveway into the Mildenhall Service Station property at Canby.

Agreement with Mary Z. E. Conder providing for the elimination of a cattle pass at Mile Post 0.10 on the Little Nestucca Secondary Highway, in Tillamook County.

Agreement with McNutt Bros. disposing of their claim for extra compensation arising out of their contract No. 2126 for the construction of the Ochoco Dam-Marks Creek Section of the Ochoco Highway, in Crook County.

Agreement with Coos County providing for state cooperation to the extent of \$150.00 in acquiring right of way from J. P. Johnson on the Coquille-Clausen Section of the Oregon Coast Highway, in Coos County.

Agreement with C. J. Montag & Sons pertaining to their contract No. 2128 for the construction of a bridge over the Umpqua River on the Pacific Highway, near Roseburg, in Douglas County.

Agreement with the United States of America, Works Progress Administration, providing for the advancement of state funds to finance non-labor items in connection with the Wolf Creek Highway W.P.A. Project during the month of November, 1939.

Agreement with Mountain States Power Company covering construction and maintenance of a culvert across the power company's Santiam Canal on the South Unit of the Albany Section of the Pacific Highway East, in Linn County.

Agreement with John Hewitt covering maintenance of a logging road across the Salmon River timber reserve adjacent to the Salmon River Highway, in Tillamook County.

Bargain and Sale Deed conveying unto Tigard Methodist Episcopal Church two parcels of land in Washington County, one containing 20,000 sq.ft. and the other 0.017 acre, being Right of Way Transactions Nos. 7005, 7012, and 7013.

Bargain and Sale Deed conveying unto H. C. McGurdy 3.83 acres of land situate adjacent to the Hood River Secondary Highway, in Hood River County, being Right of Way Transaction No. 3462.

Bargain and Sale Deed conveying unto C. H. Pfaffle and wife 0.012 acre of land situate in Washington County, being Right of Way Transactions Nos. 6940 and 6999.

Bargain and Sale Deed conveying unto Max Brown and Inez Brown, husband and wife, 0.05 acre of land situate in Lot 17 of Section 5, T. 11 S., R. 3 W., W. M., Waverly Fruit Farms, in Linn County.

Easement agreement with Eugene Thorndike, et al, parties of the second part, providing for a detour road over property of the

parties of the second part during construction of the Eagle Point-Trail Section of the Crater Lake Highway, in Jackson County, Right of Way Transaction No. 7228.

Easement agreement with Jesse Glen White and wife, parties of the second part, providing for a detour road across properties of the second part during construction of the Newberg-McMinnville Section of the Pacific Highway West, in Yamhill County, Right of Way Transaction No. 7125.

Bargain and Sale Deed conveying unto Henry Reese and Max and Charlotte Schlag Lots 8, 9, 10, and 11, Block 7, Bunker Hill Addition to Marshfield, being Right of Way Transaction No. 4773.

Bargain and Sale Deed conveying unto H. M. Featherstone and Pearl E. Featherstone 1.5 acres of land situate in the S.E. $\frac{1}{4}$ of Sec. 22, T 18 S., R. 45 E., W. M., Malheur County, being Right of Way Transaction No. 7234.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:15 o'clock p. m.

Thos. J. Lane
State Highway Engineer

Secretary

Henry L. Cabell
Chairman
E. H. Hocking
Commissioner
Wm. M. Lloyd
Commissioner

Salem, Oregon, November 20, 1939

The State Highway Commission met in special session at 10:30 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. W. DeSouza, Assistant Attorney
H. B. Glaizer, Secretary

The Assistant Attorney reported on the status of the 1939 right of way budget. He advised that present indications are that the expenditures during this calendar year will be less than the amount of the budget by approximately \$50,000. The matter was discussed briefly but no action taken thereon.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

NOV 20 1939

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Portland-Gresham Section - Mt. Hood Highway</u> 7468-Multnomah County	R/W	0.45	Gratis	McCullough

The Commission discussed matters pertaining to the acquisition of right of way needed for the reconstruction of the Pacific Highway through the town of Cottage Grove, particularly the proposed settlements with J. H. Chambers, right of way transaction No. 5701, and with A. W. Helliwell and P. E. Nelson, right of way transaction No. 5694, which settlements were referred by the Commission at its last meeting to Commissioner Clough for investigation. Commissioner Clough reported that he has investigated these properties and is inclined to believe that the proposed settlements are satisfactory whereupon

NOV 20 1939

the Commission voted unanimously to acquire the properties on the basis of the settlements previously reported.

The Engineer read aloud a letter from the Commission's Attorney, Mr. J. M. Devers, with respect to the right of way situation in Cottage Grove wherein the Attorney points out that at least one of the properties will have to be acquired by condemnation, being the Frank and Mary Heck property, right of way transaction No. 5697, involving a camp site, garage, store building, and service station. Possession of the property, he said, cannot be obtained until after condemnation action has been tried and since the circuit court does not meet for jury cases every month it is not likely that the case could be tried before May or June of next year. The Engineer advised that plans were to call for bids for the Cottage Grove project at the December meeting of the Commission but in view of the information received from the Attorney he now suggests that the project be deferred until the right of way matter has been satisfactorily disposed of. The Commission concurred in the Engineer's viewpoint and so ordered. The Secretary was instructed to inform the Cottage Grove City Council of the action taken and the reasons for the same.

The Commission thereupon authorized the Attorney to proceed with condemnation of the Frank Heck property on the basis of his previous offer of \$13,000, representing the cost of the property exclusive of the buildings located thereon but including the cost of moving such buildings. He was authorized to offer Mr. Heck an additional amount in the event it is necessary to acquire title to the buildings along with the land.

In this connection the Engineer suggested the following procedure for the handling of matters pertaining to proposed highway construction so as to avoid unnecessary delays, not only with respect to right of way but also with respect to the working up of plans. He recommended, when the Commission adopts a tentative construction program, that authority be granted to him to work up the plans for the projects listed therein and that the Attorney be authorized to secure options for the right of way, particularly such right of way as lies within the corporate limits of cities and towns. It was his thought that such procedure would not entail any greater expense than the procedure now followed and would greatly facilitate the contracting of the work involved. After discussion the Commission by unanimous vote adopted the procedure recommended by the Engineer as its policy to be followed hereafter with respect to such matters.

The Commission had under discussion matters pertaining to the acquisition of timber on Larch Mountain, Multnomah County. The Engineer advised that this timber is owned by the Crown-Zellerbach Corporation which plans to market it in the near future and that the company proposes to transport the timber to market over the road that was recently constructed from the Columbia River Highway to Larch Mountain. He pointed out that Larch Mountain is the source of water that supplies several of the waterfalls along the Columbia River Highway and advised that if the timber is cut it will greatly affect these waterfalls which are important scenic attractions. This matter, he said, has been brought to his attention by people who are particularly interested in preserving the scenic beauty of the Columbia River Highway and who have

suggested that the state acquire this timber for state park purposes in order to preserve it. He also pointed out that this timber is located in an area that is surrounded by a national forest and that when the matter of acquiring Benson Park from the City of Portland was under discussion it was agreed that the United States Forest Service would take title to that portion of the park south of the Oregon Washington Railroad and Navigation tracks and that the State of Oregon would take title to the portion between the railroad and the Columbia River and it was his thought, in line with such agreement, that the Larch Mountain property should be included in the national forest area so that it could be controlled by the United States Forest Service along with its property.

Chairman Cabell advised that he has conferred with the District Forester, Mr. Sherrard, concerning this matter and that the Forest Service is now working on a proposition for an exchange of timber which, if it works out satisfactorily, will solve the problem. He also mentioned that there is a possibility of the forest service acquiring the timber by purchase using federal funds that have been provided for purposes of this kind. This matter was discussed at some length and, while it was agreed by all that it would be very much adverse to the best interests of the Columbia River Highway if the timber were cut, there appears to be nothing that the State Highway Commission can do about the matter at the present time.

The Assistant Attorney requested instructions relative to the settlement with the Erickson Dairy Products Company, St. Helens, for right of way needed for the improvement of the Lower Columbia River Highway near St. Helens. It appears that the value set on this property by the Right of Way Department was \$1,200 but such value was lowered to \$775 when certain changes in the original plan were effected which reduced the width of the land needed from the company. However, the company apparently had a change of heart and is now demanding the sum of \$5,000 notwithstanding that the state has fulfilled its obligation with respect to the other matters. He advised that Mr. Erickson has taken a very determined stand and absolutely will not settle for less than \$5,000. In view of the circumstances and it appearing to the Commission that an agreeable settlement cannot be reached with Mr. Erickson without taking the matter to court, the Attorney was instructed to condemn the property.

The Assistant Attorney reported a communication from Louis E. Schmitt, Attorney, Portland, in regard to the John Jordan property situate adjacent to McLoughlin Boulevard in Lot 7, Riverside Homestead Addition, advising that Mr. Jordan has spent nearly \$100 to improve his property outside of the highway right of way limits and in view thereof refuses to sell this property to the state on the basis of the state's offer of 10¢ per square foot. It was the thought of the Commission that, if Mr. Jordan actually spent \$100 to improve his lot as alleged, as a matter of good faith he should be reimbursed therefor in the event that the state is able to purchase the property from him. Accordingly, the Commission ordered an investigation of the work actually performed by Mr. Jordan to ascertain whether or not the said \$100 is a reasonable amount to allow him therefor or whether the offer previously made should be increased by a lesser amount. The Attorney was authorized to renew his previous offer to Mr. Jordan plus an additional amount to be determined by such investigation.

NOV 20 1939

The Commission had under discussion the adoption of a policy with respect to the maximum amount of state funds that it would expend for acquisition of right of way for state highway improvements within the corporate limits of cities and towns with particular reference to right of way needed for the proposed Front Street project in Portland. After a lengthy discussion of this matter the Commission voted unanimously to pay for right of way needed for any project in this class an amount equal to 40 per cent of the construction cost of such project. Chairman Cabell was authorized to convey this information to the Portland City Council for its information in providing funds to finance the city's share of the cost of right of way for the Front Street project. He was also authorized to prepare a statement for the newspapers of the action taken by the Commission in this matter.

The Commission adjourned at 12:40 o'clock p. m. and reconvened at 2:20 o'clock p. m. in the same room with the same persons present and participating. Also present were W. H. Lynch, District Engineer, and T. M. Davis, Senior Highway Engineer, representing the United States Public Roads Administration, and Ray Conway, Manager of the Oregon State Motor Association.

Mr. Roger Mything, District Manager, Oregon Culvert and Pipe Company, Portland, came before the Commission at this time in regard to the use of wooden stave pipe in connection with highway construction work. Mr. Mything voiced objections, in behalf of the manufacturers of metal and concrete pipe, to the Commission permitting the manufacturers of wooden stave pipe to compete with the manufacturers of metal and concrete pipe on highway work. He declared that the manufacturers of metal and concrete culvert pipe cannot stand the extra competition and some of them will no doubt have to go out of business if the Commission decides to accept alternate bids on the three types. He suggested in the event the Commission feels that a test should be made of wood stave pipe that it be limited to not more than five per cent of the total annual pipe requirements of the State Highway Department. The Commission took the matter under advisement. (This matter was reconsidered by the Commission on the following day. See minute entry ahead.)

The Commission had under discussion matters pertaining to the erection of signs along state highway rights of way pointing out and describing important historical locations. Mr. Conway expressed himself as being heartily in favor of the maintenance of such signs and volunteered, in behalf of the State Motor Association, to prepare a booklet bearing full information in regard to each site for the benefit of tourists and others interested. After considerable discussion the Commission decided unanimously to erect such historical signs or markers and referred the entire matter to the Engineer to work out the details.

The Commission had under consideration the adoption of a federal aid secondary highway system. The Engineer presented a list of highways that are eligible for such system from which the Commission selected the following roads which represent approximately 25 per cent of the mileage authorized by the Federal Government for the State of Oregon, it being understood that the Engineer has authority to add additional roads to this system in the event that the mileage represented by this selection is less than 25 per cent of that allowed:

County	Road or Highway	Section	Length in miles
Baker	Baker-Homestead	Baker to Halfway	63.8
Benton	Kings Valley Secondary	Wren to Polk-Benton Co. line	10.3
"	Albany-Independence County Road	North Albany to Polk-Benton County line	7.4
Clackamas	Woodburn-Sandy Secondary	Marion Co. line to Eagle Creek	37.6
"	Boring County Road	Cascade Secondary Highway to Mt. Hood Highway	12.8
"	Carver-Redlands Store County Road	Boring County Road to Red- lands Store	4.9
"	Eagle Creek Grange Hall- Firwood County Road	Woodburn-Sandy Secondary Hwy. to Mt. Hood Highway	9.8
"	Bluff County Road	Multnomah Co. line to Sandy	6.4
"	Cottrell County Road	Bluff Road to Cottrell	0.3

TOTAL . . .			1,280.3

The Commission also discussed the matter of financing the construction of the Illinois River Bridge on the Illinois Valley county road, in Josephine County, bids for which were taken by the Commission on June 22, 1939, the award of the contract having been deferred at that time because the federal authorities would not approve the work as a federal aid secondary highway project. In the discussion of this matter it was pointed out that there remains unexpended of the 1935 federal allotment of national recovery funds that must be expended on feeder roads an amount of \$5,800 that might be used to help defray the cost of this bridge construction. Such funds it was explained were provided to finance construction of feeder roads entirely off the state highway system and do not have to be matched with other funds whereas the Federal Government requires the matching of federal aid secondary highway funds with which it was originally proposed to finance the construction of this bridge. The Engineer suggested, in order to provide the remaining funds needed for this bridge work, the transfer of the required amount from some other project in the same class, substituting therefor an equal amount of state funds which would avoid the necessity of using state funds to finance this work which is not on a state highway. The Commission approved the suggestion unanimously and authorized the Engineer to make the necessary transfer and to present the plan to the Public Roads Administration for its approval. He was also authorized to call into conference contractor J. F. Johnston, who submitted the low bid for this work, and ascertain whether or not he is willing to accept the award of this contract at this late date. In the event that the contractor is willing to abide by his original offer, submitted on June 22, 1939, and the Public Roads Administration approves the method of financing the work, then the Engineer is authorized to award the contract to Mr. Johnston.

The Commission had under discussion the selection of projects to be recommended to the Public Roads Administration and the United States Forest Service for the 1941 Forest Highway Program. The Engineer presented a list of projects eligible for such program from which the Commission by unanimous vote tentatively selected the following as those to be recommended to the government officials when the joint meeting is held for the allocating of 1941 forest highway funds:

TENTATIVE 1941 FOREST HIGHWAY ALLOCATIONS

Highway	Section	Type of Work	Amount
Willamette	Oakridge-Tunnel	Oiling	\$ 70,000
Pendleton-John Day	Fox Valley	"	50,000
Tiller-Trail		Grade, Surf. & Oil	75,000
Santiam	Sheep Ridge-Tombstone	Surface and Oil	100,000

(continued)

1941 Forest Highway Program (continued)

<u>Highway</u>	<u>Section</u>	<u>Type of Work</u>	<u>Amount</u>
North Santiam	Niagara-Detroit	Grading	\$ 100,000
Klamath Falls-Lakeview	Quartz Mountain	Grade, Surf. & Oil	75,000
John Day-Burns	Canyon City-Bear Valley	Surface and Oil	75,000
Flora-Enterprise	To Washington Line	Grading	60,000
Cascade Lakes	Bend-Elk Lake	Grade and Surface	50,000
Timberline		Grade, Surf. & Oil	100,000
John Day	Prairie City-East	Grade, Surf. & Oil	75,000
Warm Springs	Forest Reserve Section	Grading	75,000
			<hr/>
			\$ 905,000
Location Surveys			50,000
Maintenance			45,000
			<hr/>
			\$ 1,000,000

Matters pertaining to the acquisition of right of way needed in connection with the proposed railroad grade separation project in Nyssa had the attention of the Commission. Mr. C. W. Parker, Right of Way Agent, reported results of negotiations with property owners affected by this proposed improvement. The following settlements effected by him were approved by the Commission by unanimous vote:

Nora Williams: property damages allowed in the amount of \$4,000 by reason of cutting off access to her property from Main Street. Dick Tensen: property damages allowed in the amount of \$4,000 on account of access from Main Street being entirely cut off. Bettie Lafrenz: property damages allowed in the amount of \$2,000 because access from Main Street is entirely cut off. Fletcher Oil Company: purchase approved for the sum of \$5,000. Privately-owned property in the Emison Addition: Mr. Parker advised that several homes are being maintained in this addition and that the only access thereto is by a single roadway which will be closed by reason of the highway improvement and that these properties will either have to be purchased outright or another roadway provided for the owners and if such other roadway is provided it will necessitate these people crossing the railroad grade which is undesirable. The Amalgamated Sugar Company, he said, which owns the bulk of the property in this area, will benefit greatly and its property will be much enhanced by the addition to its holdings of the other privately-owned property, and the Union Pacific Railroad Company would be greatly benefited if the road to serve these few homes were not built across its tracks at grade and it was his thought, in view of such benefits, that the Sugar Company and the Railroad Company should be willing to assume the expense of acquiring the residence properties. This matter was discussed at considerable length and was referred by the Commission to Chairman Cabell and the Attorney to confer with the railroad company officials relative thereto, it being understood that not any of the options shall be closed until authorized by the Commission.

The Commission had under discussion the complaint of St. Pauls Episcopal Church, Oregon City, with respect to the plans for the construction of a concrete viaduct on Water Street (Pacific Highway East) in Oregon City,

opposite the church property described as Lots 7 and 8 of Block 7, Oregon City. It appears that plans for the viaduct include the construction of hand-rail along the easterly side of the roadway which will prevent access to the church property from the highway and it is alleged by the church people that their property will be greatly lessened in value thereby, and that they will suffer damages in the amount of \$5,000 but they will waive their right of access to the highway if the state will pay them such sum. This matter was discussed at considerable length and the conclusion reached that there are no circumstances nor conditions which would justify the Commission in making an expenditure from state highway funds in the amount of \$5,000 as compensation for loss of access to the highway. The Commission took the viewpoint that inasmuch as the street has been constructed, has been in use for many years without access thereto from the church property, and the present plan of construction will not introduce any new factors into the situation, compensation for damages at this time is not in order. Furthermore, the Commission would not have legal authority to expend state highway funds for the purpose if no legal obligation is involved, hence, if the church people desire access to the highway from their property, the cost of constructing such physical connection must be borne by them.

As an alternative the Engineer suggested a revision in the plans for this structure to include brackets so that if at any time in the future the church people desire to make a physical connection to the highway from their property the handrail could be removed provided the adjoining property owners would pay the cost of the removal of the same and would likewise bear all the expense of making the connection. If, on the other hand, it is desired to make the physical connection at the same time that the viaduct is constructed, then the Commission will eliminate from the plans provision for a section of the handrail as may be necessary and under such conditions the Commission will contribute to the cost of making the connection to the church property such amount as it will save by reason of the elimination of the handrail from its contract, it being understood of course that the connection must be constructed in accordance with the plans approved by the State Highway Engineer and must conform to the inspection requirements during construction. It was the thought of the Commission that the plan suggested by the Engineer is logical and fair whereupon it was approved by the Commission by unanimous vote. The Attorney was instructed to convey the information to Reverend A. J. Mockford, Church Rector, Oregon City.

The Commission adjourned at 5:00 o'clock p. m., to reconvene at 9:30 o'clock on the following morning in the same room, and immediately motored to Junction City to conduct a previously scheduled public hearing with respect to the improvement of the Siuslaw Highway.

W. H. McCreary
State Highway Engineer

W. H. McCreary
Secretary

Henry F. Cabell
Chairman

Stearns
Commissioner

Wm. McCreary
Commissioner

Junction City, Oregon, November 20, 1939

The State Highway Commission and party were guests of the Junction City Lions Club at a 6:30 o'clock dinner in the parlor of the First Christian Church, following which the Commission discussed with the members of the Lions Club and others present matters pertaining to the proposed improvement of the Siuslaw Highway over the summit of the Coast Range Mountains. Mr. W. D. Thrall, President of the Lions Club, presided. State Highway Department officials present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
H. G. Smith, Construction Engineer
K. D. Lytle, Division Engineer
H. B. Glaisyer, Secretary

Approximately fifty persons were present among whom were the members of the County Court of Lane County consisting of County Judge Clinton Hurd and County Commissioners C. M. Young and W. J. Holland; County Engineer P. M. Morse; members of the City Council of Junction City consisting of Charles R. Nelson, Mayor, I. M. Peterson, Recorder and City Attorney, Henry Hansen, City Treasurer, and C. B. Washburne, Councilman; members of the City Planning Commission of Junction City, Mr. Kennedy, Chairman; and Earl Hill, State Representative.

Mr. Thrall called the meeting to order and, after a few opening remarks, inquired as to whether or not the Commission has as yet made its decision with respect to the improvement of the Siuslaw Highway.

Chairman Cabell gave detailed information in regard to the funds available to the State Highway Commission and outlined the formula used by the Commission in distributing these funds to the five districts of the state. He also explained how the Commission selects the projects in each district, pointing out that such lists of projects consist of those which the Commission feels will do the most good for the greatest number of people, are especially needed projects, will provide the greatest amount of convenience to the public, or will reduce maintenance cost to the greatest extent. He added that there are economic advantages from the traffic standpoint such as saving in time, the value of time saved, the savings that accrue by reason of reduced driving costs, et cetera. He advised that the Siuslaw Highway is situated in the third highway division of the state in which division are located numerous other projects such as the Pacific Highway, the Oregon Coast Highway, the Willamette Highway, the McKenzie Highway, the Coos Bay-Roseburg Highway, the Umpqua Highway, and the Green Springs Highway, all of which are costly and are considered by the State Highway Commission to have priority rights over the Siuslaw Highway, particularly in view of the fact that there is under consideration another route between Eugene and the Coast which is known as Route F.

To rebuild the Siuslaw Highway to modern standards over the summit of the Coast Range, he said, is also a costly proposition and is a very dif-

ficult one for the Commission to handle in view of the limited amount of funds available to the Commission and the other projects that are already under way. Further, if the Commission should rebuild this short section, it would render obsolete the adjoining sections which are now considered satisfactory. The cost to construct this short section, he said, is estimated between \$300,000 and \$400,000 which is a large sum of money and raises a question in the minds of the Commission as to whether or not its expenditure is justified in view of the agitation for Route F. The Commission is not financially able to construct both routes and feels that it should not approve an expenditure of a large sum of money for the improvement of the Siuslaw Highway at the summit and commit future Highway Commissions to extend such improvements. The Highway Commission does not question the desirability of this improvement, he said, and realizes that a bad condition exists for the transportation of logs because of excessive curvature which introduces an undue hazard to other traffic, and in order to alleviate this condition has instructed the Engineer to investigate the possibilities of improving the existing road somewhat by widening, et cetera, which the Commission thought could be done for considerable less cost or expense and would serve the purpose for the time being. He called upon the State Highway Engineer to explain this alternate plan.

The Engineer estimated that to construct a standard improvement on a six per cent grade, including a tunnel, would cost approximately \$350,000 whereas a partial improvement, consisting of widening the present road to 22-foot width and with a roadbed 30 feet wide and reducing the super-elevation of sharp curves, will cost not to exceed \$60,000. He expressed his belief that on the basis of economics such modified plan would provide to the users of this road a fair and reasonable degree of safety.

Commissioner Clough was then called upon by Mr. Thrall for a statement. He voiced his concurrence in the remarks made by Chairman Cabell and the Engineer and declared that the analysis given by these men is a true picture of the facts. He expressed sympathy with the loggers who are being inconvenienced by reason of the condition of the present road but pointed out that they are not alone in their predicament because the same problem exists in all of the timbered districts of the state. He gave as his understanding that it is the duty of the State Highway Commission to provide for the timber interests, in so far as funds will permit, the best means possible for the transportation of timber.

County Commissioner Holland stated that in his opinion there is no question of the need for the improvement of the Siuslaw Highway but he for one is willing to leave the problem up to the State Highway Commission.

County Commissioner Young expressed his pleasure that the State Highway Commission is willing to spend a reasonable amount of money to improve this road. He advised that he would be perfectly satisfied with any improvement the State Highway Commission sees fit to undertake.

County Judge Hurd questioned the advisability of spending money for partial improvement as outlined by the Engineer because in his estimation even with such improvement it would not be possible to transport long logs

and poles over the road without taking up the full width of the roadway. It was his understanding that the proposed improvement was for this particular purpose. He suggested that the entire project be deferred for two or three years and that it be constructed at that time on proper alignment and to proper standards, including a tunnel at the summit.

County Engineer Morse gave as his thought that the entire problem is one for the State Highway Commission to solve as best it can.

Mr. Julius P. Hult, timber owner, was called upon for remarks. He inquired as to whether or not the road would be any straighter after the modified improvement was completed and whether or not it would then be possible to transport piling over the road. He was informed by the Engineer that the road would not be any straighter but that the improvement would simply consist of widening which would make it possible to safely move equipment conforming to the statutory length of 50 feet including load. To reconstruct the entire road to a standard that would permit the transportation of long piling, he said, would cost approximately \$2,500,000. Mr. Hult then suggested the reconstruction of the summit section to permanent standards on a four-year continuing program and in reply thereto Chairman Cabell stated that the Commission could not commit itself to a program of that kind because it would simply mean that the improvement would have to be extended later and the Commission cares not to start a fine improvement at one place if it cannot see its way clear to extend it in the future. It was his thought that the modified plan described by the Engineer would help considerably although it would not permit the transportation of piling. The Commission wants to help the logging industry as much as it possibly can, he said, but feels that it should not spend a lot of money to permit the hauling of piling when there is a question whether or not the Commission has legal authority to authorize such movements.

Mayor Nelson stated that he appreciates that the State Highway Commission does not have funds to finance the reconstruction of the Siuslaw Highway as a super-highway, nevertheless he feels that this highway is of major importance as a route to the coast as is also Route F, which route, he said, he is not opposing. He pointed out that the timber along the Siuslaw Highway must be transported over this road and predicted that as time goes on general traffic over the Siuslaw Highway will greatly increase which will mean that the road will have to be improved in order to make it safe for travel. He urged the Commission to make some kind of an improvement but left it entirely up to the Commission to decide the extent thereof.

Mr. Angus Gibson concurred in the remarks of Mayor Nelson. He said that, while he prefers the realignment of the road so that piling could be transported over the same, he would be perfectly satisfied with a \$60,000 project as mentioned by the Engineer because he is satisfied that the Highway Commission would extend the improvement later.

Mr. Hill pointed out that the State Highway Commission has a big problem in road construction throughout the entire state and must be very careful in allocating its funds to the various districts so as to satisfy people and avoid criticism. He also pointed out that Lane County has five major road

problems, viz: reconstruction of the Pacific Highway, improvement of the McKenzie Highway, completion of the Willamette Highway, reconstruction of the Siuslaw Highway, and the building of Route F, and advised that the people of this county do not expect to secure all of these improvements at once but will be satisfied with a just portion of the funds. The people of Lane County who reside west of the Coast Range, he said, are perfectly willing to leave the matter up to the State Highway Commission as to where the funds shall be spent. As a matter of information he pointed out that there are two ways to market the timber along the Siuslaw Highway, one is to take the timber east to Junction City, as the bulk of it is going at the present time, and the other is to take it west. He thanked the Commission for its interest in the Siuslaw project and also for making the additional studies and report, which report he believed should be respected and taken as a matter of fact. He urged all of the people of Lane County to be reasonable and fair with the State Highway Commission in its disposition of this matter.

There followed a general discussion of this problem during which Mr. Gibson inquired as to when the Commission proposes to undertake this improvement. He was informed by the Engineer that it is a summer job and that the work would probably start next spring and would be finished during that working season. Chairman Cabell stated that present indications are that the Commission will do the work next year.

Motion was then made by Mr. Washburne that the members of the Lions Club and others present accept the modified plan offered by the State Highway Commission. The motion was duly seconded by Mr. Gibson and carried, there being no dissenting vote. This concluded the discussion of the matter.

Mayor Nelson then brought up for discussion a problem confronting the City Planning Commission with respect to the establishing of a business zone along the state highway through Junction City and the establishing of a set-back line for buildings along this thoroughfare. He said that the Pacific Highway extends for 17 blocks through the city and that they would like an expression from the State Highway Commission as to whether or not the city should adopt a zone plan which would prohibit the establishment of additional business blocks along this street, and whether or not the city should adopt a set-back line for buildings fronting on this street.

Mr. Washburne pointed out that for the most part the present business section of Junction City lies east of the highway and as a result there is very little traffic congestion along the highway. It was his thought that by proper zoning the city could keep the traffic congestion in the business district where it is at the present time which would leave the highway open and free such as will obtain in Albany and Oregon City when the highway work now under way at those places is completed.

Chairman Cabell advised that, while the Commission now has authority to control signs, et cetera, on state highways outside of incorporated cities and towns, it does not have as much control over these matters as it feels it should have from the standpoint and good of the general public, and there is a question whether or not the Commission should be responsible for or have

jurisdiction over the establishment of zones along the highways within municipalities. He gave as his personal opinion that the zoning feature should be controlled locally although he advised that he has not as yet given serious consideration to the matter, in fact has not had time to study it.

Mr. Washburne suggested, in view of the fact that this problem has not as yet been made public in Junction City, that the matter be discussed in private. Accordingly at 9:00 o'clock p. m. the Highway Commission and the City Planning Commission adjourned to the directors' room of the United States National Bank of Portland, Junction City Branch, where Mayor Nelson presided.

Mr. Kennedy, Chairman of the City Planning Commission, explained their plan for the establishment of zones and a set-back line for new buildings.

Mr. Washburne asked the Commission for a statement which would help the City Planning Commission in passing a city ordinance providing for zones and for the establishment of a set-back line on the highway route.

Chairman Cabell gave as his thought that a set-back line is proper and that the Engineer will advise the city relative thereto as soon as it has been determined; however, both matters involve the establishment of a general policy to be followed throughout the state, hence the Commission must look at it from all standpoints in order to be consistent in the disposition of all cases. The Commission, he said, hesitates and does not consider it proper to adopt any rule as a general policy which appears to be dictatorial, hence is not in a position to make any commitment at this time but will be pleased to give the matter study and will help in the matter as much as possible inasmuch as the Commission wants to continue its friendly relationship with the city and its Planning Commission. Commissioner Clough concurred in the remarks of Chairman Cabell.

The Engineer pointed out that the present highway through Junction City is not a four-lane highway as has been intimated, but is really a wide two-lane highway. It was his thought that the establishment of a set-back line would be desirable so when the highway south of Junction City is widened to four lanes the work could be extended through Junction City without extra cost for moving buildings, however he is not in a position at the present time to advise just how much of a set-back line should be provided. This matter was discussed at considerable length but no definite action was taken except that the Planning Commission was given to understand that the Commission would advise them as soon as possible.

The meeting was adjourned at 10:00 o'clock p. m.

Washburne
State Highway Engineer

W. S. Seay
Secretary

Henry F. Cabell
Chairman

John M. Clough
Commissioner

Salem, Oregon, November 21, 1939

The State Highway Commission reconvened in special session at 9:30 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

The Commission had under discussion the Engineer's report on the complaint of Mrs. Joseph Franswa, Eugene, relative to her property at the corner of Abbey and Sixth Streets in Newport. It appears that when the Oregon Coast Highway was constructed through this town the area between the Franswa property and the highway right of way line was utilized as a borrow pit, all vegetation, top soil, et cetera, having been removed, which resulted in a subgrade consisting entirely of fine sand subject to drift and movement during the summer trade winds. This area being directly west of the Franswa property and the prevailing trade winds being from that direction, the result was the constant drifting of sand onto the Franswa property which interfered with the driveway entrances, et cetera. The Engineer advised that this condition can be corrected only by covering the sand with top soil and planting the area to vegetable growth; further, that he had the matter investigated and it was found that the State Highway Department was responsible for this condition and temporary relief was provided, but to entirely remedy the cause of the complaint will require an expenditure of \$1,600, the work to consist of finishing the highway grade and planting the area. He recommended approval of this expenditure. The Commission approved the recommendation unanimously.

The Engineer reported the condition of the Tiller-Frail Secondary Highway, in Douglas County, the improvement of the same having been requested by Mr. P. A. Briggs, Myrtle Creek. He advised that inspection of this road discloses that the surface is in very poor condition being full of chuck holes and corrugations which are the result of heavy hauling. Between Canyonville and Milo, he said, a distance of 16.8 miles, the road is about 20 feet wide but between Milo and Tiller, a distance of about 8 miles, the road is very narrow, being not more than 10 feet wide in certain places. He estimated that to provide a standard oiled highway from Canyonville to Milo, which is the limit of the farming country, would cost approximately \$38,600. He recommended approval of the project using state forces to do the work during 1940 if funds are available to finance it, otherwise that the project be done in two working seasons, 1940 and 1941. After discussion, and in view of the limited amount of state funds available, the Commission approved the recommendation by unanimous vote with the understanding that the work would be done in two working seasons. The Engineer was thereupon instructed to include in the 1940 budget an item of \$20,000 for this purpose.

The Engineer reported the results of a survey in Klamath Falls for the installation of traffic signals. He estimated the cost of the signals recommended by the Traffic Engineer for installation at this time at \$14,350

of which amount the state would pay about \$6,600 and the city \$7,750, considering that the state would participate to the extent of paying 50 per cent of the cost of the "fixed time" and "traffic actuated" signals installed on state highway routes, and 100 per cent of the cost of installing "overhead" flashing signals on such routes, and that the city would pay the balance of the expense, including 100 per cent of the cost of signals installed on streets that are not state highways. He recommended approval of the project on such basis and that the matter be covered by appropriate contract between the state and the city; also that the city be required to deposit with the Commission a certified check in the amount of its share of the cost before any work is done. The Commission approved the recommendation unanimously and so ordered.

In this connection Commissioner Clough reported a request for a traffic signal installation at the point where the Klamath Falls-Malin Highway crosses the Oregon, California & Eastern Railroad near Merrill, in Klamath County. The Engineer advised that the current program for traffic signal installations has already been prepared and it is now too late to make any change. Further that this particular grade crossing was discussed in the preparation of such program but was not considered very hazardous and was placed rather low on the priority list. He said that he would bear the project in mind in the preparation of future programs of this kind but suggested that the proper solution would be for the sponsors of the signal to take the matter up direct with the railroad company and the Public Utilities Commissioner. The Commission approved the suggestion and so ordered.

The Commission had under discussion a request from the people of Sweet Home for the oiling of the Santiam Highway through their town. The Engineer recommended approval of the project which he estimated would cost about \$3,000, the work to consist of rocking and oiling the strips between the present highway pavement and the curb lines provided the City of Sweet Home will pay for the rocking or graveling of the unpaved portions as is needed to provide a proper base for the oil mat which expense, he said, the city officials have orally agreed to assume. The Commission approved the recommendation unanimously.

Reconsideration was given by the Commission to the request of the Town of Sisters for the oiling of the unoiled strips adjacent to the highway pavement through that town. The Engineer estimated that such work would cost about \$2,000 and recommended approval of the expenditure as a minor betterment project, the work to be done during the summer of 1940. The Commission approved the recommendation unanimously.

The Engineer reported on the request of Stewart Grange No. 805 and other residents and taxpayers of Baker County for the construction of guard-rail along the narrow and dangerous curves on the Sumpter Valley Highway between Salisbury and Mason Siding. He said that this highway is narrow and crooked and dangerous to travel but in his estimation construction of guard fences would not eliminate the hazard. It was his thought that the \$8,000 that is required to finance the guard fence construction could be spent to much better advantage by reconstructing the highway itself. He suggested in view thereof that the request for the guard fence be denied but that he be authorized to make a survey to determine the minimum amount that it would take

to widen the road sufficiently to make it safe for travel. The Commission by unanimous vote authorized the Engineer to make such survey.

The Commission also had under discussion the Engineer's report on the cost to construct a sidewalk or footpath along the Wallowa Lake Highway between LaGrande and Island City as has been requested by Congressman Walter M. Pierce and the County Court of Union County. He estimated that such footpath would cost approximately \$4,000. In the discussion of this matter it was pointed out that the number of requests for sidewalk construction along state highways is steadily increasing which indicated to the Commission that it would be advisable to conduct a state-wide investigation of such projects so as to provide a formula for the future handling of work of this kind. The Engineer was thereupon authorized and instructed to make such state-wide survey in order that each project may be given a preference rating.

The Commission withheld action on the following requests for sidewalk construction pending completion of the survey and the development of the formula which is to be based on cost of construction, pedestrian traffic count, accident records, et cetera:

Request of the Cities of Gearhart and Seaside for sidewalk construction along the Oregon Coast Highway between these towns. In connection with this matter the Commission considered, in view of the fact that these towns are seaside resort towns, that the pedestrian traffic count should be taken during the summer season when pedestrian traffic is heaviest because a count taken at any other time of the year would not be indicative of the traffic that has to be taken care of. The Engineer was instructed to conduct such traffic count at that time.

Request for construction of footpath along the Nehalem-Manzanita County Road in the vicinity of Manzanita School.

Request for construction of sidewalk along the Pacific Highway extending south from Hayesville School to Salem.

Request for construction of footpath along the Medford-Provost Secondary State Highway, in Jackson County.

The Commission also considered the request of the Parkdale Parent Teachers' Association for sidewalk construction along the Hood River Secondary Highway in the town of Parkdale. In regard to this project, the Engineer advised that only 75 feet of sidewalk construction are involved which would cost about \$100. He recommended approval of the project in view of the small cost. The Commission approved the recommendation.

The Commission also discussed a request for sidewalk construction on the Oregon Coast Highway between Third Street and Tenth Street in the city of Coquille. It appeared to the Commission that this project should be given special consideration in view of the fact that it is located within the city limits of Coquille. The Engineer advised that considerable grading work would have to be done before the sidewalk could be constructed at the proper location.

He estimated the cost of the project, including the grading work and sidewalk construction, right of way, et cetera, at \$3,200 and advised that it would be a desirable improvement because a real hazard now exists at this location. It appeared to the Commission that there is immediate need for the improvement of the sidewalk facilities at this particular location but that the responsibility for the improvement is a joint obligation of the state and the city. In view thereof the Commission decided to proceed with the improvement if the city will cooperate in the cost thereof. The Engineer was thereupon authorized to negotiate with the city on the basis of the state widening the highway grade and preparing it for the sidewalk and the city constructing the sidewalk.

Mr. Jim E. Smith, Commissioner, and Mr. N. C. Hubbs, County Engineer of Marion County, appeared before the Commission at this time in regard to snow removal operations on the North Santiam Highway. The State Highway Engineer explained that this road is not a state highway, hence the State Highway Commission is without authority to spend state funds either for its improvement or for snow removal to maintain travel during the winter season, thus, if the road is to be kept open for travel during the winter months, the cost thereof must be paid by the county and the federal government. He further explained that the government has indicated a willingness to remove snow from its portion of the section in so far as it is able to do so with push plow equipment, but when the snow becomes so deep that it cannot be removed by such equipment its operations will have to be discontinued because they do not have the proper equipment to handle the excessive depth snow. He inquired as to the attitude of the Marion County Court relative thereto.

Mr. Smith advised that the county is in the same predicament as the government with respect to equipment but he thought that the county court would be perfectly willing to enter into an agreement with the state for the use of the state's heavy snow equipment as was done last year if that is agreeable, the state to furnish the equipment and operate the same with the understanding that the county will reimburse the state for the expense as bills are submitted. He agreed to take the matter up with the other members of the county court immediately and let the Commission know by letter within a very short time just what to expect from the county. It was agreed by all that if this arrangement is approved it should be covered by an appropriate written agreement among the parties concerned.

Reconsideration was given by the Commission to the matter of improving the Siuslaw Highway across the summit of the Coast Range concerning which matter a hearing was held in the town of Junction City on the previous evening. Chairman Cabell reviewed the events of the previous evening and particularly pointed out that the people at such hearing voted unanimously in favor of the modified improvement suggested by the Engineer which was estimated to cost about \$60,000. After discussion the Commission authorized an expenditure of \$60,000 in 1940 to rebuild this section of road which is about three miles in length and instructed the Engineer to make provision for such project in the 1940 budget.

The Commission also reconsidered the advisability of permitting wood

stave pipe, known as McPherson creosoted pipe, to compete as an alternate with concrete pipe and corrugated metal pipe on state highway construction work. After a lengthy discussion of this matter the Commission decided to try out, as an experiment, a quantity of such creosoted timber pipe, such quantity to be limited to not more than 10 per cent of the annual pipe requirements of the State Highway Department, approximately 6,000 feet, and the purchase of the same to be made as a result of competitive bidding. The Engineer was instructed to arrange the details so that the pipe will be used in contract work as well as state force work throughout the entire state. He was also instructed to present the matter to the federal authorities for their approval.

In this connection the Commission discussed the matter of changing its present policy with respect to the use of concrete pipe as compared to metal pipe and decided not to make any change in the present policy which is to the effect that this business shall be divided equally, and during the conduct of the experiment with creosoted wood pipe the same policy shall be followed after allowance has been made for the timber pipe.

The Commission discussed the selection of projects for the 1941 Regular Federal Aid Program, the 1941 Federal Lands Highway Program, and the 1941 Federal Aid Secondary Highway Program. A decision with respect to the Federal Lands Highway Funds was deferred for the time being, however the Commission tentatively selected the following projects from lists presented by the Engineer for the Regular Federal Aid Primary Highway Program and for the Federal Aid Secondary Highway Program:

1941 REGULAR FEDERAL AID PROGRAM

County	Highway	Section	Miles	Kind of Work	Estimated Cost
<u>DIVISIONS #1 AND #2</u>					
Multnomah	Columbia River	Troutdale-Dodson		G.	\$ 260,000
		Front Street, Portland		G. & P.	250,000
Clatsop & Tillamook	Oregon Coast	Hug Point-Manzanita	8.7	S., B-11	100,000
Columbia	Columbia River	Scappoose-Multnomah County Line	3.0	G. & P.	122,000
Linn	Santiam	Cascadia-Upper Soda	11.2	S. & O.	75,000
Washington	Pacific West	Mult. Co. Line-Tigard	1.2	G. & P.	75,300
		or			
Clackamas & Marion	Pacific East	Aurora Bridge			75,300
Lincoln	Oregon Coast	Depoe Bay	1.0	G. & Bit M.	75,000
Clatsop	Oregon Coast	Astoria	0.3	G. & P.	40,000
Columbia	Columbia River	Rainier		P.	30,000
Benton	Pacific West	Corvallis-North & South		P.	40,000
Washington	Wolf Creek	Wolf Creek Tunnel			225,000
	Roadside Improvement				15,500
	Planning Survey				23,200

1941 Regular Federal Aid Program (continued)

County	Highway	Section	Miles	Kind of Work	Estimated Cost
<u>DIVISION #3</u>					
Curry	Oregon Coast	Brookings	0.7	G.&Bit.M.	\$ 70,000
Douglas	Pacific	Rice Hill-Turkey Hill	2.2	G. & P.	112,000
Josephine	Pacific	Grants Pass-Green Creek, East Unit	0.7	G. & P.	30,000
Douglas	Pacific	Kelley Corner-Kinston Bridge	0.7	G. & P.	50,000
Coos	Oregon Coast	Bandon	0.6	G.&Bit.M.	40,000
	Roadside Improvement				5,900
	Planning Survey				8,100
<u>DIVISION #4</u>					
Wasco	Sherman	Shaniko-Cow Canyon, East Unit		S. & O.	60,000
Lake	Dalles-Calif.	Horse Ranch		G. S., O.	30,000
Klamath	Dalles-Calif.	Rabbit Flat	3.0	G.&Bit.M.	100,000
Gilliam	Columbia River	John Day River-Blalock, West Unit	3.0	G.&Bit.M.	86,500
Wheeler	Ochoco	Mitchell-West	4.0	G. & O.	70,000
Crook		Prineville		G. & P.	40,000
	Roadside Improvement				4,800
	Planning Survey				7,200
<u>DIVISION #5</u>					
Umatilla	Oregon-Wash.	Pendleton-Adams	11.0	Bit. M.	\$ 134,500
	Old Oregon Trail				135,000
Malheur	John Day	Brogan-Jamieson	4.8	G. & O.	75,000
Grant	John Day	Goose Rock			85,000
Union	Wallowa Lake	Minam Hill	4.0	G. & O.	130,000
Baker	Old Oregon Tr.	Troy Line Change		G.&Bit.M.	50,000
Umatilla	Oregon-Wash.	Milton	0.5	G. & P.	25,000
Umatilla	Oregon-Wash.	Pilot Rock	0.5	G.&Bit.M.	25,000
	Roadside Improvement				6,800
	Planning Survey				10,200

1941 FEDERAL AID SECONDARY PROJECTS ON STATE HIGHWAYS			
County	Project	Kind of Work	Estimated Cost
<u>DIVISIONS #1 AND #2</u>			
Columbia	Banser Bridge-Mist	3.2 mi. Surface and Oil	\$ 60,000
Marion	Woodburn-Molalla	Grade and Oil	20,000
Lincoln	Silets	Grade and Surface	20,000
	Planning Survey		1,400
		Total Divisions #1 & #2	\$101,400
<u>DIVISION #3</u>			
Jackson	Little Butte	Grade and Oil	\$ 30,000
	Planning Survey		500
		Total Division #3	\$ 30,500
<u>DIVISION #4</u>			
Crook	Warm Springs	Grade	\$ 35,000
Sherman	Buck Hollow-East -		
	Sherars Bridge Hwy.	Grade	15,000
	Planning Survey		500
		Total Division #4	\$ 50,500
<u>DIVISION #5</u>			
Morrow	Happner-Rhea Creek,		
	West Unit	Grade and O-11	\$ 40,000
Umatilla	*Umatilla River Bridge		20,000*
Grant	Kimberly-Monument		20,000
	Planning Survey		600
		Total Division #5	\$ 80,600
* \$20,000 Additional State Funds Allocated			

1941 FEDERAL AID SECONDARY PROJECTS ON COUNTY ROADS			
County	Project	Kind of Work	Estimated Cost
<u>DIVISIONS #1 AND #2</u>			
Clatsop	Fort Stevens Road	Grade and Pave	\$ 25,000
Tillamook	(Projects to be selected)		20,000
Marion	Silverton Road	Grade and Pave	25,000
Multnomah	Skyline Blvd.	Surface and Oil	35,000
	Planning Survey		1,400
		Total Divisions #1 & #2	\$106,400

Union	North Powder River Road	Oil	\$ 20,000
	Planning Survey		<u>600</u>
	Total Division #5		\$ 20,600

The Engineer was authorized to proceed with the preparation of the plans for such projects and the Attorney was authorized to secure right of way options for the same at once in accordance with the general policy adopted by the Commission on the previous day.

Commissioner Aldrich brought up for discussion the matter of improving the Pendleton-McKay Creek Section of the Pendleton-John Day Highway. The Commission instructed the Engineer to make a location survey of the section and to render a cost report thereon.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room with the same persons present and participating.

The Engineer brought up for discussion the matter of granting leaves of absence to employees who are members of the United States Army or Navy Reserve Corps. He advised that there are a number of employees of the Highway Department in this category and there is a possibility, in view of the unsettled condition obtaining throughout the world, that these men will be called for service. It was his thought that the status of these men should be given full recognition and that they should be given leaves of absence during the period that they are called for duty, so that they will not lose their priority standing with the department. The Commission concurred in the viewpoint of the Engineer and thereupon by unanimous vote decided to give to each of such employees affected a leave of absence if and when he is called for military duty.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Wayside strips along the Pendleton-John Day Highway, in Harney County, between Burns and Canyon City:- The Parks Superintendent advised that it is possible to purchase from the United States Government under the Recreational Act 560 acres of timber land situate in Township 21 S., Range 31 E., W. M., at the rate of \$1.25 per acre; or, if the Commission prefers, they could be leased for the sum of \$35 per year. He advised that this land is located in what is known as Poison Creek Canyon and is highly desirable as an addition to the state parks system, particularly in view of the fact that it fronts on the highway for a distance of about 2½ miles. He strongly recommended acquisition of the area by purchase at \$1.25 per acre, or \$700 total. The Commission approved the recommendation unanimously.

Recreational area at the confluence of the Crooked River, Deschutes River, and Metolius River:- The Parks Superintendent advised that he has already secured from the Federal Government a 50-year lease on a tract containing 1,150 acres of land, at this location, same being secured under what is known as the Bankhead-Jones Farm Tenant Act, and that there is no yearly rental attached to this lease. Further, that he has also secured from the United States Bureau of Reclamation a lease covering an additional 2,852 acres of land at this location, for which the Government is demanding the sum of \$10 per year. However, this lease is limited to ten years. He requested instructions whether or not to accept the property on the basis of a 10-year lease, and gave as his thought that such time-limit is too short to justify an expenditure of very much money for development purposes. The Commission concurred in the Parks Superintendent's viewpoint and thereupon referred the matter back to him, to secure, if possible, a 99-year lease.

Mehalem Bay Sandspit:- The Parks Superintendent reported that, as previously authorized by the Commission, he has negotiated for the acquisition of privately owned lots in this area and he has been able to secure from the Hammond Lumber Company, for the payment of \$250, the equity of this company in Lots 5 and 6, of Section 33, Township 3 N., Range 10 W., W. M. However, it appears that there is a tax lien against this property amounting to \$542.53, which the Tillamook County Court feels it has no legal right to waive, but in lieu thereof the county has expressed a willingness to donate to the state the S.W.¼ of the N.W.¼ of Section 33, Township 3 N., Range 10 W., W. M., in the same locality, containing about 60 acres. He recommended payment of the back taxes on Lots 5 and 6 in order to secure full title to these lots, and acceptance of the county's offer to donate the other tract in lieu of the waiver of the tax lien. The Commission approved the recommendation unanimously.

Salmon River Highway timber strips:- The Parks Superintendent brought up for discussion matters pertaining to the acquisition from the Miami Corporation of timber strips along the Salmon River Highway. He advised that a letter has been received from Mr. L. H. Mills, representing the company, stating that the company would defer the sale of this timber for a period of six months from November 13, 1939, in order to give the state first opportunity to purchase the property after Congress has acted on the bill now before it

providing for an appropriation of federal funds to finance the acquisition of areas of this kind. The Commission approved the report.

Acquisition of 10-acre timber tract adjacent to Nehalem Highway at Natal Grange:- The Parks Superintendent advised that Mrs. Pearl Becker, Secretary of the Columbia County Pomona Grange, has been carrying on negotiations with the Clark and Wilson Lumber Company, owners of this tract, for some time relative to the acquisition thereof, and has been endeavoring to get the company to reduce its price of \$6,000 which is double the amount that the Commission previously authorized as payment for it. However, the company has absolutely refused to sell the property for less money although it will accept \$3,000 for half of the tract. Chairman Cabell advised that he inspected this tract on the ground and in his estimation the property is worth \$3,000 but no more. After discussion the Commission decided not to purchase the tract and instructed the Parks Superintendent to so inform Mrs. Becker.

The Commission had under discussion a communication from Foster and Kleiser Company, an outdoor advertising concern, outlining a suggestion for state-wide zoning legislation for signs. The Engineer advised that he has studied this matter thoroughly and is inclined to believe that, while the proposed legislation is desirable, it is somewhat too drastic for practicability. He explained briefly the various points of the proposed bill which the Commission discussed at length. It was the Commission's thought that it should have full control of state highways insofar as encroachments by signs or anything else are concerned but the matter of zoning private property is a problem which should be sponsored by local organizations which the Commission would be pleased to advise if its viewpoints were requested. The Engineer was instructed by the Commission to convey such information to Foster and Kleiser Company.

Reconsideration was given by the Commission to the establishment of the procedure authorized by the 1939 Legislature for approving state highway fund vouchers whereby the necessity for a majority of the Commissioners to sign each individual voucher in excess of \$200 is eliminated and their approval indicated by the signing of prepared lists of such vouchers. The Engineer reviewed the proposed procedure in detail. After discussion the Commission decided unanimously to give it a trial for a couple of months to see how it functions.

A letter was presented from the Coos Bay Dredging Company, Marshfield, offering to pay \$100 for two state-owned pontoons located at the old North Bend ferry slip at Coos Bay. The Engineer advised that the Commission owns only one pontoon at this location, the other one referred to having been given to Mr. Andrew Stambuck for his use in connection with his contract with the Commission for the operation of the Enegren Ferry across Coos River. He recommended the sale of the other pontoon to the Coos Bay Dredging Company for the sum of \$50 in view of the fact that it is no longer of any value to the state and is simply deteriorating on the mud flats in North Bend. The Commission approved the recommendation unanimously.

The matter of permitting markers to be maintained on the Pacific Highway East at the north and south entrances to Oregon City, bearing historical

information with respect to the McLoughlin Memorial Home, had the attention of the Commission. The Commission decided to permit such signs to be located on the highway at such locations provided the reading matter that is to appear on them meets with the approval of competent authority. The Engineer was instructed to ask Mr. Lewis A. McArthur, President of the Oregon Historical Society, to prepare such reading matter and to submit same to the committee in charge of the McLoughlin Memorial Home before these signs are erected.

A letter was presented from Mr. Jack Burton, Wallowa, requesting permission to plant clover seed on two small parcels of state-owned property adjacent to the Wallowa Lake Highway at the west city limits of Wallowa. The Commission deferred its decision on this matter pending investigation and report from the Engineer as to what is a fair rental value to place on the property.

The Commission had under discussion a request from Mr. Blaine Stanley, Woodburn, for permission to drain into the state highway ditch, on the Pacific Highway north of Hubbard, water from a swimming pool which he proposes to construct near the highway at this location. The Engineer advised that investigation reveals that if the water from this pool is emptied into the highway ditch it will have to be carried along the highway for about one-half mile and then along the county road for about three-quarters of a mile before it could find a natural outlet. It was his thought that approval of the request would establish a very undesirable precedent and would possibly evoke criticism from adjacent property owners and the Marion County Court. He recommended that the request be denied. The Commission approved the recommendation unanimously.

The Commission discussed several pictures of Indian houses at Priest Rapids, Washington, received from Mr. C. O. Bunnell, Farm Service Supervisor of the Pacific Power and Light Company, as a suggestion for the improvement of the Indian village located adjacent to the Columbia River Highway at Celilo, Wasco County. The Commission referred the matter to the Engineer to discuss with the Indian Agent in charge of this Indian village.

The Commission considered and denied a request from County Judge A. R. Bowman, Crook County, for state aid in the cost of illuminating the state highway in Prineville, it appearing to the Commission that this is strictly a city responsibility.

The Engineer reported that in accordance with authority previously granted him by the Commission he awarded on November 10, 1939, to Leonard & Slate, the contract for grading and paving the West Unit, Grants Pass-Green Springs Section of the Pacific Highway, in Josephine County, Leonard & Slate having submitted the low bid for this project on November 3, 1939, and the conditions of the award having been satisfied. The Commission by unanimous vote confirmed the award as reported.

The Commission discussed briefly the matter of granting special permits for the transportation, over state highways, of loads longer than the length limits specified by statute. A decision in this matter was deferred

until the next meeting when the Engineer is to submit a tentative form of application for permits covering such movements. The Secretary was authorized and instructed to issue permits to cover such movements as in the past until otherwise directed.

The Engineer requested authority to purchase the following equipment:

- 12 4-wheel drive trucks such as Fageols and Republics - 12 old trucks to be traded in as part purchase price. Estimated net total cost \$54,000.00;
- 4 2,000-gallon semi-trailers for transportation of oil. Estimated total cost \$8,820.00;
- 1 self-contained air pressure unit, including tank and motor, for Santiam maintenance headquarters. Estimated cost \$250.00.

The Commission approved these purchases by unanimous vote; however, ordered that, before purchasing the air pressure unit for the Santiam headquarters, an examination be made of the equipment that is being acquired from Hellivell and Nelson in Cottage Grove in connection with a right of way transaction at that place, it being the thought of the Commission that this equipment should be used at the Santiam headquarters if it is satisfactory, rather than buy new equipment.

The Commission had under discussion the matter of designating a route for U. S. Highway Route No. 95 through the state of Oregon. The Engineer suggested the adoption of a route which enters Oregon at a point on the Idaho state line, about two miles north and east of Malloy Ranch, in Malheur County, and extends southerly therefrom along the I.O.N. Secondary State Highway, a distance of about 22 miles, to the town of Jordan Valley; thence continuing along the I.O.N. Secondary State Highway in a southwesterly direction, a distance of about 32 miles, to the Owyhee River bridge; thence southerly continuing along the said I.O.N. Secondary State Highway, a distance of about 64 miles, to the Nevada state line at McDermitt. He advised that he discussed this matter with Mr. H. R. Flint, Acting Commissioner of Public Works of the State of Idaho, at the meeting of the American Association of State Highway Officials in Richmond, Virginia, and such routing meets with Mr. Flint's approval. After discussion the Commission adopted such route by unanimous vote and instructed the Engineer to recommend it to the American Association of State Highway Officials by letter.

The Commission considered and adopted by unanimous vote the following resolution abandoning a portion of the Soda Creek-Tombstone Summit Section of the Santiam Highway, in Linn County, such action having been recommended by the Engineer in view of the fact that the highway has been reconstructed on other alignment and that the section being abandoned is of no further value from the state highway standpoint:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Soda Creek-Tombstone Summit Section of the South Santiam Highway in Linn County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Soda Creek-Tombstone Summit Section of the South Santiam Highway in Linn County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Linn County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

That certain section of the old right of way of the Soda Creek-Tombstone Summit Section of the South Santiam Highway lying between mile post 52 and mile post 65 of the reconstructed highway.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant

Map filed in Right of Way Abandonment and Retention file - No. 68

State Highway Engineer, and is dated October 10, 1939, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Linn County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Linn County and beyond any responsibility or supervision by the State Highway Commission.

The Secretary presented a letter from the Weston Chamber of Commerce inviting the members of the State Highway Commission to attend a get-together meeting of members of the Chambers of Commerce in the vicinity of Weston on November 29, 1939, to celebrate the oiling of the Weston-Elgin Secondary State Highway. It was decided that Commissioners Aldrich and Clough and the State Highway Engineer should attend this meeting.

A letter was presented from the Port of Arlington Commission requesting the designation and improvement as a state secondary highway of the county road which extends from Morgan in Morrow County to Arlington in Gilliam County; also asking the Commission to authorize a reconnaissance survey of this road at an early date. In the discussion of this matter it was pointed out that this road carries very little traffic at the present time. The Commission decided that it was not justified in spending state funds for the improvement of the road until the traffic develops; also that, in conformity with the established policy, a request for such secondary highway designation should be initiated by the county courts concerned. The Secretary was instructed to so inform the Port of Arlington Commission.

A petition was presented from property owners and residents adjacent to the Pacific Highway south of Salem requesting a change in the proposed grade line of the highway improvement that is under way at this loca-

tion. This matter was referred by the Commission to the Engineer to discuss with the petitioners and report back to the Commission if necessary.

The Commission had under discussion a letter from Senator W. H. Strayer requesting that the name of the Old Oregon Trail be shown upon the official highway map of Oregon, and particularly calling attention to Section 44-1203, Laws of Oregon for 1930, in regard thereto. The Engineer was instructed to discuss this matter with Senator Strayer and to call his attention to the action taken by the Commission on the previous day authorizing the erection of signs pointing out historical locations along this highway.

The Commission discussed and deferred for future consideration a petition from residents of Curry County requesting miscellaneous improvements to the Oregon Coast Highway in that county.

The Commission also discussed and ordered filed a letter from the City of The Dalles advising that the city has granted to local merchants and city clubs permission to decorate the city streets, including the state highway route through the business district of The Dalles, during the coming Holiday Season and further advising that the city assumes all liability and protects the state from any claims that may arise by reason thereof.

The Engineer reported on the following requests for installation of traffic signals, traffic lights, et cetera:

Request of the City of Tillamook, through its Street Commissioner, for traffic signals (stop and go):- The Engineer advised that a survey of conditions at this place indicates that the expense of such installation is not justified and it is his recommendation that the request be denied. The Commission approved the recommendation with the understanding that the matter would be reconsidered when the traffic problem warrants.

Request from the City of Cornelius for installation of a flashing beacon on the Tualatin Valley Highway:- The Commission denied the request on recommendation of the Engineer.

Request of the South Lane-North Douglas 99 Highway Improvement Association and the Cottage Grove Chamber of Commerce for the installation of a flashing beacon in Cottage Grove. The Engineer recommended that the request be denied in view of the possibility of the relocation of the highway at this place, and that the condition be temporarily handled by signs. The Commission approved the recommendation.

Request from the Central-East Portland Community Club for the installation of traffic lights at the intersection of N. E. Union Avenue and Vancouver Avenue, in Portland. The Engineer recommended denial of this request, the survey indicating that the expense is not justified, but that a traffic island be constructed in lieu thereof. The Commission approved the recommendation.

Request of the City of Oregon City for traffic signal installations

at the intersections of Main Street with Fifth, Seventh, Tenth and Fourteenth Streets, in Oregon City:- The Engineer recommended postponement of action on this request until the new highway through Oregon City is completed. The Commission approved the recommendation.

Request of the City of Oswego for installation of a traffic light on the Oswego Highway. The Engineer recommended that the request be denied but that the city adopt an ordinance making certain changes in its speed regulations. The Commission deferred its decision pending further investigation by the Engineer.

Request of the City of Ontario for the installation of a traffic signal at the intersection of Oregon and Idaho Streets in Ontario:- The Engineer gave as his thought that the expense of a traffic signal at this location is not warranted. He recommended in lieu thereof the installation of a flashing beacon estimated to cost \$250. The Commission approved the recommendation.

Request of the City of Clatskanie for installation of a flashing beacon on the Lower Columbia River Highway at the intersection of Bridge Street, Front Street and Nehalem Street, in Clatskanie:- The Engineer recommended approval of this installation which he estimated would cost approximately \$250. The Commission approved the recommendation unanimously.

Request of the City of Portland for the installation of a traffic light at the intersection of N. E. 82nd Street, N. E. Halsey Street, and N. E. Jonesmore Street, Portland:- The Engineer recommended the installation of an overhead flashing light costing approximately \$250. The Commission approved the recommendation unanimously.

Request of Oregon College of Education at Monmouth for the installation of traffic signals on the Pacific Highway West in front of the school campus:- Action on this matter was deferred pending consultation with Dr. C. A. Howard, President of the School. The matter was referred to the State Highway Engineer to handle personally.

The Commission had under discussion a letter from the City of Medford making formal application for permission to install a traffic signal at the intersection of Sixth Street and Central Avenue in Medford. The Engineer advised that the City has agreed to install a signal similar to and in conformance with the other signals that have been installed in their city, with the exception that they are planning their wiring so that this particular signal may be disconnected whenever they so desire; also that the installation will be made and operated at no expense to the state whatsoever, and that the only reason the city is asking the Commission's approval is because that is required by statute, particularly by Section 55-2002, Oregon Code 1935 Supplement. He recommended approval of the city's request subject to the condition that the equipment installed conforms to state's standards and that it be synchronized with the signal at the adjacent intersection of Main Street with Central Avenue. The Commission approved the recommendation unanimously.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

Clifford A. Dunn, contract No. 2170, for regrading, surfacing and oiling the Baker Gulch-Lick Creek Section of the Little Butte Secondary Highway, in Jackson County, requested an extension of time from September 15 to September 29, 1939, within which to complete this job. He attributed his failure to complete this project within the specified time limit to rainy weather which interfered with oiling operations. The Engineer advised that this contract was awarded on April 7, 1939, but Mr. Dunn did not commence construction until June 27, 1939, and then worked only a few days when operations were stopped until August 1 because of lack of proper equipment. He further advised that in his estimation rainy weather is not a legitimate reason for failure to complete the project within the specified time limit. He recommended that the extension of time now requested be granted but that the contractor be required to reimburse the state for the extra engineering expense incurred subsequent to the date of completion specified in the contract. A letter was presented from the District Engineer of the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Leonard & Slate, contract No. 2176, for grading, surfacing and oiling the Charleston-Sunset Bay Section of the Cape Arago Secondary Highway, in Coos County, requested an extension of time from September 30 to October 28, 1939, within which to complete this project. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on April 28, 1939, and work was started on May 8, 1939. The chief reason for the contractors' failure to complete the job within the specified time limit, he said, was that they were required to install some 1200 lineal feet of drain tile which was not included in the contract but was performed under special price agreement. It was his thought that the contractors are entitled to an extension of time to October 21, 1939, without penalty but that they should be charged with the engineering expense incurred subsequent to that date and he so recommended. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2120, 2170, 2172, 2176, 2179, 2197, 2206, and 2225, for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state

highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2120, with C. J. Montag & Sons, for construction of Main Street Undercrossing in Klamath Falls, Klamath County. Completed November 17, 1939.

Contract No. 2170, with Clifford A. Dunn, for grade widening, surfacing and oiling, also furnishing crushed rock in stock piles, on the Baker Gulch-Lick Creek Section of the Little Butte Secondary Highway, in Jackson County. Completed September 29, 1939.

Contract No. 2172, with Jacobsen-Jensen Company, for the construction of a bridge over Wilson River, and grading, surfacing, and oiling approaches thereto on the Mills Bridge Section of the Wilson River Highway, in Tillamook County. Completed November 14, 1939.

Contract No. 2176, with Leonard & Slate, for grading, surfacing, and oiling on the Charleston-Sunset Bay Section of the Cape Arago Secondary Highway, in Coos County. Completed October 28, 1939.

Contract No. 2179, with Birkemeier & Saremal for construction of the Interstate Avenue Lighting Project, on the Pacific Highway West, in the city of Portland, Multnomah County. Completed October 31, 1939.

Contract No. 2197, with Odom Construction Company, for the construction of the Santiam Junction maintenance buildings on the Santiam Highway, about 26 miles west of Sisters, in Linn County. Completed November 2, 1939.

Contract No. 2206, with D. L. Ashton, for roadside improvement on the Smith Point-Youngs Bay Bridge Section of the Oregon Coast Highway, in Clatsop County. Completed November 4, 1939.

Contract No. 2225, with Leonard & Slate, for grading the South Unit, Albany Section, of the Pacific Highway East, in Linn County. Completed November 7, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

NOV 21 1939

The Commission considered and signed agreements, et cetera, as follows:

Agreement with contractors Saxton, Looney & Risley disposing of their claim for extra compensation arising out of their contract No. 2145 for furnishing crushed materials in stock piles for the Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections of the John Day Highway, in Grant and Wheeler Counties.

Easement providing for use of a detour road across property owned by Raleigh Matthews and wife, in Jackson County, being right of way transaction No. 7227.

Bargain and sale deed conveying unto Charles Childs certain property located in Lot 7, Block A, Central Addition to the City of Albany, being right of way transaction No. 6377 and No. 6378.

Bargain and sale deed conveying unto the Oregon Washington Railroad and Navigation Company and the Northern Pacific Company two standard gauge railroad tracks and appurtenances which were constructed by the State Highway Department in connection with the Pendleton Railroad Grade Separation Project pursuant to terms of an agreement between the State Highway Commission, the City of Pendleton, the Oregon Washington Railroad and Navigation Company, the Union Pacific Railway Company, and the Northern Pacific Railway Company, dated May 1, 1936, being right of way transaction No. 2676.

Warranty deed conveying unto the Oregon Washington Railroad and Navigation Company and the Northern Pacific Railway Company certain property in Lots 7 and 8 of Block I, South Pendleton, Lot 4, Block H, of Reservation Addition to Pendleton, Lot 6 of Block I, South Pendleton, and other property, pursuant to terms of an agreement between the State Highway Commission, the City of Pendleton, the Oregon Washington Railroad and Navigation Company, the Union Pacific Railway Company, and the Northern Pacific Railway Company, dated May 1, 1936, being right of way transaction No. 2676.

There being no further business to come before the Commission at this time the meeting was adjourned at 4:00 o'clock p. m.

NOV 21 1939

Portland, Oregon, December 7, 1939

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for moving and sale of buildings were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards would be made at 3:00 o'clock p. m. in the same room:

BAKER-HOMESTEAD HIGHWAY

The Engineer reported results of negotiations with the United States War Department pertaining to the construction of the Oak Hill-Veneta Section of the Route "F" Highway, in Lane County, with particular reference to the attitude of the War Department with respect to the assumption of the extra cost of doing this work in view of the proposed construction of the Fern Ridge dam and reservoir. He advised that this matter has been discussed at numerous times and that he has a letter in his files signed by Mr. C. I. Grimm, Chief Civilian Engineer, dated July 29, 1938, stating that the War Department can find no legal obstacle to the matter of reimbursement to the state for expenditures made in connection with construction of the highway at an elevation above the high water that would be created by the dam, when funds are available; however, at a more recent conference with War Department officials, he was informed by Captain Berrigan that it would be impossible for the War Department to pay any portion of this expense, as, under the law, they could not pay for any highway that was not already constructed, although they would reimburse Lane County, for the county roads which were inundated, to the extent of the value of the existing facilities. This matter was discussed at considerable length and as a result the Engineer was instructed to secure a statement in writing from the War Department indicating briefly the extent to which the War Department will cooperate in this project.

The Attorney brought up for discussion matters pertaining to the Commission's condemnation suit against the Security and Investment Company of Oregon City for right of way needed for the Pacific Highway East along Water Street in Oregon City. He advised that this matter has come to trial and that a decision has been rendered, by which the jury has allowed the company the amount of \$26,500 as compared to the state's offer of \$20,000 and the company's

demand of \$60,000. He further stated that one of the attorneys for the defendant has indicated that this decision will not be appealed in the event that the state will pay 50 per cent of the cost of the defendant's witnesses, which aggregates \$1,355.20, the state's share thus being \$677.60. He explained that the state is not legally obligated to pay any portion of such expense, but, in his estimation, it would be advisable to do so in this instance in order to avoid an appeal to the higher court, which would necessarily delay further the construction of the Oregon City project. After discussion the Commission voted unanimously to assume the payment of one-half this witness expense, which would amount to \$677.60, provided it is legal. The Attorney advised that the Commission could legally do so.

Dr. Joseph D. Sternberg, Portland, came before the Commission in regard to a right of way matter at Albany. It appears that Dr. Sternberg owns certain property near the north city limits of Albany, particularly at the junction of the Pacific Highway East with the Albany Airport Road, and that in order to extend the Albany improvement of this highway it is necessary to acquire a narrow strip of Dr. Sternberg's property fronting on the present highway. Further, that the state's right of way agent has offered to pay to Dr. Sternberg \$100 per acre for the two acres involved, which is in conformity with prices paid for other property in that vicinity; but Dr. Sternberg feels that such price is far below the actual value of the property and is demanding \$500 per acre for his land. This matter was discussed at considerable length but the Commission deferred its decision pending personal inspection of the premises by Commissioner Clough, to whom the matter was referred.

Mr. Jim Nutter, Public Relations Director, Timberline Lodge, Inc., came before the Commission and advised that the United States Post Office Department has established a postoffice at Timberline Lodge and, in view thereof, it is the opinion of the Directors of Timberline Lodge, Inc., that the signs bearing the wording "Timberline" which have heretofore been erected by the state to direct traffic to Timberline Lodge should be changed to read "Timberline Lodge" at such time as the signs are renovated. The Commission took no action on this matter. (This matter was reconsidered and approved by the Commission at the December 20th meeting.)

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Offer of Mr. Elmer Bankus, Brookings, to donate to the state a 5-acre tract of land fronting on the Pacific Ocean at Brookings:- The Parks Superintendent recommended that the offer be refused in view of the fact that the state now owns two parks in the vicinity of Brookings,- one known as Harris Beach Park and the other as Azalea Park, and for the further reason that Mr. Bankus's property is situate practically in the town of Brookings, and, in his estimation, its preservation for park purposes is strictly a local matter. The Commission approved the recommendation.

Proposal of Mr. Fred Reynolds, Lakeview, for the establishment of a drinking fountain on the Fremont Highway about 14 miles north of Lakeview:- The Parks Superintendent advised that Mr. Reynolds owns some land adjacent to

the highway at this point on which there exists an artesian well, and he has volunteered to provide water for a drinking fountain on the highway right of way for general public use if the state will construct the fountain. The Parks Superintendent recommended acceptance of Mr. Reynolds's offer. The Commission approved the recommendation by unanimous vote subject to the condition that the fountain erected on the present highway fit in with the proposed new highway location.

Offer of Mr. B. E. Smith to sell to the state for the sum of \$3,250.00 a 140-acre tract of land situate adjacent to the Oregon Coast Highway just south of the state park that was acquired from the Pratt interests, in Lane County, more particularly between the present state park and Bob Creek, in Sections 14, 15, and 22, Township 15 S., Range 21 W., W. M.:— The Parks Superintendent advised that this property has very little value from the state parks standpoint. Further, that the acquisition of the same was previously considered by the Commission and was eliminated in favor of a more desirable tract in Curry County, there being insufficient funds available to finance the purchase of both tracts. He recommended that the state do not buy the Smith tract at this time. The Commission approved the recommendation.

Lease of 2,800 acres of government-owned land from the United States Reclamation Service at the confluence of the Deschutes River, Crooked River, and Metolius River, in Jefferson County:— The Parks Superintendent advised that the Reclamation Service will not grant a lease for a period longer than 10 years, which is insufficient time for the proper development of the area; further, that, as previously instructed by the Commission, he made inquiry as to the possibilities of securing a lease for 99 years and received a reply from Mr. John C. Page, Commissioner of the Bureau of Reclamation, as follows: "If upon termination of the lease in 1949 the land is still needed for reclamation purposes, the Commission can rest assured that a continuation of the lease will receive careful consideration in the light of the existing conditions. In the event the lands are released from the reclamation withdrawal, the Oregon State Highway Commission could file its application to lease the said area under the Act of June 14, 1926 (44 Stat., 741)." The Commission by unanimous vote approved the lease of this property for a 10-year period under the above condition, but instructed the Parks Superintendent to secure, if possible, a stipulation in writing that at the expiration of the lease in 1949 the State Highway Commission would be given first consideration in the renewal thereof. He was also authorized to proceed with the development of the property with C.C.C. forces regardless of whether or not he is able to secure a lease of longer duration than 10 years.

Purchase of 20-acre addition to Ecola State Park, in Clatsop County:— The Parks Superintendent reported that in order to protect the water supply to Ecola State Park it would be necessary to acquire from the Crown Willamette Company a 20-acre tract of land described as the N.½ of the N.E.¼ of the S.E.¼ of Section 18, Township 5 N., Range 10 W., W. M. He advised that, while the tract is heavily wooded, the timber is of little value from the conservation standpoint, particularly because the timber on the adjoining property has been logged; also, that if the property is owned by the state, he could develop it with C.C.C. forces. He recommended acquisition of the tract on the basis of

purchase of land only. After discussion, the Commission authorized the Right of Way Department to negotiate for the purchase of the property on such basis.

The Engineer reported on the request of residents of South Roseburg for the improvement of the connecting road between the Pacific Highway and South Main Street, Roseburg. He advised that investigation reveals that the connection in question includes a portion of the old Pacific Highway, being exactly the same route and traffic way that these people had before the highway was realigned. He further advised that it is contemplated to construct a guard fence along the face of the cut for the protection of traffic, and, in his estimation, when such work is completed, the road will be adequate for the very limited amount of traffic that will use it. He recommended, in view thereof, that no expenditure for the improvement of the section be made at this time except that necessary in connection with the guard fence construction. The Commission approved the recommendation unanimously and instructed the Secretary to so inform the petitioners.

The Attorney brought up for discussion the matter of reimbursing Baker County for a portion of the expense that the county incurred by reason of an accident that occurred on the Sumpter Valley Railroad in August 1937. He recalled that the Commission at a previous meeting authorized the payment of a portion of this expense with state highway funds, and accordingly a voucher in the amount of \$1,248.50 was prepared. Such voucher, he said, was executed by the Commission and was transmitted to the Secretary of State for payment. However, because of a legal technicality, the Secretary of State refuses to honor the voucher, it appearing that the state was not made a party to the suit. He confirmed the Secretary of State's stand in the matter and requested instructions as to how to proceed. In the discussion of this matter the Commission reaffirmed its previous stand that the state is more or less obligated to pay a portion of this expense in view of the fact that it involves a state secondary highway, and decided, in view thereof, to interpose no objection if Baker County will present its claim to the 1941 legislature for payment out of state highway funds. The Attorney was instructed to so inform the Baker County Court.

The Attorney reported the results of investigations of the apparent delinquencies on the part of certain county officials with respect to the rendering of reports on and the remitting of fines imposed for violations of the motor vehicle laws of this state. He said that he is certain from such investigation that the state highway fund is not receiving fair treatment, but so far as he is able to ascertain there are no existing laws which could be referred to in remedying the situation. It was his thought that the Commission should secure new legislation covering the matter if possible. The Commission concurred and thereupon by unanimous vote instructed the Attorney to prepare an appropriate form of legislation for presentation to the 1941 legislature.

Consideration was given by the Commission to the claim of A. B. Chapman for losses incurred by him when he drove his car into a state highway department sanding truck on the Green Springs Highway on January 23, 1939. Action on this matter was deferred by the Commission pending an investigation by the Engineer as to the facts of the case.

The Commission also considered and denied the claim of the Miles Otis Estate, in the amount of \$5,000.00, arising out of an accident that occurred on the Corvallis-Newport Highway on July 28, 1939, which resulted in the death of Mr. Otis, it appearing to the Commission that the accident happened as a result of faulty driving rather than imperfections in the road surface. (See report of J. N. Bishop, Maintenance Engineer, dated October 14, 1939, for details.)

Reconsideration was given by the Commission to its controversy with the Richfield Oil Company arising out of the state's contract with this company for the furnishing of gasoline and oil products for state-owned equipment during the year 1939, and particularly to the payment for service station delivery of gasoline under modified agreement executed by the Secretary of the State Board of Control, Mr. Daniel J. Fry. The Commission decided, after discussion, to ratify the action taken by Mr. Fry on this matter, with the understanding that hereafter the Highway Commission will be consulted before contracts involving the purchase of material, equipment, and supplies for the State Highway Commission are either made or modified. Chairman Cabell thereupon signed a letter directed to Mr. Fry, dated December 5, 1939, to that effect.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with the same persons present and participating.

Messrs. Walter Meacham and Walter Hembree, Portland, came before the Commission at this time and urged that special prominence be given to the Old Oregon Trail on future issues of the State Highway Commission's main-traveled road map. After considerable discussion the Commission decided unanimously to print the following wording on the top margin of maps printed hereafter: "U. S. Highway 30, from Ontario to Seaside, and State Routes 35 and 50, around Mt. Hood, are the paths of the historic OLD OREGON TRAIL." Messrs. Meacham and Hembree signified their approval of such disposition of this matter.

The Commission also discussed with Messrs. Meacham and Hembree its plans for the erection of markers pointing out historical locations along state highway routes of this state, and the plan of the Oregon State Motor Association to publish a booklet describing each of such points. Messrs. Meacham and Hembree signified their hearty approval of such plan.

Mr. and Mrs. F. J. Fisher, Sherwood, Oregon, came before the Commission in regard to a drainage problem along the Pacific Highway West in front of their property located at Mile Post 17.00, near Sherwood. Mr. Fisher stated that his property fronts on the highway for a distance of about 600 feet and that, because of faulty drainage conditions, water from the highway flows onto his land, overflowing his fields so that in the spring of the year his fields are so soft that he is unable to farm them properly. He asked the Commission to remedy this condition. The Engineer advised that Mr. Fisher's complaint has been investigated and it was found that the drainage ditches for the most part are in good condition and adequate to carry all of the water required without difficulty. However, at one point where the ground

slopes away to the east the ditch is not well defined and as a consequence water drains across Mr. Fisher's field through a small creek on the east side of the highway. It would be possible, he said, by constructing a rather deep ditch along the section where no ditch now exists, and by reconstructing the existing ditch, to carry the drainage water from the highway past Mr. Fisher's place to a small creek about 0.4 mile distant. However, this would involve considerable expense and would require considerable maintenance. He gave as his thought that it is not the state's obligation to drain the highway in this manner, particularly in view of the fact that the condition complained of has existed for many years. A decision in this matter was deferred by the Commission pending personal inspection on the ground by Chairman Cabell.

Mr. Irving Rand, Portland, came before the Commission in regard to maintaining travel on the Sumpter Valley Secondary State Highway, in Baker County, during the coming winter. He advised that there is considerable mining activity in the vicinity of the town of Granite and that concentrates must be trucked over this road to Baker continuously, which cannot be done unless the road is kept free of snow. He further advised that arrangements have already been made to keep the road open between the end of the state secondary highway and Granite but they need the state's cooperation in maintaining travel over the secondary highway. He pointed out that this is the only outlet to Baker for the people of Granite and that if the road is kept open it will greatly benefit them as well as the mining companies. The Engineer advised that the state secondary highway is now kept open each winter as far as the town of Sumpter and that the approval of Mr. Rand's request would simply mean the extending of snow removal operations a distance of about 4 miles, which he thought would cost about \$500, using push-plow equipment. He recommended approval of the request as long as the section beyond the secondary highway is kept open for travel. The Commission approved the recommendation unanimously.

A delegation representing the Oregon Coast Highway Association and consisting of the following: A. B. Sanders, Executive Secretary; Henry G. Kern, President; Clarence Coe, Treasurer; County Judge A. H. Boice, Curry County; Representative Roy Carter, Gold Beach; and J. E. Norton, Coquille, appeared before the Commission in the interests of the Oregon Coast Highway. Mr. Sanders headed the group and introduced the speakers. He advised that the Oregon Coast Highway Association has gone on record as being opposed to opening the Neahkahnie Mountain Section of the Oregon Coast Highway to travel until the last section thereof has been graded to proper standards. He advocated the placing of barricades across each end of the section now under construction and urged the Commission to complete the construction of this unit during the 1940 season.

Chairman Cabell advised that the State Highway Commission is receiving bids on the following day for the grading of the final section of this road. He approved Mr. Sanders' suggestion relative to the maintenance of barricades until the grading work is completed but added that it did not seem possible at this time to do the surfacing in 1940 because of the interference that would be caused if the grading and the surfacing work were under way simultaneously. It was his thought that the surfacing and oiling could not be

done until the season of 1941. The Engineer confirmed Chairman Cabell's statement.

Mr. Norton urged the Commission to construct the project between North Bend and Marshfield as its first project. He suggested as an alternate project the reconstruction of the Marshfield-Coquille Section at the summit, working toward Coquille.

Judge Boice urged the Commission to decide definitely on a permanent route for the Oregon Coast Highway through the towns of Port Orford and Gold Beach. He said that development of these towns is being retarded because of lack of information as to where the highway is to be permanently located, and in his estimation the people of these towns are entitled to such information.

Chairman Cabell advised that it is contrary to the policy of the State Highway Commission to make any definite statement as to highway locations until it is ready to construct; also, that the Commission is doing the best it possibly can with moneys available and has the Curry County improvements in mind. He pointed out that numerous requests have been received for the revision of this highway through the town of Brookings, which project, he said, the Commission is inclined to consider has priority over others in this district. He inquired as to Judge Boice's attitude in regard thereto. Judge Boice agreed that the highway should be reconstructed through Brookings and stated that, if the Highway Commission has allocated moneys to such project, in his estimation they should not be reallocated to any other project.

Mr. Sanders urged the improvement south of Port Orford, particularly the removal of excessive curvature between Port Orford and Rumburg Mountain.

Representative Carter suggested that it might be advisable to start the improvement of the Oregon Coast Highway at the California state line and proceed northerly therefrom. It was his thought that the tourist reaction would be much more favorable if the improvement were started at the southerly end rather than farther north, particularly in view of the improvements that have been made by the State of California. He also urged the Commission to decide the location through the town of Gold Beach, suggesting that it would be a fine idea to acquire the right of way soon. The people of Gold Beach, he said, are not particular where the road is built but they would like to have the location adopted as soon as possible.

Chairman Cabell advised that the Commission has this matter under advisement but is not in a position to make a definite commitment at this time.

Mr. Carter then inquired as to the federal aid secondary highway setup for Curry County, giving as his understanding that the Commission has not included any Curry County roads in such system. Judge Boice also made inquiry concerning such matter. They were informed that the Commission has given this matter considerable thought but up to the present time has not been able to see its way clear to include any of the Curry County roads in

such system because it was understood that the county could not acquire the right of way, which is a condition precedent. Judge Boice advised that the county is ready and willing to cooperate in such matter, whereupon the Commission instructed the Engineer to discuss the matter further with the Curry County Court and try to find a suitable road if possible.

Mr. Coe concluded the presentation by stating that, while the people of the Coos Bay district are particularly desirous of securing the reconstruction of the highway between North Bend and Coquille, they do not wish to appear to be dictatorial in the matter and their primary purpose in coming before the Commission at this time was simply to ascertain just what plans the Commission has for such improvement so they can pass the information along to the local people.

Dr. L. I. Hewes, Chief, Western Region, Public Roads Administration, San Francisco, was present and paid his personal respects to the members of the State Highway Commission.

A delegation from Eugene, representing the Willamette Ski Patrol, and consisting of Hale G. Thompson, Sterling Behnke, Bill Parrish, and Ed Turnbull, came before the Commission and urged snow-removal operations on the McKenzie Highway to enable the winter sports enthusiasts to reach the skiing grounds about two miles above a place known as Dead Horse Grade. Mr. Thompson headed the group. They presented numerous arguments in behalf of their request and particularly referred to petitions and endorsements heretofore filed with the Commission's Secretary endorsing the project. Mr. Thompson said that they would be satisfied with an expenditure of state highway funds equal to that paid out by the State Highway Commission last winter for similar operations.

Chairman Cabell inquired whether or not there is any place along the Willamette Highway that would be suitable for winter sports when that highway is completed. He was informed by Mr. Thompson that diligent search has been made but as yet they have been unable to find anything as satisfactory as the McKenzie Highway site or anything near comparable with it. However, it is their intention to continue their search as time permits.

The State Highway Engineer pointed out that snow-removal operations on this highway are very costly, particularly compared with the revenues that the state would derive from traffic if the road were kept open. He also pointed out that such operations with heavy-type equipment are very damaging to the surface of the road, making for high maintenance cost. He suggested that the Commission might authorize push-plow operations to be carried on until the snow got so deep that push-plows could not handle it, but he could not recommend full compliance with the delegation's request.

Chairman Cabell advised that he is heartily in favor of doing everything possible for the winter sports enthusiasts, provided the expense is not great, but is not in position today to state just what the Commission can do in this particular instance. However, the matter will be given serious consideration and the Commission will take definite action as soon as it possibly can.

At 3:00 o'clock p. m. Chairman Cabell announced the awards of contracts and sale of buildings as follows, bids for which were received at the morning session, such awards and sales having been previously approved by the Commission by unanimous vote:

"Black Bridge-Richland Section of the Baker-Homestead Highway, in Baker County. 7.0 miles surfacing and oiling; also furnish 2000 cu. yds. crushed gravel in stock piles. Morrison-Knudsen Company, Boise, Idaho, submitted the low bid for this project at \$26,240.00. Newport Construction Company, Portland, submitted the second-low bid at \$26,642.90. There were 3 higher bidders. The Commission awards this contract to Morrison-Knudsen Company, the low bidder, at its bid price of \$26,240.00.

"Mountain Rest-Mt. Vernon Rock Production Project on the Pendleton-John Day and Beech Creek Highways, in Grant County. Furnish 5700 cu. yds. crushed rock in stock piles. Only 2 bids were submitted for this project, the low one being that of F. R. Hewett, Spokane, Washington, at \$9,750.00 and the other bid being that of A. S. Wallace, Roseburg, at \$9,880.00. The Commission awards the contract to the low bidder, F. R. Hewett, at his bid price of \$9,750.00.

"Siskiyou-State Line Section of the Pacific Highway, in Jackson County. 6.31 miles bituminous macadam surfacing; also furnish 5200 cu. yds. crushed rock in stock piles. 11 bids were received for this project, the low one being submitted by Roy L. Houck, Salem, at \$108,174.00. The second-low bid was submitted by Clifton & Applegate, Spokane, Washington, at \$117,373.00. The Commission awards the contract to Roy L. Houck, the low bidder, at \$108,174.00.

"Hebo-Oceanlake Rock Production Project on the Oregon Coast and Salmon River Highways, in Lincoln and Tillamook Counties. Furnish 6000 cu. yds. crushed rock in stock piles. The low bid for this project was submitted by Washington Hauling Company, Seattle, Washington, at \$11,580.00, and the second-low bid was submitted by Feldschar & Son, Tillamook, at \$12,420.00. There were 7 higher bidders. The Commission awards the contract to Washington Hauling Company at its bid price of \$11,580.00.

"Cow Hollow Creek-Owyhee School Section of the Vale-Adrian County Road, in Malheur County. 4.08 miles grading. The Commission received 11 bids for this project, the low one being that submitted by M. L. O'Neil & Son, Eugene, at \$13,198.80. The second-low bid was submitted by E. L. Rigdon, Prairie City, at \$13,891.00. The Commission refers all bids received to the Engineer, with power to award the contract to the low bidder when certain conditions are satisfied.

"Jordan Creek-McNamers Camp Section of the Wilson River Highway, in Tillamook County. 9.3 miles surfacing and oiling; also, furnish 3000 cu. yds. crushed materials in stock piles. Saxton,

Looney & Risley, Oak Grove, submitted the low bid for this project at \$31,789.00, based on the use of road oil, and \$32,016.70, based on the use of tar. Newport Construction Company, Portland, submitted the second-low bid at \$32,034.00, based on the use of road oil, and \$32,413.50, based on the use of tar. There were 8 higher bidders. The Commission awards the contract to Saxton, Looney & Risley, the low bidders, at the bid of \$31,789.00, based on the use of road oil.

"Construction of a 606-foot steel and concrete viaduct over Devils Lake Fork of the Wilson River on the Wilson River Highway, in Tillamook County. The Commission received 9 bids for this project, the low one being submitted by McNutt Brothers, Eugene, at \$98,232.50, and the second-low one being that submitted by Bennett & Taylor, Los Angeles, California, at \$100,959.00. The Commission awards the contract to McNutt Brothers, the low bidders, at \$98,232.50."

Buildings at Tigard:

" Building No. 7001, formerly owned by Frona K. Williams. The only bid received for this building was that of Sullivan Wrecking Company, Portland, at \$92.72. The Commission rejected this offer and orders that the building be sold with the lot.

"Building No. 7001 and Lot, formerly owned by Frona K. Williams. 6 bids were received for this building and lot, the high one being that of H. V. Kruse, Oswego, at \$1,754.00. The second-high bid was received from Harold J. Heffron, Tigard, at \$1,100.00. The Commission accepts the offer of H. V. Kruse and accordingly sells the building to him at his high bid of \$1,754.00.

"Building No. 6940, formerly owned by C. H. Pfaffle. H. N. Peabody, Portland, submitted the high bid for this building at \$75.00, and the only other bid received was that of Sullivan Wrecking Company, Portland, at \$2.17. The Commission accepts the offer of H. N. Peabody and accordingly sells the building to him at his high bid of \$75.00. (Note: Action rescinded by Commission at meeting held on December 20, 1939.)

"Building No. 6998, formerly owned by Vivian H. North. The high bid received by the Commission for this building was that submitted by Loyd and Ruby Robinett, Tigard, at \$1,000.00. The second-high bid was received from H. B. Tigard, Tigard, at \$915.00. There were 4 lower bidders. The Commission accepts the offer of Loyd and Ruby Robinett and accordingly sells the building to them for \$1,000.00.

"Building No. 6924, formerly owned by Joseph D. Foley Estate. The only bid received for this building was that submitted by Sullivan Wrecking Company, Portland, at \$2.07. The Commission rejects

this offer and orders the building readvertised.

"Building No. 6980, formerly owned by Emil Johnson. The Commission received two bids for this building, the high one being that of Madson & Picha, Salem, at \$122.00, and the other one being that of Sullivan Wrecking Company, Portland, at \$85.59. The Commission rejects both offers and orders the building readvertised.

"Building No. 6943, former owner E. C. Hunsiker. 4 bids were submitted for the purchase of this building, the high one being that of H. V. Kruse, Oswego, at \$201.00. The second-high bid was that of John F. Mills, Tigard, at \$105.00. The Commission accepts the offer of H. V. Kruse and accordingly sells the building to him at his high bid of \$201.00.

"Building No. 7040, formerly owned by Shubring & Biederman. 2 bids were received for this building, the high one being that of Les Gray, Tigard, at \$201.50, and the other one being that of Sullivan Wrecking Company, Portland, at \$41.99. The Commission accepts the offer of Les Gray and accordingly sells the building to him at his high bid of \$201.50.

"Building No. 6983, formerly owned by Emil Johnson. John Scheckla, Tigard, submitted the high bid for this building at \$125.00. Madson & Picha, Salem, submitted the second-high bid at \$53.00. The only other offer received was that of Sullivan Wrecking Company, Portland, at \$33.79. The Commission rejects all bids received and orders the building readvertised.

"Building No. 6945, formerly owned by MacGormac Snow. 3 bids were received for this building, the high one being that of Francis J. Scheckla, Tigard, at \$95.00, and the second-high being that of Madson & Picha, Salem, at \$53.00. Sullivan Wrecking Company, Portland, submitted the other bid at \$33.49. The Commission considers the offer of F. J. Scheckla satisfactory and accordingly sells the building to him at his high bid of \$95.00.

"Building No. 6937, formerly owned by Charles ? Kuensler. John Scheckla, Tigard, submitted the high bid for this building at \$75.00. Madson & Picha, Salem, submitted the second-high bid at \$53.00. The only other bid received was that of Sullivan Wrecking Company, Portland, at \$29.97. The Commission accepts the offer of John Scheckla and accordingly sells the building to him at his high bid of \$75.00."

Buildings at Cotters Grove:

"Building No. 5643, formerly owned by Mark Woodruff. 2 bids were received for this building, the high one being that of George Lemmers, Grants Pass, at \$12.00, and the other one being that of J. E. Soric and Roy Crowe, Eugene, at \$1.00. The Commission

accepts the offer of George Lammers and sells the building to him at his high bid of \$12.00.

"Building No. 5644, formerly owned by Francis M. Turner. George Lammers, Grants Pass, submitted the high bid for this building at \$36.00, and J. E. Soric and Roy Crowe, Eugene, submitted the only other bid received, at \$1.00. The Commission considers the offer of George Lammers satisfactory and accordingly sells the building to him at \$36.00, the high bid.

"Building No. 5650, formerly owned by Frank H. Snodgrass. 2 bids were received for this building, the high one being that of George Lammers, Grants Pass, at \$66.00, and the other that of J. E. Soric and Roy Crowe, Eugene, at \$1.00. The Commission accepts the offer of George Lammers and sells the building to him at his high bid of \$66.00.

"Building No. 5653, formerly owned by C. A. McFarland. George Lammers, Grants Pass, submitted the high bid for this building at \$26.00, and J. E. Soric and Roy Crowe, Eugene, submitted the only other bid received at \$1.00. The Commission considers the offer of George Lammers satisfactory and thus sells the building to him for \$26.00.

"Building No. 5692, formerly owned by George M. Hawley. 2 bids were received for this building, the high one being that of George Lammers, Grants Pass, at \$11.00, the other bid being that of J. E. Soric and Roy Crowe, Eugene, at \$1.00. The Commission considers the offer of George Lammers satisfactory and accordingly sells the building to him for \$11.00.

"Building No. 5693-A, formerly owned by First Free Methodist Church. The Free Methodist Church, Cottage Grove, submitted the high bid for this building at \$101.00. George Lammers, Grants Pass, submitted the second high bid at \$56.00. There was one lower bidder. The Commission accepts the offer of the Free Methodist Church and accordingly sells the building to it for \$101.00.

"Building No. 5693-B, formerly owned by the First Free Methodist Church. 4 bids were received for this building, the high one being that of the Free Methodist Church, Cottage Grove, at \$301.00, and the second-high bid being that of George Lammers, Grants Pass, at \$153.00. The Commission considers the bid of the Free Methodist Church satisfactory and accordingly sells the building to it at its high bid of \$301.00."

Buildings at Albany:

Building No. 5845, formerly owned by Forrest Barker. 4 bids were received for this building, the high one being submitted by Forrest Barker, Albany, at \$201.50, and the second-high one being

submitted by Edward Falwell, Albany, at \$196.50. The Commission accepts the offer of Forrest Barker and accordingly sells the building to him at his high bid of \$201.50.

"Building No. 6378, formerly owned by Lee Hurst. The Commission received 6 offers for the purchase of this building, the high one being that of Harriett Hamilton, Albany, at \$535.00. V. W. Mason, Albany, submitted the second-high bid at \$201.50. The Commission accepts the offer of Harriett Hamilton and accordingly sells the building to her at \$535.00.

"Building No. 6382, formerly owned by R. B. McCalley. Wm. Eagles, Albany, submitted the high bid for this building, at \$406.00. V. W. Mason, Albany, submitted the second-high bid, at \$351.50. There were 3 lower bidders. The Commission considers the offer of Wm. Eagles satisfactory and accordingly sells the building to him at his offer of \$406.00.

"Building No. 6396, formerly owned by J. L. Richardson. The Commission received 3 bids for this building, the high one being that of Charles Childs, Albany, at \$51.00, and the second-high one being that of Wilbur Stead, Tangent, at \$40.00. The Commission considers the offer of Charles Childs satisfactory and accordingly sells the building to him at his high bid of \$51.00."

Moving and reconstructing Methodist Episcopal Church Building, in Tigard:

"Contracting & Sales Company, Portland, submitted the low bid for this project, with a bid of \$5,927.00 based on constructing a full basement. Their bid for this work based on constructing a furnace room only was \$5,827.00. V. W. Mason, Albany, submitted the second-low bid, being \$6,385.00 for full basement construction, and \$5,050.00 for furnace room only. There were 2 higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when the question whether or not a full basement shall be constructed has been decided by the owner."

Moving and remodeling Johnson Lumber Company Buildings, near Tigard:

"Odom Construction Company, Oregon City, submitted the low bid for this project at \$6,364.00. A. C. Baumback, Sandy, was the second-low bidder with a bid of \$7,350.00. There were 2 higher bidders. Bids for this project were received by the Commission in behalf of the owner of the buildings, to whom the bids are referred for awarding the contract."

Remodeling Lone Oak Service Station Buildings, near Tigard:

"The Commission received 2 bids for this project, the low one

being that of the Odom Construction Company, Oregon City, at \$6,180.00, and the other being that of Ray Christensen, Tigard, at \$6,430.00. Bids for this project were received by the Commission on behalf of the owner of the buildings, to whom the bids are referred for award of the contract."

Moving and reconstructing buildings of Villa Ridge Service Station, near Tigard:

"Only 2 bids were received for this project, the low one being that of Odom Construction Company, Oregon City, at \$4,537.00, and the other being that of Ray Christensen, Tigard, at \$5,035.00. Bids for this project were received by the Commission in behalf of the owner of the buildings, to whom the bids are referred for awarding the contract."

Mr. Charles H. Reynolds, President, Oregon Trail Association, and County Judge G. G. Shults, Wasco County, member thereof, came before the Commission and resubmitted the following program for improvements to the Old Oregon Trail:

Reconstruct the section between Ontario and Olds Ferry, in Malheur County, to shorten the distance and eliminate inferior alignment.

Widen the undercrossing of the Union Pacific Railroad at Durkee, in Baker County, and flatten the approach curves thereto.

Reconstruct 0.7-mile section through the John Troy property three miles east of Pleasant Valley, in Baker County.

Complete reconstruction of the Baker-Haines Section just out of Baker, in Baker County.

Reconstruct the section between North Powder and Union, in Union County, by elimination of curves and widening roadbed.

Construct proposed cutoff between Stanfield, in Umatilla County, and Boardman, in Morrow County.

Continue reconstruction of the Arlington-John Day River Section, in Gilliam County, by elimination of curves, et cetera.

Expedite reconstruction between The Dalles and Troutdale, financing same without special government appropriation, if necessary.

They offered full cooperation in every way possible in the undertaking of these projects. They were informed by Chairman Cabell that the Commission would be pleased to keep these projects in mind.

Mr. Reynolds also requested the following improvements in behalf of the County Court of Union County:

DEC 7 1939

Reconstruct Minam-Elgin Section of the Wallowa Lake Highway, particularly the section over Minam Hill.

Modernize as expeditiously as possible the Union-Medical Springs Section of the Medical Springs Secondary State Highway.

Extend the Starkey Secondary State Highway from its present terminus to the forest boundary and reconstruct this road to secondary state highway standards as soon as possible. In connection with this project Mr. Reynolds stated that if the state does not have funds available to finance the entire improvement between Starkey and the forest boundary it might be possible to secure funds from some other source.

The Commission agreed to keep these projects in mind.

A delegation from Tigard, consisting of A. L. Mason, C. A. Donnelly, M. W. Evans, A. Schubring, and E. A. Woodward, came before the Commission and asked for the oiling of the unimproved strips adjacent to the highway pavement through the town of Tigard. Mr. Mason headed the group. The Engineer advised that this matter has been investigated and it appears that a first-class improvement will cost about \$7,500, whereas for about \$1,000 a temporary improvement that would be satisfactory could be obtained, although the oiling work would have to be deferred until next year when weather conditions are favorable to such type of construction. The Commission agreed to give the matter careful consideration and instructed the Engineer to make further investigation, and report.

Mr. E. C. Gerber, highway contractor, came before the Commission at this time and requested reconsideration of the Commission's order disqualifying him from bidding on future highway construction projects. The Engineer explained why the Commission has seen fit to disqualify Mr. Gerber, particularly pointing out that Mr. Gerber has been lax in complying with the specifications with respect to labor, and that he carried on his work in a dilatory manner, which in one particular instance has cost the state approximately \$6,000 for extra oiling work. Furthermore, Mr. Gerber's failure to complete this particular project within the specified time limit has caused great inconvenience to the traveling public. He advised, however, that the Commission has no complaint to make with respect to Mr. Gerber's ability to finance the work upon which he is engaged, but insists that he, as well as other contractors, complete his projects within the specified time limit and that he respect all of the provisions of the specifications. He suggested, in view of Mr. Gerber's past performance record, that the Commission reinstate Mr. Gerber on the basis of awarding to him only one contract limited to a maximum of \$100,000. After considerable discussion the Commission approved the Engineer's suggestion by unanimous vote as a trial proposition, it being understood that if Mr. Gerber does not carry on the work to the entire satisfaction of the Commission and its engineers, then he is to be disqualified entirely and will not be permitted to bid on highway work thereafter.

Mr. C. F. Howard, St. Helens, and his attorney, Mr. E. T. Steel,

came before the Commission in regard to the moving of his service station building from right of way recently acquired by the state from him for the improvement of the Lower Columbia River Highway just north of St. Helens. The Assistant Attorney explained that it had been necessary in connection with the improvement of the highway at this location to acquire some of Mr. Howard's property on which he is maintaining a service station, and as a consideration the state deeded to Mr. Howard state-owned property that was not needed for highway purposes. Further, that Mr. Howard is desirous of removing his buildings from the highway right of way but before doing so wants to grade the new site to conform with the grade of the new highway, which will involve considerable excavation not only on his own property but also on the highway right of way. He further advised that the highway work has not yet been contracted but Mr. Howard wants to move his buildings at once and has agreed to perform all of the grading operations himself, both within and without the limits of the highway right of way, but wants the state to reimburse him for the cost of excavation work performed within the highway right of way limits. He recommended approval of Mr. Howard's offer. The Commission approved the recommendation by unanimous vote on the basis of reimbursing Mr. Howard in an amount equal to the cost of the excavation work within the right of way limits if such work were performed by the state's contractor in connection with his other work on the highway when the contract for this section is awarded. The Engineer was instructed to prepare an estimate of cost at once and present the same to Mr. Howard for his consideration, so he will have an idea as to how much reimbursement he may expect from the state.

A delegation representing the Conservation Committee 40 et 8, American Legion, and consisting of Mr. James McCrea, Salem; Municipal Judge Julius Cohn, Portland; Charles F. Walker, Portland; and Ira Withrow, Grand Ronde, came before the Commission in regard to the preservation of timber along the Salmon River Highway. Mr. McCrea headed the group. He urged the Commission to purchase at once from the Miami Corporation certain timber along the north side of the highway in the vicinity of a place known as Boyer, and suggested that arrangements be made to pay for this timber in three annual payments as the Commission now is purchasing another timber tract from this company along the south side of the highway at this location.

Judge Cohn stated that he is Chairman of the Conservation Committee of the 40 et 8 and that the idea which the committee has in mind is to secure the preservation of timber adjacent to the highways generally throughout the state rather than in any one particular locality, and that the Salmon River Highway timber strip is only one of the tracts that they had in mind, but it is an important one.

Mr. Walker also spoke in favor of the preservation of the Salmon River Highway timber.

Mr. Withrow advised that the Miami Corporation has a bona fide buyer for the timber under discussion and that this purchaser plans to start his logging operations on the area fronting the highway.

Chairman Cabell advised that the Commission is cognizant of the value and beauty of the timber along the Salmon River Highway and would like to

purchase it in order to insure its preservation, but funds available to the Commission for such purpose are very limited and there is a question whether or not the Commission would be able to finance the proposition, particularly in view of the fact that the Commission has already committed a substantial amount for the purchase of additional timber in this district. He pointed out that there is a bill pending in Congress which provides federal funds for financing the acquisition of timber tracts adjacent to highways and in view thereof the Commission is reluctant to commit state funds to such projects until Congress has taken final action on this bill, which it is expected will be disposed of shortly after Congress reconvenes this winter. He also advised that the Commission has received a letter from the Miami Corporation granting the Commission a period of six months in which to make its final decision with respect to the purchase of this timber tract so as to give Congress sufficient time to pass on the bill. In view of the circumstances, he said, the Commission is not in a position today to take definite action on this matter.

Mr. F. L. Smith, Portland, came before the Commission in regard to the sale of a timber tract on the Arch Cape promontory adjacent to the Oregon Coast Highway near the Clatsop-Tillamook County line. Mr. Smith stated that he owns considerable timber in this area and that he has received an offer from certain parties who desire to market this timber at once, but he is of the opinion that the state should own the timber on this particular promontory and accordingly is giving the state first refusal of the same. There are approximately 130 acres in the tract, he said, and it contains about 4,000,000 feet of timber which he is willing to sell to the state for the sum of \$2,500 plus accrued taxes. He also said that if the state does not want this timber he cannot afford not to sell it to the logging companies, and all that he is asking in addition to the cash settlement is the right to maintain a roadway across the property for the benefit of the people who have purchased property from him farther removed from the highway. The Commission appeared favorably inclined to Mr. Smith's proposition but deferred a decision in regard thereto pending a report from the State Parks Superintendent, to whom the matter was referred.

At 5:00 o'clock p. m. the Commission adjourned to Room 210, Congress Hotel, for a conference with representatives of the Oregon State Police Department and the Public Utilities Commissioner of Oregon regarding matters pertaining to the transportation of logs, poles, and piling over state highways. Present at such conference were the following: Henry F. Cabell, Chairman, Huron W. Clough, Commissioner, R. H. Baldock, State Highway Engineer, J. M. Devers, Attorney, H. B. Glaisyer, Secretary, representing the State Highway Department; Charles P. Pray, Superintendent of the Department of State Police; T. O. Russell, Chief Engineer, A. F. Harvey, Superintendent of Motor Transportation, Perry O. DeLap and John Bagley, representing the Public Utilities Commissioner; and Mr. Roy Putnam, representing the Southern Pacific Company.

This matter was discussed at considerable length but, due to the lateness of the hour, no definite action was taken thereon. It was decided that the State Highway Engineer should formulate a set of rules and regulations pertaining to the subject and submit the same to the Superintendent of the Department of State Police and the Public Utilities Commissioner for

suggestions and approvals, following which it is to be discussed with representatives of the logging industry at a special meeting called for such purpose.

Mr. Russell also brought up for discussion a dangerous condition which exists at Canby where logging trucks entering Canby from adjacent county roads are obliged to cross the Pacific Highway and the tracks of the Southern Pacific Company enroute to their destination. It was explained that the highway and the railroad lie very close together in that town, and, while logging trucks are required to come to a complete stop before entering the highway, there is no such provision with respect to the railroad. It was thought that some such provision should be made as a safety measure and that some authority should issue an order requiring the logging trucks to stop at such point. Action on this matter was deferred until a later date.

The meeting was adjourned at 6:15 o'clock p. m., the Highway Commission to reconvene in regular session at 9:00 o'clock the following morning in the auditorium of the Public Service Building.

Portland, Oregon, December 8, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in the auditorium of the Public Service Building, with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room:

WOLF CREEK HIGHWAY
NEHALEM RIVER-SUNSET SUMMIT ROCK PRODUCTION PROJECT

A. S. Wallace	\$ 21,668.00
H. L. Rice	23,326.00
E. C. Hall Company	25,010.00

H. L. Rice	15,968.00
Cochran & Gatten	17,807.30

Mr. Herbert C. Hardy, attorney for the Bonneville Authority, came before the Commission in regard to Bonneville's power transmission pole line between Portland and Eugene. He advised that some time ago the Commission granted the Bonneville Authority permission to construct its pole line over

and across certain state highways but there is no provision in the permit indicating any permanency of this privilege, and, in view of the fact that the Government is spending a large sum of money to construct a 115,000-volt line to Eugene, and will build other lines later on, it would like to have some understanding with the Highway Commission relative to the permanency of its construction and an understanding as to the obligations of the government and the state in the event that alterations are made for any reason or other in the future. He presented a tentative form of agreement covering the matter and pointed out the following: paragraph 3, page 2 thereof, which provides that if at any time, by reason of the construction, repair, improvement, alteration or relocation of any highway or of any portion thereof, it shall become necessary, in the opinion of the State Highway Commission and the Administrator, to relocate any of the electrical transmission lines, and appurtenances, the Administrator shall promptly relocate same; and paragraph 5, on page 3 thereof, which provides that if the highways are damaged or injured in the construction, operation, maintenance, or repair of the electrical transmission lines, then they shall be immediately repaired and reconstructed by the United States under the supervision and to the satisfaction of the Highway Commission; and which provides further that upon failure, neglect or refusal of the United States to immediately repair the highways, then the state may undertake such work, the cost thereof to be paid by the United States upon presentation of properly executed voucher, provided that the state shall submit an estimate of the cost of such changes, alterations, or repairs to the Administrator and shall obtain his approval thereof before making such changes, alterations or repairs, and that, if in an emergency it becomes necessary for the state to make such changes, et cetera, without first having obtained the approval of the Administrator, then the United States shall not be required to make any payment therefor unless the sum expended shall be approved by the Administrator.

This matter was discussed at considerable length, during which the Commission's Attorney questioned the authority of the Commission to enter into an agreement of this nature. The Commission deferred action on this matter pending the securing of an opinion from the Attorney General relative thereto. The Commission instructed its Attorney to confer further with Mr. Hardy with respect to the legal features involved and in the preparation of the form of agreement that might be accepted, and report to the Commission later.

A delegation consisting of County Judge Nelson B. Higgs, of Harney County; William Baer, County Commissioner of Deschutes County; Don Peoples, Secretary of the Bend Chamber of Commerce; and M. A. Lynch, ex-member of the State Highway Commission, Redmond, was present. Judge Higgs asked for the construction of the secondary highway which extends in a southeasterly direction from Princeton, in Harney County, to a connection with the I.O.N. Secondary Highway, near Rome, in Malheur County. He also asked for the oiling of the Burns-Crane Primary State Highway, in 1940. He stated his preference for the construction of this project over the improvement of the secondary highway south of Crane. He was informed by Chairman Cabell that, due to the limited amount of funds available to the Commission, it does not appear possible for the Commission to construct an oiled surface on the Burns-Crane Highway in 1940, but the Commission will be glad to keep the project in mind for future

consideration. As to the other projects mentioned by Judge Higgs, Chairman Cabell stated that, in his estimation, now is not the time to start construction of this road while there are so many other highways of more importance that need attention.

The Secretary presented a petition signed by numerous residents of Harney County, asking for the reconstruction and improvement of the Burns-Crane Highway. He was instructed by the Commission to acknowledge the same and advise the petitioners of the action taken by the Commission at this meeting with respect to this road.

Mr. Peoples urged the Commission to allocate additional forest highway funds to improve the forest highway section of the Warm Springs Highway south of its junction with the Wapinitia Highway, in order to expedite the completion of this road. He also asked that this road be placed on the federal aid highway system so as to receive the benefit of federal aid highway funds. He urged early completion of the highway inasmuch as it will reduce the distance from Central Oregon to Portland by about 30 miles and will eliminate approximately 50 miles of fog condition that obtains on the present traveled route. He also asked that an additional amount of forest highway funds be allocated to extend the improvement now under way on the Bend-Elk Lake Forest Highway. His remarks were endorsed by Judge Higgs, Mr. Lynch, and Commissioner Baer.

Chairman Cabell advised that the Commission questions the advisability of completing the forest section of the Warm Springs Highway until the construction of the state's section of this highway is further advanced. The Commission is now considering, he said, the placing of this highway on the federal aid system so that advantage can be had of financing the project with federal aid funds. However, final action has not yet been taken to that end because the Commission wants to make definitely certain that placing this road on the federal aid system is the proper thing to do, considering other roads throughout the state that are in the same category. The Commission will be pleased, he said, to bear this project in mind in the formulation of future highway programs.

Mr. Lynch also appeared before the Commission in company with Mr. M. A. Hawke and Mr. Charles Woodruff, Prineville, in the interests of the Ochoco Highway. He urged the continuation of reconstruction work on this highway easterly from Marks Creek to Mitchell, which section, he said, is very important, and is entitled to funds in view of the fact that it has lain dormant for a long time. He was informed by Chairman Cabell that the Commission would be pleased to keep this project in mind.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the Green Room of the Congress Hotel for a conference with government officials relative to the programming of the fiscal year 1941 forest highway funds. Present at such conference were Henry F. Cabell, Chairman, E. B. Aldrich, Commissioner, Huron W. Clough, Commissioner, R. H. Baldock, State Highway Engineer, J. M. Devers, Attorney, and H. B. Glaisyer, Secretary, representing the State Highway Department; W. H. Lynch, District Engineer,

T. M. Davis, Senior Highway Engineer, H. D. Farmer, Senior Highway Engineer, and F. E. Andrews, Senior Highway Engineer, representing the United States Public Roads Administration; and F. V. Horton, Acting Regional Forester, and James Frankland, Regional Engineer, representing the United States Forest Service.

Mr. Lynch advised that the exact amount of the federal appropriation for forest highways for the fiscal year 1941 is not yet known but they anticipate that it will be approximately \$1,116,000.00, less \$50,000.00 reserved for financing location surveys, and \$40,000.00 reserved for financing maintenance work, and an additional amount for contingencies. He suggested that an amount of \$960,000.00 be set as the basis for the allocation at the present time. The suggestion was approved.

The State Highway Engineer submitted a list of projects eligible for this program, as did also Mr. Lynch. After considerable discussion the following projects were tentatively approved for such program:

<u>Project</u>	<u>Termini</u>	<u>Length</u>	<u>Amount</u>	<u>Activity</u>
Tiller-Trail	Trail Cr.Br.-Trail	4.3	\$ 85,000 (with tr)	Surf. & Stockpiling for Y (1 mi.) & Br.
Willanette	Oakridge-Upper Salt Cr. Br. 2183	7.5	100,000	Surfacing (7" Comp.)
Santiam	Sheep Cr.-Tombstone	7.0	100,000	Grad. & Surf.
(North Santiam { or { (Santiam	Detroit-Niagara } Hogg Rock-Suttle) Lake	2.0	100,000	Financing share of reconstr. between Niagara & Detroit
			100,000	Oiling
Klamath-Lakeview	Quartz Mt.-Quartz Cr.	5.5	100,000	Grad., Surf., & Stock- piling

The matter of conducting snow-removal operations on the Timberline Lodge Road was then discussed. The State Highway Engineer explained that a question has arisen as to the status of this road, whether it is a private road or a public road, and until such question has been decided definitely the State Highway Commission is in the position of not being able to say definitely whether it can cooperate in the snow-removal operations, as was done last winter. This matter, he said, is now before the Public Utilities Commissioner and if such Commissioner should decide that the road is a private road, then the State Highway Commission would have no alternative but to refuse to cooperate in snow-removal operations, because it does not have legal authority to spend state funds for private improvements, and will have to call upon the Federal Government to reimburse the state for expenditures made last year for such work. If, on the other hand, he said, the Public Utilities Commissioner decides, from the evidence submitted, that the road is a public road, then the Commission would have the authority to cooperate in the snow-removal undertaking and will continue the oral arrangement heretofore effected.

Messrs. Horton and Frankland both declared the road to be a public road, notwithstanding assertions made to the contrary at the time of the hearing before the Public Utilities Commissioner.

The Commission's Attorney gave as his opinion that the road is a public road rather than private. However, he suggested, in view of the uncertainty, that the Commission do not spend any money on the road until it has been so declared by the Public Utilities Commissioner, particularly in view of the allegation that the road is a private one.

After considerable discussion the Commission instructed the Attorney to ask the Public Utilities Commissioner to expedite his decision as much as possible. The Engineer was instructed by the Commission not to spend any state funds for snow-removal operations on this road, even should an emergency exist, until the order of the Public Utilities Commissioner has been received, and not then if, by such order, the road is declared to be a private road.

In this connection the Engineer reported receipt of a letter from Clackamas County Court advising that they have received for execution from the United States Forest Service certain agreements relative to the construction and maintenance of the new road to Timberline Lodge, whereby the county is made responsible for the maintenance and upkeep of this road, and have been advised by the Regional Engineer, Mr. James Frankland, that such obligation will be assumed by the State Highway Commission. The County Court would like advice, he said, before signing the agreements, as to whether or not the information given by Mr. Frankland is correct, inasmuch as the county is not financially able to undertake this task. The Engineer was instructed to inform the County Court that the present plans of the Commission contemplate placing this road on the state highway system when it has been constructed throughout, and when that is done the Commission will assume the responsibility for maintenance and upkeep of the same.

At 3:00 o'clock p. m. the Commission returned to the auditorium of the Public Service Building, and Chairman Cabell announced the following

awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Nehalem River-Sunset Summit Rock Production Project, in Clatsop and Washington Counties. Furnish 15,600 cu. yds. crushed rock in stock piles. A. S. Wallace, Roseburg, submitted the low bid for this project at \$21,668.00. H. L. Rice, Portland, submitted the second-low bid at \$23,326.00. There were 11 higher bidders. The Commission awards the contract to the low bidder, A. S. Wallace, at his bid price of \$21,668.00.

"Reedsport (12th Street to 15th Street) Section of the Umpqua Highway, in Douglas County. 0.22 mile paving. 4 bids were received for this project, the low one being that of R. I. Stuart & Sons, Medford, at \$26,894.00, and the second-low being that of Edlefsen-Weygandt Company, Portland, at \$26,945.00. The Commission awards the contract to R. I. Stuart & Sons at their low bid price of \$26,894.00.

"Siskiyou Junction-Klamath County Line Rock Production Project on the Green Springs Highway, in Jackson County. Furnish 7,600 cu. yds. crushed rock in stock piles. The low bid for this project was submitted by A. S. Wallace, Roseburg, at \$13,680.00. The second-low bid was submitted by R. I. Stuart & Sons, Medford, at \$14,960.00. There was only one higher bidder. The Commission awards the contract to A. S. Wallace at his low bid of \$13,680.00.

"Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County. 5.1 miles surfacing and oiling; also furnish 1,500 cu. yds. crushed rock in stock piles. 16 bids were received for this project, the low one being submitted by Saxton, Looney & Risley, Oak Grove, at \$33,565.50, and the second-low being submitted by H. L. Rice, Portland, at \$35,655.50. The Commission awards the contract to the low bidders, Saxton, Looney & Risley, at their bid of \$33,565.50.

"Remodel and widen concrete arch bridge over Depoe Bay and construct 0.1 mile of highway roadbed approaches, on the Oregon Coast Highway, in Lincoln County. Odom Construction Company, Oregon City, submitted the low bid for this project, at \$60,367.50. A. W. Stevens Construction Company, Mt. Vernon, Washington, submitted the second-low bid at \$68,644.50. There were 8 higher bidders. The Commission awards the contract to Odom Construction Company, the low bidder, at its bid price of \$60,367.50.

"Trout Creek-Toll Creek Section on the Santiam Highway, in Linn County. 8.9 miles surfacing and oiling; also furnish 1,700 cu. yds. crushed rock in stock piles. E. C. Hall Company, Eugene, submitted the low bid for this project, at \$61,381.00, based on the use of road oil but they did not submit a bid based on the use of tar. Babler Bros., Portland, submitted the second-low bid at \$65,166.00,

based on the use of road oil, and \$65,370.00, based on the use of tar. There were 5 higher bidders. The Commission awards the contract to E. C. Hall Company at their low bid of \$61,381.00, based on the use of road oil.

"Necarney Creek-Neahkahnie Mountain Section of the Oregon Coast Highway, in Tillamook County. 0.87 mile grading and 6 reinforced concrete structures. 12 bids were received for this project, the low one being that of K. L. Goulter, Seattle, Washington, at \$135,418.00. The second-low bid was that of Leonard & Slate, Multnomah, at \$137,450.00. The Commission awards the contract to K.L. Goulter at his low bid of \$135,418.00.

"West Unit, Petersburg-Fairbanks Section of the Fifteenmile Creek County Road, in Wasco County. 2.0 miles grading and 2.94 miles surfacing and oiling. The low bid submitted for this project was that of Leonard & Slate, Multnomah, at \$11,537.00. The second-low bid submitted was that of Mid-Columbia Sand & Gravel Company, The Dalles, at \$12,229.50. There were 9 higher bidders. The Commission awards the contract to the low bidder, Leonard & Slate, at their bid price of \$11,537.00."

The Engineer reported that, as previously authorized by the Commission, he awarded to E. C. Hall Company on November 30, 1939, the contract for grading, surfacing, and oiling the Muddy Creek-Haines Section of the Old Oregon Trail, in Baker County, for which the Commission took bids on November 2, 1939, the conditions of the award having been satisfactory. The Commission approved the award of this contract as reported.

The Engineer also reported receipt of a letter from Contractor J.F. Johnston, Newberg, who submitted the low bid on June 22, 1939, for construction of a bridge over the East Fork of the Illinois River on the Illinois Valley County Road, in Josephine County, to the effect that he is ready and willing to accept the award of this contract notwithstanding that such a long time has elapsed since the bids were taken. He also reported that he has received oral information from Mr. W. H. Lynch, District Engineer, Public Roads Administration, to the effect that he will approve the award of this contract to Mr. Johnston. In view of the report, the Commission voted unanimously to award this contract to Mr. Johnston as soon as written confirmation from Mr. Lynch has been received. The matter was referred to the Engineer with power to make the award at such time.

The Engineer requested authority to purchase the following equipment:

- 1 electric light plant for maintenance headquarters at Chemult, and trade in as part purchase price 1 old plant, estimated cash outlay \$900
- 1 electric light plant for maintenance headquarters at Austin, estimated cost \$900

- 5 power hoists for installation on bridge crew trucks, estimated total cost \$1,750

The Commission approved the request by unanimous vote.

The Secretary presented a request from the State Parks Superintendent that the Yachats Park Road, which extends along the ocean shore line just south of Yachats River, in Lincoln County, be posted for reduced load limit so as to prevent its use by logging trucks, which now use the road for turn-around purposes and are rendering it impassable for general public use. The Engineer endorsed the request and recommended the adoption of a 50 per cent reduced load limit. The Commission approved the recommendation by unanimous vote and adopted the following resolution in regard thereto:

WHEREAS, the following road or highway has been designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

YACHATS STATE PARK ROAD

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against said damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon, are breaking up, damaging and deteriorating the said road,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to wit:

YACHATS STATE PARK ROAD, from its junction with the Oregon Coast Highway at the south end of the Yachats River Bridge at Yachats, to its junction with said Oregon Coast Highway at a point approximately 3000 feet south of

said bridge, said park road lying on the westerly side of said Oregon Coast Highway and following closely the high tide line of the Pacific Ocean between said points, in Lincoln County

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Clerk of Lincoln County, in which said highway is located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer brought up for discussion the matter of adoption of budgets for 1940 for primary highway maintenance, primary highway minor betterments, secondary highway maintenance, and secondary highway minor betterments. He submitted budgets for each item, as follows, which the Commission considered carefully and approved by unanimous vote:

GENERAL SUMMARYPrimary Maintenance Budget
-1940-

<u>Section Maintenance</u>		
Division I	\$150,750.00	
Division II	210,740.00	
Division III	306,310.00	
Division IV	321,214.00	
Division V	366,000.00	
Supervision	<u>45,000.00</u>	
Total Section Maintenance	\$1,400,014.00	\$1,400,014.00
<u>Extra Gang Maintenance</u>		
Division I	\$109,260.00	
Division II	170,185.00	
Division III	152,870.00	
Division IV	154,022.00	
Division V	135,975.00	
Bridge Maintenance	207,100.00	
Signs	70,000.00	
Traffic Lines	92,000.00	
Traffic Signals	3,500.00	
Highway Illumination	8,000.00	
Supervision	40,000.00	
Contingencies	<u>7,074.00</u>	
Total Extra Gang Maintenance	\$1,149,986.00	\$1,149,986.00
TOTAL GENERAL MAINTENANCE		\$2,550,000.00

SEGREGATION OF GENERAL MAINTENANCE
BY TYPE OF WORKPRIMARY HIGHWAYS

Surface Maintenance	\$1,121,702.00
Maintenance of Shoulders	115,570.00
Drainage	181,770.00
Structures	267,605.00
Roadside	299,883.00
Traffic Service	471,296.00
Supervision	90,000.00
Contingencies	<u>2,174.00</u>
TOTAL BUDGET	\$2,550,000.00

DEC 8 1939

INCLUDED IN THE ABOVE TABULATIONS ARE THE FOLLOWING ITEMS
OF HIGHWAY OPERATION

Highway Beautification	\$ 18,750.00
Signs	70,171.00
Traffic Lines	92,000.00
Traffic Signals	3,500.00
Highway Illumination	8,000.00
Snow Removal	248,029.00
Sanding Slippery Pavements, etc.	44,725.00
Guard Fence and Sight Posts	42,905.00
Mile Posts	750.00
Protecting Traffic account Washouts, etc.	<u>4,597.00</u>
TOTAL	\$533,427.00

GENERAL SUMMARY

Primary Minor Betterment Budget
-1940-

Division I	\$ 21,270.00
Division II	13,562.00
Division III	34,215.00
Division IV	22,181.00
Division V	12,545.00
Bridges	52,800.00
Traffic Signals	18,000.00
Highway Illumination	2,000.00
Supervision	6,000.00
Contingencies	<u>17,427.00</u>
TOTAL MINOR BETTERMENT	\$200,000.00

Details of Primary Minor Betterment Budget
-1940-

Construction and Extension of Culverts	\$ 21,593.00
Improvement of Road Approaches	9,018.00
Guard Fences	20,482.00
Sight Posts and Mail Box Posts	3,450.00
Grade, Surface and Oil Parking Places	800.00
Widening	10,595.00
Construct Masonry Walls	3,540.00
Drains and Ditches	10,585.00
Slope Protection	170.00
Shoulder Oiling	2,625.00
Place Riprap	<u>2,335.00</u>

DEC 6 1939

Reconsideration was given by the Commission to the request of Mr. Emory Tresham to lease 6.14 acres of state-owned land adjacent to the Amity-Dayton Secondary State Highway, in Yamhill County. The Assistant Attorney advised that Mr. Tresham has had the use of this property for the last two or three years and would like to renew the lease for another year, if possible, and is willing to pay \$4.00 per acre for the same. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of encroachment of the service station buildings of the Standard Stations, Inc., on the state highway right of way at the intersection of Denver and Union Avenues, Portland. He recalled that at a previous meeting the Commission ordered removal of these buildings from the highway right of way, giving the company 90 days' time within which to do the work, which time expires December 29, 1939, and that at the same meeting he was instructed to investigate conditions at this location with the view to providing greater safety to the traveling public at this point. He further advised that such investigation has been made and several alternate plans are being studied to remedy the existing conditions, but he is not yet ready to make a definite recommendation with respect to any of them. He suggested, therefore, that it would be proper to give Standard Stations, Inc. additional time within which to remove their buildings and suggested an extension of time of 90 days, or until March 29, 1940. The Commission approved the suggestion by unanimous vote.

The Engineer also brought up for discussion a right of way matter arising out of the improvement of the John Day Highway in the town of Prairie City. He advised that in connection with this improvement it is necessary to acquire some property from a Mr. W. H. Clark, on which property there is being maintained a very modern service station valued conservatively at approximately \$7,500. The city street in front of this service station, he said, is only 50 feet wide and the service station is built to conform with such width, the front of the canopy over the gasoline pumps being only 25 feet from the center line of the highway; so, in order to provide an 80-foot right of way, it will be necessary to remove 15 feet from the front of this canopy. He further stated that Mr. Clark's gasoline pumps are now located almost exactly on the 40-foot right of way line and when the highway is reconstructed will be considered as curb pumps, of which there are several along the main street in Prairie City. He said that if the Commission would permit Mr. Clark to leave his pumps in the present location, the cost of the right of way would not be great; in fact, the damage to Mr. Clark would probably not exceed \$800, including land and the remodeling of the canopy; whereas, if Mr. Clark is not permitted to maintain his pumps in their present location, then it will be necessary to readjust his entire service station, which would cost approximately \$5,000 and would be quite difficult to do in view of the limited amount of property that he owns. He requested instructions. After some discussion the Commission decided, in view of the fact that this property is within the city limits of Prairie City and for the further reason that gasoline pumps are being maintained on the curb line at several other locations in this town, that it would not be advisable to require the removal of Mr. Clark's pumps. Accordingly, the Commission, by unanimous vote, authorized a settlement with Mr. Clark on the basis of the \$800 estimate, leaving the pumps in their present location.

The Attorney presented to the Commission for its consideration and approval a deed from the City of Portland, whereby the city conveys unto the State of Oregon that portion of the city's property known as Benson Park, which lies on the north side of the Oregon-Washington Railroad and Navigation Company's tracks at Multnomah Falls and extends to the Columbia River. He said that he has inspected this deed and recommends its acceptance. The Commission by unanimous vote approved the recommendation and ordered the deed recorded in the county records.

A letter was presented from Ralph Allen of Allen's Cash Grocery, Marshfield, advising that, because of certain highway construction work that was being undertaken by the State Highway Commission in the Bunker Hill District, Marshfield, during the period September 4 to October 4, 1939, he has lost considerable business in the sale of gasoline and oil and has been deprived of profits from such business in the amount of approximately \$150.00, which amount he is asking the State Highway Commission to pay him as damages. The Attorney advised that there is no legal obligation on the part of the State Highway Commission to compensate Mr. Allen for his loss; in fact, the Commission has no legal authority to expend state funds for such purpose. In view thereof, the Commission decided unanimously to deny Mr. Allen's claim and instructed the Secretary to so inform him.

The Commission considered and ordered filed two resolutions adopted by the Oregon Coast Highway Association at its annual meeting in Astoria on October 23, 1939, in one of which the Commission was urged to appropriate funds to complete the surfacing of the Neahkahnie Mountain Road and to make every effort to complete the construction of this road in the early summer of 1940; and in the other of which the Highway Commission, the State Police Department, and other state bodies affected, are urged to take steps as may be necessary to enforce existing laws and secure additional laws to eliminate hazards created by the improper loading and overloading of logging trucks operating on state highway rights of way.

The Secretary presented a letter from L. J. Rickard, Waldport, renewing his previous request for the construction of a sea wall along the Oregon Coast Highway at Waldport, to protect the state park at this location. Mr. Rickard advises that he has contacted two contractors who are willing to construct a 12-foot sea wall for the sum of \$10,000, which is considerably less than the amount that the State Highway Engineer estimated the work would cost. The Engineer advised that it would not be possible to construct this improvement for an amount less than the original estimate unless an inferior and unsatisfactory type of work were done, which he could not recommend. It was his thought that the project is not of sufficient importance to justify the expense. In view thereof the Commission decided not to undertake the improvement.

The Commission also considered and ordered filed correspondence between the State Highway Engineer and Mr. Clyde Edmondson, Manager of the Redwood Empire Association, San Francisco, with respect to the paving of the intersection of the Redwood Highway and the Pacific Highway just south of Grants Pass, it appearing to the Commission that this matter has been disposed of

to the satisfaction of all parties concerned.

The Assistant Attorney brought up for discussion the matter of renewing the Commission's contracts with the several hospital associations. He advised that the services heretofore rendered by these associations appear to be entirely satisfactory, and recommended that the contracts be extended for another year on the original basis. The Commission approved the recommendation unanimously.

The Engineer presented a letter from Mr. Ivan E. Oakes, Director, Division of Operations, Works Progress Administration of Oregon, in which the Commission is requested to take action as may be necessary to abate the nuisance caused by the close proximity to Camp Manning of two locations at which the State Liquor Control Commission permits the sale of beer. He recommended the directing of a letter to the Liquor Control Commission requesting consideration to either the cancellation of the permits or the refusal to renew the existing permits when they expire at the end of the calendar year. The Commission approved the recommendation by unanimous vote, whereupon Chairman Caball signed a letter to that effect.

The Secretary presented a mimeographed letter dated December 4, 1939, directed by Governor Charles A. Sprague to all state departments employing male help, in which Governor Sprague requests that all state departments continue cooperation with state employees who are members of the Oregon National Guard or Reserve Officers Association by granting such leaves of absence or making such rearrangement of work programs or hourly schedules as is necessary to assist the personnel to carry out their required active duty training. The Engineer advised that this is in conformity with the plan that is now in effect in the State Highway Department. The Commission approved the same by unanimous vote, subject to the condition that it fit in properly with the state highway department rulings on this subject.

The Secretary presented resolutions from several county courts, as follows, accepting or rejecting short sections of state highways that have been heretofore abandoned by the State Highway Commission because of revisions in the alignment of the highways at such points:

- | | |
|------------------|--|
| Douglas County | Resolution accepting a portion of the Winston Bridge Section of the Pacific Highway, from a point 6 miles south of Roseburg, southerly about 0.8 mile. Abandoned by state May 2, 1935. File No. 6. |
| Lake County | Resolution accepting a portion of the Fremont Highway from Lakeview northerly, approximately 8 miles. Abandoned by state November 30, 1935. File No. 14. |
| Multnomah County | Order accepting a portion of the Bertha-Beaverton Highway, in the Fairvale District. Abandoned by state November 30, 1935. File No. 15. |

- Washington County Resolution accepting a portion of the Tualatin Valley Highway, from Multnomah-Washington County line southwesterly to a point opposite and 40 feet distant northerly from Engineer's Station 82+00 of the highway revision. Abandoned by state February 7, 1936. File No. 20.
- Washington County Resolution accepting a portion of the Tualatin Valley Highway from approximately Engineer's Station 160+20 of the revised center line southerly to a point on the easterly right of way line of the Bertha-Beaverton Highway. Abandoned by state February 7, 1936. File No. 21.
- Jackson County Resolution accepting a portion of the Pacific Highway between Central Point and Medford. Abandoned by state August 14, 1935. File No. 23.
- Multnomah County Resolution accepting a portion of the West Side Pacific Highway, from Bertha to Multnomah-Washington County line. Abandoned by state September 6, 1935. File No. 30.
- Lake County Resolution rejecting a portion of the Fremont Highway between Engineer's Stations 1789+00 and 1804+40 and between Engineer's Stations 1810+40 and 1832+40. Abandoned by state October 4, 1936. File No. 37.
- Washington County Resolution accepting a portion of the Pacific Highway West, north of reconstructed highway between Stations 606+20 and 635+20. Abandoned by state July 29, 1937. File No. 43.
- Douglas County Resolution accepting a portion of the Shady Point-Kelly Corner Section of the Pacific Highway, between Stations 1401+00 and 1302+80. Abandoned by state November 17, 1937. File No. 46.
- Multnomah County Order accepting a portion of the Lower Columbia River Highway between Engineer's Stations 210+00 and 219+50, and rejecting portions between Engineer's Stations 54+50 and 59+50, and between Engineer's Stations 270+50 and 279+00. Abandoned by state December 1, 1937. File No. 50.
- Douglas County Resolution accepting a portion of Stephens Street Section of the Pacific Highway, in Roseburg. Abandoned by state December 21, 1937. File No. 51.
- Marion County Resolution accepting a portion of the Pringle Creek-Taylor Creek Section of the Pacific Highway. Abandoned by state on February 16, 1938. File No. 55.
- Baker County Resolution accepting a portion of the Old Oregon Trail between Mile Posts 365 and 366; also between Mile Posts 374 $\frac{1}{2}$ and 375 $\frac{1}{4}$. Abandoned by state March 25, 1938. File No. 57.

- Jackson County** Order accepting a portion of the Pacific Highway north from Ashland Undercrossing about $1\frac{1}{2}$ miles. Abandoned by state March 28, 1935. File No. 1.
- Washington County** Resolution accepting a portion of the Multnomah County Line-Middleton Section of the West Side Pacific Highway between Engineer's Station 283+00 and Engineer's Station 321+80 (new location). Abandoned by state November 8, 1935. File No. 10.
- Yamhill County** Order accepting a portion of the Salem-Dayton Highway between Engineer's Stations 20+00 and 78+100 (old location). Abandoned by state November 18, 1936. File No. 38.
- Columbia County** Resolution accepting a portion of the Mile Bridge Section of the Nehalem Highway. Abandoned by state November 16, 1938. File No. 59.
- Linn County** Resolution accepting Fleming Ranch-Shindler Bridge Section of the Albany-Lyons Highway, including Shindler Bridge. Abandoned by state January 26, 1939. File No. 61.

After due consideration the Commission approved the resolutions and ordered them filed in the highway department records.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts authorized for each. After due consideration, action was made by Commissioner Aldrich that the State Highway Engineer be authorized and instructed to make such surveys on various sections of highways of this state, which said sections of highways and the amounts authorized for survey expenditures are as follows:

- Plans - - - - 1-2820 - Troy Ranch Section, Old Oregon Trail, in Baker Co.
1st authorization - \$300.00
- Plans - - - - 101-2821 - Mason-Salisbury Section, Sumpter Valley Highway, Baker County.
1st authorization - \$1,800.00
- Plans - - - - 202-2818 - Albany-North Section, Albany-Buena Vista Co. Road, Benton County.
2nd authorization - \$900.00
Total to date \$1,500.00
- Right of Way - 104-2831 - Jewell-Banzer Bridge Section, Nehalem Highway, Clatsop County.
1st authorization - \$1,050.00
- Quarry - - - - 105-2821 - Oak Ranch Creek Section, Nehalem Highway, Columbia County.
1st authorization - \$275.00
- Location - - - - 7-2808 - Crooked River-Prineville Section, Ochoco Highway, Crook County.
4th authorization - \$150.00
Total to date \$1,450.00

Location - - - 107-2806 - Jefferson County Line-Prineville Section, Warm Springs Highway, Crook County.
2nd authorization - \$1,500.00
Total to date \$7,500.00

Location - - - 10-2825 - Gardiner Section, Oregon Coast Highway, Douglas County.
2nd authorization - \$280.00
Total to date \$1,680.00

Plans - - - - - 12-2820 - Bridge Creek-Baker County Line Section, John Day Highway, Grant Co. 1st authorization - \$1,500.00

Plans - - - - - 12-2821 - Rock Creek Bridge, John Day Highway, Grant County
1st authorization \$400.00

Plans - - - - - 112-2819 - Kimberly-Dry Creek, Monument Highway, Grant County
2nd authorization - \$475.00
Total to date \$2,275.00

Plans - - - - - 13-2808 - Okerman Ranch-Sage Hen Hill Section, Central Oregon Highway, Harney Co. 2nd authorization - \$252.00
Total to date \$1,652.00

Right of Way - 13-2808 - Okerman Ranch-Sage Hen Hill Section, Central Oregon Highway, Harney Co. 3rd authorization - \$450.00
Total to date \$2,102.00

Plans - - - - - 18-2835 - Bly-E. Boundary Indian Reservation, Klamath Falls-Lakeview Highway, Klamath Co.
2nd authorization - \$650.00
Total to date \$1,650.00

Plans - - - - - 18-2840 - Odell Lake Maint. Hdqtrs., Willamette Highway, Klamath County.
1st authorization - \$150.00

Stock Pile - - - 20-2839 - Cushman-Camp Creek Section, Siuslaw Highway, Lane & Quarry County.
3rd authorization - \$100.00
Total to date \$500.00

Bridge - - - - - 21-2833 - Depoe Bay Bridge, Oregon Coast Highway, Lincoln County.
2nd authorization - \$460.00
Total to date \$660.00

Testing - - - - 121-2836 - Karnville Section, Silets Highway, Lincoln County.
1st authorization - \$300.00

Plans - - - - - 22-2821 - San Garland Bridge-Trout Creek Section, Santiam Highway, Linn Co. 1st authorization - \$1,200.00

Testing - - - - - 22-2809 - Albany Section, Pacific Highway East, Linn County
5th authorization - \$25.00
Total to date \$17,025.00

DEC 8 1939

Reconn. - - - 23-2816 - Baker County Line-Ontario Section, Old Oregon Trail,
Malheur County. 3rd authorization - \$600.00
Total to date \$2,600.00

Location - - - 26-2838 - Steel Bridge-Interstate Avenue, Front Ave., Port-
land, Multnomah Co. 1st authorization - \$2,000.00

Plans and - - - 26-3839 - Columbia-Alder Streets, Front Ave., Portland, Mult-
Right of Way nomah County. 1st authorization - \$1,500.00

Testing - - - - 26-2840 - Bridal Veil Section, Columbia River Highway, Mult-
nomah County. 1st authorization - \$270.00

Plans - - - - - 29-2837 - Manzanita Junction, Oregon Coast Highway, Tillamook
County. 1st authorization - \$115.00

Reconn. & - - - 31-2818 - Cricket Flat-Wallowa County Line Section, Wallowa
Location Lake Highway, Union County.
1st authorization - \$3,100.00

Plans - - - - - 33-2820 - Criterion-Cow Canyon Section, The Dalles-California
Highway, Wasco Co. 1st authorization - \$575.00

Testing - - - - 33-2815 - Seufert-Dufur Section, The Dalles-California Hwy.
Wasco County. 4th authorization - \$250.00
Total to date \$584.00

Plans - - - - 134-2823 - Campbell Bridge-Laurel Road, Hillsboro-Silverton Rd.
Washington Co. 1st authorization - \$500.00

Reconn. - - - 235-2811 - Fossil-Kinzua Section, Kinzua County Road, Wheeler
County. 1st authorization - \$500.00

Reconn. - - - 235-2811 - Fossil-Kinzua Section, Kinzua County Road, Wheeler
County. 2nd authorization - \$100.00
Total to date \$600.00

The motion was duly seconded by Commissioner Clough and was declared by Chair-
man Cabell to have carried by the unanimous vote of the Commission.

The Commission had under consideration the following requests for
extensions of time within which to complete highway construction projects:

Mountain States Construction Company, Contract No. 2163, for
grading, surfacing, and oiling the Noyes Ranch-Cove Section of the
Cove Secondary State Highway, in Union County, requested an exten-
sion of time from August 31 to November 15, 1939, within which to
complete this job. They attributed their failure to complete the
project within the specified time limit to failure of the La Grande
Concrete Pipe Company to deliver certain materials for this job.

The Engineer advised that all of the work on this project was satisfactorily completed on October 28, 1939, and that the reason that the job was not completed within the specified time limit was that the commercial plant furnishing material aggregate and maintenance materials failed to supply such materials in accordance with the specifications. The overrun of time limit, he said, did not increase the engineering expense on this job, neither did it interfere with the use of the highway by the traveling public. He recommended, in view of the circumstances, that an extension of time, from August 31 to October 28, 1939, be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Saxton, Looney & Risley, Contract No. 2168, for grading, surfacing, and oiling the East Unit, Rhea Creek-Heppner Section of the Wasco-Heppner Secondary State Highway, in Morrow County, requested an extension of time of 10 days, from September 30 to October 10, 1939, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to unforeseen difficulties, and circumstances beyond their control. The Engineer advised that all work in connection with this job was completed on October 6, 1939, hence an extension of time of only 6 days is required. He recommended the granting of the extension of time covering such 6-day period without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

M. L. O'Neil & Son, Contract No. 2171, for grading the Hooker Creek-Jordan Valley Section of the Jordan Valley Secondary Highway, in Malheur County, requested an extension of time from October 31 to November 15, 1939, within which to complete this job. They attributed their failure to complete the job within the specified time limit to bad weather conditions which interfered with the progress of the work. The Engineer advised that all work in connection with this project was completed on November 13, 1939, so that an extension of time of only 13 days is required. He further advised that bad weather conditions did interfere somewhat with the progress of the work; nevertheless, the contractor could have completed the job within the specified time limit had he employed sufficient equipment and crew during the grading operations. He recommended, in view of the circumstances, that the extension of time from October 31 to November 13, 1939, be granted, but that the contractor be required to reimburse the state for the extra engineering expense incurred during such period. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

H. L. Rice, Contract No. 2202, for grading, surfacing, and oiling the Strebin Road-Hoaner Road Section of the Troutdale-Sandy

County Road, in Multnomah County, requested an extension of time from September 30, 1939, to July 1, 1940, within which to complete this project. He attributed his failure to complete the project within the specified time limit to delay in awarding this contract to him. The Engineer advised that the Commission took bids for this project on May 19, 1939, but that the contract was not awarded until July 13, 1939, 53 days later, when approval of the project was obtained from the Public Roads Administration, which cooperated in the cost of the work. He further advised that the contractor started clearing operations on July 21 and commenced the construction of his gravel-crushing plant on July 31; but, owing to various difficulties, was able to manufacture only 100 cubic yards of materials by September 15, when, according to the contract, the oil mat surface treatment should have been placed. On account of the fact that there was nearly two months' delay in awarding this contract, he said, it was not possible for Mr. Rice to complete oiling work this year; in fact, he has been ordered not to do such work until weather conditions permit. He recommended, in view of the circumstances, that an extension of time of 53 days after the resumption of construction operations in the spring be granted without penalty, but that the contractor be required to maintain the road during the winter season and to perform whatever work is necessary in the spring to put the road in condition for oil mat wearing surface. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2151, 2163, 2168, 2171, & 2203, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and said jobs are now ready for acceptance:

Contract No. 2151, with Colonial Construction Company, for clearing, grading, and toe embankment on the Corbett Station-Rooster Rock Section of the Columbia River Highway, in Multnomah County. Completed November 30, 1939.

Contract No. 2163, with Mountain States Construction Company, for grading, surfacing, oiling, and furnishing crushed gravel on the Noyes Ranch-Cove Section of the Cove Secondary Highway, in Union County. Completed October 28, 1939.

Contract No. 2168, with Saxton, Looney & Risley, for grading, surfacing, and oiling, also furnishing crushed

rock in stock piles on the East Unit, Rhea Creek-Heppner Section of the Wasco-Heppner Secondary Highway, in Morrow County. Completed October 6, 1939.

Contract No. 2171, with M. L. O'Neil & Son, for grading the Hooker Creek-Jordan Valley Section of the Jordan Valley Secondary Highway, in Malheur County. Completed November 13, 1939.

Contract No. 2203, with Blair T. Alderman, for roadside improvement on the Junction City-Eugene Section of the Pacific Highway, in Lane County. Completed November 30, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Charlotte A. Fuchs, providing for the elimination of a timber cattle pass at Mile Post 224.22 on the Central Oregon Highway, in Malheur County.

Agreement with Wasco County, providing for county maintenance of the lower Fifteenmile Creek County Road, from its junction with The Dalles-California Highway to a point approximately 3 miles southerly therefrom, after construction of the same by the state as a federal aid secondary highway, being project PAS 44-A(1).

Agreement with Castle Films, Inc., providing for the distribution and showing of the film "Old Oregon Trail".

Agreement with the United States of America, providing for advancement of state funds in an amount not to exceed \$4,000 to pay non-labor items in connection with the Wolf Creek Highway W.P.A. project during the month of December, 1939.

Easement granting to the Southern Pacific Company for the sum of \$1,027.30 a right to construct, operate, and maintain a railroad tye track and appurtenances on certain state-owned property in Albany, being Right of Way Transaction No. 5151.

Easement from the Portland General Electric Company, authorizing the state to occupy a certain portion of the company's property on the Water Street Section of the Pacific Highway East, in Oregon City, being Right of Way Transaction No. 1421.

DEC 6 1939

Bargain and Sale Deed, conveying unto Ida E. Davis certain property lying outside of the standard-width highway right of way in Lot 9, Electric Addition to Tigardville, being Right of Way Transaction No. 6927 and No. 7152.

Agreement with the Portland General Electric Company, being a revocable permit for the use of one of the company's power poles at a place known as Six Corners on the Pacific Highway West, in Washington County, for the purpose of suspending an overhead flashing beacon at such location.

Agreement with the Portland General Electric Company, being a revocable permit for use of three of the company's poles at the Fairgrounds Road and Myrtle Avenue, Salem, for the purpose of suspending therefrom an overhead flashing beacon.

Agreement with the Tidewater Associated Oil Company, being a revocable permit granting the state permission to maintain a pole in the corner of the company's property at the intersection of Myrtle Avenue, Fairgrounds Road and Tile Road, Salem, for the purpose of suspending an overhead flashing beacon.

The Commission discussed the advisability of holding a special meeting between now and its regular meeting on January 11 and 12, 1940, for the disposal of accumulated routine matters, and decided to hold such meeting in Salem on Wednesday, December 20, 1939, following its inspection of the Wilson River and Wolf Creek Highways on the preceding day.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:30 o'clock p. m.

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1939	
9261	Dec. 20	Attractions along highways. Privately-owned attractions, including Sea Lion Caves, not to be shown on highway maps. Tigard. Action on oiling strips adjacent to pavement deferred. Real property. Resolution authorizing acquisition.
9266		Mehalem Sand Spit. Scale of prices for property adopted.
9267		Taxes. Payment of outstanding taxes in order to effect right of way settlements authorized. Condemnation. Recommended offers. Resolution adopted as follows: Albany Section of Pacific Highway East; Tigard Section of Pacific Highway West; Oregon City Section of Pacific Highway East Cottage Grove Section of Pacific Highway.
9269		Bandon. Right of way negotiations to be abandoned pending decision relative to delinquent taxes.
9270		Historical sites. Not to be acquired within cities and towns. Depoe Bay. Report on proposed parking site for automobiles. Sale of building. Field office building located at Lobert Overcrossing, Klamath County, sold to L. K. Porter. Arch Cape. Purchase of Edward W. Smith property authorized. Negotiations to be continued for purchase of tract from Anna C. Taylor.
9271		Oregon Coast Highway. Manzanita-Fisher's Point Section. Acquisition of right of way to be deferred. Footpath. Vicinity of Manzanita School. County offers cooperation in construction. Decision deferred. Park matters: Alkali Lake and McDermitt Creek CCC Camps:- Acceptance as oases or state park sites deferred.
9272		Saddle Mountain State Park:- Game refuge to be established by Legislature. Attorney to prepare bill. Ecola State Park:- Fence to be constructed around property of Mrs. F. G. Minott as barricade against elk from park. Cascadia:- Acquisition of Giesendorfer property deferred.
9273		Timber strips. Wilson River Highway. Options to be secured on section from Summit of Coast Range to McNamers Camp. Tigard. Deposit of H. N. Peabody for purchase of service station building and facilities to be returned. Station to be readvertised. Oregon Coast Highway. Taft. Widening of pavement deferred. Willamette River Bridge at Salem. Expense of maintaining lights not to be assumed by state.
9274		Sidewalk. Waldport. Action on request for construction deferred. Beaver Creek Bridge. Widening deferred pending permanent revision of Oregon Coast Highway. Oregon Coast Highway. Report ordered on improving alignment southerly from Tillamook city limits.

	1939	
9274	Dec. 20	Reedsport. Landscaping wye connection of Umpqua and Oregon Coast Highways approved.
		The Dalles. Report on refusal of Dr. Thompson to remove neon sign at his camp ground on Columbia River Highway.
9275		Traffic signal and flashing beacon. Klamath Falls. Installation approved.
		Klamath Falls Undercrossing. Painting of traffic stripes approved.
		Laboratory building. Engineer to report on need for same.
		Claim. H. E. Warren's claim for automobile tire damaged on East Portland-Oregon City Highway approved.
9276		Snow removal. McKenzie Highway between Blue River and Pole Creek. Expenditure of \$1,000 approved for this winter.
		Columbia River. Dredging operations in vicinity of Multnomah Falls. Financing state's share of cost discussed.
		Grants Pass. Action deferred on request of city for state aid in constructing roadway into city park from Pacific Highway.
		Lacquer. Purchase of traffic line lacquer for 1940 approved.
		Interstate Bridge. Attorney to attempt to collect costs of damages to barriers and gates caused by motorists. (see 9308)
		Western Association of State Highway Officials. Mr. Cabell and Mr. Baldock to attend meeting in Reno, Nevada, Jan. 5, 1940.
		Mr. McCullough to attend meeting in Santa Fe if representation necessary.
9277		Historical markers. Committee appointed to designate locations for markers along Old Oregon Trail.
		Award of contracts. Commission approves following awards:
		Cow Hollow Creek-Owyhee School Section, M. L. O'Neil & Son;
		East Fork Illinois River Bridge, J. F. Johnston.
		Salem-Dayton Secondary Highway. Spaulding Ranch Section. Abandonment resolution.
9279		Signposts or racks. Regulations adopted relative to installation and representation.
		Signs. Request that "Timberline" signs be changed to "Timberline Lodge" approved.
9280		Log hauling. Trucking of logs in vicinity of Prineville during Saturday afternoons and Sundays approved for three months.
		Junction City. Commission to take no action in establishing zones. Setback line of 15 feet on each side of highway recommended.
		Sunnyside-Umapine Secondary Highway. To be designated a through highway. Signs to be erected at intersecting roads or streets.
		Waldport. Request for loan of services of an engineer approved.
		Warm Springs Highway. Placing of section from Madras to junction with Wapinitia Highway on federal aid system requested.
9281		Rickreall Cutoff. Proposed route opposed. Alternate route suggested.
		Sidewalk. Request for construction from Roseburg to Garden Valley County Road.

Page	Date	Subject
	1939	
9281	Dec. 20	Log hauling. F. E. Butt offers services as inspector of logging equipment and loading. Oregon Coast Highway. Port Orford and Gold Beach. Suggestions presented for proposed improvement. Warren. Request of Leon D. Pitts to construct roadway between new and old highway denied. Area to be landscaped.
9282		Pacific Highway. Sutherlin. Widening of Calapooya Street, route of highway, approved. Buildings. Eugene. Remodeling maintenance building and construction of storage building approved. Oregon City. Bill presented by appraisers in Security and Investment Company condemnation suit approved. North River Road. Salem. State to assume expense of damage repairs. Interstate Bridge. Chairman Cabell authorized to give written consent to removal of street car tracks.
9283		Nehalem Sandspit. Mrs. Edna A. Bell refuses Commission's offer for seven lots. Extensions of time, as follows: Coos Bay Dredging Company, Charleston-Miner Creek Section; Roy L. Houck, Albany Overcrossing Section;
9284		Odum Construction Company, school building at Manning. Contracts completed and accepted, as follows: Charleston-Miner Creek Section, Coos Bay Dredging Company Albany Overcrossing, Mountain States Construction Company; Bunker Hill Section, Roy L. Houck; Robert Overcrossing, Edlefsen-Keygandt Company;
9285		West Unit, Stanfield-Pendleton Hill Section, M. E. Meyers & Son; Weston-Elgin Rock Production Project, F. R. Hewett; Maupin-Cow Canyon Section, A. S. Wallace. Date for February meeting set for 15th and 16th. Agreements, et cetera, signed as follows: Lease of borrow pit near Tigard secured from Mrs. Zelda Ploeger; Bargain and sale deed conveying unto Emil A. Johnson land in Tigard; Lease of quarry site from County Court of Lake County Release of cattle pass by Herman Beilke, in Umatilla County; Release of cattle pass by Stephen Spike, in Umatilla County; Extension of CCC campsite lease at Moahink Lake from James V. and Edna C. Ford. Cooperative and license agreement with United States of America providing for lease of land in Jefferson County.
	1940	
9287	Jan. 10	Log hauling. Conference relative to dropping of logs on highways and removal of same. (See page 9333)
9288	Jan. 11	Bids received on following projects: Summit-Mist Section, surfacing, oiling, crushed rock;
9289		Lapine-West Forest Boundary Section, grading, surfacing, oil; Chemult-Fort Klamath Section, crushed rock;

	1940	
9289	Jan. 11	Bids received on following projects (continued): Lost River Section, grading, surfacing, road oil; Concrete viaduct over Lost River and concrete siphon;
9290		Albany Section, grading and paving; Hay Canyon Section, grading, surfacing, crushed rock; Buildings in Tigard.
9291		Gravel pit. State's contractor to use Klamath County pit in connection with construction of Lost River Project. The Dalles-California Highway. Improvement north and south from Klamath Falls discussed. Flume Section. Improvement and grade line change discussed. Klamath County. Additional federal aid secondary highway funds discussed.
9292		Cascade Lakes Forest Highway. Improvement from Willamette Highway junction to Crescent Lake discussed. Westside Klamath Lake Secondary Highway. Improvement near Fremont Bridge, in Klamath Falls, requested. Sidewalk. Construction on Fremont Bridge, Klamath Falls, requested. Drainage. Bly. Condition at intersection of Klamath Falls-Lakeview Highway and county road to be investigated. Morrow County. Several highway improvements discussed.
9293		Saxton, Looney & Risley. Additional time granted to furnish bonds in connection with contracts awarded Dec. 7 & 8, 1939. Tigard. E. C. Warren requests construction of temporary approach to his service station, pending completion of highway.
9294		Minutes of August 31 and September 1, and of September 27 and 28, 1939, approved. Buildings. List of new buildings needed. List of buildings approved for 1940 construction.
9295		Laboratory building. Additional land needed to be acquired from State Penitentiary. Warm Springs Highway. Designation as federal aid highway urged. Lower Columbia River Highway. Deer Island. Report on proposed improvement. Oregon Coast Highway. Beaver. Bridge over Beaver Creek to be widened in lieu of revision of highway.
9296		The Dalles. Neon sign maintained by Dr. Thompson to be left in present location. North Umpqua Highway. Report on justification of standard-type bridge across Steamboat Creek. Footpath. Oregon Coast Highway from Tillamook to Trask River Bridge. Engineer's report. Decision deferred. Hubbard. Destruction of traffic island by O. E. Powell at entrance to his service station.
9297		West Portland-Hubbard Highway. Delegation urges completion. Elsie-Jewell Road. Delegation urges designation as state secondary highway.
9298		Tongue Point State Park. Clatsop County requests state to deed back part of park to county.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1940	
9298	Jan. 11	Rock. Sale of rock from state's quarry near Seaside to Clatsop County approved. Elsie-Jewell County Road. Reconsideration of request that road be placed on state secondary highway system. Pea-vining equipment. Special permits for movement of equipment requested by Maling Company and Wentworth & Irwin Co.
9299		Awards. Commission announces awards of contracts and sale of building. (See page 9288).
9301		McMinnville-Tillamook Highway. Sheridan. Improvement requested. Portland. East 39th Avenue. Designation and improvement as arterial highway route requested.
9302		Hood River Secondary Highway. Dee-Parkdale Section. Report on plans for improvement requested. Log hauling. C. L. Hoover granted permission to haul logs on Columbia River Highway, short distance west of Hood River. Hood River County. County Court requests several highway improvements. Irrigation canal across Ochoco Highway near Powell Butte. Construction on basis of skew design approved. Irrigation District to cooperate in cost.
9304		Traffic light. Hubbard. Request for installation denied. Speed limit. Hubbard. 35-mile per hour signs to be erected. Springfield. Request for state to assume expense of replacing lights on Willamette River Bridge. Lights on bridges. State to assume expense of replacement. Traffic lights. Jefferson. Request referred to Engineer. Pedestrian lanes. Jefferson. Request for painting of lanes across highway referred to Engineer.
9305		Traffic light. Cornelius. Request for installation renewed. Oregon Coast Highway, between Marshfield and North Bend. Request for installation denied. Portland. Installation approved at intersection of Sandy Boulevard with Prescott Street, Columbia Boulevard, and N. E. 105th Street. Burns. Request for installation denied. Portland. Installation approved at intersection of U. S. Highway 99 West with S. W. Terwilliger Boulevard, S. W. 19th Street and S. W. 30th Street. Cascade Lakes Forest Highway. Improvement from junction with Willamette Highway to Crescent Lake requested.
9306		Portland. Request for paving of shoulders adjacent to McLoughlin Boulevard at intersection of street leading to Bybee Avenue denied. Yaquina Head Lighthouse Road. Improvement of road leading from Oregon Coast Highway to Lighthouse denied. Siletz Secondary Highway. Improvement discussed. Lower Columbia River Highway. Prescott Hill Section. Improvement requested.
9307		Baker-Homestead Highway. Flagstaff Hill-Lower Powder Section. Light oil treatment tentatively approved.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1940	
9307	Jan. 11	Wasco-Heppner Secondary Highway. Resurfacing and oiling in vicinity of Condon requested.
		Hospital Association. Physicians and Surgeons Association requests modification of agreement. Referred to Attorney.
		Political activities of employees. No change to be made in present policy. (Adopted January 1934)
9308		Railroad grade crossings. Discussion of resolution prepared by Union Pacific System relative to federal appropriations.
		American Association of State Highway Officials. Payment of dues for 1940 approved.
		Nysse. Grade separation project. Acquisition of privately-owned property discussed. Union Pacific Company refuses co-operation.
		Interstate Bridge. Discussion of reimbursement for bridge damages caused by motorists. (See page 9276)

Federal Government, receipt acknowledging payment for perpetual flowage easement on land in Hood River County;
Bargain and sale deed conveying unto Paul Nordyke and wife land near Corvallis, Benton County;
Bargain and sale deed conveying unto Herbert V. Kruse land in Washington County.

Date for next regular meeting set for May 2 and 3, 1940.

Salem, Oregon, December 20, 1939

The State Highway Commission met in special session at 9:30 o'clock a. m. in Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner E. B. Aldrich was excused from attending this meeting.

The Commission had under discussion the matter of designating on future state highway maps the location of Sea Lion Caves and other privately-owned attractions situate adjacent to state highways of Oregon. The Commission decided not to show such places on these maps, in view of the fact that they are private commercial enterprises.

The Commission discussed briefly the matter of oiling the uncoiled strips adjacent to the existing highway pavement through Tigard, but deferred action thereon pending a report from the Engineer on how much it would cost to do this work.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of

DEC 20 1939

the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney reported on the value of the various lots on the Nehalem Sand Spit, the purchase of which was previously authorized by the Commission. He advised that he had a competent appraiser inspect this property and the following scale of prices was recommended, in which he concurs:

Recommended price to be paid for one lot - - - - -										\$10.00
"	"	"	"	"	"	two	lots, owned by same person			10.00 ea.
"	"	"	"	"	"	three	"	"	"	9.00 ea.
"	"	"	"	"	"	four	"	"	"	8.50 ea.
"	"	"	"	"	"	five	"	"	"	8.00 ea.
"	"	"	"	"	"	six	"	"	"	7.50 ea.
"	"	"	"	"	"	seven	"	"	"	7.00 ea.
"	"	"	"	"	"	eight	"	"	"	6.50 ea.
"	"	"	"	"	"	nine	"	"	"	6.00 ea.
"	"	"	"	"	"	ten	"	"	"	5.50 ea.
"	"	"	"	"	"	eleven	"	"	"	5.00 ea.
"	"	"	"	"	"	twelve or more lots, owned by the same person				5.00 ea.

The above scale, he said, is for lots of regular size, about 50' x 100'. For large tracts of a size equal to several lots he suggested payment of \$50.00 each. He recommended adoption of such scale of prices for this property. The Commission approved the recommendation unanimously and authorized the Attorney to proceed to close the several transactions on such basis and to commit the Commission to the purchase of additional lots at the same rate, although such

settlements are to be included in real property resolutions later, to complete the record.

The Attorney also advised that in some instances it may be necessary, in order to effect settlements, to pay outstanding taxes, which he estimated would rarely exceed \$15 on any large group of lots. The Commission approved the payment of such taxes.

The Attorney reported the necessity to resort to condemnation proceedings to acquire right of way for certain highway improvements. He submitted a list of the properties in question, with offers that he recommended be made in connection with each, as follows:

Albany Section of the Pacific Highway East

		<u>Recommended Offer</u>
Transaction No. 5827 - Owner, C. T. Veal		\$1800 to \$2000
" 5844 - " Harry Dinkle		\$ 350.00
" 6735 - " S. W. Koontz		150.00
" 7390 - " Joseph D. Sternberg		200.00

Tigard Section of Pacific Highway West

Transaction No. 6991 - Owner, A. H. Wright	125.00
" 7002 - " Tracey B. Caswell	1250.00

Oregon City Section of Pacific Highway East

Transaction No. 4485 - Owner, Henry Klossen, et al	100.00
--	--------

Cottage Grove Section of Pacific Highway

Transaction No. 5638 - Owner, D. W. Sturges (lease of Nacmi Hoskins Preston property)	400.00
--	--------

The Commission, after careful study, approved the offers suggested and thereupon, by unanimous vote, adopted the following resolution authorizing the Attorney to condemn the properties:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, re-construct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section

DEC 20 1939

or sections of the state highway system of the State of Oregon,
to wit:

property

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney reported the status of the litigation involving the question of the right of the Coos County Court to waive and cancel delinquent taxes on property in the town of Bandon. He advised that the Legislature in 1937 passed an act which, as applied to the town of Bandon, gives the taxing body the right to waive and cancel delinquent taxes. However, the Sheriff of Coos County refused to give the benefit of such statute to the properties in this town, whereupon proceedings were commenced in court seeking to require the sheriff to recognize this statute and give it full application; and Judge Brand, before whom the case was tried, has sustained the statute, although there is a possibility that an appeal may be taken to the Supreme Court. He pointed out that the Commission at a previous meeting ordered that negotiations for the right of way for the realignment of the Oregon Coast Highway through the town of Bandon be abandoned pending Judge Brand's decision. He requested instructions, therefore, in view of the fact that this decision has been rendered, whether to proceed with the acquisition of the right of way now or wait until the Supreme Court finally disposes of the matter. The Commission decided unanimously not to resume right of way negotiations in this town until the Supreme Court's decision has been obtained.

The Commission had under discussion the adoption of a policy with respect to the administering and maintaining of historical sites within cities with particular reference to a site in Albany owned by Robert L. Burghardt of that city. The State Parks Superintendent, who was present, gave as his thought that the acceptance by the Commission of historical sites located within the corporate limits of cities and towns is not desirable because it would open up a field of endeavor that is limitless in its scope and would eventually involve a large expenditure of state highway funds for constant improvements, expenses of caretakers, et cetera. He also advised that, in his estimation, the maintenance of such sites is more of local importance than of state-wide concern, hence should be maintained by local people. Further, that

a system of state parks should consist of properties that are strictly state wide in character, located outside the confines of any municipality. The Commission appeared favorably inclined toward the viewpoint of the Parks Superintendent and thereupon, by unanimous vote, decided as its general policy to be followed for the time being not to acquire sites located within the boundaries of cities and towns. The Secretary was instructed to convey such information to Mr. Lewis A. McArthur, President of the Oregon Historical Society, for his information, in so far as it pertains to the Burghardt site in Albany.

The Commission discussed briefly a report on the proposed parking site for automobiles adjacent to the Oregon Coast Highway near Depoe Bay, Lincoln County, but deferred action thereon pending further study of the situation existing at this point.

The Secretary reported the offers received from L. K. Porter, Klamath Falls, and Wm. Woahlander, to purchase the field office building located at the Lobert Overcrossing, in Klamath County, which building was used by the Highway Department's field engineers during the construction of such overcrossing, Mr. Porter's offer being in the amount of \$15 and Mr. Woahlander's being in the amount of \$7.50. The Engineer advised that the construction of the Lobert Overcrossing is completed and that the Highway Department has no further use for the office building. Also, that it would not be economical to tear the building down and salvage the materials. In view thereof, he recommended that the building be sold to Mr. Porter at his offer of \$15. The Commission approved the recommendation unanimously.

The Attorney reported the results of investigation of the Edward W. Smith property along the Oregon Coast Highway at Arch Cape, which property Mr. Smith has previously offered to sell to the state for the sum of \$2,500, plus taxes. He advised that such investigation reveals that the tract contains a large stand of spruce, hemlock, and cedar timber, which is valued in excess of \$6,000. Further, that the delinquent taxes amount to approximately \$1,300. He gave as his thought that Mr. Smith's offer to sell this property, which consists of 121.7 acres, including the timber, for \$2,500, plus the delinquent taxes in the amount of approximately \$1,300, is very fair, particularly in view of the fact that Mr. Smith has an offer of \$4,500 from one of the logging companies for the timber alone, which offer he has held in abeyance pending the Highway Commission's decision, because he would prefer that the timber be preserved in the name of the state.

The State Parks Superintendent strongly urged the purchase of this area. He declared it to be an outstanding tract and advised that if the Commission purchases it he could develop it with C.C.C. forces that are now operating in this vicinity. He also urged the acquisition of a 5-acre tract contiguous to the Smith property from Mrs. Anna C. Taylor so as to preserve a water supply for public use in the main tract. After considerable discussion the Commission voted unanimously to purchase the Smith property, which is described as follows:

All of Lot 4, except 5 acres belonging to Anna C. Taylor, situate in the S.W. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of Sec. 30, T. 4 N., R. 10 W., W.M., containing 51.7 acres. (Description continued on next page.)

(Description of Edward W. Smith property at Arch Cape, continued)

All of the S.E. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of Sec.30, T.4 N., R.10 W., W.M., containing 40 acres.

All of the S. $\frac{1}{2}$ of the S.W. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$ and the N.W. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$ of Sec.30, T.4 N., R.10 W., W.M., containing 30 acres.

The Commission authorized the Right of Way Department to conduct negotiations for the acquisition of the 5-acre tract belonging to Mrs. Taylor, in Lot 4.

The Commission discussed the advisability of acquiring right of way for the proposed state highway extending from Manzanita to Fisher's Point, in Tillamook County. The State Parks Superintendent advised that C.C.C. forces have a camp established at the town of Nehalem and there is a scarcity of the fuel required in the operation of this camp. Also, that the C.C.C. officials have proposed the securing of fuel from land that will be needed as right of way for this proposed highway; in fact, have stated a willingness to clear this right of way if the state will purchase the same. He pointed out that this would be an opportunity for the State Highway Commission to secure the clearing of the highway right of way at no expense to the state.

The Assistant Attorney called attention to the fact that he is now negotiating for the acquisition of private lots on the Nehalem Sandspit nearby. It was his thought that negotiations for the acquisition of the right of way between Manzanita and Fisher's Point should be deferred until all of the lots on the sandspit have been acquired, because it might have some bearing on the price that will have to be paid for the lots. In view thereof the Commission decided not to acquire the right of way at the present time.

The Engineer brought up for discussion the request of Tillamook County Court and the Manzanita School District for construction of a footpath along the Nehalem-Manzanita county road in the vicinity of Manzanita School. He said that he discussed this matter with the county court, which has offered to furnish equipment to carry on the work provided the State Highway Department will take charge of construction and will secure materials needed for widening the grade, from narrow points along the present road. He recommended acceptance of the county's offer, if the cost to the state is only nominal, because this road will probably have to be used as a state highway detour for several years. The Commission deferred its decision in the matter pending further investigation and report from the Engineer as to the proposed cost involved.

The State Parks Superintendent reported on the following matters:

Proposal of Mr. Nic W. Monte, Acting Regional Grazier of the United States Taylor Grazing Act, with respect to C.C.C. camps located at Alkali Lake and at McDermitt Creek, in Malheur County:- The Parks Superintendent advised that according to Mr. Monte these two camps will be continued in operation some 4 or 5 years, and, owing to their suitability for development as oases or state park sites, it was his thought that they should be turned over to the state when the C.C.C. work is done, but that they should be developed

now while the C.C.C. workers are available to do it, which would advance considerably the time when the sites could be utilized by the general public. The Commission's Attorney advised that the Commission has legal authority to accept these sites if it so desires. The Commission appeared favorably inclined to accept Mr. Monte's offer but deferred definite action thereon pending investigation and recommendation by the State Parks Superintendent.

Game refuge previously suggested for the Saddle Mountain State Park area in Clatsop County:- The Parks Superintendent advised that, as previously instructed by the Commission, he discussed this matter with Mr. Frank Wire, State Game Supervisor, who approved the idea but suggested that the refuge would be more permanent and would give better protection to the wild life of the area if it were established by the state Legislature rather than by the action of the State Game Commission. He recommended approval of Mr. Wire's suggestion and disposal of the matter on such basis. The Commission approved the recommendation and instructed the Attorney to prepare a bill for presentation jointly by the State Highway Commission and the State Game Commission to the 1941 Legislature.

Complaint of Mrs. F. G. Minott regarding damage to her property located adjacent to Ecola State Park, Clatsop County, by elk:- The Parks Superintendent advised that Mrs. Minott was one of the donors of Ecola State Park and that she still maintains her residence on property owned by her adjacent to the park. Further, that her property is being badly damaged by elk from the adjacent state park area and she is no longer able to grow garden truck or shrubbery on her premises because of the depredations of these animals. Mrs. Minott, he said, has appealed to the State Game Commission to have the elk killed, but he (Mr. Boardman) objects to such manner of handling the matter because the elk are a real attraction to visitors to the park. He suggested, therefore, as a solution of this problem, the construction of a fence around Mrs. Minott's property, which, he said, could be done by C.C.C. forces operating in that vicinity at no expense to the state. The Commission by unanimous vote approved the suggestion.

The Attorney reported the results of further investigations in regard to the Giesendorfer property located adjacent to the Santiam Highway, at Cascadia. He advised that the records show that this property is mortgaged for \$14,000.00 and that highway department appraisers value the property at \$17,375.00; further, that Mr. Giesendorfer has expressed a willingness to sell the property to the state for \$15,000.00 if the state will pay him, in addition thereto, \$75.00 per month for the rest of his life (his life expectancy, according to life insurance company ratings, being 3 years and 8 months). In other words, on such basis, the state would be paying approximately \$18,000.00 for the property. In the discussion of this matter the question arose as to what disposition would be made of the lease that was given heretofore by Mr. Giesendorfer to the Baptist Church people for church purposes. It appearing that no arrangements have been made for the removal of the church facilities from the area, the Commission decided to defer action on the purchase of the entire tract until it knows just how the church matter is to be handled. The matter was re-referred to the Attorney to secure such information.

The State Parks Superintendent brought up for discussion the matter of acquiring wayside areas along the Wilson River Highway from the summit of the Coast Range Mountains westerly to McNamers Camp, for the preservation of timber standing thereon. The Commission instructed the Attorney to secure options for desirable tracts along this section after first consulting with the State Parks Superintendent in regard thereto.

The Engineer requested instructions in regard to the bid submitted to the Commission at its last meeting by H. N. Peabody for the purchase of a service station building and certain facilities on the newly acquired right of way at Tigard. He advised that Mr. Peabody submitted a bid by letter rather than on the proposal form prepared by the State Highway Department, his bid being \$75.00 for the building and facilities, including two gasoline pumps. Further, that after the notice of sale was published, it was decided that the pumps could be used to good advantage by the Highway Department, so they were excluded from the sale and information to that effect was given to all of the prospective bidders with the exception of Mr. Peabody, who had not requested a standard proposal form. He pointed out that the Commission accepted Mr. Peabody's offer on the day that it was submitted and that the customary notification of the sale was given to Mr. Peabody, who now claims the gasoline pumps along with the other facilities. He recommended, in view of the circumstances, that the moneys paid by Mr. Peabody be returned to him and that the service station be readvertised for sale at the next meeting. The Commission approved the recommendation and so ordered.

The Commission adjourned at 1:00 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room.

The Engineer reported on the cost to widen the pavement on the Oregon Coast Highway through the business section of Taft, as has been requested by Mr. Jos. R. DeJardin, postmaster of that place. He estimated the cost of this project at \$2,000.00, which would include widening work and construction of storm drains through the business portion of this town. He pointed out that the entire district between Taft and Oceanlake is quite thickly populated and that the traffic congestion is quite severe during the summer season, which fact, in his estimation, calls for the improvement of the entire section in the not far distant future, as a traffic safety measure. He questioned the advisability of spending \$2,000.00 at this time for improvement of a very short section in the town of Taft, in view of the possibilities of securing federal aid funds with which to improve the entire section between Taft and Oceanlake. The Commission decided, in view of the report, against the improvement through Taft at the present time, although the matter is to be reconsidered later, after the Commission has had an opportunity to inspect the project.

A letter was presented from the County Court of Marion County and Mayor W. W. Chadwick, of Salem, in which the Commission was asked to assume the expense of maintaining lights on the Willamette River Bridge between Salem and West Salem. The Commission denied the request as a matter of policy, it being considered that this is a state-wide problem requiring modification of the present practice, an expense that the Commission cares not to assume at the present time.

A letter was presented from the Waldport Lions Club requesting sidewalk construction along the state highway through the town of Waldport. The Engineer advised that investigation reveals that this request involves the construction of 3,600 feet of sidewalk, partly on the Oregon Coast Highway between the Alsea Bay Bridge and the sea wall, and the balance being along the Alsea Highway from the Oregon Coast Highway junction to a connection with the main street of the town, being the route of the old highway. He estimated the cost of this project at approximately \$8,000.00, including the construction of fills, rockings, and storm sewer drainage. The Commission deferred action on this matter for the time being in accordance with its recently-adopted policy with respect to the construction of sidewalks along state highways within corporate limits of cities and towns.

The Engineer reported on the cost to widen the bridge over Beaver Creek, on the Oregon Coast Highway, in the town of Beaver, Tillamook County, which project was heretofore requested by the Tillamook County Court. He estimated that the widening of the structure proper would cost \$4,477.00, and that the grading and paving of the north approach thereto would cost approximately \$1,500.00, or a total of about \$7,500.00, including contingencies and engineering. He pointed out that, according to the reconnaissance survey for the permanent location of this section, the eventual line will bypass this bridge and will necessitate the construction of another bridge over the same stream about one-half mile north of Beaver. In view thereof, he suggested the determination of the cost of constructing the permanent revision before the Commission makes its decision with respect to the widening of the bridge. After considerable discussion the Commission deferred its decision pending a report from the Engineer as to how much it will cost to reconstruct the highway on permanent alignment at this location. The Engineer was authorized and instructed to prepare a project about $\frac{3}{4}$ mile in length, extending from the old highway a short distance south of the Beaver Creek Bridge northerly about $\frac{3}{4}$ mile to a point where the reconnaissance survey crosses the present highway.

In this connection the Commission also discussed the matter of improving the alignment of the Oregon Coast Highway southerly from the Tillamook city limits. The Engineer was instructed to study the data assembled from the reconnaissance survey of this section and render a report thereon to the Commission.

The Engineer also rendered a report on the cost to landscape the area contained in the wye connection of the Umpqua Highway with the Oregon Coast Highway at Reedsport. He estimated that such improvement would cost about \$2,000.00, the principal expense being for filling in the area, which was estimated at \$1,000.00. He recommended approval of the project. The Commission approved the recommendation unanimously and ordered that the work be done as a state project.

The Commission had under discussion the report from the Attorney in regard to the neon sign that is being maintained on the Columbia River Highway at the west entrance to The Dalles by Dr. Fred F. Thompson, for the purpose of calling attention to his privately-owned camp ground at this location. It appears that when the right of way for this section of highway was acquired

from Dr. Thompson permission was granted him to maintain a sign partially on the highway right of way, but when the sign was actually erected it was placed much nearer the traveled portion of the roadway than was contemplated under the agreement, and Dr. Thompson now refuses to remove the sign, notwithstanding that the violation of the agreement has been called to his attention, alleging that he is strictly within his rights in view of the fact that the sign is located within the city limits of The Dalles where it is outside the jurisdiction of the State Highway Commission. The matter was discussed at some length but action thereon was deferred pending the securing of further detailed information by the Engineer.

The Commission had under discussion a letter from Mayor Clifton Richmond, Klamath Falls, requesting the installation of flashing beacons at the intersections of Viehn Street and Upham Street with Oregon Street, and a traffic-actuated signal at South Sixth Street and East Main Street, in Klamath Falls. Also, requesting the painting of traffic stripes and pedestrian lanes at the Main Street undercrossing recently built under State Highway Department supervision. The Engineer recommended the painting of the traffic stripes and the installation of flashing beacons, at state expense; also, the installation of the traffic-actuated signal provided the City of Klamath Falls will pay 50 per cent of the cost thereof, which is in accordance with the Commission's established policy with respect to such matters. The Commission approved the recommendation unanimously.

The Commission discussed briefly a report from the Engineer on the necessity to provide a building to house the State Highway Department Laboratory but deferred action thereon until its meeting in January. The Engineer was instructed to resubmit the report at that time and to supplement the same with a full report on buildings that will be needed during the next 12-month period.

The Commission discussed the claim of H. E. Warren, Portland, for damage to an automobile tire that he alleged was ruined when he drove it onto a projection on the East Portland-Oregon City Highway between Park Road and Courtney Road. The Engineer advised that this matter has been investigated, and the projection referred to by Mr. Warren is an 8" concrete pipe under the pedestrian lane, the end of which pipe is in the grassed area about 6½ feet from the edge of the highway pavement. He further advised that the end of the pipe has been chipped off, leaving a sharp edge, so that it would be possible, if a car were driven over it, for a tire to be damaged, although the possibilities of an accident of that kind occurring are very remote in view of the fact that the end of the pipe is such a great distance from the traveled portion of the highway. The state is responsible for the condition, he said, and he recommended payment of the claim, which amounts to \$10.00, notwithstanding that it is rather far-fetched. Recommendation approved unanimously.

Reconsideration was given by the Commission to the request of the Willanette Ski Patrol for snow removal on the McKenzie Highway between Blue River and Polc Creek for the benefit of winter sports enthusiasts of the Eugene district. Chairman Cabell gave as his thought that the Commission should approve an expenditure of \$1,000 for such purpose this winter but not there-

after. The Engineer recommended approval of such suggestion, with the understanding that only light snow-fighting equipment would be used and that the work would cease as soon as the snow became so deep that it could not be removed with such type of equipment, as, in his estimation, there is too much danger of ruining the pavement if snow equipment is employed. After discussion the Commission approved the recommendation unanimously.

Matters pertaining to the proposed agreement with the United States Government covering dredging operations in the Columbia River in the vicinity of Multnomah Falls and the use of the dredged materials for highway construction, particularly the plan proposed for financing the state's share of this work, had the attention of the Commission. The matter was discussed briefly but no action taken in view of the fact that the Attorney General's opinion as to the matter of financing has not yet been secured. The Engineer was instructed to telephone each Commissioner the information contained in the Attorney General's opinion when received, at which time he will be instructed how to act in the matter.

The Commission discussed briefly and referred to Commissioner Clough for investigation and report at the January 11th meeting of the Commission a request from the City of Grants Pass for state aid in constructing a roadway entrance into the city park from the Pacific Highway.

The Engineer requested authority to purchase 60,000 gallons of traffic line lacquer to carry out the Highway Department's stripe-painting program during the 1940 season. He estimated the cost of such lacquer at \$63,000. The Commission approved the purchase by unanimous vote.

The Engineer requested instructions as to what action to take against persons who inflict damage on the barriers and gates on the Interstate Bridge between Portland and Vancouver, Washington. He said that these facilities are frequently damaged by irresponsible drivers and sometimes the cost of repairs amounts to a considerable sum, for which the state should really be reimbursed where it is possible to collect. However, in some instances the persons causing the damage reside out of the state and are not in a position financially to pay this expense, although that is not true in all cases. The Attorney pointed out that the cost to collect these claims in most instances would be more than the amount that the state would recover, so there is a question whether or not it would be advisable to attempt to make collection by process of law. After discussion, the Commission referred the matter to the Attorney with instructions to attempt to collect damages in each instance, if possible, and if not possible to effect a settlement, to report back to the Commission each such case, with an opinion as to whether the cost of an action at law would be justified for the amount involved.

The Commission had under discussion the matter of attending the special committee meeting of the Western Association of State Highway Officials, in Reno, Nevada, on January 5, 1940, for a discussion of important matters concerning the western states. It was decided that Chairman Cabell and the State Highway Engineer should attend such meeting at state expense, subject

to approval by Governor Charles A. Sprague. The Commission also discussed the advisability of being represented at a meeting of the Western Association of State Highway Officials which is to be held in Santa Fe, New Mexico, during the latter part of January, 1940. The Commission decided not to be represented at such meeting because it was thought that the matters proposed for discussion at such meeting could be very well disposed of at the meeting in Reno, and the need for the meeting in Santa Fe is not now apparent. However, the Assistant State Highway Engineer, Mr. C. B. McCullough, was authorized to attend the meeting in Santa Fe in the event that developments in the meantime are such that advantages would be gained by such representation. (Both meetings were called off later.)

The matter of the appointment of a committee to designate locations along the Old Oregon Trail where historical markers are to be erected, and to decide the wording that should appear on such markers, had the attention of the Commission. The names of a number of citizens who are competent to pass on such matters were mentioned and the Commission finally decided to limit the committee to three members, consisting of Messrs. Lewis A. McArthur, President, Oregon Historical Society; Ray Conway, Manager of the Oregon State Motor Association; and Walter Meacham, member of the Oregon Trail Association. The Secretary was instructed to advise these men of their appointment, which is to cover the marking of the Old Oregon Trail only.

The Engineer reported that in conformance with authority previously granted him by the Commission he has awarded the following contracts, the conditions of the awards having been satisfied:

Grading the Cow Hollow Creek-Owyhee School Section of Vale-Adrian County Road, in Malheur County. Bids taken December 7, contract awarded December 11, 1939, to M. L. O'Neil & Son, the low bidders.

Construction of a bridge over East Fork Illinois River, on Illinois Valley County Road, in Josephine County. Bids taken June 22, contract awarded December 18, 1939, to J.F. Johnston, the low bidder.

The Commission by unanimous vote confirmed the awards as reported.

The Commission had under discussion the abandonment of the Spaulding Ranch Section of the Salem-Dayton Secondary Highway, in Yamhill County. The Engineer advised that this section of road is no longer of value from the state highway standpoint, in view of the fact that the highway has been reconstructed on new alignment. He recommended that the section be turned over to Yamhill County for future maintenance. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Spaulding Ranch Section of the Salem-Dayton Highway in Yamhill County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Spaulding Ranch Section of the Salem-Dayton Highway in Yamhill County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Yamhill County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Salem-Dayton Highway in Yamhill County, lying on the westerly side of the right of way required for the reconstructed Salem-Dayton Highway, which lies between Mile Post 3.2 and Mile Post 4.5 of said highway, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 193+00 on the northerly end and Station 237+65 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part thereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated December 11, 1939, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

Map filed in Abandonment and Retention File - No. 69.

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Yamhill County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Yamhill County and beyond any responsibility or supervision by the State Highway Commission.

Reconsideration was given by the Commission to the erection of service club signs on state highway rights of way. It was recalled that the Commission at its meeting on June 21, 1939, authorized the installation of a sign post or rack on the state highway right of way within the corporate limits of cities and towns and on a site approved by the city authorities, provided the owners of existing signs located on the highway right of way outside of the corporate limits would remove such existing signs. The Commission considered, in view of the complications that have subsequently arisen, that it would be advisable to restrict such offer to cities and towns of 900 or more, and it was so ordered. The Commission also ordered that no more than 7 panels should be contained on any one signpost and that the organizations that would be represented on such signposts or racks should be limited to national service clubs, patriotic organizations, and chambers of commerce.

The question of what to do with the existing signs on state highway rights of way at the entrances to cities and towns of less than 900 population was then discussed. The Commission decided to give the owners of such signs until April 1, 1940, within which to remove them, and instructed the Engineer to have the signs removed by state forces in the event that the owners fail to take them down by that time. The Secretary was instructed to notify the owners of such signs of the action taken by the Commission and to cite the law which prohibits the maintenance of such signs on state highway rights of way.

A letter was presented from Mr. Jim Nutter, Public Relations Director for Timberline Lodge, Inc., in regard to the changing of the wording on the signs recently erected by state highway forces, directing the traveling

DEC 20 1939

public to Timberline Lodge, from "Timberline" to "Timberline Lodge", because Timberline Lodge has been designated a United States post office. The Commission decided, in view of the fact that a United States post office is now being maintained at Timberline Lodge, that it would be proper to change the wording on these signs, as has been requested, when it becomes necessary to replace them or to install additional signs, and it was so ordered.

The Secretary presented a letter from Donald M. Graham, lawyer, Prineville, requesting, on behalf of local loggers, permission to truck logs over state highways in the vicinity of Prineville during Saturday afternoons and Sundays for the next few weeks, so as to avoid closing the Prineville mills. The Engineer advised that traffic over state highways in the vicinity of Prineville at this time of year is not very heavy, and, in his estimation, it would be satisfactory to grant the request. He recommended approval thereof as a trial proposition for the next three months. The Commission approved the recommendation.

Reconsideration was given by the Commission to the matter of the establishment of zones along the Pacific Highway through the town of Junction City and the establishment of building setback lines along such section, as has been requested by the Junction City Planning Commission. The Attorney advised that the Commission has no legal right to establish residential and business zones either on rural or on urban highways, or to establish setback lines; hence it is his opinion that the Commission has no legal authority to assume such responsibility in the city of Junction City. The Engineer pointed out that the present highway through Junction City is only 60 feet wide and that it would be advantageous in the future widening of this highway for four lanes of traffic to have setback lines 15 feet on each side of the street. The Commission decided, in view of the Attorney's opinion, to take no action in regard to the City Planning Commission's request for the establishment of zones; however, considered it advisable to recommend to the City Planning Commission the adoption by the city of an ordinance providing for a setback line of 15 feet on each side of the present highway. The Engineer was instructed to convey such information to the City Planning Commission.

The Secretary presented a letter from the County Court of Umatilla County requesting that the Sunnyside-Umapine Secondary State Highway be designated a through highway, and that signs be erected at each intersecting street or road requiring traffic to stop before entering such highway. The Engineer recommended approval of this request. The Commission approved the recommendation by unanimous vote and instructed the Engineer to see that appropriate signs are erected.

The Commission discussed a letter from the City of Waldport requesting the services of an engineer from the State Highway Department to establish the lines of state highways within the Waldport city limits and to set sidewalk grade stakes along such section so that new buildings may be constructed in accordance therewith. The Commission approved the request upon recommendation of the Engineer.

A resolution was presented from the County Court of Jefferson County

urging the State Highway Commission to take steps as may be necessary to add the Warm Springs Highway, from Madras to its junction with the Wapinitia Highway, to the federal aid system in order that additional funds may be made available to insure the early completion of this road. The Commission appeared favorably inclined toward this request but deferred action thereon pending a report from the Engineer at the next meeting as to the federal aid mileage available for allocation and which roads throughout the state are leading candidates for the same.

The Commission considered and ordered filed for future consideration a petition from 17 residents of Rickreall and vicinity opposing the adoption of the proposed highway route extending from the Salem-Dallas Highway, at Rickreall, northwesterly to a connection with the Dallas-Coast Secondary Highway at Salt Creek, and suggesting, in lieu thereof, the improvement of the existing highway between Rickreall and Dallas, and a connection at Oakville, or thereabouts, rather than at Rickreall for the proposed cutoff.

The Commission also considered and ordered filed a letter from the Roseburg Chamber of Commerce renewing its request for sidewalk construction along the Pacific Highway between the north city limits of Roseburg and the Garden Valley County Road.

A letter was presented from Mr. F. E. Butt, Oceanlake, Oregon, calling attention to the hazard resulting from the dropping or dumping of logs along state highway rights of way, and offering his services as an inspector of logging equipment and loading, to the end that fewer logs be dumped on highway rights of way and the hazard to the traveling public thereby greatly reduced. The Commission considered that the employment of such inspector does not come within the jurisdiction of the State Highway Commission but is rather a function of the Department of State Police, and ordered that Mr. Butt be so informed.

The Secretary presented a letter from Frank H. Seal, Eugene, in regard to the proposed improvement of the Oregon Coast Highway in the towns of Port Orford and Gold Beach; also, a petition from businessmen of Port Orford requesting no change in the present route of the Oregon Coast Highway through Port Orford from Garrison Lake Auto Court, on the north, to Port Orford Pharmacy, on the south. The Commission took no action on these communications other than to indicate that it would give them due consideration at the proper time.

The Commission discussed a letter from Mr. Leon D. Pitts, Warren, Oregon, requesting permission to construct a roadway across state property between the new highway and the old highway at Warren. It appears that Mr. Pitts conducts a store business along the old highway, which store is located about 300 feet from the new highway, and he alleges loss of business by reason of isolation, and requests the privilege of building a roadway from his store to the new highway, which would be entirely across the state-owned property. The Engineer advised that the highway was reconstructed on permanent alignment about 2 years ago and that Mr. Pitts's store is located on the abandoned section, although the old road is still being maintained for traffic,

and people have access to Mr. Pitts's store, as heretofore. He further advised that all of the property between the old and the new highway was acquired by the state at the time that the revision was made, in order to retain the freeway characteristics of this road, and it was planned to landscape the area at some time in the future. He gave as his thought that Mr. Pitts's request should be denied, inasmuch as the granting of the same would defeat the purpose for which the extra property was acquired. The Attorney advised that the Commission is not obligated in any way to Mr. Pitts and it would not have to grant his request unless it felt that this was the proper thing to do. After discussion, the Commission decided, in view of the fact that Mr. Pitts now has roadway facilities to his place of business, that the interests of the public would be best served by denying his request, such public interest being considered paramount. However, the Engineer was instructed to do some landscaping work so as to beautify the area in front of Mr. Pitts's store.

The Commission also had under discussion a letter from the City of Sutherlin, requesting the widening of Calapooya Street (Pacific Highway) for a short distance through the business section of their town, by moving the curb on the west side of the street to conform with the curbs on the adjoining sections. The Engineer recommended approval of this request, which he estimated would cost about \$125.00, the work to consist of moving back the existing curb about 8 feet, and the construction of an oiled surface. The Commission approved the recommendation unanimously.

The Engineer requested authority to remodel the highway maintenance building at Eugene so as to provide quarters for the state police officers who operate out of that headquarters; also, to construct a new building at this place for truck and equipment storage. He estimated that these improvements would cost approximately \$6,500.00, and recommended approval of the project. The Commission approved the recommendation.

The Commission discussed the bills presented by the several appraisers who were employed in connection with the condemnation suit to acquire right of way from the Security & Investment Company, Oregon City, for the Oregon City improvement. The Commission considered that the bills as presented were correct statements of time actually employed in this work and accordingly approved them for payment by unanimous vote.

The Engineer reported the failure of the short section of the North River Road, Salem, which was recently constructed as a federal aid secondary highway project. He said that the failure was due to faulty drainage conditions and that to repair the damage would cost about \$1,000 and recommended that the state assume payment of such expense. The Commission approved the recommendation unanimously.

Chairman Cabell reported receipt of information to the effect that the Portland General Electric Company has petitioned the Interstate Commerce Commission for the abandonment of the interurban street car line between

Portland and Vancouver, in connection with which petition the State Highway Commission will be asked for a written statement to the effect that the removal of the street car tracks on the Interstate Bridge will be of benefit to motorists. He gave as his thought that the writing of such a letter would not react disadvantageously to the State Highway Department. The Engineer declared that the removal of the street car tracks from this bridge would be of considerable benefit to the motoring public. After discussion, the Commission authorized Chairman Cabell to write such a letter when requested to do so by the Traction Company.

The Assistant Attorney reported receipt of a communication from John H. Kelley, attorney for Mrs. Edna A. Bell, stating Mrs. Bell's refusal to accept the sum of \$49.00 which has been offered to her for seven lots that she owns on the Nehalem Sandspit, in Tillamook County, and demanding \$20.00 per lot for the same. He requested instructions. The Commission decided to adhere strictly to the scale of prices approved earlier in this session.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Coos Bay Dredging Company, Contract No. 2116, for grading and surfacing the Charleston-Miner Creek Section of the Cape Arago Secondary Highway, in Coos County, requested an extension of time from July 29 to August 11, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct; also, that the contractor was required to install a large amount of drain tile on this project which was not called for in the contract and incidentally had considerable to do with the contractor's failure to complete the job within the specified time limit. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Roy L. Houck, Contract No. 2159, for grading and paving the Albany Overcrossing Section of the Pacific Highway East, in Linn County, requested an extension of sufficient time in the spring of 1940 within which to complete this project. The Engineer advised that the contract specified a completion date of December 31, 1939, but the contractor was ordered to close down the work on December 4, 1939, because weather conditions were unsuitable to secure a good finished job. It was his thought that it would take 28 days to finish the work in the spring when weather conditions are favorable, or until June 1, 1940. He recommended, in view of the circumstances, the granting of an extension of time of 28 days after work is resumed in the spring, without penalty, for completing the project.

A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Odom Construction Company, Contract No. 2218,, for moving and re-establishing a school building and play shed at Manning, in Washington County, requested an extension of time of 18 days, from October 31, 1939, to November 18, 1939, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the fact that the new building site had not been prepared. The Engineer advised that according to the provisions of this contract, the state was to prepare the new building site, which work was done by a W.P.A. crew working under state supervision, but such work was not completed until the first part of October and the contractor could not begin his work until that time. He recommended, in view of the circumstances, that the extension of time requested by the contractor be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2116, 2158, 2165, 2177, 2228, 2229, and 2230, for the construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2116, with Coos Bay Dredging Company, for grading and surfacing the Charleston-Miner Creek Section of the Cape Arago Secondary Highway, in Coos County. Completed August 11, 1939.

Contract No. 2158, with Mountain States Construction Company, for construction of the Albany Overcrossing on the Pacific Highway East, in Albany, Linn County. Completed December 16, 1939.

Contract No. 2165, with Roy L. Houck, for grading and paving the Bunker Hill Section of the Oregon Coast Highway, in Coos County. Completed November 28, 1939.

Contract No. 2177, with Edlefsen-Weygandt Company, for construction of the Lobert Overcrossing on The Dalles-California Highway, in Klamath County. Completed December 13, 1939.

Contract No. 2228, with M. E. Meyers & Son, for roadside improvement on the West Unit, Stanfield-Pendleton Hill Section of the Old Oregon Trail, in Umatilla County. Completed December 13, 1939.

Contract No. 2229, with F. R. Hewett, for furnishing crushed rock on the Weston-Elgin Rock Production Project, on the Weston-Elgin Secondary Highway, in Umatilla and Union Counties. Completed December 6, 1939.

Contract No. 2230, with A. S. Wallace, for furnishing crushed rock in stock piles on the Maupin-Cow Canyon Section of The Dalles-California Highway, in Wasco County. Completed December 9, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the date for its regular meeting in February and decided to hold such meeting in Portland on Thursday and Friday, February 15 and 16, 1940. The Secretary was instructed to make the usual arrangements to hold this meeting in the Public Service Building.

The Commission considered and signed agreements, et cetera, as follows:

Lease of borrow pit containing 4.1 a. near the Pacific Highway West one-half mile north of Tigard. Lease secured from Mrs. Zelda Ploeger. Lies in Richardson Donation Land Claim 39, Washington County. Lease expires upon completion of the grading and surfacing of the Tigard Section of the Pacific Highway West, about 2 miles in length, commencing at the Multnomah County line.

Bargain and Sale Deed, Right of Way Transaction Nos. 6930 and 6982, conveying unto Emil A. Johnson 309 sq. ft. of land situate in Lot 3, Block 3, Kingston Addition to Tigard, Washington County.

Lease of quarry site containing 6.92 acres adjacent to the Fremont Highway, at Lakeview, Lake County. 99-year lease, from September 1, 1939, to September 1, 2038. Lease secured from County Court of Lake County. Property lies in Northwest Quarter of the Southeast Quarter of Section 22, Township 39 South, Range 20 East, W. M., Lake County.

Release of cattle pass by Herman Beilke on Stanfield-Pendleton Secondary Highway at Mile Post 08.05, Umatilla County. Consideration, \$50.00.

DEC 20 1939

Release of cattle pass by Stephen Spike at Mile Post 34.93 on the Lexington-Echo Secondary Highway, Umatilla County.

Extension of C.C.C. campsite lease at Woahink Lake from James W. Ford, Jr., and Edna C. Ford, husband and wife. 10 acres of land in the North Half of the Northwest Quarter of the Northeast Quarter of Section 27, Township 19 South, Range 12 West, W. M., Lane County. Extends prior lease from May 31, 1940, to May 31, 1941.

Cooperative and License Agreement between the United States of America and the State of Oregon, providing for 50-year lease of certain government-owned land in Jefferson County which is required in connection with the Crooked River-Deschutes Recreational Area. (Three copies of agreement returned to Mr. Boardman December 26, 1939, to be held by him pending lease of additional property from the Government.)

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:00 o'clock p. m.

Commissioner

DEC 20 1939

Portland, Oregon, January 10, 1940

The State Highway Commission met in special session at 8:00 o'clock p. m. in the Rose Room of the Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldeck, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission conferred with representatives of the logging industry with respect to the truck-hauling of logs, poles, and piling over state highway rights of way. There were 24 representatives of such industry present and also present were the following representatives of the office of the Public Utilities Commissioner of Oregon: Ormond R. Bean, Commissioner; T. O. Russell, Chief Engineer; A. F. Harvey, Superintendent of Transportation; Perry O. Delap, Supervisor of Permits. Speaking on behalf of the logging industry were Senator F. M. Franciscovich, Astoria; A. C. Lighthall, representing the Oregon Lumber Company; Austin Flegel, attorney, Portland; R. W. Pointer; George Haley, log hauler, Molalla; Ernest McCulloch, Eugene, representing the Booth-Kelley Lumber Company; Faye Abrams, Eugene, also representing the Booth-Kelley Lumber Company; A. S. Page, Seaside; and Fred Packwood, representing the Columbia Basin Loggers Association.

Chairman Cabell opened the meeting by explaining its purpose. He advised that the Highway Commission has received numerous complaints from the general public of logs that are dropped on the highway right of way from logging trucks, and advised that the matter has reached the point where it is considered serious enough to warrant revision of the present rules and regulations covering such type of hauling, in an endeavor to reduce the number of logs that are dropped and the hazards that are created thereby. The State Highway Department, he said, has given this matter considerable study and has prepared a revised list of rules and regulations which it wants to present at this meeting. He particularly mentioned that the Commission is trying to reduce the number of dropped logs and to secure the removal of the same from the highway right of way within a reasonable length of time, and, in order to do this, it will be necessary to have the name of the person responsible for the dropping of the logs. He added that, in the minds of the Commissioners, log haulers who constantly lose logs should be ruled off the road. He then read aloud the proposed draft of regulations and invited all present to express themselves relative thereto.

This matter was discussed at considerable length and numerous suggestions were offered in regard thereto. Particular reference was made to the transportation of loads that exceed the length limit specified by statute. Concerning such matter Chairman Cabell pointed out that when the bill for increasing the overall length limit came up for discussion in the 1939 legislature, the Highway Commission offered no objections thereto; nevertheless, the legislature did not see fit to change the present law in that respect, so the

Commission considers that it has no authority to grant permits for overlength loads except in isolated instances or in cases of emergency. He further stated that, so far as the transportation of ordinary-length logs is concerned, the Commission will formally adopt new rules and regulations in the near future for recommendation to the Public Utilities Commissioner, and in its study of the same will be pleased to consider the suggestions made at this meeting; however, its decision with respect to the granting of permits for the transportation of overlength loads will have to wait until the Commission has had time to give such matter further thought and study, which it will do as soon as possible. In the meantime, he added, no change will be made in the present practice of granting permits. He thanked the delegation for its appearance and suggestions and declared the conference concluded at 10:30 o'clock p. m. (This matter was reconsidered by the Commission on January 12, when the Commission adopted rules and regulations to govern the truck-hauling of logs that do not exceed the legal length-limit.)

---------------	----------

The County Court of Klamath County, consisting of County Judge U.E. Reeder and County Commissioners Wm. Chase and Jack E. Benner, and County Engineer Frank Z. Howard, came before the Commission in regard to the following highway matters:

Klamath County gravel pit needed by the state in connection with the construction of the Lost River Section of the Klamath Falls-Malin Highway in Klamath County:- The County Court advised that it has no objection to the state's contractor procuring materials from this quarry although it would prefer that an entirely new pit be opened up because the county is now working the old pit and they are fearful confusion will result if the county's forces and the contractor's forces operate in the pit at the same time. After considerable discussion and in view of the emergency that exists relative to the award of the contract for the Lost River Project, the County Court agreed to let the state's contractor use the existing pit in connection with the construction of this project, with the understanding that the county would be given an allowance for the materials that it has already prepared for removal from the pit and that other arrangements would be made for the use of the county's property in connection with future state highway work in this vicinity. The Engineer was instructed to discuss the matter further with the County Court and to have the final arrangements covered by written agreement.

The County Court inquired as to the plans of the Commission for additional improvements to The Dalles-California Highway north from Klamath Falls. Chairman Cabell advised that the Commission has made no definite provision for such work as yet but a project will be considered by the Commission in the formulation of its program for the fiscal year 1941 funds, which are the earliest moneys available.

The County Court also inquired as to the Commission's plan for widening The Dalles-California Highway south of Klamath Falls and for the reconstruction of the Flume Section of this highway. They were informed that nothing definite has as yet been planned for the widening work, although the matter is being considered, but the Commission does have an amount budgeted in its 1940 program for the reconstruction of the Flume Section.

Engineering questions in regard to the Flume Section were then discussed. County Engineer Howard inquired as to the possibilities of securing a change in the proposed grade line of this section to improve the vertical sight distance. A decision in this matter was deferred until the following day, when plans of the proposed improvement will be available.

The County Court then inquired as to the possibilities of securing the benefits of additional federal aid secondary highway funds and was informed by Chairman Cabell that, due to the reduction of the federal aid allotment of such funds, the Commission is not in a position at the present time to make any definite statement in regard thereto, but will be glad to consider Klamath County's request in the event that Congress sees fit to increase the amount of such funds in its next appropriation. It was his thought that Klamath County is entitled to some of these funds.

JAN 11 1940

The County Court also asked for the improvement of the Cascade Lakes Forest Highway from its junction with the Willamette Highway to the town of Crescent Lake, and was informed that the Commission will bear this project in mind in the allocation of forest highway funds although it is a costly project and the justification for the expense of the railroad grade elimination project is not apparent. After considerable discussion of this project the Commission instructed the Engineer to make a personal inspection on the ground in company with County Engineer Howard and to render a report on the possibilities of providing a better road connection to the town of Crescent Lake at minimum expense.

The County Court also asked for the improvement of the Westside Klamath Lake Secondary Highway near what is known as Fremont Bridge, in the corporate limits of Klamath Falls. They particularly requested the construction of a sidewalk on the Fremont Bridge which crosses Link River, for the benefit of pedestrians, and the realignment of the traveled roadway. They advised that the present traveled roadway is quite crooked, although it lies within the limits of the highway right of way, so it would not be necessary to acquire any additional land for right of way purposes. The State Highway Engineer advised that this is a meritorious project, although it would run into considerable money because it involves not only the construction of the bridge but sidewalk approaches thereto, and it appears that the project would have to be financed entirely with state funds. After discussion, the Commission instructed the Engineer to investigate the project and report his findings, including an estimate of cost to do the work.

County Commissioner Benner brought up for discussion a drainage matter in the town of Bly. He advised that when the Klamath Falls-Lakeview Highway was reconstructed through this town certain drains were blocked by the highway grade and as a result water has backed up, forming a lake at the point where the highway intersects a county road. He gave as his thought that this is not a county obligation and asked the Commission to do something about it. The Commission instructed the Engineer to investigate the conditions and to report thereon.

County Commissioner George N. Peck, of Morrow County, was present and asked for the oiling of the West Unit of the Wasco-Heppner Secondary State Highway, which would complete the oiling of this road between Heppner and a place known as Rhea Creek. He said that this is Morrow County's preference project. He was informed by Chairman Cabell that the first moneys that could be used to finance this work are the 1941 moneys and that the Commission would do its best to allocate a sufficient amount of such moneys for this job.

Mr. Peck then outlined a 5-year construction program as proposed by Morrow County Court, which includes the oiling of a 7-mile section of the Wasco-Heppner Secondary Highway west of Rhea Creek, which section has already been rocked; the surfacing of the adjacent 4-mile section that has already been graded to proper standards; and the grading of the 7-mile section at the Gilliam County Line. He urged the Commission to bear these projects in mind. He also asked the Commission to oil the Oregon-Washington Highway between

JAN 11 1940

Heppner and a place known as Lena, a distance of about 10 miles. The Engineer gave as his thought that the present surfacing on this road is satisfactory for oil treatment. After discussion, the Commission informed Mr. Peck that it would bear this project in mind and would construct a light oil treatment as far as Lena in the event that funds can be found to finance the work.

Mr. Peck brought up for discussion the maintenance of the county road which extends from the Lexington-Echo Secondary State Highway up Butter Creek to a place known as Pine City, a distance of about 3 miles, in Umatilla and Morrow Counties. He pointed out that this road was oiled under a state contract last year and in their estimation it is eligible for designation as a state secondary highway. He urged the Commission to so designate it. He was informed that the matter would be taken under advisement.

Mr. Peck then inquired, if the Commission cannot see its way clear to place this road on the secondary state highway system, would the state agree to maintain the road at county expense? The Commission approved such an arrangement and thereupon authorized the Engineer to provide for the maintenance of the section on such basis, the matter to be covered by appropriate written agreement between the county and the state.

Mr. Peck also asked the Commission to take over as a state secondary highway the county road which extends from the Columbia River Highway to the Columbia River Ferry at Patterson, a short distance west of Irrigon. He said that no one resides along this road and that the traffic which the road carries is strictly interstate in character and that the road is of no particular benefit to Morrow County. The Commission agreed to inspect the road the next time it is in that vicinity.

Mr. J. S. Risley, of the contracting firm Saxton, Looney & Risley, came before the Commission in regard to the signing of contracts for the construction of the Jordan Creek-McNamers Camp Section of the Wilson River Highway, and the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Tillamook and Jefferson Counties, respectively, which contracts were awarded to them by the State Highway Commission on December 7 and 8, 1939. Mr. Risley advised that they are having a little difficulty in obtaining the bonds required by the state in connection with these jobs, both of which are state finance projects, but they believe that their difficulties will be ironed out in about 10 days, in view of which they are asking that much additional time within which to furnish the bonds. After considerable discussion the Commission granted the contractor 2 weeks' additional time within which to furnish the bonds; however, advised Mr. Risley that his request must be in writing and must be accompanied by the written consent of the surety to such extension. (This matter was reconsidered by the Commission on the following day.)

Mr. E. C. Warren, Tigard, Oregon, was present in regard to the approaches to his service station in Tigard. He advised that the new location of the highway through Tigard took in his service station property and he was obliged to sell his property to the state, one of the conditions of the sale being that the state would provide satisfactory approaches to a new service

JAN 11 1940

station that he proposed to build along the new highway route. He further advised that his new station has been constructed and is now ready for operation but he is precluded from serving the public because of the condition of the approaches thereto. He asked the Commission to provide him with temporary relief, at least until such time as the highway improvement is completed so that he can continue to serve his customers. The Commission referred this matter to the Engineer with authority to provide a temporary improvement if he considers that advisable.

The Commission by unanimous vote approved the minutes of the meetings of the Commission held on August 31 and September 1, and on September 27 and 28, 1939, and thereupon signed the same.

The Engineer reported as follows on new buildings that will be needed within the next 12 months, as requested by the Commission at the previous meeting:

Laboratory building in Salem, estimated to cost \$50,500.00

Maintenance headquarters buildings at the following locations:

Seneca, on the John Day-Burns Highway, in Grant County, estimated to cost \$19,470.00

Princeton, on the Diamond Valley Secondary Highway, in Harney County, estimated to cost \$21,835.00

Prospect, on the Crater Lake Highway, in Jackson County, estimated to cost \$20,570.00

Newport, on the Oregon Coast Highway, in Lincoln County, estimated to cost \$10,065.00

Condon, on the John Day Highway, in Gilliam County, estimated to cost \$11,275.00

Madras, on The Dalles-California Highway, in Jefferson County, estimated to cost \$11,055.00

Total estimated cost of all buildings \$144,770.00

He pointed out that the Commission has already approved for 1940 construction the following buildings:

One new building and addition to existing building at Medford, estimated to cost \$11,000.00

One new building and remodeling of present building at Eugene, estimated to cost \$6,500.00

Addition to present building at John Day, estimated to cost \$3,300.00

JAN 11 1940

(Buildings approved for 1940 construction, continued)

Maintenance headquarters building at Odell Lake, estimated to cost \$27,500.00

Maintenance headquarters building at Blue Mountain Pass on the I.O.W. Highway, estimated to cost \$21,800.00

Total estimated cost \$70,100.00

After discussion the Commission authorized the Engineer to prepare plans for all of the buildings that are needed at this time, but ordered that those not yet approved for construction be not advertised for bids until the Commission can see its way clear to finance them.

In this connection the Engineer pointed out that it will be necessary to acquire additional land from the State Penitentiary on which to construct the proposed laboratory building at Salem. The Commission authorized negotiations for the acquisition of such property.

A communication was presented from the County Court of Jefferson County urging the designation of the Warm Springs Highway as a federal aid highway in order to make available federal funds for financing the construction of the same, which it was thought would expedite the completion of this road and would provide a main highway from Central Oregon to Portland approximately 30 miles shorter than any existing route. This matter was discussed at considerable length, during which the Commissioners expressed themselves as being in favor of placing this road at the top of the list for consideration in allocating the remaining federal aid mileage. It was the Commission's thought, however, that none of the available mileage should be allocated at this time nor until it is urgent that that be done, particularly in view of the fact that the Commission wishes to make definitely certain that it allocates this small mileage to the proper roads. The Secretary was instructed to inform the County Court that it is the intention of the Commission to place this road on the federal aid system at some future time and proposes to do so this year so as to make it eligible for the fiscal year 1941 federal aid money in the event a portion of such funds can be spared to finance it; otherwise, it will have to wait until the fiscal year 1942 funds are available or until such time as construction work can actually start.

The Commission discussed briefly the Engineer's report on the proposed improvement of the Lower Columbia River Highway through the town of Deer Island, involving the relocation of the highway on a line parallel with the S. P. & S. Railroad tracks and the re-establishment of numerous buildings. A decision in this matter was deferred pending a personal inspection of the project by Chairman Cabell.

The Engineer reported on the cost to construct a revision of the Oregon Coast Highway in the vicinity of the town of Beaver, as instructed by the Commission at the previous meeting. He pointed out that the shortest

JAN 11 1940

revision that could be constructed is about one mile in length and estimated the cost to construct the same, including the grading, surfacing, and oiling, at \$80,000. He questioned the justification of such expense in view of the possible reduction in traffic when the Wilson River Highway is completed, and recommended as an alternate proposition the widening of the present bridge over Beaver Creek, which, he said, would cost only about \$7,500, although state money would have to be used to finance the work because the Federal Government would not cooperate on a temporary improvement of this kind. The Commission approved the recommendation by unanimous vote, subject to the condition that state moneys can be spared for the purpose by May or June of this year.

The Attorney reported the results of investigations to determine the exact location of the neon sign that is being maintained on the right of way of the Columbia River Highway at The Dalles by Dr. Fred F. Thompson to advertise his tourist campground. He said that such investigation reveals that the sign is located on the highway within the city limits of The Dalles, hence is beyond the jurisdiction and control of the State Highway Commission. He recommended, in view thereof, that the sign be left where it now is, at least for the present. The Commission approved the recommendation.

The Commission discussed briefly the Engineer's report on the North Umpqua Highway, in Douglas County, being an analysis to determine the justification for a standard-type bridge across Steamboat Creek, near Steamboat Creek Guard Station, as has been proposed by the United States Forest Service. A decision on this matter was deferred until the following day, when it will be discussed with representatives of the Public Roads Administration and the U.S. Forest Service.

A report was rendered by the Engineer on the cost of construct a footpath along the Oregon Coast Highway from the city of Tillamook southerly to the Trask River Bridge. He estimated the cost of such footpath, including right of way, grading, surfacing, oiling, and the construction of a timber walk along the outside of the bridge, at \$2,860.00. The Commission deferred its decision in this matter pending a report from the Engineer on needed footpath and sidewalk construction throughout the state.

The Engineer also reported a controversy with Mr. O. E. Powell, who owns a service station adjacent to the Pacific Highway at Hubbard, Oregon. It appears that a standard entrance driveway was constructed into Mr. Powell's service station and that in connection therewith the usual traffic island was installed, which island Mr. Powell destroyed, alleging that it interfered with his business; also, that the island was replaced with a new one, which Mr. Powell destroyed also. The Engineer questioned the advisability of additional expenditures for this purpose unless assurance is given that the island will be preserved, and requested instructions relative thereto. The Commission ordered the replacement of the island and instructed the Attorney to enjoin Mr. Powell from damaging or removing the same. The Attorney was also instructed to collect damages from Mr. Powell if possible.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p.m. in the same room, with the same persons present and participating.

Mr. G. S. Ehle, Multnomah, Oregon, headed a delegation from Multnomah and Portland that was particularly interested in completion of the West Portland-Hubbard Highway. Other members of the delegation were Sol Lubliner, H. K. Kibler, and County Commissioner C. A. Bigelow of Multnomah County. Mr. Ehle read aloud and filed with the Commission a brief on behalf of this project. He also filed with the Commission petitions bearing the names of numerous residents of Multnomah, Washington, Clackamas, and Yamhill Counties, urging the early completion of the same. Mr. Ehle's remarks were endorsed by Messrs. Kibler, Lubliner, and Bigelow.

Mr. Bigelow advised that his endorsement was presented on behalf of the Board of County Commissioners of Multnomah County, which urges the Commission to give the project its early consideration. The Commission thanked the delegation for its appearance and advised that the matter would be taken under advisement.

A delegation from Clatsop County appeared before the Commission and urged the designation of the Elsie-Jewell County Road as a state secondary highway. The delegation was headed by County Judge Guy Boyington of Clatsop County and included the following: County Commissioners James Elliott and John Slotte; Lee Wooden, representing the Union Grade School of Jewell, Oregon, and the Jewell Grange; David Tweedale, pioneer of Nehalem Valley and Clatsop County; Frank Wooden, Manager, Clatsop County Pomona Grange; Mr. Meyers of Jewell, owner of a hotel and garage; and W. W. Barnett, representing the Nehalem Valley Grange.

Mr. Barnett alleged that when the Wolf Creek Highway was placed on the state highway system it was understood that Astoria would have a standard highway connection thereto via the Nehalem Secondary Highway, and, in his estimation, such connecting highway should be established now, particularly in view of the fact that the volume of traffic that uses the present connection between Elsie and Jewell is as heavy as it is on the Wolf Creek Highway. Furthermore, it will provide a shortcut to Astoria which the people of Astoria believe they are entitled to at the earliest possible time.

Mr. Lee Wooden stated that the Elsie-Jewell Road is the most important feeder road to the Wolf Creek Highway and that the Jewell School Board and Jewell Grange are strongly in favor of it, particularly in view of the great advantage that would be gained in the consolidation of school districts. Mr. Meyers declared that this connecting road is endorsed by all of the granges, the Astoria Chamber of Commerce, and all of the residents in the district affected. Mr. Tweedale, pioneer of the Nehalem Valley, who has resided along the Elsie-Jewell road for the past 47 years, endorsed the remarks of the other speakers. Mr. Frank Wooden endorsed the project on behalf of the Clatsop County Pomona Grange, which, he said, has gone on record unanimously in favor of the road. He read aloud and filed with the Commission a letter from the Astoria Chamber of Commerce endorsing the project and pointing out that it will eliminate the necessity of building the proposed shortcut between Fishhawk Falls and the Wolf Creek Highway at the mouth of Alder Creek.

Mr. Elliott declared that Astoria needs this shortcut road and, in

JAN 11 1940

their estimation, the economical thing to do would be to rebuild the present road rather than construct an entirely new one. Mr. Slotte endorsed the remarks of the other speakers. Judge Boyington also endorsed the remarks of the other speakers but suggested investigation of a possible revision at Cow Creek to shorten the distance. He filed with the Commission a petition bearing the names of 156 residents and property owners of the Nehalem Valley, strongly urging the Commission's approval of this project. The Commission took the matter under advisement.

Judge Boyington also inquired whether or not the state would be willing to deed back to Clatsop County a portion of Tongue Point State Park, consisting of 43 acres, which was heretofore conveyed to the state by the county for state park purposes. He explained that the Federal Government, in connection with the development of a naval base at this point, needs additional land, and it appears that a small portion of the state park meets the requirements, hence the county court's inquiry as to whether or not the Highway Commission would be willing to reconvey a few acres of this park to the county so it in turn can deed it to the government. The Commission indicated a favorable attitude toward this request but deferred a definite decision thereon pending an opinion from the Attorney as to whether it has legal authority to make such transfer, and a report from the State Parks Superintendent as to whether or not the state park would be adversely affected by such transfer.

Judge Boyington inquired as to whether or not the Commission would be willing to sell to the county some of the rock from the state's quarry located about 5 miles south of Seaside. He explained that Clatsop County is co-operating with the City of Seaside in preparing a parking area for automobiles at the north end of Tillamook Head and that they need rock to surface the same, the most convenient rock available being that from the state's quarry. He suggested that, with the Commission's permission, the county would enter into an agreement with the state's contractor who is operating this quarry, for the furnishing of about 200 cubic yards for the aforementioned purpose. The Commission approved the request by unanimous vote and instructed the Engineer to cover the matter by letter.

Following the appearance of the Clatsop County delegation the Commission reconsidered the delegation's request for the designation of the Elsie-Jewell County Road as a state secondary highway. In the discussion of this matter the Engineer pointed out that the right of way of the present road is considerably less than 60 feet wide; also, that the road is now being maintained by the State Highway Department as a detour road pending completion of the Wolf Creek Highway. He suggested that it would be advisable to place this road on the state secondary highway system if the county will furnish a right of way 60 feet wide. The Commission appeared favorably inclined but deferred action until the next meeting. The Engineer was instructed to ascertain in the meantime whether or not Clatsop County would furnish the required right of way.

Mr. Wm. O. Joos, representing the Maling Company, Inc., Hillsboro, and Mr. Chas. Pierce, representing Wentworth & Irwin Company, Portland,

manufacturers of special equipment, came before the Commission in regard to the moving of pea-vining equipment over state highways, the dimensions of which equipment exceed the limits specified by statute, particularly the overall height, which, Mr. Pierce stated, is 13 ft. 8 inches, whereas the legal height is 12 ft. 6 inches when permitted by the State Highway Commission. Mr. Joos stated that his company would like to have a blanket permit of 90 days' duration to transport three pieces of such equipment over designated state highways at any time of the day or night, explaining that it is very urgent that they have this permission so as to facilitate the harvesting of the pea crop. Such operations, he said, would extend from The Dalles, on the Upper Columbia River Highway, to Astoria, on the Lower Columbia River Highway, and their season is between May 20 and August 20 of each year. Mr. Pierce presented blueprint plans of the equipment that they propose to manufacture, and explained that they could reduce the overall height from 13 ft. 8 in. to 12 ft. 9 in., but it is impossible to make it any lower.

The Commission's Attorney explained the law which authorizes the Commission to grant permits for special privileges under certain conditions. After considerable discussion the Commission advised that a decision in this matter could not be rendered today because there is a question regarding the authority of the Commission to grant such a permit. However, the matter will be given serious study, and action will be taken as soon as possible. The Engineer was thereupon instructed to make such study and report back to the Commission at the next meeting.

Mr. Joos also asked the Commission to consider elimination of the requirement that flagmen accompany the movement in the event a permit is granted. He was informed that insofar as overheight loads are concerned it would not be necessary to have special flagmen accompany the movement except at points where vertical clearance is impaired.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards having been previously approved by unanimous vote:

"Summit-Mist Section of the Mist-Clatskanie Secondary Highway, in Columbia County. 4.89 miles surfacing and 5.45 miles oiling; also furnish 1,000 cu. yds. crushed rock in stock piles. The low bidder for this project was Tidepoint Company, Astoria, at \$26,506.00, based on the use of tar. It did not submit a bid based on the use of asphalt. The second-low bidder was Babler Bros., Portland, at \$27,128.00, also based on the use of tar. They did not submit a bid based on the use of asphalt. There was one higher bidder. The Commission awards this contract to the low bidder, Tidepoint Company, at its bid of \$26,506.00, based on the use of tar.

"Lapine-West Forest Boundary Section of the Fremont Highway, in Deschutes and Klamath Counties. 4.45 miles grading and 12.19 miles surfacing and oiling. 19 bids were submitted for this project, the low one being that of E. L. Rigdon, Prairie City, at \$59,579.00.

JAN 11 1940

The second-low bid was submitted by Babler Bros., Portland, at \$61,899.00. The Commission awards this contract to the low bidder, E. L. Rigdon, at his bid of \$59,579.00.

"Chemult-Port Klamath Section of The Dalles-California Highway, in Klamath County. Furnish 12,000 cu. yds. crushed rock in stock piles. Rogers Construction Company, Dayton, Washington, submitted the low bid for this project at \$23,700.00. Fisher Bros., Oregon City, submitted the next low bid at \$24,598.50. There were 2 higher bidders. The Commission awards the contract to Rogers Construction Company, the low bidder, at its bid price of \$23,700.00.

"Lost River Section of the Klamath Falls-Malin Highway, in Klamath County. 0.92 mile grading, surfacing, and road mix oil treatment. The low bid for this project was submitted by W. D. Miller Construction Company, Klamath Falls, at \$19,252.00. The second low bid was submitted by Rogers Construction Company, Dayton, Washington, at \$19,640.50. There were 3 higher bidders. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Construction of a 130-lin. ft. concrete viaduct over Lost River and a 4' x 6' concrete siphon on the Klamath Falls-Malin Highway, in Klamath County. 6 bids were submitted for this project, the low one being that of W. D. Miller Construction Company, Klamath Falls, at \$13,327.00. The second-low bid was submitted by Clifford A. Dunn, Klamath Falls, at \$14,456.00. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Albany Section of the Pacific Highway East, in Linn County. 1.4 miles grading and 3.9 miles paving. Roy L. Houck, Salem, submitted the low bid for this project at \$219,892.00. Edlefsen-Weygandt Company, Portland, submitted the next low bid at \$225,214.95. There were 6 higher bidders. The Commission awards this contract to the low bidder, Roy L. Houck, at his bid of \$219,892.00.

"Hay Canyon Section of the Moro-Hay Canyon County Road, in Sherman County. 1.98 miles grading and surfacing; also furnish 2,000 cu.yds. crushed rock in stock piles. 8 bids were received for this project, the low one being that of Fisher Bros., Oregon City, at \$11,873.00. The second-low bid was submitted by H. L. Rice, Portland, at \$13,648.50. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled."

Buildings in Tigard:

"Building No. 6924, former owner Joseph D. Foley Estate. 3 bids

were received for this building, the high one being that of John Scheckla, Tigard, at \$11.00, and the second-high being that submitted by Madsen & Picha, Salem, at \$7.50. The Commission considers the bid of John Scheckla satisfactory and accordingly sells the building to him at his bid of \$11.00.

"Building No. 6980, former owner Emil Johnson. H. V. Kruse, Oswego, submitted the high bid for this building at \$266.00. Emil A. Johnson, Tigard, submitted the second-high bid at \$251.00. There were 2 lower bidders. The Commission considers the offer of H. V. Kruse satisfactory and accordingly sells the building to him at his high bid of \$266.00.

"Building No. 6983, former owner Emil Johnson. 3 bids were received for this building, the high one submitted being that of John Scheckla, Tigard, at \$136.00. The second-high bid was submitted by Madsen & Picha, Salem, at \$71.00. The Commission considers the bid of John Scheckla satisfactory and accordingly sells the building to him at his high bid of \$136.00.

"Building No. 6940, former owner C. H. Pfaffle. H. A. Peabody, Portland, submitted the only bid for this building, his bid being \$15.00. The Commission considers this bid satisfactory and accordingly sells the building to him for \$15.00."

A delegation from the town of Sheridan, headed by Mayor E. J. Bayliss and including Cecil Harrison, President of the Chamber of Commerce; and E. M. Huntley, came before the Commission and asked for the improvement of the McMinnville-Tillamook Highway through their town. The Engineer estimated the cost of such improvement, which extends from Bridge Street to the west city limits, a distance of about 0.6 mile, at \$20,000, the city to construct fills as may be necessary and the state to construct concrete curbs and pave the entire width between curbs. Mr. Bayliss pointed out that the city contemplates doing considerable W.P.A. street work this year and will probably have considerable excavation material to spare, so it is in much better position to cooperate in the state's improvement than heretofore. After discussion the delegation was informed by Chairman Cabell that the Commission appreciates that this is a needy improvement and looks with favor upon the project, but whether or not it could undertake it this year depends upon the Commission's ability to finance it. The Engineer was thereupon authorized and instructed to make a detailed survey of the project and to ascertain just what is necessary in regard to embankment construction.

A delegation from Portland appeared before the Commission and urged the designation and improvement of East 39th Avenue as an arterial state highway route. The delegation was headed by Mr. William M. Hartford, President, East 39th Avenue Improvement Club, and included the following: Russell Ward and W. R. Bailey, representing the Hollywood Boosters' Club; Herman Ledding, Milwaukie Businessmen's Club; Paul Sayre, President, Federation of Community Clubs; Rev. Edward Cunningham of the Ardenwald Community Club; L. M. Lepper, Director, Eastside Commercial Club; and Carl Hutchinson of the Hawthorne Commercial Club.

JAN 11 1940

In support of oral arguments presented by the individual members of the delegation for this designation, Mr. Ledding filed with the Commission a resolution from the City Council of Milwaukie, the Milwaukie Community Club, and the Milwaukie Businessmen's Club, in which the Commission was urged to "declare and establish an arterial highway from Sandy Boulevard and 39th Avenue, in Portland, to the north limits of the City of Milwaukie; and that the Commission make such improvements thereto as the Commission may determine." He urged the Commission to authorize a preliminary survey of this project at once.

Chairman Cabell advised that the Commission appreciates the desirability of this improvement and will be pleased to bear the project in mind for future consideration but it does not wish to give too much encouragement at this time because there are so many other important projects that have priority for the limited amount of funds available. He thanked the delegation for its presentation.

Mr. Rory Collins, Dee, Oregon, appeared before the Commission on behalf of residents of Dee and Parkdale relative to the improvement of the Hood River Secondary Highway between Dee and Parkdale. He inquired as to the plans of the Commission for this improvement. He was informed that the Commission has no definite plans for this project as yet; in fact, investigations to date consist only of a reconnaissance survey. The Engineer was instructed to send a copy of this survey report to Mr. Collins for his information.

Mr. C. L. Hoover, Cascade Locks, came before the Commission and requested authority to transport logs 32 ft. long over the Columbia River Highway from Mile Post 49 to Mile Post 48, a short distance west of Hood River. He advised that he has approximately 800,000 board feet of timber to transport to the Columbia River and the only route available to him necessitates the use of the Columbia River Highway for a distance of about one mile. He estimated that it would take him about 2 months to complete this operation after he gets started, and in any event his operations should be entirely finished by the middle of April. The Engineer pointed out that it is contrary to the established policy of the Commission to permit log-hauling operations on the Columbia River Highway because of the hazard to other traffic, particularly along the sections where there is excessive curvature. He exhibited a map showing the section over which Mr. Hoover wishes to conduct his operations, and pointed out that this particular section contains no specially bad curves. He gave as his thought that Mr. Hoover's operations along this section would not cause undue hazards to other traffic and recommended approval of his request subject to the condition that no hauling be done on the highway after April 15, 1940. The Commission approved the recommendation unanimously.

The County Court of Hood River County, represented by County Judge C. D. Nickelsen and County Commissioners R. W. Perry and R. Waldo Arens, came before the Commission in regard to several highway matters. Judge Nickelsen was the spokesman. He urged the Commission to make provision for the reconstruction of the Dee-Parkdale Section of the Hood River Secondary Highway in its 1941 program. He also requested the construction of the proposed revision of the Mt. Hood Highway at a place known as Fike's Corner, in such program.

He was informed by Chairman Cabell that the 1941 program has not yet been formulated but the Commission will be pleased to consider these projects for the same inasmuch as it considers that Hood River County is deserving of such consideration, although no definite commitment or promise can be made in regard to the allocation of funds at this time. The Engineer was instructed to personally investigate the proposed revision at Fike's Corner and report back to the Commission before the next construction program is discussed.

Judge Nickelsen also asked the Commission to construct an oil surface on a short section of the new county road that connects with the Mount Hood Highway near Fike's Corner, particularly the section between the new county bridge and the highway. The Commission indicated approval of this request but deferred definite action pending personal inspection and report by the Engineer.

There followed a general discussion of matters pertaining to the improvement of the Mount Hood Highway, particularly the widening of the same and the elimination of curves, but no action was taken thereon.

Messrs. George H. Brewster, attorney, and Olaf Anderson, engineer, representing the Central Oregon Irrigation District, Redmond, Oregon, appeared before the Commission in regard to the reconstruction of the district's canal across the Ochoco Highway near Powell Butte, in Crook County. It appears that under the present arrangement irrigation water is carried across the highway through three 36-inch concrete pipes; but, on account of the restricted head room, the pipes are depressed in the bottom of the canal and act as a siphon, so that full carrying capacity of the pipe is not realized, and water backs up so that the high-water mark is very close to the top of the highway pavement. It also appears that the canal has not been enlarged since the highway was constructed some 20 years ago, but the demand for water has increased to a large extent, which makes it necessary to provide a greater waterway across the highway; hence the request of the Irrigation District for a larger opening. The Engineer gave as his thought that the Irrigation District is well within its rights in asking the state to provide a suitable structure at this point and accordingly recommended the construction of three openings, each 10 feet wide, to replace the pipes, at an estimated cost of about \$3,000.

Mr. Brewster pointed out that the existing pipes cross the highway at right angles to the center line of the highway, which is not in line with the center line of the canal. He suggested that it would be advisable to correct the alignment and to construct a skewed crossing of the highway. If the Commission will approve such type of construction, he said, the Irrigation District will pay the difference between the cost of constructing it at right angles to the highway and the cost to construct it on the skew. Furthermore, the district will deposit with the Commission, whenever requested, a certified check in the amount of its share of the cost. He urged the Commission to expedite the improvement because the water will be badly needed by the 10th of April at the latest.

After discussion, the Commission by unanimous vote approved the construction of such crossing on the basis of the skew design, as suggested by

JAN 11 1940

Mr. Brewster, provided the Irrigation District will submit its certified check in advance, covering its share of the cost. The Engineer was instructed to proceed with the plans for the structure at once and to advertise the project for bids to be received at the earliest opportunity.

A letter was presented from the City Council of Hubbard, Oregon, requesting the installation of a traffic light on the Pacific Highway at its intersection with Needy Road, within the city limits of Hubbard; also, requesting the erection of 35-mile per hour speed-limit signs on this highway at the north and south city limits of Hubbard. The Engineer advised that this request has been investigated by the Traffic Engineer and it appears that conditions obtaining at this point do not meet the requirements of the Commission for traffic lights, and it is recommended that the request for the same be denied. However, he recommended approval of the city's request for the 35-mile per hour speed-limit signs, subject to the condition that the city, by appropriate ordinance, provide an indicated speed limit of 35 miles per hour. The Commission approved the recommendations.

The Commission also had under discussion a request from the City of Springfield, Lane County, that the state relieve the city of the expense of replacing the electric light globes on the Willamette River Bridge at that place. The Engineer advised that at present there is no uniformity in the practice of the State Highway Department relative to such matters. He recommended, in view thereof, the adoption of a state-wide policy whereby the state would assume the expense of replacement of light globes and fixtures on all of the bridges on the state highway system, which arrangement, he estimated, would not cost the state more than \$2,000 annually. After discussion, the Commission approved the recommendation by unanimous vote; however, decided to adhere to its present policy with respect to the payment for electrical energy used in lighting these structures, which is that cities, counties, or other civic bodies concerned pay for the electrical energy used in lighting bridges and overpasses, and the state assume such expense in connection with the lighting of the underpasses.

The Commission considered and referred to the Engineer for investigation and report a petition from the citizens of Jefferson, Oregon, requesting the installation of a traffic light at the intersection of Main Street with the Pacific Highway in Jefferson, and the painting of pedestrian lanes across the highway at such intersection.

The Secretary presented a letter from Mr. Ray P. Shaw, Mayor of Cornelius, Oregon, renewing the city's request for the installation of flashing beacons at important intersections on the Tualatin Valley Highway in that town. The Engineer pointed out that this matter was discussed by the Commission at the previous meeting and the request was denied because it appeared, from investigations made by the Traffic Engineer, that the conditions obtaining at this place do not meet the requirements for traffic light installations, and that the city officials were so informed. However, it is apparent that the city does not wish to take "no" for an answer. In view thereof the Commission instructed the Engineer to discuss this matter personally with Mayor Shaw.

A request from the North Bend Traffic Safety Council for the installation of traffic lights along the Oregon Coast Highway between North Bend and Marshfield had the attention of the Commission. The Engineer advised that investigation of the conditions obtaining along this section has been made by the Traffic Engineer, who reports that, while the accident record at this point is quite high, he does not believe that the expense of installing traffic lights at this time is justified in view of the fact that the Commission has under consideration the reconstruction of this section of the highway in the near future, which would simply mean duplication of expense inasmuch as lights installed on the present highway would have to be moved when the highway improvement was completed. The Commission concurred in the viewpoint of the Engineer and instructed the Secretary to inform the North Bend Traffic Safety Council that the lighting of this section will have to wait until the highway improvement is done.

The Commission also considered the request from the Parkrose Lions Club, Portland, for the installation of a stop light at the intersection of Northeast 105th Avenue and Sandy Boulevard (Columbia River Highway) so as to provide greater safety for pedestrians at this point. The Engineer advised that an investigation has been made of this request; in fact, the investigation covered the entire section from Northeast 82nd Avenue to Northeast 122nd Avenue, a distance of approximately 2.14 miles, and it was found that the section most congested and upon which most accidents have occurred is that between Northeast Prescott Street and Northeast 112th Avenue, inclusive. He recommended the installation of flashing beacons at three points; viz., Prescott Street, Columbia Boulevard, and Northeast 105th Street, it appearing that these intersections carry the most vehicular and pedestrian traffic, at an estimated cost of \$250 each. The Commission approved the recommendation unanimously.

The Commission considered and denied the request of the City of Burns for the installation of two flashing beacons on the Central Oregon Highway at the following street intersections in Burns: Broadway North and Dee Street and West Monroe and Egan Avenue, it appearing from investigations made by the Traffic Engineer that conditions obtaining at these intersections do not meet the requirements of the Commission for traffic signals.

The Engineer rendered a report on traffic conditions obtaining along U. S. Highway No. 99 West (Barbur Boulevard) between Southwest Slavin Road and Southwest Capitol Street, Portland. He said that a very thorough study has been made of the conditions obtaining along this section, which reveals that there are six important intersections from the standpoints of vehicular traffic entering the highway, pedestrian traffic crossing the highway, and number of accidents. However, in his estimation, there are only three of these that are particularly outstanding and where flashing beacons should be installed; viz., at Southwest Terwilliger Boulevard, Southwest 19th Street, and Southwest 30th Street. He recommended the installation of flashing beacons at each of these three points, and further studies to ascertain the volume of pedestrian traffic along the highway, as a guide in determining the justification for sidewalk construction. The Commission approved the recommendation unanimously.

Letters were presented from Fred R. Hall, B. W. Hood, and the County

Court of Klamath County, requesting the improvement of the Cascade Lakes Forest Highway from its junction with the Willamette Highway, southerly, to the town of Crescent Lake, eliminating from consideration for the time being the construction of the railroad grade separation structure which is involved. The Secretary was instructed to reply that the Commission has this project in mind and that an investigation will be made in accordance with the suggestions offered. The Engineer was instructed to make such investigation and it was decided to discuss this matter with representatives of the Public Roads Administration and the United States Forest Service on the following day.

The Engineer reported the request from the City of Portland for the paving of the shoulders adjacent to McLoughlin Boulevard at its intersection with the city street that leads to Bybee Avenue, Portland, so as to provide a paved roadway connecting the highway pavement and the street pavement. The Engineer advised that the work contemplated would cost about \$370. He recommended against the improvement because it would have a tendency to increase traffic on the connecting road and would create a very undesirable traffic hazard. The Commission approved the recommendation by unanimous vote.

The Commission discussed a letter from the Agate Beach Community Club requesting the improvement of the road leading from the Oregon Coast Highway at Agate Beach to the Yaquina Head Lighthouse. The Engineer advised that this is an expensive project which he did not believe the Commission could finance in view of its other obligations. Furthermore, the road is not on the state highway system, so the Commission is without authority to expend state funds to improve it. The Commission thereupon denied the request.

In the discussion of this matter other secondary state highway projects in Lincoln County were mentioned, particularly the Siletz Secondary Highway. The Engineer advised that the Commission previously budgeted federal aid secondary highway funds for the improvement of this road, but the project was turned down by the federal authorities as not being eligible on account of excessive curvature and steep grades; so, unless the government officials can be prevailed upon to change their attitude, the improvement will have to be deleted from the construction program unless the Commission will approve the same as a state-financed job. He pointed out that the Commission heretofore gave the people of this district to understand that the project would go forward this year. This matter was discussed at some length but action thereon was deferred by the Commission until the following day. The Engineer was instructed to prepare a list of projects that have been approved by the Commission for construction as state-financed jobs.

A letter was presented from Mrs. Maude Hollenbeck, Rainier, Oregon, in which complaint was made of the condition of the Lower Columbia River Highway between Rainier and Coble, particularly the section known as Prescott Hill. Also, in which request was made for the improvement of this section so that it would be safe for traffic. The Engineer was instructed to inform Mrs. Hollenbeck that the Commission is reconstructing the Lower Columbia River Highway as rapidly as it can with the funds available and that the plan is to perform such reconstruction work in increments, starting at the Portland end until the improvement reaches the town of St. Helens; and, until the improvement reaches

St. Helens, the Commission considers it inadvisable to commence the reconstruction of any other section.

The Engineer brought up for discussion the matter of improving the Flagstaff Hill-Lower Powder Section of the Baker-Homestead Highway, in Baker County, which improvement has been urgently requested by the people of that district. He advised that to regrade this section to proper standards is a very expensive job, estimated at \$220,000, and that it would take a long time to accomplish it in view of the limited amount of funds that the Commission has available for this class of work. He suggested as an alternate proposition the construction this year of a light oil treatment on the present road, costing about \$10,000, followed later by a heavier oil and rock surface costing about \$12,000, which improvement, he said, would last for a long time and would probably satisfy the local people. After discussion, the Commission tentatively approved an expenditure of \$10,000 of state funds this year for the light oil treatment, deferring a definite decision pending further discussion on the following day.

A letter was presented from the County Court of Gilliam County, requesting the resurfacing and oiling of the Wasco-Heponer Secondary State Highway from the City of Condon westerly a distance of 6 miles; also, requesting the resurfacing and oiling of this highway from Condon easterly a distance of about 5 miles. The Engineer advised that the Commission has already budgeted \$15,000 to grade and surface a section of this highway east of Condon commencing at a point about 5 miles from the city limits and extending to Rock Creek Hill, it being the thought of the Commission at the time the budget was prepared that it would be better to do additional grading and surfacing work rather than to oil the portion that has already been graded and surfaced. The Commission appeared inclined to favor the improvement nearer the town of Condon, as requested by the County Court; however, a decision as to whether or not to transfer the funds to such project was deferred pending consultation with the County Court. The Engineer was instructed to contact the County Court relative thereto.

The Commission discussed a proposal from the Physicians and Surgeons Hospital Association, Salem, for modification of the agreement between the Commission and the Association providing for group health insurance for State Highway Department employees, so as to provide for the Association reasonable protection in the event that conditions beyond the control of the Association should arise at any time in the future, which modification reads as follows: "The Association shall not be held responsible for the furnishing of services other than those reasonably available, in the event that conditions beyond its control should arise, such as conditions of war, catastrophies, floods, earthquakes, fires, and general strikes." The Commission indicated approval of the modification in principle but not as written. The matter was referred to the Attorney to discuss with the officials of the Association in an endeavor to secure a clause that would be satisfactory. (The Association's request was withdrawn later.)

The Commission discussed the advisability of altering its code of relations covering the activities of State Highway Department employees in

relation to their membership in political parties, fraternal organizations, religious organizations, and labor unions, et cetera, and decided unanimously to make no change in the present code. (See Code on page 10 of the Maintenance Manual, Second Addition.)

The Attorney reported that he has been asked by Mr. Harold Turner, attorney for the Union Pacific System, to discuss with the Commission a form of resolution prepared by Mr. Turner for congressional action, which resolution provides for a federal appropriation of \$50,000,000 for the elimination of highway railroad grade crossings during the fiscal year 1942 and 1943, without state cooperation. He read aloud such resolution, which the Commission discussed briefly. The Engineer suggested that the resolution should provide for an appropriation of federal funds equal to those appropriated for the fiscal year 1938 and 1939 without mentioning any particular class of project. The Commission favored the purpose of the resolution but was of the opinion, since the Chairman of the Commission, who also is President of the American Association of State Highway Officials, will be in Washington to promote the general interests of the states with respect to federal funds, that it would not be wise to recommend the type or class of improvement.

The Secretary presented an invoice from the American Association of State Highway Officials covering the annual dues of the State of Oregon in such Association during the year 1940, said invoice being in the amount of \$350. The Commission by unanimous vote approved the payment of same.

The Attorney brought up for discussion matters pertaining to the proposed underpass construction at Nyssa, in Malheur County, particularly the acquisition of privately-owned property that will be affected by this improvement by reason of its being deprived of a roadway connection to the highway. He read a letter received from the Union Pacific Company which advises that the privately-owned property in question is of no value to the railroad company, hence it refuses to pay out any of its funds to add this property to its present holdings. Furthermore, the proposed highway improvement necessitates the remodeling of the railroad station at Nyssa at considerable expense, and in view thereof the company does not feel that it can go to the extra expense of acquiring additional land for which it has no use. The Attorney further advised that he has consulted with the officials of the Amalgamated Sugar Company, Nyssa, in regard to this project and has ascertained that this company is willing to cooperate with the Highway Commission fully in this undertaking. He also advised that there is no ground for the assertion of the Union Pacific Company that the highway improvement is responsible for the remodeling of the railroad station, because, as he understands it, the company intended to remodel this station regardless of the highway improvement. After discussion, the Attorney was instructed by the Commission to inform the Union Pacific Railroad Company officials that the grade separation project at Nyssa, in which the railroad company is particularly interested, is in jeopardy and may be cancelled from the Highway Commission's construction program unless the Commission can secure reasonable cooperation from the company.

The Attorney also brought up for discussion the question of whether or not persons who are accused of damaging state highway bridges should

JUN 11 1940

reimburse the state for the cost of repairs. He read aloud several letters from persons who were involved in accidents on the Interstate Bridge between Portland and Vancouver, in which it was pointed out that accidents occurred by reason of the faulty condition of the highway rather than on account of reckless driving, and the question arises whether or not, under the circumstances, they are obligated to pay the cost of repairing the bridge. The Engineer stated that at times the Interstate Bridge is slippery by reason of the dripping of oil from the street-cars and there is no question that a hazard exists, and if conditions are just right an accident is bound to occur regardless of the care that the driver of an automobile may exercise. He suggested that it might be advisable to investigate each accident carefully and ascertain, if possible, whether or not the accident occurred by reason of reckless driving or otherwise, and if it is found that recklessness on the part of the driver of the car was the cause of the accident the driver of said car should be required to reimburse the state for the cost of repairs; otherwise, the state should assume such expense. After considerable discussion, the Commission by unanimous vote approved the Engineer's suggestions and ordered that hereafter accidents occurring on any state highway bridge be handled in such manner. The Engineer and the Attorney were instructed to study each of the current cases involving accidents on the Interstate Bridge and if it appears that oil on the street-car tracks was the main cause of the accidents or if it is found that the accident occurred because of the slippery highway surface, then the owner of the automobile shall not be required to reimburse the state, and any remittances tendered by such persons shall be returned to them.

Consideration was then given by the Commission to the claim of Jack Carey for reimbursement for the cost of repairing his car which he alleged was damaged while enroute across the Interstate Bridge between Portland and Vancouver. The Engineer explained that this accident occurred during a time when inspection of the barrier on the right side of this bridge was being made by a highway department employee, and it so happened, for some unknown reason, that the contacts of the control box became connected, causing the barrier to start lowering, and it was not stopped until too late to prevent Mr. Carey driving his car into it. The responsibility for the accident, he said, is clearly the state's and he recommended that Mr. Carey be reimbursed for the cost of repairs to his car, which were estimated at \$102.40. The Commission by unanimous vote approved the recommendation subject to the condition that the State of Washington, which is joint owner of this bridge, assume a portion of this expense.

The Engineer requested authority to purchase the following equipment:

1 6-ton roller - estimated cost	\$ 3,500.00
1 6-ton trailer - estimated cost	1,500.00
7 550-gallon kettles - estimated total cost	8,050.00
2 200-gallon kettles - estimated total cost	1,200.00
1 100-gallon kettle - estimated cost	380.00
2 pickup trucks - estimated total cost	1,200.00
6 dump trucks - estimated total cost	5,550.00
Carried forward	\$21,380.00

(Continued on next page)

(Purchase of equipment requested by Engineer, continued)

	Forward \$21,380.00
9 trucks of the Ford and Chevrolet type, and trade in 9 old trucks as part purchase price - estimated net total cost	8,100.00
2 pickup trucks for Landscape Department - estimated total cost	1,200.00
1 157" wheel base truck for Parks Department - estimated cost	800.00
Grand Total	\$31,480.00

After consideration the Commission approved the request by unanimous vote and ordered that the purchases be made through the State Purchasing Agent in accordance with the usual practice.

The Engineer requested authority for the Assistant State Highway Engineer and himself to attend the meeting of the Western Association of State Highway Officials which is tentatively scheduled to be held in Santa Fe, New Mexico, some time in February. The Commission approved the request unanimously, subject to further approval by Governor Charles A. Sprague.

A letter was presented from Mr. Lester Sheeley, Vernonia, requesting that the county road which extends from the Wolf Creek Highway at Sunset Camp northeasterly to a connection with the Nehalem Secondary Highway, near the town of Vernonia, be designated a state secondary highway. The Commission decided not to so designate this road at the present time.

The Secretary presented letters from Messrs. Ray Conway, Lewis A. McArthur, and Walter Meucham, all of Portland, accepting appointments on the Commission's committee to select sites for historical markers along the Old Oregon Trail. The Commission approved the letters and ordered them filed.

A letter was presented from Mr. R. Allen, of Allen's Grocery Store, Marshfield, renewing his claim for loss of business and damages which he alleges he suffered by reason of the construction of the Bunker Hill Section of the Oregon Coast Highway just south of Marshfield. The Commission referred this matter to the Attorney for investigation and report.

The Secretary presented a letter from Mr. Charles Stidd, President, Peninsula Public Golf Course, Portland, advising that they have plans for the development and improvement of this golf course, located at the intersection of Denver and Union Avenues, Portland, which they would like to undertake in the near future, and inquiring as to the plans of the State Highway Commission for the reconstruction of the highway at this location. He was instructed to inform Mr. Stidd that the highway improvement is too costly a project to undertake in the near future and in view thereof the State Highway Commission would offer no objections to the immediate improvement of the golf course and would expect to reimburse the Golf Club for extra expense that it incurs by reason of the delay in the highway improvement.

JAN 11 1940

The Commission considered and ordered filed a petition signed by numerous residents of Eugene objecting to the Commission's plans for the proposed permanent routing of the Pacific Highway through the city of Eugene.

The Commission also considered a petition filed by numerous residents and tax payers of Newport and vicinity urging action by the Commission to stop the removal of agate-bearing sand and gravel from the ocean beach between Newport and Otter Crest, in Lincoln County. The Commission deferred action on this matter pending personal inspection of the premises.

The Engineer reported that he has received information from the Portland Traction Company to the effect that it intends to abandon its street-car tracks on Lombard Street, Portland, and in connection therewith intends to remove the rails. Also, that the company has stated its willingness to contribute toward the improvement of this street, which is a state highway route, an amount equal to the cost to repair the street after the rails have been removed. He requested authority from the Commission to make a survey of this street so as to ascertain how much it will cost to improve it to modern standards and to determine whether or not the offer of the Traction Company should be accepted. The Commission approved the request unanimously.

The Engineer also requested authority to conduct a survey on South 6th Street, Klamath Falls (The Dalles-California Highway) from Klamath Falls south to the state highway shops, a distance of about 2.18 miles, so that detailed information will be available when this project comes up for consideration in the formulation of future highway construction programs. He advised that this section extends through a thickly populated district and carries a large volume of traffic and must be improved in the near future as a traffic safety measure. Also, that the city is now working on the matter of acquiring strips for the widening of the right of way and for the establishment of building setback lines so as to advance the improvement as much as possible. The Commission approved the Engineer's request by unanimous vote.

The matter of authorizing an expenditure of state highway funds during 1940 to assist in financing the Oregon exhibit at the San Francisco Fair, which is to be opened again this year, had the attention of the Commission. The Engineer advised that this fair is to remain open for five months, beginning about May 1, and he estimated that to maintain an exhibit would cost between \$18,000 and \$20,000, of which amount the Fair Committee is asking the State Highway Commission to pay 50 per cent. After discussion the Commission authorized an expenditure not to exceed \$10,000 for such purpose, provided some other Oregon agency would pay the balance.

The matter of advancing additional state funds to finance non-labor items in connection with the Wolf Creek Highway W.P.A. project was brought up for discussion by the Engineer. He advised that if this work is to proceed the state will have to advance about \$2,500 in January and about \$3,500 in February. In this connection he pointed out that several months ago a new W.P.A. Project on this highway, to supersede the project now in force, was initiated, but, for some reason that he has not been able to ascertain, approval of the same by the Washington authorities has not been secured. He recommended

advancement of state funds to finance the non-labor items during January and February of 1940 but that a letter be written to E. J. Griffith, Works Progress Administrator for Oregon, inquiring as to the reason for the delay in securing approval of the new project and advising him that, notwithstanding that the State Highway Commission wants to see this project proceed to completion, some more equitable arrangement must be made in the near future to finance it. The Commission approved the Engineer's recommendations by unanimous vote and authorized Chairman Cabell to write such letter.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration, the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans	----	11-2810	- Quinton-Blalock Section, Columbia River Highway, Gilliam County.	1st authorization - \$437.50
Plans	----	20-2841	- Defter-Duval Creek Section, Willamette Highway, Lane County	2nd authorization - \$25.00 Total to date \$325.00
Right of Way	-	21-2837	- City of Waldport Section, Oregon Coast and Alsea Highways	1st authorization - \$500.00
Testing	----	22-2809	- Albany Section, Pacific Highway East, Linn County.	6th authorization - \$35.00 Total to date \$17,060.00
Plans	----	24-2827	- Pringle Creek-Taylor Creek Section - Pacific Highway East	1st authorization - \$100.00
Plans	----	-226-2841	- Barnes Road-Germantown Road Section, Skyline Blvd. (Co.Rd.)	1st authorization - \$600.00
Plans	----	30-2827	- Tutuilla Creek Section, Pendleton-John Day Highway, Umatilla County	1st authorization - \$250.00
Plans	----	33-2819	- Shaniko-The Dalles-California Highway, Wasco County.	2nd authorization - \$1,400.00 Total to date \$2,400.00
Location	----	235-2812	- John Day Highway-Kinzua Section, Kinzua County Road, Wheeler County.	1st authorization - \$2,800.00

The Engineer also reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys as reported and adopted the following resolution in regard thereto:

JAN 11 1940

WHEREAS the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED, that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highway involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
1A-8-27	7-2808	Crook	Location	Crooked River-Prineville	Ochoco
5B-24-20 5B-24-21	107-2806	Crook	Location	Jefferson Co. Line-Prineville	Warm Springs
5B-25-3	12-2815	Grant	Reconn.	Prairie City-Baker Co. Line	John Day
5B-23-18	13-2809	Harney	Location	Buchanan Ranch-Nigger Flat	Central Oregon
5B-24-19	18-2816	Klamath	Relocation	Flume, M.P. 293.66	The Dalles-Calif.
5B-25-4	235-2811	Wheeler	Reconn.	Fossil-Kinsua	Kinsua County Rd.

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Mountain States Construction Company, Contract No. 2154, for construction of a bridge over the Nehalem River on the Wolf Creek

JAN 11 1940

Highway, near Elsie, in Clatsop County, requested an extension of time of 60 days, from December 31, 1939, to February 29, 1940, within which to complete this project. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that failure of the contractor to complete this job in the time limit specified in the contract was due to changes in the plans and additional work authorized, which increased the contract amounts by 21 per cent. Such increase, he said, would entitle the contractor to 71 days extra time within which to complete the job. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

E. C. Hall Company, Contract No. 2192, for grading, surfacing and oiling the Silver Lake-Harris Creek Section of the Fremont Highway, in Lake County, requested an extension of time of 6 days, from September 30 to October 6, 1939, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that bids for this project were taken by the Commission on May 18, 1939, but the contract was not awarded until June 9, 1939. Furthermore, the quantities involved in the contract were increased during the time that the contract was under way. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2185 and 2192, for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2185, with E. L. Rigdon, for grading, topping, and oiling the John Day-Prairie City Section of the John Day Highway, in Grant County. Completed December 31, 1939.

Contract No. 2192, with E. C. Hall Company, for grading, surfacing, and oiling the Silver Lake-Harris Creek Section of the Fremont Highway, in Lake County. Completed October 6, 1939.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway

projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed a date for its regular meeting in March for the receiving of bids for highway construction work, and decided tentatively to hold such meeting on Thursday and Friday, March 21 and 22, 1940, in Portland. The Secretary was instructed to make the usual arrangements to hold such meeting in the auditorium of the Public Service Building.

The Commission adjourned at 6:00 o'clock p. m., to reconvene on the following morning at 9:00 o'clock in the same room

Portland, Oregon, January 12, 1940

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room:

PACIFIC HIGHWAY EAST
SOUTH UNIT, OREGON CITY SECTION - GRADING AND PAVING

Edlefsen-Weygandt Company	\$36,781.25
Jacobsen-Jensen Company	39,582.00
Contracting & Sales Company	39,912.50
The United Contracting Company	41,396.20
McNutt Bros.	41,652.50
Theo. Arenz	41,980.25
A. W. Stevens Construction Company	42,303.95
Bennett & Taylor	42,996.50

PACIFIC HIGHWAY EAST
SOUTH UNIT, OREGON CITY SECTION - PARTIAL VIADUCT AND RETAINING WALL

Barham Bros.	\$30,697.50
Kuckenberg Construction Company	30,743.50
Bennett & Taylor	31,085.00
Birkemeier & Sarnel	31,580.00
McNutt Bros.	32,050.00
A. W. Stevens Construction Company	32,561.00
Contracting & Sales Company	34,375.00
Parker-Schram Company	34,832.50
Edlefsen-Weygandt Company	35,870.00
Jacobsen-Jensen Company	36,452.50

JAN 12 1940

NEHALEM SECONDARY HIGHWAY
MIST-VERNONIA SECTION - CRUSHED ROCK IN STOCK PILES

Tidepoint Company	\$ 8,640.00
Homer G. Johnson	10,500.00
A. S. Wallace	10,800.00
Babler Bros.	11,200.00
Schmeer & Williams Bros.	11,400.00

E. C. Gerber	58,450.00
McNutt Bros.	59,450.00
Clifford A. Dunn	64,606.50

The Assistant Attorney reported that the right of way budget as set up for 1940 amounts to \$600,000 and that of this amount a total of \$230,361.83 has been authorized to date for acquisition of right of way. He also reported that by reason of exceptionally large payments during the month of December the anticipated saving in the 1939 budget of from \$40,000 to \$50,000 did not materialize, the actual saving being approximately \$12,000. The Commission approved the report.

The Engineer brought up for discussion the matter of the acquisition of right of way for the Columbia River Highway across a place known as Dodson Flat. He suggested that the Attorney be authorized to proceed with the securing of options for such right of way. The Commission approved the suggestion by unanimous vote.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED, that the several offers, or bases of settlement hereinafter enumerated be, and the same

hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent

The Engineer presented for consideration the Rose M. Hollenbeck property matter at Eugene, explaining that Mrs. Hollenbeck had awarded a contract for the construction of a residence building and that after the excavation work had been done she stopped further activities at the request of the Highway Department until such time as it could be definitely ascertained whether or not any additional right of way would be required across her property. The Commission expressed its appreciation of the cooperation afforded by Mrs. Hollenbeck and instructed that if it should develop later that her residence construction will be increased in cost by reason of the taking of any additional right of way, a claim for such increase in cost shall be presented to the Commission for approval.

JAN 12 1940

The Commission decided to study the plans for the Eugene project within the next three or four weeks and decide at that time whether to conduct a public hearing in Eugene on the subject.

Reconsideration was given by the Commission to the matter of paying the assessment made by the City of Portland against certain state-owned property adjacent to McLoughlin Boulevard, Portland, which property is described as Lots 10 and 11, Block 3, Reynolds Addition. The Attorney advised that the assessment is in the amount of \$42.00 and that he has received notice from the city that the property will be sold in the near future unless this assessment is paid. He gave as his thought that the city has no legal authority to collect such assessment against state property and requested instructions relative thereto. The Commission discussed this matter at some length but deferred its decision pending investigation and report as to whether or not the City of Portland actually pays the assessments made for improvements in front of city-owned property, it being the thought of the Commission that if the city pays such assessments then the state should do likewise. (This matter was reported on later in the session when the Attorney advised that inquiry reveals the fact that the City of Portland does pay assessments for improvements in front of city-owned property the same as private property owners are required to do in front of private holdings. In view thereof, the Commission by unanimous vote approved the payment of the assessments in this instance.)

The Attorney requested instructions as to whether or not he should resume negotiations for the acquisition of right of way needed for the proposed improvement of the Oregon Coast Highway through the town of Bandon. He advised that he has not yet received the final decree of the Circuit Judge in the case of the tax lien matter, involving property in the town of Bandon, but indications are that the decree will be favorable, so if the Commission wants to expedite this project it could authorize the acquisition of the right of way at this time. The Commission deferred a decision in the matter until the final decree has been handed down.

The Attorney reported a request from the State Forestry Department for a permanent easement to use a roadway across state-owned property acquired from Mr. Charles Pope, in Lane County, for stock pile purposes, so as to permit access to property that the Forestry Department owns. He explained that the Forestry Department simply wants a permanent right to use an existing roadway across this tract and that it has offered to construct a fence around the stock pile at its own expense. The Commission appeared inclined to grant this request but deferred a definite decision pending investigation and recommendation by the Engineer.

Reconsideration was given by the Commission to the matter of acquiring the area contained within the wye connection of the Lakeview-Burns Highway with the Central Oregon Highway, in Harney County. The Attorney advised that the owners of this property have indicated a willingness to accept \$350.00 for the same, which is \$150.00 less than their previous offer. The Commission approved the purchase of this tract at such figure.

The Engineer reported the need to acquire additional land in John

JAN 12 1940

Day for the enlargement of the maintenance headquarters at such place, and recommended that the Attorney be authorized to negotiate for the same. The Commission approved the recommendation and instructed the Attorney to secure options for consideration by the Commission at the next meeting.

The Attorney reported difficulties in acquiring right of way for the improvement of the Pacific Highway across land owned by Harry Dinkle at Albany. He advised that the appraised value of this property is \$350.00, including damages in the amount of \$150.00, but the owner previously demanded \$550.00 for the same, in view of which the Commission authorized condemnation of the property. However, Mr. Dinkle subsequently agreed to accept the sum of \$450.00 and has given the state an option in that amount. He inquired whether he should close this transaction on such basis or should proceed with condemnation, in view of the value placed on the property by the state's appraiser. After discussion the Commission authorized the Attorney to pay as much as \$400.00 for the property, and if Mr. Dinkle will not accept such sum, then to proceed with condemnation.

The Assistant Attorney presented for consideration the settlement on the Emil A. Johnson property, Right of Way File 6978, at Tigard, explaining that on December 7 the State Highway Commission received bids on behalf of the owner for the moving of the buildings and that the low bid was submitted by Odom Construction Company, in the amount of \$6,364.00. It has developed, however, that there was some indefiniteness in the specifications and that Mr. Johnson has demanded additional items of work, estimated to cost about \$300.00, which the contractor has refused to do, resulting in failure to enter into a contract by the owner and the contractor for the doing of the work. If new specifications are prepared and the work is readvertised, it is anticipated that Mr. Johnson will make additional demands over and above the original specifications, which unquestionably will greatly increase the cost of the work. The Assistant Attorney advised that Mr. Johnson has offered to accept the sum of \$7,000.00 and to do all of the work himself, and to relieve the Commission from any further liability. Mr. Johnson's offer was based upon the further fact that from the sum of \$7,000.00 there should be deducted \$159.10, which is 2½ per cent of the low bid of Odom Construction Company and which sum is to be paid to Odom Construction Company as compensation for having submitted the low bid and not having been awarded the contract for the work by Mr. Johnson. In view of the desire to place the Tigard project under contract, and the expense which will be involved in preparing additional specifications and readvertising the work, it was recommended that Mr. Johnson's offer be accepted. After consideration the Commission approved the recommendation of the Assistant Attorney and authorized settlement for the moving work upon the basis of payment of \$6,840.90 to Mr. Johnson and \$159.10 to Odom Construction Company.

The Attorney requested authority to institute condemnation proceedings to acquire right of way needed for the revision of the Lost River Section of the Klamath Falls-Malin Highway, in Klamath County, across the property of B. L. Dodenhoff and wife, Right of Way Transaction No. 7683. He explained that the appraised value of this property is \$3,064.50, but that Mr. Dodenhoff is demanding the sum of \$8,000.00 for the same. He recommended condemnation

of the property and that he be authorized to offer Mr. Dodenhoff \$3,000.00 for the same. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Lost River Section of the Klamath Falls-Vain Highway

real property owned by or in possession of the following parties and/or persons, to wit:

File 7683-B. L. Dodenhoff and Hallie M. Dodenhoff

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said

JAN 12 1940

Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney brought up for discussion the matter of renting the building recently acquired by the Commission from Duane Gibson in connection with the purchase of right of way for the revision of the Pacific Highway just south of Salem. He suggested that the renting of this building should be handled in the same manner that the state-owned buildings in Pendleton are handled; that is, through a local agency. The Commission approved the recommendation unanimously.

The Commission had under discussion the offer of the United States Division of Grazing relative to the maintenance of an oasis for general public use adjacent to the Lakeview-Burns Highway at a place known as Alkali Lake. The Engineer advised that Mr. George Beers, who represents the Division of Grazing, offers, if the Commission intends to proceed with its plans for an oasis at this place, to make available to the state certain wells already drilled and serving the C.C.C. camp located nearby, and he will also cooperate with the Highway Commission in this undertaking by furnishing C.C.C. labor required for the construction and maintenance of such oasis as long as the C.C.C. camp is maintained in that vicinity. The Commission deferred its decision in this matter pending investigation by the Engineer, who was instructed to have the Landscape Engineer contact Mr. Beers for details.

Mr. Honeyman, Portland, came before the Commission at this time in regard to logging operations on highways in the vicinity of Molalla. He stated

that the loggers of this district apparently have no regard whatsoever for the provisions of the permits that have been issued to them and continually violate the provision that prohibits the transportation of logs during the hours of darkness, Saturday afternoons, Sundays, and holidays. Further, that many logs are spilled along the roadside, creating a hazardous as well as an unsightly condition; furthermore, the highways are being badly damaged by reason of truck-hauling of logs over the same. He asked the Commission to look into the matter. The Commission instructed the Engineer to investigate Mr. Honeyman's allegations and report his findings.

The Engineer requested authority to post the Nye Junction-Ukiah Section of the Pendleton-John Day Highway and the Prairie City-Unity Section of the John Day Highway for 50 per cent reduced load limits when the need for such posting is apparent. He explained that there is considerable frost in the ground at the present time and it may be necessary to post the roads for reduced loads at any time. In any event, he said, it would be necessary to do so when the spring break-up occurs, in order to prevent serious damage to the highway. The request was approved by the Commission by unanimous vote, with the understanding that an appropriate resolution would be adopted later when the reduced load limit signs are placed.

The Secretary presented a letter from the Belle Passi Cemetery Association, Woodburn, in which the Commission was requested to authorize the erection and maintenance of a monument on the Pacific Highway right of way near its junction with the Belle Passi Cemetery Road about 1 mile south of Woodburn, as a memorial to pioneers of this historical location. The Engineer advised that the right of way at this place is only 60 feet wide, which is too narrow to accommodate a monument such as the petitioners have in mind, and it would be necessary to acquire additional width as a site for the monument if the Commission approved the request. He suggested that the Commission secure a recommendation from Mr. Lewis A. McArthur, President of the Oregon Historical Society, before passing definitely on the matter. The Commission approved the recommendation and so ordered.

The Attorney reported briefly on the status of the proposed Astor Street project in Astoria, particularly as to the progress that is being made by the city in securing the removal of buildings from the highway right of way. He said that the city has encountered difficulties in this matter and has brought suit against the owners of the buildings to force them to move their buildings. He read aloud a letter from the City Attorney regarding the matter, in which was outlined an offer of settlement made by the property owners to the city, and advised that the city has rejected the offer and has decided to proceed with its trial, in connection with which the city would like to know whether or not the Highway Commission will contribute any state funds to help defray the cost. He also said that the City Council intends to discuss this matter at a meeting in the near future and would like to have the Commission's answer at that time. The Commission appeared disinclined to contribute state funds for this purpose; however, authorized the Attorney to attend such meeting and to inform the City Council, if questioned on the matter, that he has no authority to obligate the state for any additional amount but will report back to the Commission for further instructions.

The Attorney presented a letter from Mr. Jay Bowerman, Portland, attorney for the Safeway Stores, Inc., inquiring whether or not the Commission would grant Safeway Stores a permit to operate its delivery equipment on the Ontario Spur Section of the Old Oregon Trail between Ontario and the Snake River, which equipment exceeds somewhat the overall height limit specified by the Oregon statutes. It appears that the Safeway Company supplies its Ontario store from its Payette, Idaho, headquarters, and that the equipment that it operates in Idaho meets the Idaho requirements in all respects, but it does not meet the Oregon requirements as to height, hence their request for a special permit to avoid the necessity of purchasing special equipment simply to serve its store in Ontario, which requires the movement over the Oregon highway for a distance of only 1 mile. The Engineer recommended granting such permit in the event that the Commission has legal authority to do so and provided there is sufficient overhead clearance across the Snake River Bridge. The Commission approved the recommendation unanimously, subject to a check of the bridge clearance. The Engineer was instructed to investigate the matter.

County Commissioner H. B. Roadman, Douglas County, was present and urged the construction of an additional section of the North Umpqua County Road on permanent alignment from the end of the present improvement which is now unusable, being a deadend section, for a distance of about 1 mile, to a connection with the existing road. He said that the county has already started proceedings to acquire the right of way and in support thereof presented a copy of the County Court's resolution in regard thereto. He was informed by Chairman Cabell that the Commission appreciates that this particular section should be completed as soon as possible but just how soon the Commission could undertake it is a question which depends entirely upon the availability of funds. The Commission agreed to give the project serious consideration in the formulation of its next federal aid secondary highway program.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:15 o'clock p. m. in Room 210, Congress Hotel, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Commission conferred with representatives of the Public Roads Administration and the United States Forest Service with regard to the selection of projects to be recommended to the Commissioner of Public Roads and the Chief of the Forest Service, Washington, D. C., for the fiscal year 1941 forest highway program. Representing the Public Roads Administration were Messrs. W. H. Lynch, District Engineer, and T. M. Davis, H. D. Farmer, F. E. Andrews, and Robert Bloodsworth, Senior Highway Engineers. Representing the United States Forest Service were James Frankland, Regional Engineer, and F. V. Horton, Acting Regional Forester.

Mr. Lynch advised that the exact amount of the fiscal year 1941 authorization is \$1,171,755.00, which amount, less the administrative expense and cost of equipment, estimated at \$116,755.00, leaves a balance of \$1,055,000.00 available for allocation to construction projects, location surveys, and maintenance, being \$95,000.00 more than was estimated at the previous

conference. Discussion was then had on the question of whether or not an allocation should be made for the construction of a permanent bridge structure on the North Umpqua Forest Highway, in Douglas County, at a place known as Steamboat, or to construct a temporary structure at such place. It was pointed out that the state highway bridge over the Pudding River on the Pacific Highway, at Aurora, will have to be replaced in the near future, and it was suggested that this old bridge, which is a steel structure, could be dismantled upon completion of the new bridge and re-erected at Steamboat at considerably less expense than if an entirely new bridge were built at the latter place. The suggestion was approved by unanimous vote of all parties concerned and it was decided to finance the new Pudding River Bridge at Aurora with fiscal year 1941 federal aid moneys and to finance the re-erection of the old Pudding River Bridge at Steamboat with fiscal year 1942 forest highway moneys, which would avoid the necessity of providing an allotment in the current forest highway program for such project. The Commission indicated that it would take bids for the construction of the new bridge at Aurora in the fall of 1940.

The question of whether or not to construct a section of the Cascade Lakes Forest Highway between its junction with the Willamette Highway and the town of Crescent Lake was also discussed at some length. On account of the excessive cost to build this section, including the railroad overcrossing structure involved, it was suggested that consideration should be limited to the section from the Willamette Highway southerly a distance of about one mile to a junction with the county road that leads to the town of Crescent Lake, which project it was estimated would cost only about \$30,000.00. Mr. Lynch gave as his thought that sufficient savings would accrue from the contracting of other work to finance such project so that it would not be necessary to make an allocation thereto at the present time. The suggested improvement was approved by the unanimous vote of all parties concerned, whereupon Mr. Lynch advised that he would order a survey of the project immediately, to secure a closer estimate of cost. It was decided that the action taken at this meeting with respect to this project would be brought to the attention of the people of Crescent Lake, and their attitude with respect thereto ascertained. The Engineer was instructed to personally contact these people in company with a representative of the Public Roads Administration and the County Engineer of Klamath County.

There followed a general discussion of the projects to be included in the 1941 program, special consideration being given to the proposed revision of the Oregon Coast Highway south of Port Orford, in Curry County; to the construction of the forest highway section of the Warm Springs Highway; and to the reconstruction of the remaining link of the Wapinitia Highway a short distance westerly from its junction with the Warm Springs Highway. After considerable discussion the Commission voted unanimously to contribute \$100,000.00 of state funds as cooperation in financing the Port Orford improvement and the Warm Springs and Wapinitia projects. The following projects were thereupon approved for the program under discussion and it was decided unanimously to recommend them to the Commissioner of Public Roads and the Chief of the Forest Service, Washington, D. C.:

	Maintenance		25,000		
	TOTAL		\$1,055,000	\$100,000	

Mr. Lynch then brought up for discussion the matter of providing funds to carry on surveys and to perform necessary maintenance work before the new forest highway program receives final approval in Washington. He advised that about \$30,000 will be needed to finance location surveys and \$25,000 to finance maintenance of forest highways, or a total of \$55,000, which, he said, is available in the forest highway state contingent fund. He asked the Commission to approve such allocations. The Commission approved the request and thereupon signed the following joint letter with Mr. Lynch and Mr. Horton in regard thereto:

JAN 12 1940

Chief, Forest Service
 Commissioner of Public Roads
 Washington, D. C.

Gentlemen:

It is recommended that \$30,000 be allocated from the Oregon Forest Highway State Contingent to finance location surveys in the State of Oregon, and that \$25,000 be allocated to finance maintenance of Forest Highways in that State for which the Federal Government is obligated under existing cooperative agreements.

The conference was concluded at 2:15 o'clock p. m., whereupon the Commission reconvened immediately in the auditorium of the Public Service Building with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Matters pertaining to the proposed Front Street project, Portland, were discussed and in this connection the Attorney advised that the Portland City Council desires a conference with the Commission for consideration of right of way matters incident thereto; also, that the city officials have requested that someone from the State Highway Department be assigned to work with the city authorities in appraising properties along this route. After discussion, the Commission authorized the Attorney to assign one of his right of way agents to work with the city officials in making such appraisals, it being understood, however, that options are not to be taken.

The Engineer discussed with the Commission the program of state finance projects that have been approved for construction in 1940. He pointed out that the Commission has already approved an item of \$767,000.00 in the 1940 budget to finance state work on primary highways, and an item of \$386,000 to finance state work on secondary highways, or a total of \$1,152,000.00, and some time ago approved individual projects to take up these amounts. He questioned the advisability of approving additional projects until it is known whether or not these already approved will take up the amounts available. This matter was discussed briefly and the Engineer was instructed to prepare a list of approved projects and report the same to the Commission at the next meeting.

Reconsideration was given by the Commission to the award to the bidders, Saxton, Looney & Risley, of the contract for the construction of the 5.1 miles of surfacing and oiling on the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, bids for which were received by the Commission on December 8, 1939, and also to the award to the said bidders of the contract for the construction of 9.30 miles of highway construction on the Jordan Creek-McNamers Camp Section of the Wilson River Highway, in Tillamook County, bids for which were received by the Commission on December 7, 1939, and the failure of the said bidders to execute each of said contracts and furnish the construction bond required in support of each

JAN 12 1940

contract. In this connection the Commission gave consideration to the bidders' request for additional time within which to execute said contracts and furnish the required bonds, and the Commission by unanimous action agreed to grant the bidders two weeks within which to execute the contract and furnish the bond with respect to each project, said period of time to terminate on January 27, 1940.

The Commission instructed the Secretary to so notify the bidders and the surety on their bidders' bonds and the Commission further instructed the Secretary to advise the said bidders and their sureties that in the event they fail to execute each of said contracts within said extension of time and furnish the bonds required, the Commission will determine and conclude that the bidders have abandoned the contract, and the Commission will proceed to recover the full amount of the bidders' bonds in each case. The Engineer was authorized by the Commission to award said contracts to the next low bidder in each instance in the event that Saxton, Looney & Risley fail to meet the Commission's requirements.

The Engineer discussed briefly with the Commission the proposed agreement with the United States War Department with respect to the use of the dredged materials from the Columbia River for constructing fills along the new Columbia River Highway, in Multnomah County, but no definite action was taken thereon.

At 3:00 o'clock p. m. Chairman Cabell announced awards of contracts as follows, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"South Unit, Oregon City Section of the Pacific Highway East, in Clackamas County. 0.31 mile grading and paving. Edlefsen-Weygandt Company, Portland, submitted the low bid for this project at \$36,781.25. Jacobsen-Jensen Company, Portland, submitted the second-low bid at \$39,582.00. There were 6 higher bidders. The Commission awards this contract to the low bidder, Edlefsen-Weygandt Company, at its bid of \$36,781.25.

"Construct 336 lin. ft. concrete partial viaduct and 173 lin. ft. concrete retaining wall on the South Unit, Oregon City Section of the Pacific Highway East, in Clackamas County. The low bid for this project was submitted by Barham Bros., Salem, at \$30,697.50. The second-low bid was submitted by Kuckenberg Construction Company, Portland, at \$30,743.50. There were 8 higher bidders. The Commission awards the contract for this job to Barham Bros., the low bidders, at their bid of \$30,697.50.

"Mist-Vernonia Section of the Nehalem Secondary Highway, in Columbia County. Furnish 6,000 cu. yds. crushed rock in stock piles. 7 bids were received for this project, the low one being that of Tidepoint Company, Astoria, at \$8,640.00. The second-low bid was that submitted by Homer G. Johnson, Portland, at \$10,500.00. The Commission awards the contract for this project to the low bidder, Tidepoint Company, at its bid of \$8,640.00.

"Band-Millican Section of the Central Oregon Highway, in Deschutes County. Furnish 8,000 cu. yds. crushed gravel in stock piles. A. S. Wallace, Roseburg, submitted the low bid for this project at \$10,040.00. Fisher Bros., Oregon City, submitted the second-low bid at \$11,460.00. There were 6 higher bidders. The Commission awards the contract to the low bidder, A. S. Wallace, at his bid of \$10,040.00.

"Construct frame office building approximately 26' x 48', and a 32' x 40' addition to existing maintenance building at Medford, Jackson County. 5 bids were received for this project, the low one being that submitted by Walter J. Stutte, Portland, at \$10,767.00. The second-low one was submitted by E. G. Whiteside & Son, Medford, at \$11,996.73. The Commission awards the contract to Walter J. Stutte, the low bidder, at his bid of \$10,767.00.

"Dairy Section of the Klamath Falls-Lakeview Highway, in Klamath County. 0.51 mile grading, surfacing, and oiling; also, furnish 4,000 cu. yds. crushed rock in stock piles. Rogers Construction Company, Dayton, Washington, submitted the low bid for this project at \$19,733.00. The only other bid received was that of W. D. Miller Construction Company, Klamath Falls, at \$23,771.00. The Commission awards the contract for this project to Rogers Construction Company at its bid price of \$19,733.00.

"Cushman-Swisshome Section of the Siuslaw Highway, in Lane County. Furnish 6,800 cu. yds. crushed rock or crushed gravel in stock piles. Three bids were received for this project, the low one being that of the Eugene Sand and Gravel Company, Eugene, at \$14,280.00, and the second-low one being that of A. S. Wallace, Roseburg, at \$14,960.00. The Commission awards the contract to the low bidder, Eugene Sand and Gravel Company, at its bid of \$14,280.00.

"Pleasant Hill-Oakridge Section of the Willamette Highway, in Lane County. 13.05 miles surfacing and 14.65 miles oiling; also, furnish 11,300 cu. yds. crushed gravel in stock piles. E. C. Hall Company, Eugene, submitted the low bid at \$49,393.50. O. C. Yocom, Willamina, submitted the second-low bid for this project at \$51,292.50. There were 9 higher bidders. The Commission awards this contract to the low bidder, E. C. Hall Company, at its bid price of \$49,393.50."

The Commission had under discussion the schedule bond furnished by The Ohio Casualty Insurance Company covering certain State Highway Department employees. The Engineer advised that the present bond protects only the State Highway Commission, whereas, in his estimation, he, as State Highway Engineer, should be included as additional party assured, inasmuch as he is responsible for the acts of the employees covered by the bond. He further stated that Mr. H. R. Drinker, President of the Metzger-Parker Company, Portland, the local representatives of The Ohio Casualty Insurance Company, advises that his company is willing to include as additional parties assured any official of the State Highway Department whom the State Highway Commission wishes protected

by this bond, and will furnish an endorsement to be attached to the bond so protecting such officials. Accordingly, he suggested that such endorsement be secured protecting him as State Highway Engineer. The Commission approved the suggestion by unanimous vote and instructed the Secretary to secure such an endorsement from the insuring company.

Messrs. J. S. Risley and A. H. Saxton, representing the contracting firm of Saxton, Looney & Risley, came before the Commission at this time in regard to the contracts awarded to them by the State Highway Commission at its meeting on December 7 and 8, 1939, for the surfacing and oiling of the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, and the construction of the Jordan Creek-McNamers Camp Section of the Wilson River Highway, in Tillamook County. They advised that up to the present time they have been unable to secure the bonds required by the State Highway Commission in connection with these contracts, and requested additional time within which to provide such bonds. Chairman Cabell advised the action taken by the Commission previously on this matter and that the Commission has instructed the Secretary to confirm such action by letter. The question of whether or not the Commission would authorize the assignment of these contracts was then brought up for discussion. The Commission decided unanimously not to approve such assignment.

The Engineer presented a list of rules and regulations covering the truck-hauling of logs over state highways, as revised pursuant to suggestions offered at the conference with representatives of the logging industry in the Benson Hotel on Wednesday evening, January 10, 1939, which rules and regulations are as follows:

A. Disposal and Reporting of Lost Logs or Log Loads

If any log be dropped from any load during its transportation over any of the highways of this state, it shall be the duty of the person, firm, or corporation hauling said logs, immediately to remove the same from the travelled portion of the roadway, and within a period of not more than 48 hours (holidays excluded) to remove the same from the right of way at his or its own expense. The repeated dumping or loss of logs upon the highway right of way, or the neglect or refusal of any log hauler to remove any log or logs so unloaded or lost in transit shall be considered as an indication of laxity in conforming to loading requirements and shall be cause for the immediate suspension or cancellation of the permit under which said log hauler is operating.

If any log or logs be dropped or lost upon the highway it shall be the duty of the log hauler to report said fact to the Highway Commission within 48 hours thereafter. Said report shall state, among other things:

1. The time the log or logs were lost.
2. The exact location.
3. The number of logs on the truck at the time of the accident.

4. The length of the respective logs.
5. The number of board feet contained in the load.
6. The speed of the truck at the time of the accident.
7. If on a curve, a full description of the curve and surrounding country.
8. What portion of the equipment broke, if any, prior to the loss of said logs.
9. The type and age of equipment, both truck and trailer, and the number and size of chains or fastenings used.
10. The date of the last checkup or inspection of the equipment involved.

The neglect or refusal of any log hauler to render the above report within the time specified may be considered cause for the immediate suspension or cancellation of the permit under which said log hauler is operating.

B. Method of Loading

1. The bunks or bolsters of any truck hauling logs shall be straight or concave upward. Bunks which are convex upward will not be permitted.

2. The ends of the bunks or bolsters shall be provided with a chock block which can be securely locked in position; and when the truck is loaded and the chock block in position, it shall have a height of not less than eight inches above the edge of the bunk. No chock block shall extend more than three inches beyond the limits of the bunk.

3. Loads shall be tied with not less than two ties. All ties shall entirely surround the load and the rear tie shall be securely fastened to the bunk of the trailer. In case any log is of insufficient length to rest securely upon both front and rear bunks, such log shall have an additional tie securely binding the unsupported end of such log to the remainder of the load. All ties shall be placed on right-hand side of load and shall be drawn tight.

4. Any tie or fastening thereof shall have a minimum breaking strength of not less than 15,000 pounds.

5. The method of loading shall be such that the outside logs in any upper tier or layer shall have their centers inside of the centers of the outer logs of the next lower tier or layer so that the load is stable without ties or bindings. The ties or bindings are to be regarded as a precautionary measure to insure stability while rounding curves or on superelevated or sloping sections of highway.

6. In the case of short logs hauled on trucks not pulling trailers, the following regulations may be substituted in lieu of Paragraphs 3, 4, and 5: The logs may be loaded between rigid standards

JAN 12 1940

attached to the bed of the truck at the bottom and tied across above the load with cable or chain ties. There shall be a standard on each side of the load within two feet of each end of the logs, and a sufficient number of standards shall be provided so that they are spaced not more than eight feet apart on each side of the load. The standards shall be rigidly connected to the bed of the truck or shall be placed in tight-fitting sockets at least twelve inches in depth. The chain or cable tie above the load shall have a minimum breaking strength of not less than 15,000 pounds. The standards shall be of such size and dimension that when supported at each end, a load of 15,000 pounds applied at the center of the standard shall not cause failure.

C. Precautions at Grade Crossings

No permit for the movement of overlength logs or piling will be granted involving any crossings at grade of a railroad carrying passenger traffic unless said crossing is protected either by automatic signals or gates or by flagmen. Such flagmen shall be permanently stationed at the crossing or crossings in question during all times when hauling operations are in progress.

After careful consideration the Commission approved the regulations by unanimous vote subject to concurrence by the Superintendent of the Department of State Police and the Public Utilities Commissioner of Oregon. The Engineer was instructed to discuss the rules with said state officials and he was authorized to make such minor revisions in the same as may appear necessary as a result of such consultations. (The above rules and regulations were approved by the Superintendent of the Department of State Police and the Public Utilities Commissioner of Oregon as of January 30, 1940.)

The Secretary was instructed to send a copy of the approved rules to each logging operator.

The Commission also discussed briefly the matter of modifying its present rules and regulations with respect to the granting of permits for the transportation over state highways of timbers, the length of which when loaded exceeds the length limit specified in the statutes, but deferred action on this matter until a future meeting.

The Commission considered and signed agreements, et cetera, as follows:

Supplemental agreement with Contractors Leonard & Slate, providing for the furnishing of insurance written by a commercial agency rather than by the State Industrial Accident Commission, protecting the persons employed by them in connection with their contract with the state for the furnishing of ferry service across the Willanette River at Wilsonville.

JAN 12 1940

Supplemental agreement with Andrew Stambuck providing for the furnishing of insurance written by a commercial agency rather than by the State Industrial Accident Commission, protecting persons employed by him in connection with his contract with the state for the furnishing of ferry service across Coos River at Enegren Ferry.

Agreement with Emery Tresham covering the lease to Mr. Tresham of certain state-owned property situate adjacent to the Pacific Highway West, in Yamhill County, being Right of Way Transaction No. 3262. Consideration to be paid by Mr. Tresham is \$24.56 annually for the 6.14 acres involved.

Agreement with Klamath Indian Agency providing for the lease of Indian tribal lands in Klamath County for stock pile site purposes.

Agreement with the Oregon Electric Railroad Company covering construction of the Tigard railroad grade separation project at Tigard.

Agreement with the United States of America providing for the advancement of not to exceed \$2,500.00 of state funds to pay non-labor items in connection with the Wolf Creek Highway W.P.A. project during January 1940.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:00 o'clock p. m.

Raymond C. [Signature]
State Highway Engineer

Secretary

Henry F. Cabell
Chairman
E. B. [Signature]
Commissioner

Thurman W. [Signature]
Commissioner

JAN 12 1940

Salem, Oregon, January 25, 1940

The State Highway Commission met in special session at 11:00 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Chairman Henry F. Cabell was absent, being in attendance at Congressional Committee hearings on road matters in Washington, D. C.

The Engineer reported on the cost of reconditioning the present route of the Pacific Highway west through the town of Tigard, as has been requested by businessmen of that town. He estimated that a first-class job would cost about \$7,500, however, for an expenditure of about \$3,300 an improvement could be secured which he thought would be satisfactory and would afford adequate relief from the present unsatisfactory condition for a long time. He recommended an expenditure of state funds in such amount for a project of that kind. The Commission approved the recommendation unanimously.

A letter was presented from Mr. Fred B. Robinson, Klamath Falls, complaining of the practice of the National Park Service in collecting a toll of \$1.00 from motorists who drive over the Crater Lake Highway enroute from Medford to Klamath Falls, but who do not visit Crater Lake. Mr. Robinson gave as his opinion that such practice is unfair and that no charge should be made unless the motorist drives up to the lake. The Commission concurred in the viewpoint of Mr. Robinson and, thereupon, instructed the Attorney to prepare a letter to the proper Government officials, for the Commission's signature, objecting to the collection of such toll inasmuch as, in the minds of the Commission, it is an unfair charge and is an injustice to the motorists who do not visit the lake.

In this connection the Attorney advised that a movement is on foot to relieve the bus companies that operate to Crater Lake from Klamath Falls and Medford from the payment of state transportation fees and gasoline tax, it being the thought of these people that the road to Crater Lake is a private road which would place it outside of the jurisdiction of the state and would obviate the necessity of the payment of the fees. The Attorney said that this case is similar to the case of the road leading to Timberline Lodge from the Mount Hood Highway, which road was declared by the Public Utilities Commissioner to be a public road. He recommended that this matter be called to the attention of the proper government officials and objections offered thereto. The Commission approved the recommendation.

The Attorney requested authority to acquire certain parcels of real property that are needed for various state highway improvements throughout the state. He submitted a list of such properties together with the prices

JAN 25 1940

that be recommended be paid for each. After careful study the Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto, with the understanding that options taken for the right of way needed for the Nyssa underpass on the Old Oregon Trail, in Malheur County, shall not be closed until the Commission approves the project for construction:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent

The Attorney reported that since the Commission awarded the contract for the moving of the Methodist Episcopal Church building and parsonage, in Tigard, the trustees of this church have changed their ideas with respect to the arrangement of the buildings on the new location and they now want the buildings re-established in a somewhat different manner than was specified in the contract and they also want additional toilet facilities. Such alterations in the plans and the added facilities, he said, are estimated to cost \$456.00. He gave as his thought that the request is reasonable and just and recommended approval of the extra expense provided the church will pay the cost of the extra toilet facilities which, he estimated, would cost about \$75.00. The Commission approved the recommendation unanimously.

The Attorney also brought up for discussion the M. B. Reeder lease of the R. O. Borland property at Grants Pass which property the Commission acquired for right of way for the improvement of the Pacific Highway at this

JAN 25 1940

place. He said that Mr. Reeder is a tenant on the property, in fact has a lease which runs for a period of five years, although the lease was never recorded in the county records so was not discovered when the title search was made, and he now refuses to vacate the premises unless he is compensated therefor. He further stated that Mr. Reeder has agreed to the cancellation of the lease provided the state will give him the building that he is occupying and will also pay him the sum of \$250 cash. Furthermore, Mr. Reeder will assume the responsibility of removing the building from the right of way. It was the Attorney's thought that such settlement is very satisfactory in view of the fact that the building is of little value and must be moved soon so as not to interfere with the progress of the highway construction. He recommended approval of the same. The Commission approved the recommendation unanimously.

The Assistant Attorney brought up the matter of the rental of the Duane Gibson building which was purchased in connection with the acquisition of right of way for the Salem South Project on the Pacific Highway. He said that under authority granted by the Commission at the last meeting this building has been listed with a local real estate agency for rental, but it appears that the building cannot be rented to a desirable tenant unless the sewer facilities are repaired. He estimated that the repairs would cost about \$20.00 and recommended the expenditure. In the discussion of this matter the Commission considered the advisability of the sale of the property but deferred its decision in regard thereto until the highway reconstruction project is completed when a sale value for the property will be established. The Commission authorized, in the meantime, the expenditure of the amount necessary to fix up the sewer.

The Engineer rendered a status report on the Wolf Creek Highway W.P.A. project. (See letter by E. H. Clymer, Cost Analyst, dated January 16, 1940). The Commission discussed the report briefly and ordered it filed.

The Secretary presented a resolution from the Yamhill County Court requesting the resurfacing of the Yamhill-Newberg Secondary State Highway, in Yamhill County, during the 1940 season. The matter was referred to the Engineer for report on how much it would cost to do this work.

There was also presented to the Commission a petition from residents of Beaverton and vicinity requesting the widening of the Tualatin Valley Highway between Sylvan and Beaverton for four lanes of traffic. The petition was referred to the Engineer for investigation and report as to how much it will cost to do this work.

Consideration was given by the Commission to a petition signed by numerous residents and taxpayers of Lorane, Oregon, requesting the reconditioning and oiling of the Territorial Secondary Highway from Gillespie Corners southerly to the Lane-Douglas County line. The Engineer advised that this is a desirable project but there is a question whether or not the Commission will be able to finance it in view of the limited amount of funds that are available for such work. The Commission decided, after discussion, to place this project on the 1940 construction program in the event there appears to be

JAN 25 1940

funds available to finance it. The Secretary was instructed to so inform the petitioners.

The Commission discussed a resolution from Powell Butte Grange No. 629, Crook County, in which the Commission was urged to allocate funds for the construction of the Marks Creek Section of the Ochoco Highway east of Prineville, and for the construction of the Crook County Section of the Warm Springs Highway between Prineville and Madras. The Secretary was instructed to inform the grange that the Commission contemplates the construction of a portion of the Prineville-Madras Section this year along permanent alignment but because of scarcity of funds is not in a position to finance all of the construction that the grange requests. However, the projects will be kept in mind for future consideration.

The Commission also discussed a resolution from Vale Grange No. 696, Malheur County, transmitted by County Judge David F. Graham, requesting the improvement of the Vale West Secondary Highway (Graham Boulevard) during the 1940 season by widening, straightening and reconditioning the rock surface. The Engineer advised that this improvement is 10.7 miles in length and estimated that it would cost about \$87,600 to regrade and resurface it, and construct an oil mat thereon. He questioned the justification for an expenditure of such sum in view of the fact that the road carries very little traffic, the maximum count being 127 vehicles daily. The Commission decided to give this project further consideration notwithstanding that the prospects of its approval are rather remote.

The Engineer reported a request from Mr. Ralph Laird, Creswell, Oregon, for the oiling of the Springfield-Creswell Secondary State Highway, in Lane County, and advised that Mr. Laird wishes to appear before the State Highway Commission at its next meeting for a discussion of this subject. The Secretary was instructed to notify Mr. Laird that the Commission will be glad to give him an audience at such meeting and to set a time for his appearance. The Engineer was instructed to have available at such meeting a report on how much it would cost to oil this road as requested.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:00 o'clock p. m. in the same room with the same persons present and participating.

The Secretary requested instructions relative to the renewal of the fidelity bond furnished by the Assistant State Highway Engineer, Mr. C. B. McCullough. He explained that the present bond, which is in the amount of \$10,000, was written by the Commercial Casualty Insurance Company, the premium being at the rate of \$5.00 per thousand, or a total of \$50.00, and that the anniversary date of the bond is February 1, 1940. He pointed out the possibility of including Mr. McCullough under the coverage of the schedule bond furnished by The Ohio Casualty Insurance Company at the rate of \$2.30 per thousand, or a total of \$23.00. The Commission decided unanimously to include Mr. McCullough under the bond written by The Ohio Casualty Insurance Company and so ordered.

JAN 25 1940

The Secretary presented a resolution from the Deschutes County Court wherein the county accepts the following-described section of The Dalles-California Highway which has been abandoned by the state since reconstruction of this section on other alignment, and agrees to maintain such section hereafter as a county road:

Beginning on "A" Street in the city of Redmond where said street intersects the easterly line of Sixth Street, thence east on "A" Street for one-fourth mile; thence north for three miles; thence in a northwesterly direction for 0.4 mile to a point on the easterly right of way line of the present The Dalles-California Highway, opposite Engineer's Center Line Station 175+90, which point is further located as being 1035 feet east and 1390 feet north of the south one-quarter corner of Section 28, Township 14 South, Range 13 East, W. M., Deschutes County, Oregon.

The Secretary also presented a resolution from the Jackson County Court in which Jackson County accepts as a part of the Jackson County Road System a section of the Tiller-Trail Secondary Highway which was abandoned by the Commission on March 9, 1938, as a part of the State Highway System inasmuch as the section has been reconstructed on new alignment. The Commission approved the resolutions and ordered them filed in the department records.

The Secretary requested instructions relative to the disposal of numerous checks in small amounts that have been deposited by various contractors for plans and specifications. He explained that some of the checks are of long standing, one being dated January 24, 1918, and that repeated attempts to locate the depositors have been unsuccessful. After discussion, the Commission ordered that the checks be again mailed to the persons who deposited them and, if such persons cannot be located, that the checks be sent to the bank on which they are written for payment and the proceeds therefrom, if any, deposited in the state highway fund.

The Engineer reported a request from the Arrow Transportation Company for permission to transport a 700 pound overload, consisting of special equipment for sanding pavements, on its gasoline tank trucks operating on state highways during periods when the surface of the highways is frosty and covered with ice. He explained that the company has devised certain equipment for sanding pavements, to be attached to the front end of its trucks for use during such periods, which equipment weighs 700 pounds, and the company wants authority to use this equipment on its trucks without reducing its payload, alleging that if they have to reduce the payload it will render their operations unprofitable. He further explained that the use of this sanding equipment will minimize a serious hazard in the operation of the company's trucks and will also afford much benefit and safety to other vehicles using the same highway at or near the same time. He gave as his thought that the benefits that would accrue to the motoring public from the safety standpoint would justify the granting of the request for the overload and accordingly recommended favorable consideration of the request, as did also the Attorney. The Commission concurred in the viewpoint of the Engineer and the Attorney and thereupon approved the request. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

JAN 25 1940

WHEREAS, the Arrow Transportation Company is engaged in the transportation of gasoline over the public highways of the State of Oregon; and

WHEREAS, said Company has devised some detachable equipment known as sanders, which equipment during seasons of the year when the surface of the highways in places is frosty and ice covered is used to sand the surface of the highways and thereby remove a hazard connected with the movement of the company's transportation equipment; and

WHEREAS, it appears that the sanding of the highway for the benefit of the Company's own operations likewise affords benefit and safety to other motor vehicles using the same highway at or about the same time; and

WHEREAS, when said sanding equipment is attached to a motor vehicle used for the transportation of gasoline the combined weight of vehicle and load is increased to the extent of 700 pounds; and

WHEREAS, if said Company is required to reduce the weight of pay load by 700 pounds in order to be permitted to use said safety device, such reduction in pay load will so reduce the revenue as to make the operation unprofitable; and

WHEREAS, the use of said sanding equipment can be confined to movements taking place between December 15th and March 15th of each year; and

WHEREAS, it is the judgment and opinion of this Commission that the use by the said Company of said sanding equipment will contribute not alone to the safety of the traveling public with respect to the movement of the Company's motor transportation vehicles, but likewise with respect to the movement of other motor vehicles on the highway, and, therefore, it is the judgment of the Commission after due investigation that the interests of general public will be served and safety upon the said highway promoted by the use of said sanding equipment on the motor vehicles of said Company;

THEREFORE, permission hereby is granted to the Arrow Transportation Company to move, over and along any state highway in Oregon, its motor equipment for the transportation of gasoline produce while such equipment has installed thereon the said sanding equipment, the installation and use of which equipment it is understood will increase the combined weight of load and vehicle by not to exceed 700 pounds in excess of the statutory limit of 54,000 pounds.

This permit is temporary and shall be in effect from date hereof until March 15, 1940, but it is expressly understood that this permit may be terminated by the Highway Commission whenever in the

JAN 25 1940

opinion of the Commission public interests require such termination.

Nothing in this permit shall relieve the permittee from its obligation to conform to and comply with all of the laws of the road and the movement of traffic thereover, except as herein specially permitted.

The Commission considered and ordered filed a letter from Mr. Ernest Rosen, Portland, complaining of the condition of the Oregon Coast Highway and the Pacific Highway.

The Commission also considered and ordered filed a letter from Mrs. Homer Gullion, Eugene, protesting the proposed rerouting of the Pacific Highway through Eugene.

The Secretary presented a letter from the Dayton Chamber of Commerce renewing its invitation to the Commission and staff to attend a banquet at Dayton to celebrate the completion of the Dundee Section of the Pacific Highway West, when such project is completed. The Secretary was instructed to thank the Chamber of Commerce for its kind invitation which the Commission will be pleased to accept, if possible.

The Commission discussed a letter from the Western Lane County Chamber of Commerce in which permission was requested to erect on the state highway right of way in the town of Florence a monument honoring the late George Melvin Miller who was an early pioneer of this section and who was greatly interested in the promotion of a transcontinental highway between New York and Florence. The Secretary was instructed to inform the Chamber of Commerce of the recently-adopted plan of the Commission with respect to the erection of historic markers along the state highways of this state, which plan includes the appointment of special committees to designate the sites and the wording for the markers, and to further explain that the Commission is reluctant to authorize the erection of a marker in Florence, or at any other location, until the committee has passed on the matter, and that the Commission will be pleased to refer their request to the proper committee when the members thereof have been selected.

The Attorney brought up for discussion a right of way matter in Wallowa County. It appears that Mr. Twain Bodmer owns certain property adjacent to the Enterprise-Lewiston Highway about four miles south of the Washington state line and that he desires to construct a fence along the highway in front of his holdings and wants to place this fence 30 feet from the center line of the traveled roadway, which would limit the right of way to a width of 60 feet, whereas, the right of way on the adjoining sections is standard 80' width. It also appears that, according to Mr. Bodmer, right of way for this highway across his holdings has never been acquired, either by the county or by the state, but he is willing to deed a strip 60' wide to the state without cost if he is permitted to construct his fences in the location stated.

JAN 25 1940

The Attorney advised that Mr. Bodmer's statement as to the ownership of the right of way is correct according to investigation of the county records. The Engineer suggested, on account of the desirability of having an 80 foot width right of way throughout this entire section and in view of Mr. Bodmer's offer to deed a 60 foot strip without cost, that it would be advisable to negotiate with him for such 80 foot right of way on the basis of the state paying one-half of the cost of the fence construction. The Commission approved the suggestion by unanimous vote and so ordered. The matter was referred to the Attorney to handle.

The Engineer brought up for discussion the matter of improving the Nehalem-Manzanita county road in the vicinity of the Manzanita School, as has been requested by the Tillamook County Court and the School District. He advised that the present road is narrow and crooked and contains a small bridge that is in a bad state of repair; also, that in his estimation there is no question but that the road is in need of improvement in the interests of traffic safety, particularly in view of the fact that it is now being used as a detour for state highway traffic pending construction of the permanent road between Neahkahnie Mountain and Fisher's Point, near Nehalem. He estimated the cost of a new temporary bridge or a permanent culvert at \$2,700 and the cost to widen the present roadway in the vicinity of the Manzanita School, so as to make it safe for school children, at \$9,500. He presented an offer from the Tillamook County Court to furnish county equipment for the work, consisting of four dump trucks and one power shovel, provided the state will take charge of the work, will furnish the men, gasoline, oil, grease, et cetera, to operate the equipment. He questioned the advisability of using state funds to purchase supplies for county-owned equipment and suggested the following alternative proposition: that the county furnish the equipment and pay for all repairs to the same, and pay the cost of public liability and property damage insurance, gasoline, oil, and other equipment charges, including the wages of truck drivers and shovel runner; the state to furnish all culvert pipe, replace the existing bridge, pay labor charges in connection with clearing operations, the dismantling of the existing bridge, and the construction of the roadway, surface and oil the road when the grade is completed, and reimburse the county for advancing the wages of the men who operate the county equipment. The Commission by unanimous vote approved the plan suggested by the Engineer and instructed him to ascertain the attitude of the county court relative thereto.

The Commission approved and signed a joint letter with W. H. Lynch, District Engineer, Public Roads Administration, and James Frankland, Acting Regional Forester, representing the United States Forest Service, directed to the Chief of the Forest Service and to the Commissioner of Public Roads, Washington, D. C., recommending for the fiscal year 1941 forest highway program the projects that were selected from such program at the conference held in the Benson Hotel on January 12, 1940. (See minutes of meeting of January 12, 1940, for list of projects.)

The Attorney brought up for discussion matters pertaining to the failure of Saxton, Looney & Risley to sign certain contracts that were awarded to them by the Commission at its meeting on December 7 and 8, 1939, particu-

JAN 25 1940

larly Contract No. 2251 for the surfacing and oiling of the Jordan Creek-McNamara Camp Section of the Wilson River Highway, in Tillamook County, and Contract No. 2256 for the surfacing and oiling of the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County. He said that the contractor and the bonding company, which furnished the bid bonds in connection with these jobs, are endeavoring to work out a satisfactory solution of this difficulty within the time limit heretofore designated by the Commission, and it now appears that their efforts will be successful as far as they pertain to the Wilson River Highway job but it may be necessary for them to let the Warm Springs Highway job go by default. The paramount question now involved, he said, is whether or not the Commission will approve the assignment of the contract.

This matter was discussed at considerable length and the following decision reached: The Commission will not approve of the assignment of either contract in its entirety to any other contractor but the Commission will approve of the signing of either contract and bond, as a joint venture, by such other contractor along with Saxton, Looney & Risley and will also approve of the forwarding of warrants in payment of progress estimates to such other contractor direct. In the event that settlement of this difficulty cannot be reached with respect to either contract on such basis, then the Commission will declare the contract forfeited, in which event the project will be re-advertised for bids and the Commission will demand payment of the amount of the bidder's bond.

The Commission discussed a letter from W. B. Empey, Clerk of Union High School District No. 13, Junction City, Oregon, in which the Commission was advised that Mr. Glen Ditto, an employee of the State Highway Department, is a member of their Board of Directors and that he has tendered his resignation as a member of such Board due to the policy of the State Highway Department. Further, that the School Board would appreciate action on the part of the State Highway Commission which would permit Mr. Ditto to continue serving on this Board for the balance of the school year, or until July 1, 1940. The Engineer advised that the present policy of the Commission, which was adopted in February of 1934, provides that employees shall not hold honorary offices in political subdivisions of the state. The Commission decided not to deviate from this policy and, accordingly, denied the request.

The Engineer brought up for discussion the question of whether or not the state should pay direct certain claims arising out of construction of the Wolf Creek Highway W.P.A. project. He explained that, in connection with this work, the W.P.A. rented a Jumbo road ripper from the Contractor's Equipment Corporation, Portland, and inadvertently failed to renew the contract in October when the original agreement terminated; also, that the W.P.A. has not paid the rental on this equipment for the months of October, November and December, and is not in a position to make the payments now; however, will reimburse the state for the full amount thereof (\$345) if the state will advance the payment. He suggested approval of the settlement of this account on such basis and that such procedure be followed in the settlement of similar accounts in the future, except in the case of powder purchases which should be paid through the W.P.A. in order to benefit by the W.P.A.'s special price quotation

JAN 25 1940

for such commodity. The Commission approved the suggestion unanimously insofar as it pertains to the claim of the Contractor's Equipment Corporation but deferred until its meeting on February 15 its decision with respect to the establishment of such procedure as its general policy.

A letter was presented from the Ernest Thomas Cast Stone Company, Portland, requesting the privilege of collecting black obsidian from the state park at Bend for use in connection with building construction, particularly for the facing of cast stone. The Commission denied the request in view of its established policy that will not permit the giving away of state property for private undertakings.

The Commission had under discussion the matter of the payment of the final estimate to Andersen Construction Company for grading the Miller Flat-Agency Section of the Warm Springs Highway, in Jefferson County. The Attorney advised that the Federal Court in Portland has ordered payment of this final estimate to the United States Fidelity & Guaranty Company, surety on the bond furnished by the Andersen Construction Company in connection with this project, and he exhibited a copy of the judgment entered in such Court in support thereof. In view of the circumstances, the Commission authorized the payment of such final estimate and thereupon signed the voucher in regard thereto.

The Commission also discussed a letter from W. D. Morgan, Ashland, Oregon, inquiring whether or not the state would sell to him the service station building located on the property that the state acquired from W. B. Norris for right of way for the revision of the Pacific Highway at the Siskiyou Summit. The Engineer recommended the retention of this building by the state in view of the possibility that it could be used later on as a residence by one of the maintenance employees working in that vicinity, after the highway construction work now under way is completed. The Commission approved the Engineer's recommendation.

The Attorney reported on the claim of Section Foreman S. C. Millard, Dufur, against the State Industrial Accident Commission; and requested instructions relative thereto. He advised that Mr. Millard severely injured his thumb while engaged in the performance of his regular duties, necessitating his absence from work for several days, and, in accordance with prescribed procedure, filed his report with the Accident Commission with the thought in mind that he would receive compensation under the provisions of the Workmen's Compensation Act, but the Accident Commission disclaims any liability in the case and refuses to recompense him for lost time. He gave as his thought that Mr. Millard is entitled to compensation inasmuch as he was engaged in his regular duties at the time of the accident and for the further reason that he subscribes to the Industrial Accident Fund. He was instructed by the Commission to intercede with the Accident Commission in Mr. Millard's behalf.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various

sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - 4-2832 - Necanicum Junction Section, Wolf Creek Highway,
Clatsop County. 1st authorization - \$100.00

Gravel Pits - 107-2810 - Jefferson County Line-Prineville Section, Warm Springs
Highway, Crook Co. 1st authorization - \$750.00

Plans - - - 111-2809 - Lone Rock Junction-Rock Creek Section, Wasco-Hepner
Highway, Gilliam Co. 2nd authorization - \$450.00
Total to date \$1,650.00

Plans - - - 112-2819 - Kimberly-Dry Creek Section, Monument Highway, Grant
County. 3rd authorization - \$325.00
Total to date \$2,600.00

Plans - - - 13-2807 - Cinder Butte-Wagontire Section, Lakeview-Burns High-
way, Harney County. 2nd authorization - \$1,000.00
Total to date \$2,500.00

Location - - 18-2841 - Barkley Springs-Terminal City Section, The Dalles-
California Highway, Klamath County.
1st authorization - \$3,600.00

Gravel Pits - 18-2842 - Lost River Section, Klamath Falls-Malin Highway,
Klamath County. 1st authorization - \$200.00

Right of Way - 19-2819 - Forest Boundary-Cottonwood Creek Section, Klamath
Falls-Lakeview Hwy. 3rd authorization - \$200.00
Total to date \$1,100.00

Drainage - - 19-2821 - Paisley Section, Fremont Highway, Lake County.
1st authorization - \$150.00

Right of Way - 19-2822 - Drews Valley Section, Klamath Falls-Lakeview Highway,
Lake County. 1st authorization \$200.00

Reconn. - - -23-2816 - Baker County Line-Ontario Section, Old Oregon Trail,
Malheur County. 4th authorization - \$200.00
Total to date \$2,800.00

Plans - - - 24-2828 - 12th Street Junction Section, Pacific Highway East,
Marion County. 1st authorization - \$700.00

Location - - 229-2901 - Mohler-Glenwood Section, County Road (new) Tillamook
County. 2nd authorization - \$1,300.00
Total to date \$2,600.00

Plans - - - 36-2825 - Sheridan Section, Salmon River Highway, Yamhill County.
1st authorization - \$400.00

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

M. L. O'Neil & Son, Contract No. 2157, for grading the Tudor Ranch-Blue Mountain Pass Section of the I.O.N. Secondary Highway, in Malheur County, requested an extension of time of 40 days, from November 30, 1939, to January 10, 1940, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to the fact that they encountered considerably more solid rock in their excavation work than was originally contemplated. The Engineer advised that the reason given by the contractor for overrun of time limit is correct, the fact of the matter being that the quantity of solid rock excavated exceeded the estimated quantity by 5.5 per cent which in his estimation would entitle the contractor to 17 days' extension of time without penalty. He further advised that the overrun of time limit has not inconvenienced the traveling public and has not caused the state any extra expense for engineering supervision. He recommended that the extension of time requested be granted but that the contractor be charged for any engineering expense that the state may incur in connection with the job after December 17, 1939, which would allow for 17 days' extension without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Denton & Young, Contract No. 2233, for construction of a bridge over Lang Canyon on the Columbia River Highway, in Gilliam County, requested an extension of time of 90 days, from December 31, 1939, to March 31, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the delay in the award of this contract, which extended their work into the winter season. The Engineer advised that bids for this project were taken by the Commission on September 1, 1939, but due to delay in securing an easement from the Union Pacific Railway Company the contract was not awarded until October 28, 1939, a delay of 58 days. He further stated that because of this delay the contractor was unable to complete the project before the winter period set in and as a result operations were handicapped by bad weather conditions. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2154, 2157 and 2213 for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway

JAN 25 1940

projects have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance:

Contract No. 2154, with Mountain States Construction Company, for construction of a bridge over Nehalem River on the Wolf Creek Highway, in Clatsop County. Completed January 20, 1940.

Contract No. 2157, with M. L. O'Neil & Son, for grading the Tudor Ranch-Blue Mountain Pass Section of the I.O.M. Highway, in Malheur County. Completed January 10, 1940.

Contract No. 2213, with Minneapolis-Moline Power Implement Company, for furnishing structural steel for the Glenwood Undercrossing on the Wilson River Highway, in Washington County. Completed October 31, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with P. L. Crooks and Company, Inc., disposing of their claim for extra compensation arising out of contract No. 1857 for the construction of the Franklin Avenue Undercrossing, in Bend.

Agreement with Sherman County providing for county maintenance of the Moro-Hay Canyon County Road after construction of the same by the state as a federal aid secondary highway project.

Agreement with Berkley A. Davis and wife providing for the elimination of a cattle pass at mile post 08.80 on the Weston-Elgin Secondary State Highway No. 330. in Umatilla County. Consideration \$50.00.

Agreement with Mrs. Ella Cook being a revocable permit granting to the state permission to install and maintain one wooden pole on Mrs. Cook's property adjacent to the Tualatin Highway near Sylvan, Multnomah County, as a support for a traffic signal suspension cable at this place.

Agreement with Leo F. Smith providing for the purchase of a timber tract belonging to him adjacent to the Oregon Coast Highway at Arch Cape Tunnel, Clatsop County. Right of way transaction No. 7747.

JAN 25 1940

Agreement with Wasco County Court, being an assignment of \$3,250 of county funds from the county's share of the next apportionment of the motor vehicle funds, license fees, and gasoline tax, to pay for crushed rock to be furnished by the state's contractor in connection with the improvement of the Seufert-Dufur Section of The Dalles-California Highway, in Wasco County.

Agreement with the United States of America providing for the advancement of not to exceed \$3,500 of state funds to pay non labor items in connection with the Wolf Creek N.P.A. Project during February 1940.

Quitclaim deed conveying unto Shevlin-Hixon Company 2.12 acres of land situate adjacent to the Century Drive Secondary Highway in Section 25, T. 18 S., R. 10 E., W.M., Deschutes County. Right of way transaction No. 7411.

There being no further business to come before the Commission at this time the meeting was adjourned at 3:00 o'clock p. m.

H. B. Aldrich
State Highway Engineer

E. B. Aldrich
Commissioner

H. W. Clough
Secretary

Chas. H. Clough
Commissioner

Portland, Oregon, February 15, 1940

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. W. DeSouza, Assistant Attorney
H. B. Glaisyer, Secretary

Chairman Henry F. Cabell was attending congressional hearings in Washington, D. C.

Bids as follows for highway construction projects and for the sale of buildings were opened and read in conformance with previously published notice, following which Commissioner Aldrich announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room:

\$ 51.00

The Assistant Attorney reported a hazardous condition existing along the Bunker Hill Section of the Oregon Coast Highway south of Marshfield. It appears that a serious slide condition has developed as a result of highway construction at this location and that three homes are in danger of destruction; in fact, it is imperative that the properties be acquired and the residences removed from the premises immediately, otherwise the state would be liable for serious damage. The Assistant Attorney advised that he has secured options from three owners, as follows:

Ida D'Ambrozia, for six lots at \$7,000.00

Monrad Underland, for two lots at \$850.00

Garland Lillie, for two lots at \$1,800.00

The Commission discussed this matter at considerable length and, in view of the existing emergency, approved the purchase of these properties at the stated amounts and authorized the moving of the household goods of the occupants of the premises at state expense.

A delegation from Benton and Lincoln Counties, consisting of the following, came before the Commission in the interest of the Alsea-Deadwood Secondary State Highway: County Commissioner W. H. Malone, of Benton County; County Commissioner E. G. Calkins, of Lincoln County; Victor P. Moses and Guy Thomas, of Corvallis; and Messrs. John W. Orr, George Hendricks, Norman Sapp and J. C. Barclay, of Alsea. Mr. Malone headed the group.

They asked the Commission to construct a $1\frac{1}{2}$ -mile section of this highway north of Bummer Creek, which section, they stated, has already been cleared but has not yet been graded to state standards, and they would like to have that done and the entire highway rocked and oiled. They also asked the Commission to conduct a survey with the idea in mind of extending this highway a distance of about 15 miles to a connection with the Alsea Highway at Five Rivers, in Lincoln County. The Engineer advised that no money has been budgeted by the Commission for this road. He suggested that it might be advisable for the Commission to authorize an investigation of the same so that the information will be available for future use. Commissioner Aldrich advised that the Commission is not in a position today to make any definite commitment in regard to this project but will be pleased to consider it in the formulation of future programs; and whether or not the Commission can improve the $1\frac{1}{2}$ -mile section in the near future depends entirely upon the question of

FEB 15 1946

funds. After further discussion the Commission authorized the Engineer to make a survey of the proposed extension from the end of the present secondary highway to Five Rivers.

Mr. Malone then brought up for discussion matters pertaining to the North River Road out of Albany, for which the Commission has budgeted \$20,000 of federal aid secondary highway funds, for construction in 1940. He said that the right of way for this road is supposed to be 60 feet wide, although the county records do not disclose it and the County Court is having considerable difficulty in settling with some of the property owners for the land required for a 60-foot right of way; in fact, they are demanding \$6,000.00, which the county cannot pay. If the state will not construct the road on right of way less than 60 feet wide, he said, then it very likely will be necessary to transfer the funds to some other project.

The matter was discussed at considerable length, during which the suggestion was offered that the County Court secure deeds from the property owners with the understanding that the owners could use the property for 10 years or so, which arrangement would meet the requirements of the federal authorities. Mr. Malone stated that he would negotiate further with the property owners on such basis. If the County Court's efforts are not successful, then the Commission will give consideration to the transfer of the funds to finance the improvement of the Alsea-Deadwood Secondary State Highway.

Mr. Malone then asked the Commission to redesignate as a secondary state highway the 5-mile section of the Alsea-Deadwood Road that was deleted from the secondary state highway system when the Tampico-Louisville Road was placed on that system. The Commission agreed to keep the project in mind when adding new roads to the state's secondary highway system.

The County Court of Grant County, represented by County Judge J. H. Allen and County Commissioner Boyd L. Erikson, was present in the interests of the Three Flags Highway (Pendleton-John Day and John Day-Burns Highways) through Grant County. Also present with the court were Ernest Curtis, Road Superintendent of Grant County; E. H. Brent; and County Judge Nelson B. Higgs, of Harney County. They inquired as to the plans of the Commission for the further improvement of this road and were given detailed information in regard thereto by the Engineer, who recited projects that are now programmed for construction in Grant County, which projects are estimated to cost in excess of \$300,000.00. Judge Allen particularly referred to the condition of the Pendleton-John Day Highway in the vicinity of a place known as Fox. He said that the road was graded last year but there is no surfacing on it and it is now practically impassable. The Engineer was instructed to make an inspection of the section in company with H. D. Farmer, Senior Highway Engineer of the Public Roads Administration, to ascertain what is necessary to fix it up, the idea being that the work would be done with state forces in the event that it is not too costly, otherwise by contract.

A delegation from the Celilo Indian Reservation, consisting of Chief Tommy Thompson; Henry Thompson, his son; McKinley Westley; and John Whiz, interpreter, were present and discussed with the Commission matters pertaining to

FEB 15 1940

widening of the Columbia River Highway past the Celilo Indian Village east of The Dalles, and also in regard to the cleaning up of the Indian village. The State Highway Engineer advised that the present right of way is only 60 feet wide at this point, and it would be necessary, in order to provide a uniform-width highway, to acquire a 20-foot strip through the Indian village, it being impossible to widen the highway on the opposite side because of the proximity of the O.W.R. & N. Company's property, upon which the highway already encroaches. The widening of this section, he said, has been deferred for some time because of the right of way difficulty, but it now appears necessary to construct the improvement. He pointed out that the Indian buildings have been built very close to the present highway right of way and will have to be moved to accommodate the highway improvement, and gave as his thought that now would be a good time to secure a general cleanup of the village, which, under present conditions, is very unsightly, so as to make it a tourist attraction rather than an eyesore. He exhibited tentative plans for the reconstruction of the village, showing houses attractively arranged, and interspersed with wigwams. He asked Chief Thompson whether or not the Indians would object to giving up a portion of their property for right of way. Chief Thompson replied, through the interpreter, that the Indians do not wish to move away from this location and that the giving up of so much property for the highway improvement would deprive them of considerable area that they need for their village, considering that they have only 7.4 acres now for all of the Indian families; also, that he did not want to give the Commission an answer until he has had an opportunity to discuss it privately with the other Indians of his tribe. The Engineer gave as his thought that the final decision in this matter would be up to the Indian agent in charge of this reservation, Mr. M. A. Johnson, Superintendent of the Yakima Indian Agency, Toppenish, Washington. He requested authority from the Commission to communicate with Mr. Johnson in regard thereto. The Commission granted the request. He was instructed to send a copy of his letter to Chief Thompson for his information in discussing the situation with the members of his tribe.

Chief Thompson also inquired what could be done to provide greater safety for his people in crossing the highway and the railroad tracks between the village and the Celilo store. The Engineer suggested that a pedestrian underpass constructed of 84-inch diameter metal pipe would serve the purpose. This appeared to be satisfactory to Chief Thompson and accordingly the Engineer was instructed by the Commission to mention such a project in his letter to Superintendent Johnson. The conference was concluded with the understanding that Chief Thompson would discuss this matter with the members of his tribe at once and that another conference for further discussion of the entire matter would be called as soon as the Engineer receives a reply from Superintendent Johnson. The Commission also authorized the Engineer to send a letter to Senator McNary asking him to intercede with the Commissioner of Indian Affairs in Washington, D. C., for the cleaning up of the Celilo Reservation.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:30 o'clock p. m. in the same room with the same persons present and participating.

The Assistant Attorney brought up for discussion the bid received

FEB 15 1940

at the morning session for the purchase of the building on the right of way of the Corvallis-Eastside Secondary Highway, at Corvallis. He said that the only bid received for this building was that of Paul Nordyke, in the amount of \$425.50, as compared to the Highway Department's appraisal amounting to \$750.00. He also said that he could not recommend sale of the property for the amount of the bid price but suggested a minimum of \$550.00 as a compromise. After discussion, the Commission ordered that Mr. Nordyke be given an opportunity to purchase the property for not less than \$550.00, and if he does not want it at such figure, that the building be wrecked by the state contractor for the road work and the land retained for future disposition.

Reconsideration was given by the Commission to the request of B. Malting Company, Inc., Hillsboro, for a blanket permit to move peaving equipment 13 ft. 8 in. high overall, over certain state highways. The Engineer recommended denial of the request for a blanket permit but that the company be granted a separate permit for each movement, that for the first movement to be in writing and containing detailed conditions, terms, and regulations; subsequent permits to be issued by wire subject to the provisions of the written permit. The Commission approved the recommendation unanimously.

The Engineer reported the attitude of the Gilliam County Court with respect to the improvement of the Wasco-Heppner Secondary State Highway, particularly the improvement of this highway for a distance of about 5 miles east and west from Condon, as has been requested by the residents of that locality. He said that the County Court has expressed a preference for the improvement of the Rock Creek-Morrow County Line Section of this highway as originally proposed, rather than the sections adjacent to Condon, so as to expedite the grading of the entire section between Condon and Heppner, deferring until the grading work is done the surfacing and oiling of the sections adjacent to Condon. In view of this report, the Commission decided unanimously not to reallocate funds heretofore budgeted for the improvement of this road.

The Engineer also reported the cost to improve the Klamath Lake Secondary State Highway No. 421 within the corporate limits of Klamath Falls, particularly between the section already paved by the city and the end of the state's oiled section. He estimated that such project, using a 22-foot oiled section, would cost about \$12,000. He advised that this is a meritorious project but did not believe that there would be sufficient funds available to finance it this year. The Commission decided that it was too costly a project to undertake now, and so ordered.

The Commission had under discussion telegrams from Pendleton, Free-water, Weston Chamber of Commerce, Blue Mountain Ski Club of Tollgate, Oregon, the Oregon Trail Ski Club, Pendleton, and others, urging snow removal operations on the Weston-Elgin Secondary State Highway for the benefit of winter sports enthusiasts who desire to attend the Inter-Mountain Ski Tournament which is scheduled to be held at Tollgate on February 25. The Commission considered that the road carries insufficient traffic to justify the expense involved and, in fairness to other communities whose requests for similar work have been denied, could not authorize the work. The Engineer was instructed to so reply to the communications.

FEB 15 1940

A delegation from Corvallis, representing the Corvallis Planning Commission, came before the Commission in regard to the rerouting of the Pacific Highway West and the Albany-Corvallis Highway through Corvallis. The delegation was headed by Mr. Bob Glenn and included the following: W. M. Ball; C. L. Willey, City Engineer; Mayor H. W. Hand; and Ed Edmonds. They proposed a revision of the Pacific Highway West, starting at a point about one-quarter mile north of the city limits and extending southeasterly to a point near the intersection of First Street with Polk Street, thence southerly along First Street to Washington Street, thence southwesterly to a connection with the present highway at Third and "A" Streets. They pointed out that such routing would intersect the Albany-Corvallis Highway about one block north of Polk Street and the proposed route would serve both highways through the city so far as through traffic is concerned, and it would have the advantage of taking through traffic away from the congested district. They also pointed out that the proposed route, which extends along the Willamette River waterfront, would eliminate cross-traffic and would be an advantage from that standpoint. They asked an early decision in the matter because of a request now pending before the City Planning Commission for a change in the zone classification of some of the property involved, it now being classified as residential property, whereas the request is for classification as industrial property. Mr. Glenn filed a brief in support of oral arguments presented. After considerable discussion the Commission instructed the Engineer to make a study of the proposed change within the next few weeks and report his findings, including an estimate of the cost to construct the change.

Mr. O. E. Powell, Hubbard, came before the Commission in regard to the entrance driveway into his service station adjacent to the Pacific Highway north of Hubbard. The Engineer explained that highway department maintenance forces constructed a standard driveway into Mr. Powell's service station in accordance with plans heretofore adopted by the Commission, which provided two openings, one for entrance to the station and the other for exit, and in connection therewith built a traffic island on the state highway right of way, separating the two; further, that Mr. Powell caused the removal of this island and another island that was subsequently constructed to replace the first one, notwithstanding that he had been advised of the State Highway Commission's requirements. Mr. Powell alleged that the traffic island is a traffic hazard and is bound to be the cause of accidents. Furthermore, that it interferes greatly with the proper conduct of his business and that he will have to discontinue his business if the Commission insists upon maintaining the island. He demanded free access from the highway at any point in front of his property. The Engineer reiterated that the driveway was constructed in conformance with plans adopted by the Commission and pointed out that if Mr. Powell's demands are granted the Commission would have to change its policy. The matter was discussed at considerable length but action thereon was deferred pending the return of Chairman Cabell and an inspection of the premises by him.

At 3:00 o'clock p. m. the State Highway Engineer announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

FEB 15 1940

"Miles Bridge-Baker and Baker-Salisbury Sections of the Medical Springs Secondary Highway and Baker-Unity Highway, in Baker County. 4.8 miles surfacing and 22.91 miles oiling; also furnish 2,200 cu. yds. crushed material in stock pile. R. O. Dail & Warren Bros., Inc., Portland, submitted the low bid on this project at \$33,592.65. Newport Construction Company, Portland, submitted the next-low bid in the amount of \$35,628.15. There were 6 higher bidders. The Commission awards this contract to R. O. Dail & Warren Bros., Inc., at their low bid of \$33,592.65.

"Repair existing steel bridge over the Willamette River at Corvallis, in Benton and Linn Counties, and reconstruct trestle approach thereto; also construct 0.06 mile highway roadbed. The low bid received for this project was that of Averill & Corbin, Portland, at \$20,073.00. The next-low bid was that of Harry I. Hamilton, Eugene, at \$20,883.00. There were 4 higher bidders. The Commission awards this contract to the low bidders, Averill & Corbin, at their bid of \$20,073.00.

"C.O.I.D. Canal Bridge 9 miles east of Redmond on the Ochoco Highway, in Crook County. The low bid received for this project was that of Birkemeier & Sarenal, Portland, at \$2,204.00. The next-low bid was that of Hart Building Company, Redmond, in the amount of \$2,362.50. There were 8 higher bidders. This contract is awarded to Birkemeier & Sarenal at their low bid of \$2,204.00.

"Mussel Creek-Myers Creek Section of the Oregon Coast Highway, in Curry County. Furnish 13,800 cu. yds. crushed gravel in stock piles. The low bid received for this project was that of A. S. Wallace, Roseburg, in the amount of \$22,140.00. The next-low bid was that of the River Bend Sand & Gravel Company, Salem, at \$25,620.00. There was one higher bidder. The Commission awards this contract to A. S. Wallace, the low bidder, at his bid of \$22,140.00.

"John Day-Prairie City Section of the John Day Highway, in Grant County. 0.84 mile grading, 9.0 miles surfacing, and 13.10 miles oiling; also furnish crushed gravel in stock piles. The Triangle Construction Company of Boise, Idaho, submitted the low bid for this project, in the amount of \$70,516.50. Babler Bros., Portland, submitted the next-low bid in the amount of \$71,434.00. There were 10 higher bidders. This contract is awarded to the low bidder, Triangle Construction Company, at its bid of \$70,516.50.

"Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County. 5.1 miles surfacing and oiling; also furnish crushed rock in stock piles. The low bid submitted for this work was that of R. O. Dail & Warren Bros., Inc., Portland, in the amount of \$36,196.00. The next low bid was that of Babler Bros., Portland, in the amount of \$36,358.00. There were 8 higher bidders. This contract is awarded to R. O. Dail & Warren Bros., Inc., the low bidders, at their bid of \$36,196.00.

FEB 15 1940

"Silver Lake-Chalk Cliff Section of the Fremont Highway, in Lake County. 0.43 mile grading and surfacing and 40.26 miles oiling. Warren Northwest, Inc., Portland, submitted the low bid for this project at \$25,614.10. Babler Bros., Portland, submitted the second-low bid in the amount of \$26,563.00. There were 7 higher bidders. The Commission awards this contract to the low bidder, Warren Northwest, Inc., at its bid of \$25,614.10.

"Fir Creek-Laurel Road Section of the Hillsboro-Silverton Secondary Highway, in Washington County. 2.25 miles grading, surfacing, and oiling; also construct 63 lin. ft. pile trestle bridge. The low bid received on this project was that of M. L. O'Neil & Son, Eugene, in the amount of \$33,654.50, based on the use of tar. The next-low bid submitted was that of Contracting & Sales Company, Portland, in the amount of \$35,454.00, also based on the use of tar. Neither of these bidders submitted a bid based on the use of asphalt. There were 4 higher bidders. The Commission awards this contract to the low bidders, M. L. O'Neil & Son, at their bid of \$33,654.50, using tar."

Sale of Buildings:

"Sale of 4-room house and garage, formerly owned by Lorine E. Olson, at the east end of the Willamette River Bridge, at Corvallis, in Benton County. The low and only bid received for this building is that of Paul Nurdyke, of Corvallis, at \$425.50, for building and tract. This bid is referred to the Engineer to sell the building for not less than \$550.00; otherwise the bid is rejected.

"Sale of 8-room house, formerly owned by Henry Newman, on the west side of the Columbia River Highway in Scappoose, Oregon. The only bid received for the purchase of this building is that of the Scappoose Irrigation and Produce Company, at \$51.00. The Commission sells this building at this price to the Scappoose Irrigation and Produce Company."

Messrs. Ralph P. Laird and John Parrott, Creswell, Oregon, came before the Commission relative to the improvement of the Springfield-Creswell Secondary State Highway, particularly the section between the town of Jasper and the McKenzie Highway. They filed with the Commission a petition signed by numerous users of this road, in which the Commission was urged to gravel and oil the road during the summer of 1940. The Engineer estimated that it would cost about \$25,000 to stabilize and oil this road throughout its entire length, and that to improve the section between Jasper and the McKenzie Highway, which in his estimation is the most important section, would cost about \$10,000. He gave as his thought that the project is economically sound and there is no question of its merit. After considerable discussion, the Commission indicated that it would approve this project for construction this year in the event that a sufficient amount of funds accumulates by reason of savings in the maintenance operations to finance the work. The Secretary was instructed to place this project on the priority list for consideration by the Commission later in the year.

Mr. Laird signified his approval of the improvement of this section between Jasper Bridge and the McKenzie Highway, a distance of about 5 miles, in the event the Commission cannot finance the improvement of the entire road. He also asked for the construction of guard rail and installation of traffic lights at the point where a county road enters the highway at the bridge in Jasper. This matter was referred by the Commission to the Engineer with authority to take such action as may be necessary.

Mr. G. M. Fox, representing the Markel Highway Transport Service, Portland, came before the Commission in regard to the Commission's requirements with respect to the furnishing of public liability and property damage insurance in connection with the transportation over state highways of loads that exceed the statutory limit as to length. He pointed out that the Commission now requires public liability insurance in the amount of \$50,000/100,000 and property damage insurance in the amount of \$10,000. He advised that there are only two or three companies that write such insurance, and, when they do write it, they make a charge of about \$60 for the excess coverage, which, in his estimation, is valueless so far as protection to the public is concerned. He gave as his thought that the general public would be as well protected by insurance in the amounts required by statute; viz., \$5,000/10,000 public liability and \$1,000 property damage, and urged the Commission to modify its requirements in that regard. The Commission deferred its decision in this matter pending the return of Chairman Henry F. Cabell.

Mr. J. A. Irmiler, City Councilman, Cornelius, was present and conferred with the Commission in regard to the installation of flashing beacons at the intersection of the Tualatin Valley Highway with two streets in Cornelius. The Engineer explained that this matter has been given very careful study, not only by the Traffic Engineer, but by himself personally, and, in his estimation, the conditions obtaining at these intersections do not meet the requirements of the State Highway Commission for flashing beacons. He suggested, in lieu thereof, the painting of "No Parking" strips on the highway for a distance of 30 feet on each side of the intersections, which, he thought, would improve the sight distance for traffic entering the highway and would assist greatly in reducing the number of accidents. The Commission approved the Engineer's suggestion.

Mr. Walter Meacham, Secretary of the Committee appointed by the Commission to recommend sites for historical markers along the Old Oregon Trail, conferred with the Commission. He presented a report, in writing, containing suggestions for the carrying out of this assignment. The matter was discussed at some length but action thereon was deferred pending the return of Chairman Cabell.

Messrs. R. B. Pemberton, Master Mechanic, and Herbert C. Hardy, Attorney, representing the Bonneville Authority, came before the Commission and requested permission to operate over Oregon state highways certain equipment that exceeds the statutory limits as to width and length. They explained that in connection with the activities of the Bonneville Authority it will be necessary, occasionally, to make deliveries of extremely heavy transformers, and they plan to ship these transformers by rail to the nearest railroad point and

to truck them from such location to the point of use, which trucking operation will require the use of specially-built trailer equipment. They asked the Commission for a special permit to move the special equipment, without load, over state highways as occasion requires. It was explained to Messrs. Pemberton and Hardy that it is contrary to the established policy of the Commission to grant blanket privileges of this kind, but, under such policy, the Commission would be pleased to consider the granting of individual permits for each movement, provided the Bonneville Authority would meet the Commission's requirements with respect to the furnishing of insurance, et cetera. Mr. Pemberton advised that each movement of this special equipment would be in the nature of an emergency and that they would be severely criticized if they had to wait for a written permit each time one was needed. The Engineer thereupon recommended the granting of a written permit for the first movement, embodying all the rules and regulations, and the granting of subsequent permits by telegram, based on the conditions of the written permit and conditioned upon the Highway Commission being furnished proper insurance. The Commission adopted the suggestion by unanimous vote but deferred until the return of Chairman Cabell its decision with respect to the insurance. (The matter was reconsidered on the afternoon of the following day, when Chairman Cabell was present, and it was decided unanimously to require the Bonneville Authority to furnish public liability insurance in the amount of \$5,000/10,000 and property damage insurance in an amount not less than \$1,000.)

Messrs. Paul Crooks and A. H. Saxton appeared before the Commission relative to the contract that was awarded by the Commission to Saxton, Looney & Risley on December 8, 1939, for the construction of the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, which contract Saxton, Looney & Risley failed to execute. Mr. Crooks was spokesman. He advised that he has been appointed Trustee for the creditors of Saxton, Looney & Risley and is particularly interested in securing relief from the payment of the 5 per cent penalty imposed on Saxton, Looney & Risley for failure to enter into this contract. He presented a letter from the Portland Chapter of the Associated General Contractors of America in support thereof and advised that the concession requested is simply for the benefit of the creditors. Commissioners Aldrich and Clough expressed themselves as being opposed to granting the relief requested because it would establish a very bad precedent which would place the Commission in an embarrassing position in the disposition of similar cases in the future. However, they deferred a definite decision in the matter pending consultation with Chairman Henry F. Cabell. It was understood that the Commission would grant Mr. Crooks and the contractor another hearing in two or three weeks. In this connection the Assistant Attorney suggested that the contractor be notified that the Commission intends to collect the amount of the bond. The Commission concurred and thereupon instructed him to prepare such letter. (The Commission on the following day set Tuesday, February 27, as the date for a special meeting to be held in Chairman Cabell's office, Portland, and instructed the Secretary to invite Mr. Crooks and Mr. Saxton to be present at such meeting.)

Messrs. O. A. Feland and H. K. Coffey, representing the Mutual Benefit Health and Accident Association of Omaha, Nebraska, came before the Commission relative to the furnishing of group health and accident insurance covering

FEB 15 1940

salaried employees of the State Highway Department. They explained their proposition in detail and after some discussion the Commission referred the matter to the Attorney for investigation and report at the next meeting.

Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, came before the Commission and discussed briefly matters pertaining to the completion of the Warm Springs Highway between Warm Springs Agency and the Wapinitia Highway junction. He was informed as to the Commission's plans for the financing of this work.

The Commission adjourned at 6:00 o'clock p. m., to reconvene on the following morning in the same room.

Portland, Oregon, February 16, 1940

The State Highway Commission reconvened at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Chairman Henry F. Cabell arrived at 2:00 o'clock p. m.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Commissioner Aldrich announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room:

BUTLER COUNTY ROAD

BEND-BUTLER RANCH SECTION - GRADING, SURFACING AND OILING

J. C. Papin	\$31,709.90
Leonard & Slate	33,644.50
Fisher Bros.	33,927.60
Clifford A. Dunn	40,857.40
Babler Bros.	41,879.00
Homer G. Johnson	44,155.00
McNutt Bros.	46,044.50

JOHN DAY HIGHWAY

SERVICE CREEK-BRANSON CREEK SECTION - OILING

J. C. Compton	\$11,804.25
Babler Bros.	12,944.30
Norris Bros.	14,133.50
Edwin C. Gerber	15,682.00
Warren Northwest, Inc.	15,841.00
Diesel Oil Sales Company	16,137.00
McNutt Bros.	17,967.00
Newport Construction Company	20,105.00
Hoops Construction Company	21,976.25

LITTLE BUTTE SECONDARY HIGHWAY
 LICK CREEK—SALT CREEK SECTION
 SURFACING, OILING, FURNISHING CRUSHED ROCK IN STOCK PILES

Norris Bros.	\$21,032.00
Clifford A. Dunn	23,063.50
Homer G. Johnson	28,374.50

FREMONT HIGHWAY
 NORTH UNIT, ANA SPRING-HUNTER HILL SECTION
 ROADSIDE IMPROVEMENT

Guy H. Booker & Arthur T. Fox	\$ 5,381.50
River Bend Sand & Gravel Company	7,469.50
Blair T. Alderman	8,279.50
W. E. Myers & Son	8,521.00

MEDICAL SPRINGS SECONDARY HIGHWAY
 UNION-CATHERINE CREEK SECTION
 OILING; ALSO FURNISH CRUSHED GRAVEL IN STOCK PILES

J. C. Compton	\$16,097.00
R. O. Dail & Warren Bros., Inc.	16,390.30
Morrison-Knudsen Company, Inc.	18,282.00

HURRICANE CREEK COUNTY ROAD
 CASTOR RANCH-JOSEPH SECTION
 GRADING, SURFACING AND OILING; ALSO COMPOSITE TYPE BRIDGES

Norris Bros.	\$25,549.00
Colonial Construction Company	26,882.00
Homer G. Johnson	27,204.90

THE DALLES-CALIFORNIA HIGHWAY
 SEUFERT-DUFUR SECTION - CRUSHED ROCK IN STOCK PILES

Mid-Columbia Sand & Gravel Company	\$12,737.00
Homer G. Johnson	12,908.00
Schmeer & Williams Bros.	13,138.00
Fisher Bros.	13,886.00
Chester T. Lackey	14,250.00
A. S. Wallace	15,160.00

PACIFIC HIGHWAY WEST
 TIGARD GRADE SEPARATION AND FANNO CREEK BRIDGE
 REINFORCED CONCRETE VIADUCT

Jacobsen-Jensen Company	\$86,292.50
Birkemeier & Saremal	87,382.50
Scheuman & Johnson	88,150.00

(Continued on next page)

(Tigard Grade Separation and Fanno Creek Bridge continued:)

Clifford A. Dunn	\$ 38,848.00
Barhan Bros.	91,681.50
Geo. H. Buckler Company	91,923.30
Kuckenberg Construction Company	93,588.00
A. W. Stevens Construction Company	96,411.00
Edlaesen-Weygandt Company	96,687.00
McNutt Bros.	96,805.00
C. J. Eldon	98,591.00
L. H. Hoffman	99,685.00
Parker-Schran Company	101,305.00
Angeles Gravel & Supply Company	111,331.50
Ross B. Hammond Company	112,380.00

Messrs. James Frankland, Regional Engineer, and Otto Lindh, representing the United States Forest Service, came before the Commission in regard to the securing of a blanket permit to operate heavy tractor equipment over state highways in connection with the suppression of forest fires. They explained that at times during the fire season they are obliged to rent privately-owned equipment, such as trucks and tractors, to augment the government equipment, and frequently such hired equipment is not licensed to operate on the public roads of this state; further, that such equipment is rented only in cases of emergency, which would not allow time to secure a written permit. In fact, it would be disastrous to have to wait for a written permit and in view thereof they would like blanket authority to operate such equipment over state highways when necessary. After discussion, the Commission decided not to grant a blanket permit, inasmuch as that is contrary to its established policy; however, the Commission authorized the granting of a permit for one particular movement, which permit shall contain in detail the conditions and requirements under which the movement is authorized; subsequent movements to be granted by telegram subject to the conditions and requirements set forth in the original permit. Mr. Frankland advised that such arrangement would be satisfactory with the United States Forest Service.

Mr. George K. Aiken, Mayor, headed a delegation from Ontario, Oregon, which appeared before the Commission relative to the proposed revision of the Old Oregon Trail between Ontario and Huntington, to shorten the distance between these points, and concerning the plans of the State of Idaho to reroute Old Oregon Trail traffic on the east side of the Snake River through Weiser, Idaho, thus bypassing the town of Ontario. Other members of the delegation were Elmo E. Smith, Publisher of the Eastern Oregon Observer; Robert E. Lees, lawyer and city councilman; and George Merriott, owner of the Moore Hotel, Ontario.

The State Highway Engineer advised that the rerouting proposed by Idaho would increase the distance between Boise and Portland considerably over the present route through Ontario. Furthermore, it would involve the State of Oregon in considerable expense for the construction of a bridge over the Snake River. He suggested that it would be much better to retain the present routing of this highway through Ontario, and pointed out that this route, with certain

revisions, would not only be much shorter than the Weiser route but would also provide direct connections with the Central Oregon Highway and the John Day Highway, thus giving the traveling public the benefit of alternate routes. It was his thought that the State of Oregon should oppose the Idaho plan and he recommended that a letter be filed with the Public Roads Administration to that effect inasmuch as this is a federal aid highway and federal funds would be used to assist in financing the work. After considerable discussion the Commission approved the Engineer's recommendation and thereupon instructed him to prepare such letter.

Mr. James Morrell, Portland, appeared before the Commission in behalf of the Consolidated Freightways, Inc., relative to the securing of a blanket permit authorizing the movement over state highways of motor vehicles having a maximum height, unladen or with a load, in excess of 11 feet but less than 12½ feet. He particularly requested such a permit for the operation of equipment having a maximum height of 11 feet 6 inches over the Pacific Highway between Portland and the California state line; however, advised that the company also desires similar permits for its operations on other state highways. In the discussion of this matter the Engineer pointed out that there is insufficient clearance at the Springfield and Goshen underpasses on the Pacific Highway to permit movements of this height, so it would be necessary for the company to either arrange for bypassing the section between Springfield and Goshen or to cooperate with the state in providing greater clearances at these two points, which he estimated would cost about \$4,000.00. It was his thought that it would be more economical for the company to pay for increasing the clearances at Springfield and Goshen than to use any bypass route. Mr. Morell requested time in which to give the matter further study and it was agreed that he would advise the State Highway Engineer as soon as their decision has been made, and would also let the Engineer know all of the highways over which they desire permits.

Captain Harold Roche, mining engineer, Port Orford, came before the Commission in regard to the proposed relocation of the Oregon Coast Highway between Port Orford and Hubbard Creek. Captain Roche advised that he has conducted extensive investigations along the Oregon coast line, looking into the possibilities for mining, and has decided to spend a considerable sum of money in a mining venture at the mouth of Hubbard Creek, but it appears that the State Highway Commission has plans for the reconstruction of the highway at this location, which will take the only available site for his plant. He asked the Commission to revise its plans for the highway improvement so as to bypass his plant site. He also advised that he has already secured options for the purchase of this site and other property that he needs in this vicinity. He also mentioned that he has plans for the conducting of similar operations at the mouth of Euchre Creek, about 20 miles south of Port Orford. The Engineer was instructed by the Commission to investigate both locations in question with Mr. R. L. Farmer, Senior Highway Engineer of the Public Roads Administration, and ascertain whether or not it will be possible to accede to Captain Roche's request without ruining the proposed highway alignment or increasing the cost of highway construction.

County Judge Guy Boyington and County Commissioner John Slotte,

FEB 16 1940

Clatsop County, came before the Commission in regard to the Elsie-Jewell County road. They renewed their request for the designation of this road as a state secondary highway and in support thereof presented a resolution adopted by the county court to that effect. Judge Boyington advised that the right of way of the present highway between Jewell and Tideport Camp is 60 feet wide but from that point on to Elsie it is only 40 feet wide, and there are numerous building encroachments consisting of small shacks. It was his thought that the State Highway Commission is in much better position to secure the removal of the buildings but offered the services of the county to assist in securing extra right of way as may be required, particularly that needed for line changes. This matter was discussed at some length but a decision in the matter was deferred by the Commission pending personal inspection of the road by members of the Commission.

Judge Boyington then brought up for discussion matters pertaining to a stock pile site that the county deeded to the state without cost, said site being situate in the S.E. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of Section 15 and in the N.E. $\frac{1}{4}$ of the N.W. $\frac{1}{4}$ of Section 22, Township 7 N., Range 10 W., W. M., Clatsop County. He advised that the description of the property deeded to the state is in error in that it overlaps on adjacent property that the county deeded to a private individual. He asked the Commission to reconvey to the county by quitclaim deed the area included in the overlap so as to clear up the title. The Commission approved the request by unanimous vote and instructed the Attorney to prepare the necessary papers.

The Assistant Attorney reported the status of the right of way budget as follows: total budget for 1940, \$600,000.00; total obligations set up to date, \$244,684.72.

The matter of acquisition of right of way across property owned by J. R. Brewster on the west side of the Oregon Coast Highway just south of the Depoe Bay Bridge was brought up for discussion by the Assistant Attorney. He stated that Mr. Brewster owns Lot 1 of Block 1, Breakers Addition to Depoe Bay, and that he is demanding \$1,000 for one-half of this lot, which is needed for the highway improvement. He valued the entire property at \$1,750.00 to \$2,000.00, but gave as his thought that Mr. Brewster would accept a compromise offer of \$750.00, and requested authority to offer Mr. Brewster such amount for the one-half lot. The Commission approved the recommendation.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

FEB 16 1940

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Ecola Park Section - Oregon Coast Highway</u>

Reconsideration was given by the Commission to moving the Methodist Episcopal Church Building at Tigard, particularly its approval of an expenditure of \$456 in addition to the contract price, for certain items desired by the Board of Trustees. The Assistant Attorney advised that when the Commission authorized the additional expenditure it was thought that the toilet fixtures, for which the church was to make payment, would cost about \$75.00, leaving a difference of \$381.00 to be paid by the state; however, it now develops that the quotation submitted by the contractor included only \$33.00 for such items, which would leave a difference of \$423.00 to be paid by the state rather than \$381.00, an increase of \$42.00. He inquired whether or not the Commission is willing to assume this extra expense. The Commission voted unanimously to pay the extra expense with state funds.

The Assistant Attorney brought up for discussion the request of Mrs. Avvon Hughel, Grants Pass, owner of the Grants Pass Auto Park, for permission to maintain a neon sign on the state highway right of way south of Grants Pass. He advised that in connection with the Grants Pass South improvement of the Pacific Highway it was necessary to acquire some right of way from Mrs. Hughel and one of the conditions of the sale was that Mrs. Hughel would be allowed to maintain her existing sign on the highway right of way. The sign, he said, is attached to an oak tree at the highway line and projects over the right of way a distance of about 10 feet and is 10 feet above the ground surface. He also said that Mrs. Hughel wants provision made in a deed for the maintenance of this sign at such location rather than to have the matter covered by separate agreement or permit. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission adjourned at 12:15 o'clock p.m. and reconvened at 2:00 o'clock p.m. in the same room with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Messrs. William Tugman and Howard Merriam, Eugene, came before the Commission in regard to the permanent route of the Pacific Highway through Eugene. They questioned the advisability of holding a public hearing on this matter and asked the Commission to expedite the adoption of a permanent route and the construction of the same. The Engineer advised that surveys for this project have been completed but the data have not as yet been assembled for report, although he expects to have this report ready to render to the Commission at its March meeting. Chairman Cabell advised that the Commission is not in a position today to say definitely whether or not it will hold a public hearing in Eugene on this matter, but will give the matter consideration when the Engineer's report has been studied.

The matter of paying a pavement assessment against state-owned property described as Lot 9, Block 16, Grahams Fourth Addition to Toledo, had the attention of the Commission. The Attorney advised that assessment against this lot is in the amount of \$74.60 and that investigation reveals that the city actually pays the assessments against city-owned property. He pointed out that the Commission at a recent meeting authorized the payment of an assessment against state-owned property in Portland, and recommended, in view thereof, that the state pay the assessment in Toledo. The Commission approved the recommendation.

The Attorney reported receipt of a communication from the Commissioner of the Bureau of Reclamation with respect to the incorporation of an extra clause in the lease contract between the government and the state for certain lands at the confluence of the Deschutes and Crooked Rivers, in Jefferson County, which provides that the application of the State of Oregon for a continuance of the lease at termination in 1949 will be given preference over that of any other applicant. He said that according to this communication the suggested clause expresses the sentiments of the present officials of the Bureau of Reclamation but their decision is that it is not feasible to incorporate it in the lease contract because of the possibility that it would be interpreted to express the future policy of the government at the end of the 10-year period of the lease, which situation they wish to avoid. The Commission decided, in view of this report, to accept the lease contract in its present form.

The Attorney read aloud a letter from Hallock, Donald & Banta, Attorneys, Baker, Oregon, in behalf of certain mining companies operating in the vicinity of Sumpter, Oregon, in regard to the Sumpter Valley Secondary Highway right of way. It appears that one of the mining companies is operating two dragline dredges in the vicinity of Sumpter and that the company has been prohibited the use of the highway in connection with these operations. Further, that the company alleges that it is strictly within its rights in using the highway for its purposes because the Baker County records disclose that title to the right of way is still vested in the company and, in view thereof, it is the intention of the company to close the highway to general public use unless the Highway Commission will grant its request for a permit to conduct certain dredging operations on the highway right of way and to move its equipment upon and across the traveled roadway. The Engineer advised that the road under discussion was used for many years as a county road before it was added

to the state highway system and the matter of title to the right of way was not questioned when the state took the road over. He suggested that it would be advisable to search the county records to ascertain whether or not Baker County ever did acquire this right of way by purchase or otherwise. The Commission approved the suggestion and instructed the Attorney to make such investigation and report his findings. The Secretary was instructed to search the records and ascertain whether or not any mining company in this vicinity has been denied permit to use the highway.

In this connection the Commission considered that it would be advisable, in order to avoid circumstances of this kind, to check the titles to right of way of all state highways throughout the state and it was decided unanimously to have the records searched. The Attorney was instructed to make investigations as may be necessary with respect thereto.

The Attorney also brought up for discussion the matter of removal of several small buildings from state-owned property adjacent to the Salmon River Highway. He explained that for some time past certain private parties have maintained small cabins on property that the Commission acquired for wayside strips along this highway and it now appears that the work upon which these parties were engaged in this vicinity is completed and they have requested authority to remove the buildings from the state's premises. He recommended approval of the request, the buildings being of no value to the state and it being desirable to clean up the state property. The Commission approved the recommendation.

The Assistant Attorney reported the need to institute condemnation proceedings to acquire certain parcels of real property that are needed for certain highway improvements. He submitted a list of properties in question, together with offers that he recommended be made, for condemnation as follows:

- File 1823-Alice W. Jordan. Troutdale-Fairview Section of the Columbia River Highway. Right of Way - \$13,000.00
- File 4896-Juanita Starr. Multnomah Falls-Dodson Section of the Columbia River Highway. Right of Way - \$10,000.00
- File 7480-Selden B. Stonedahl. Catherine Creek Section of the Medical Springs Highway. Quarry and Stock Pile Site - \$274.00
- File 7747-Leo F. Smith. Hug Point-Arch Cape Section of the Oregon Coast Highway. Park - \$2,500.00
- File 5697-Frank Heck. Cottage Grove Section of the Pacific Highway. Right of Way - \$16,000.00

After discussion the Commission approved the request and the offers recommended. The following resolutions in regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity

FEB 16 1940

and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Troutdale-Fairview Section of the Columbia River Highway
Multnomah Falls-Dodson Section of the Columbia River Highway
Cottage Grove Section of the Pacific Highway

real property owned by or in possession of the following parties and/or persons, to wit:

Troutdale-Fairview Section of the Columbia River Highway
File 1823-Alice W. Jordan
Multnomah Falls-Dodson Section of the Columbia River Highway
File 4869-Juanita Starr
Cottage Grove Section of the Pacific Highway
File 5697-Frank Heck and Mary E. Heck

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands

defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire land or ground necessary for the development, maintenance, and operation of parks, parking places, automobile camps, camp sites, public squares, recreational grounds or resorts and land for the preservation of trees or timber growing thereon; and

WHEREAS, in the judgment and opinion of the State Highway Commission it will be for the convenience and is for the best interests of the general public that there be acquired for public purpose, to wit: for the purpose of developing and maintaining a park, recreational ground and/or resort, and for the purpose of preserving the timber growing thereon, a one-twelfth interest in the following described parcels of land, to wit:

Property of the heirs of the William E. Smith, deceased,
estate and of Anna C. Taylor

Government Lot 4 of Section 30, Township 4 North, Range 10 West, W.M., containing 56.7 acres, excepting 3.8 acres lying within the existing right of way of the Oregon Coast Highway.

Also, the southeast quarter (SE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of said Section 30, containing 40 acres.

Also, the south one-half ($S\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of said Section 30, containing 20 acres.

Also, the northwest quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of said Section 30, containing 10 acres.

All in Section 30, Township 4 North, Range 10 West, W.M., Clatsop County, Oregon, containing a total of 122.9 acres.

NOW, THEREFORE, BE IT RESOLVED that the said parcels or tracts of land be and the same hereby are declared by this resolution to be necessary for the purpose herein stated; and

BE IT FURTHER RESOLVED that title to the said parcels or tracts of land be acquired by the State of Oregon, by and through its State Highway Commission, for the above specified public use and purpose.

BE IT FURTHER RESOLVED that the best interests and convenience of the general public require that title to the said tracts or parcels of real property be acquired for the purpose of developing and maintaining the same for a park, recreational ground or public resort and for the purpose of preserving the timber growing thereon, and for the further purpose of making said parcels of land available for the use and enjoyment of the general public.

BE IT FURTHER RESOLVED that I. H. Van Winkle, Attorney General, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to negotiate further with the owners of said property and endeavor to acquire said property by agreement, and in the event that said properties cannot be acquired by agreement, then the said I. H. Van Winkle, Attorney General, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, are hereby requested to institute and prosecute such condemnation proceedings or other suits or actions as may be necessary to acquire the said real property or such parcels as cannot be acquired by agreement.

BE IT FURTHER RESOLVED that in such suits, actions, or procedure as may be prosecuted for the acquisition of said real property provision be made whereby title in fee simple shall be acquired in the name of the State of Oregon, by and through its State Highway Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and

to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and is further authorized by law to acquire lands for stock pile purposes, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials, and for stock pile purposes, on the following section of the state highway system of the State of Oregon, to wit:

Catherine Creek Section of the Medical Springs Highway

real property owned by or in the possession of the following parties and/or persons, to wit:

Selden B. Stonedahl--Jeanette Moran

and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, or are needed and necessary for stock pile purposes, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of

FEB 16 1940

land, as defined and determined by the said survey made by the said Highway Engineer shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The matter of acquiring additional land to enlarge the maintenance headquarters site in Eugene had the attention of the Commission. The Engineer advised that the present maintenance site is too small to accommodate the Highway Department's facilities and those of the State Police Department, and he suggested that the Attorney be authorized to secure options for the purchase of adjoining property, being the back end of lots that face the street on the opposite side of the block from the Highway Department's facilities. It would be preferable, he said, to purchase all of the private property on this particular block so as to allow more room for expansion. However, the front of the lots in question is occupied by residence buildings and it might be too costly. After discussion the Commission authorized the Attorney to secure options for acquisition of the back end of the lots and also for the acquisition of the full lots for purposes of comparison.

The Commission had under discussion a request from the United States War Department for a perpetual flowage easement over 0.68 of an acre of state-owned property adjacent to the Columbia River Highway at Herman Creek, in Hood River County, which property lies within the flowage area of Bonneville Dam and will be submerged during high water stages in the Columbia River. The Engineer recommended the granting of this request without charge. The Commission approved the recommendation unanimously and so ordered.

Reconsideration was given by the Commission to the request of the Bonneville Authority for blanket permit for the occasional movement over state highways of certain equipment the dimensions of which exceed the statutory

FEB 16 1940

limits as to width and length. The Engineer explained for the benefit of Chairman Cabell the action taken by Commissioners Aldrich and Clough in regard to this matter on the previous day, which action Chairman Cabell approved. The question of whether or not the federal government should be required to furnish the customary public liability and property damage insurance in connection with such movements was also discussed and it was decided unanimously to require the government to furnish public liability insurance coverage only in the amounts of \$5,000/10,000, and property damage insurance in an amount not less than \$1,000.

The Engineer also explained the action taken by Commissioners Aldrich and Clough on the previous day relative to the request of the Maling Company, Inc., Hillsboro, for a blanket permit to move over state highways peaviner equipment having an overall height in excess of the statutory limit. Chairman Cabell approved the action.

The Commission discussed and ordered filed a report from the State Parks Superintendent, being a summary of the state parks that have been acquired by the State Highway Commission up to February 1, 1940.

The Engineer requested authority for the Director of the Travel and Information Department to attend a meeting of the Evergreen Playground Association in Seattle or Olympia, Washington, sometime during the month of March, 1940. He estimated the expense at \$20.00. The Commission approved the request subject to confirmation by Governor Charles A. Sprague.

The Attorney reported the status of the right of way situation along the Taylor Street Section of the Oregon Coast Highway in Astoria, particularly progress being made by the City of Astoria in clearing the right of way of building encroachments. He stated that the city has filed a suit to require the property owners to vacate the street area. However, it appears that the city and the property owners are about to reach an agreement and if the agreement is consummated and carried out it will result in the removal of the buildings on that portion of the street which the Highway Commission wants. The cost of moving the buildings and re-establishing them on private property, he said, is estimated at \$4,780.00. However, Senator Franciscovich, who is attorney for the property owners, advises that his clients will settle on the basis of payment of \$4,000.00 and will among themselves contribute the difference between such sum and \$4,780.00. There has been made available to meet such expense the sum of \$3,600.00, of which amount the city has agreed to contribute \$600.00 and the property owners \$2,400.00 and the state \$600.00, which leaves a balance of \$400.00 unaccounted for, which amount the city is asking the state to contribute because it has no available funds; in fact, is having considerable difficulty in raising the \$600.00 that it has already pledged. After considerable discussion and in view of the apparent emergency that exists, the Commission voted unanimously to pay this extra expense with state funds and it was so ordered.

The Commission considered an offer from the Southern Pacific Company to sell to the state certain railroad company property situate adjacent to McLoughlin Boulevard at Eighth Avenue in Portland. The Engineer advised that

FEB 10 1940

this property is not of any particular use to the state and recommended that the offer be declined. The Commission approved the recommendation.

At 3:00 o'clock p. m. Chairman Cabell announced the awards of contracts as follows, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Bend-Butler Ranch Section of the Butler County Road, in Deschutes County. 6.3 miles grading, surfacing and oiling. J. C. Papin, Bend, submitted the low bid for this project at \$31,709.90. Leonard & Slate, Multnomah, submitted the second-low bid at \$33,644.50. There were 5 higher bidders. The Commission awards the contract to J. C. Papin, the low bidder, at his bid of \$31,709.90.

"Service Creek-Branson Creek Section of the John Day Highway, in Grant and Wheeler Counties. 27.17 miles oiling. 9 bids were received for this project, the low one being that of J. C. Compton, McMinnville, at \$11,804.25. The second-low bid was submitted by Babler Bros., Portland, at \$12,944.30. The Commission awards the contract to J. C. Compton at his low bid of \$11,804.25.

"Lick Creek-Salt Creek Section of the Little Butte Secondary Highway, in Jackson County. 2.54 miles surfacing and oiling; also furnish 2,850 cu. yds. crushed rock in stock piles. The low bid for this project was submitted by Norris Bros., Burlington, Washington, at \$21,032.00. The second-low bid was submitted by Clifford A. Dunn, Klamath Falls, at \$23,063.50. There was only one higher bid submitted. The Commission awards the contract to Norris Bros., the low bidders, at their bid of \$21,032.00.

"North Unit, Ana Spring-Hunter Hill Section of the Fremont Highway, in Lake County. 6.81 miles roadside improvement. Guy H. Booker & Arthur T. Fox, Salem, submitted the low bid for this project at \$5,381.50. River Bend Sand & Gravel Company, Salem, submitted the second-low bid at \$7,469.50. There were 2 higher bidders. The Commission awards the contract to the low bidders, Guy H. Booker & Arthur T. Fox, at their bid price of \$5,381.50.

"Union-Catherine Creek Section of the Medical Springs Secondary Highway, in Union County. 9.0 miles oiling; also furnish 1,000 cu. yds. crushed gravel in stock piles. Three bids were received for this project, the low one being that of J. C. Compton, McMinnville, at \$16,097.00. The second-low bid was submitted by R. O. Dail & Warren Bros., Inc., Portland, at \$16,390.30. The Commission awards the contract to J. C. Compton, the low bidder, at his bid of \$16,097.00.

"Castor Ranch-Joseph Section of the Hurricane Creek County Road, in Wallawa County. 1.58 miles grading, surfacing and oiling; also construct 77 lin. ft. composite-type bridge. 3 bids were

received for this project, the low one being that of Norris Bros., Burlington, Washington, at \$25,549.00. The second-low bid was submitted by Colonial Construction Company, Spokane, Washington, at \$26,882.00. All bids received were rejected.

"Seufert-Dufur Section of The Dalles-California Highway, in Wasco County. Furnish 9,100 cu. yds. crushed rock in stock piles. Mid-Columbia Sand & Gravel Company, The Dalles, submitted the low bid for this project at \$12,737.00. Homer G. Johnson, Portland, submitted the second-low bid at \$12,908.00. There were 4 higher bidders. The Commission awards the contract to the low bidder, Mid-Columbia Sand & Gravel Company, at its bid of \$12,737.00.

"Tigard Grade Separation and Fanno Creek Bridge on the Pacific Highway West, at Tigard, in Washington County. 343 lin. ft. and 124 lin. ft. of reinforced concrete viaduct. 15 bids were received for this project, the low one being that of Jacobsen-Jensen Company, Portland, at \$86,292.50. The second-low bid was submitted by Birkenmeier & Saremal, Portland, at \$87,382.50. All bids for this project were referred to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

The Commission had under discussion a request from the City of La-Grande for the removal of snow from its city streets that are state highway routes. They gave as their interpretation of the law that the State Highway Commission is obliged to perform such service. The Engineer advised that the present practice of the Highway Department is simply to clear the gutters and pile the snow in windrows down the center of the streets where it is considered to be of least inconvenience to merchants and to traffic, but it has not been the practice to remove the snow from the streets entirely; in fact, the procedure now being followed is practically the same as that followed by the cities before the streets were turned over to the state. He further advised that if the Commission should alter this practice it would be necessary to purchase numerous pieces of special equipment, which would have to stand idle a good part of the year because it would not be needed to carry on routine maintenance work. He estimated the cost of such equipment at \$175,000.00 and the cost of operating the same at approximately \$50,000.00 for an average year. He recommended continuance of the present practice of removing the snow from the gutters and the piling of same in windrows in the center of the street, except at intersections, where it should be piled in circular mounds in the center of the intersections so as to maintain cross-travel. He also recommended that the state's operations be carried on during the nighttime, when there is the least amount of traffic; provided, however, that the city council adopts an ordinance providing for the parallel parking of vehicles along the curb line while the snow-removal operations are under way, and will exercise its police powers to clear the parked cars from the streets during such periods. After discussion the Commission by unanimous vote adopted the recommendations of the Engineer as its general policy to be followed hereafter in connection with such matters, and instructed the Engineer to convey the information to the city manager of La Grande.

The Engineer requested authority to purchase the following equipment:

- 5 10-ton rollers, 5 old rollers to be traded in as part purchase price - estimated total net cost \$22,500.00
 - 1 10-ton roller - estimated cost \$5,200.00
 - 15 power mowing machines - estimated total cost \$16,500.00
 - 15 asphalt kettles - estimated total cost \$9,000.00
 - 4 pickup trucks, 4 old trucks to be traded in - estimated total cost \$2,000.00
 - 12 light trucks, 12 old trucks to be traded in - estimated total net cost \$10,800.00
 - 1 dust sweeper - estimated cost \$1,000.00
 - 1 electric-driven hand saw - estimated cost \$90.00
- (Total estimated cash outlay \$67,090.00)

The Commission approved the request by unanimous vote and instructed the Engineer to make the purchases through the State Purchasing Agent in accordance with the usual practice.

The Engineer reported that on January 25, 1940, in accordance with authority previously given him by the Commission, he awarded to Fisher Bros., Oregon City, the contract for grading and surfacing the Hay Canyon Section of the Moro-Hay Canyon County Road, in Sherman County, the bid of this contractor being the low bid received by the Commission on January 11, 1940, and the conditions of the award having been satisfied. The Commission confirmed the award of this contract as reported.

Consideration was given by the Commission to the matter of paying equipment rentals, et cetera, on W.P.A. projects direct rather than through the office of the Works Progress Administration in Portland. The Engineer explained that in connection with the Wolf Creek Highway W.P.A. Project, the Works Progress Administration rented certain equipment from an implement house in Portland with the understanding that the rental payments would be made monthly and would be credited against the purchase price of the equipment; but it appears through oversight by the Works Progress Administration office that the last three months' rental of this equipment was not paid and that the Works Progress Administration is now unable to make these payments but is willing to reimburse the state if the state will advance the amount. He gave as his thought that, in order to avoid a recurrence of this oversight, the state should pay these rental charges in the first instance, except in connection with the purchase of powder, which can be purchased at much less expense through the Works Progress Administration than direct from the dealer, and he recommended the approval of such procedure in this instance and in connection with future purchases. The Commission approved the recommendation unanimously.

The matter of maintenance of the park surrounding the Lewis and Clark monument at The Dalles had the attention of the Commission. The Engineer explained that a couple of years ago the State Highway Department, under contract, prepared, as a roadside beautification project, the site for a monument that the city of The Dalles proposed to erect adjacent to the Columbia River Highway near the west city limits of The Dalles, and that the city is now

FEB 16 1940

erecting the monument as a W.P.A. project; but the question has arisen as to whether or not the city or the state shall maintain the area after the monument is completed. He gave as his thought that if the area is to be maintained properly, the work should be done by state forces and at state expense, and he so recommended. The Commission approved the recommendation.

The Commission had under discussion the matter of abandoning a portion of the Brownsville Section of the Halsey-Sweet Home Secondary State Highway, in Linn County, particularly the section along Main Street and Blakeley Avenue, in Brownsville. The Engineer advised that this section is no longer of value from the state highway standpoint inasmuch as the highway has been reconstructed on other alignment. He recommended abandonment of the section in favor of Linn County or the municipal authorities of Brownsville, as the case may be. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Brownsville Section of the Halsey-Sweet Home Highway in Linn County; and

WHEREAS, by reason of said relocation and the reconstruction of the section of said highway there was eliminated and made unnecessary as a part of the completed highway the portion more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of the Commission the purpose and plan of the Commission to abandon as a part of the Halsey-Sweet Home Highway, and therefore as a part of the state highway system, the portion of the right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of the Halsey-Sweet Home Highway as formerly located between the said termini and as heretofore improved and used;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment of land was formerly within the limits of the right of way of the Halsey-Sweet Home Highway, but which is now without the limits of the right of way of said highway as said highway has been relocated, be and said fragment of land is hereby abandoned as a part of the right of way of said highway. The portion of the right of way of said highway which by this resolution is abandoned and which is within the limits of the City of Brownsville is left to revert to the abutting property owners or to the City of

FEB 16 1940

Brownsville for such public use as the City may make of the same, and the portion of said right of way lying just outside of the City of Brownsville, which is abandoned by this resolution, is left to revert to the County Court of Linn County for such public use as the County may make of the same or to the abutting property owners in the event the County does not desire to retain the same for public use.

2. That the fragment of land or right of way hereby abandoned and eliminated from the state highway system which is shown on the blueprint marked "Exhibit 'A'" is described as follows, to wit:

All that certain section of the old right of way of the Brownsville Section of the Halsey-Sweet Home Highway lying on the southerly side of the right of way required for the reconstructed Halsey-Sweet Home Highway and lying between Mile Post 5 and Mile Post 7 of said highway, the beginning and ending points with reference to the Engineer's Stations of the reconstructed highway being Station 791+00 on the easterly end and Station 819+00 on the westerly end.

In addition to the foregoing description of said abandoned right of way there is attached hereto the above-mentioned blueprint, which by this reference is made a part hereof, upon which map or exhibit there is shown shaded in red the abandoned section of highway, which exhibit for identification purposes bears the signatures of C. B. McCullough, Assistant State Highway Engineer, H. G. Smith, Construction Engineer, and F. D. Eason, Division Engineer, and bears date of December 14, 1939. *

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said abandoned section, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

4. That this resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Linn County, together with a copy of the said exhibit, and a copy of said resolution and exhibit shall be delivered to the Mayor of the City of Brownsville for such

* Map filed in Highway Retention and Abandonment Resolutions - No. 70.

FEB 16 1940

action as said County Court may desire to take and for such action as the city officials of Brownsville may desire to take, and should said abandoned portion of the highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Linn County and/or the municipal authorities of the City of Brownsville, as the case may be, and the same shall be beyond any responsibility or supervision by the State Highway Commission.

The Commission had under discussion the adoption of a policy with respect to the printing of state highway maps for private organizations, particularly with the back of the maps blank so that this space can be used for private advertising purposes. It was the Commission's decision that the Highway Department should not print maps for private parties. However, the Commission authorized the loan of the map plates to such private parties or organizations so they can print their own maps, with the understanding that any advertising matter contained thereon should be first approved by the State Highway Department and that there should be printed on the back of the map information to the effect that the maps are made available through the courtesy of the Oregon State Highway Department.

The Engineer reported that in accordance with authority previously granted him by the Commission he has posted the following highways for 50 per cent reduced load limits because the frost is leaving the ground and legal-weight loads appear to be causing damage to the road surface:

Pendleton-John Day Highway from Nye Junction to Ukiah, in Umatilla County
 Lakeview-Burns Highway from its junction with the Central Oregon Highway, in Harney County, to its junction with the Fremont Highway at Valley Falls, in Lake County
 John Day Highway from Prairie City, in Grant County, to Unity, in Baker County

He asked the Commission to confirm these postings. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the following roads or highways have been designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to wit:

PENDLETON-JOHN DAY HIGHWAY
 LAKEVIEW-BURNS HIGHWAY
 JOHN DAY HIGHWAY

AND WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highways, and, in order to protect said highways against such

damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to wit:

PENDLETON-JOHN DAY HIGHWAY from Nye Junction to Ukiah, in Umatilla County

LAKEVIEW-BURNS HIGHWAY from its junction with the Central Oregon Highway, in Harney County, to its junction with the Fremont Highway at Valley Falls, in Lake County

JOHN DAY HIGHWAY from Prairie City, in Grant County, to Unity, in Baker County

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1921, shall be in

FEB 16 1940

full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highways and at important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any part of said highways are located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer discussed briefly with the Commission the matter of selection of projects for the fiscal year 1941 regular federal aid funds. He particularly pointed out the necessity to approve a 25 per cent program for such funds now if the projects are to be gotten under way and completed during the 1940 working season. He presented a list of projects eligible for such program, consisting primarily of city projects, involving an expenditure of approximately \$1,000,000.00. The Commission deferred action on this matter for further discussion at a special meeting of the Commission which is to be held within the next two weeks.

The Assistant Attorney requested instructions whether to purchase the area between the old and new highways at Agate Beach. He advised that the tract within the intersection probably can be acquired for approximately \$600 and its acquisition appeared to be very desirable. After consideration and examination of the location map, the Commission authorized the taking of an option and presentation of the same for final consideration.

The Attorney reported an offer from Mr. Reed Holding to purchase at the rate of \$2.00 per thousand certain burned timber along the Wolf Creek Highway near the Clatsop-Tillamook County line. The Commission deferred its decision in this matter pending a recommendation from the State Parks Superintendent. In the event the recommendation is favorable and the Commission decides to sell the timber, then the timber is to be cruised.

The Attorney also reported a request from Roman Kintz, who has a lease of state-owned property at the entrance to Silver Creek Falls State Park, for electrical service from the state's electric power line supplying the buildings in the park. He said that Mr. Kintz is the state's tenant and that he is very desirous of securing electrical service but there are no power lines available in that vicinity except that owned by the state. He recommended approval of the request. The Engineer read aloud a report from the State Parks Superintendent on the subject, in which it was pointed out that the power line was constructed by the federal government for government and state use only and the government has certain restrictions which prohibit the

FEB 16 1940

dissemination of electrical power to private individuals from this circuit. It was the Parks Superintendent's thought that the supplying of electrical energy to private individuals from this power line might jeopardize the financial setup of the Government Recreational Demonstration Project and of the C.C.C. Camp that is now working in the state park, and that the proper procedure for Mr. Kintz to follow would be to apply directly to the National Park Service in Washington, D. C., which is the government unit that has supervision over the power line. After considerable discussion the Commission approved Mr. Kintz's request by unanimous vote, subject to the condition that the government has no objections thereto and the procedure is legal.

The Commission discussed a resolution from Carpenters' Union No. 780 requesting that a clause be inserted in all future federal, state, county, and municipal contracts reading as follows: "that all skilled, semi-skilled, and unskilled workers be obtained through lists furnished by the local office of the Oregon State Employment Service, and that such action as is necessary be taken by the Federal Government and the State of Oregon to secure the use of local help from lists of the Oregon State Employment Service, on all operations and projects undertaken in this community." The Engineer advised that it would not be practicable to comply with this request, particularly in view of the fact that approximately 80 per cent of the State Highway Department's contract work is partially financed with federal moneys and in connection with which work the federal government dictates the policy with respect to the employment of labor. He also mentioned other reasons why the Commission should not approve the request. He was instructed by the Commission to prepare a letter to the Carpenters' Union setting forth objections to compliance with the provisions of this resolution and to present the same to the Commission for discussion and approval at its next meeting.

The Engineer reported on the cost to recondition Lombard Street, Portland, between Interstate Avenue and Alma Street, St. Johns, in connection with which work the Portland Traction Company has indicated a willingness to contribute funds because of the abandonment of its streetcar tracks thereon. He stated that this project has been investigated from two standpoints, one of which is to provide an improvement similar to the Sandy Boulevard improvement constructed last year and involves the removal of the car tracks, surfacing throughout the entire project, constructing concrete pavement level with the top of the rails, and resurfacing between curbs with asphaltic concrete. The other, he said, involves the removal of the car tracks and surfacing for a portion of the distance only. He estimated the cost of the work under the first plan at approximately \$91,000.00 and that under the second plan at approximately \$46,000.00, and also estimated the cost of the cooperation to be received from the Portland Traction Company at about \$14,000.00. He gave as his thought that the second plan, costing around \$46,000.00, would provide a satisfactory improvement. He was instructed by the Commission to discuss the matter further with the Portland Traction Company.

The Engineer also reported the condition of the Jones Hill-Lena Section of the Oregon-Washington Highway, in Morrow County, on which section the Commission has in mind to construct a light oil surface this coming summer in the event there are funds available to finance the work. He stated that the

FEB 16 1940

section has been investigated thoroughly and it has been found that the present rock surfacing is unsuitable for light oil treatment. He estimated that it would cost about \$50,000.00 to stabilize the road and to construct an oil mat surface thereon. The Commission decided that this project is entirely too costly to undertake at this time.

Reconsideration was given by the Commission to the request of Mr. Paul Crooks, trustee for contractors Saxton, Looney & Risley, for full relief from the penalty under the bond furnished by them in connection with their bid submitted on December 8, 1939, for the construction of the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County. The Commission decided unanimously to collect the amount of the bond in view of the fact that the contractors failed to enter into the contract agreement and to furnish a contract bond; however, decided to give the contractors a hearing on the matter at the special meeting which is to be held in about two weeks. The Secretary was instructed to notify Mr. Crooks the date of such meeting.

The Commission discussed a letter from Rickreall Grange No. 671 and a petition from the ladies of the Rickreall Aid Society requesting the installation of a traffic signal at the junction of the Pacific Highway West with the Salem-Dallas Highway in Rickreall. The Engineer advised that the conditions at this intersection have been investigated and, in his estimation, a traffic signal is justified. He recommended the installation of an overhead flashing beacon costing about \$200.00. The Commission approved the recommendation unanimously.

The Commission had under discussion a report from the Engineer on the need for traffic signals at the intersection of the Tualatin Valley Highway with the Scholls Ferry County Road at Sylvan, near the west city limits of Portland, as has been suggested by Mr. Aaron M. Frank, Portland. The Engineer advised that this intersection has been investigated by the Traffic Engineer, who reports that a dangerous condition exists at this location because of a very wide intersection, which permits traffic from Portland enroute to points along the Scholls Ferry Road to cross the Tualatin Valley Highway at a very flat angle. In fact, he advises that such condition is the principal cause of the many accidents that occur at this point. As a solution for this condition, he said, the Traffic Engineer recommends the construction of a traffic island at the southeast corner of the intersection, which would serve to force traffic to take the proper traffic lane, and the installation of two overhead flashing beacons, all of which he estimated would cost about \$416.00. He recommended approval of the project. The Commission approved the recommendation by unanimous vote.

The Secretary presented a letter from the Bridal Veil Timber Company, Portland, requesting permission to transport over the Columbia River Highway, from its intersection with the Brower County Road to the county road leading to Corbett, loads of logs having an overall length of 70 feet, which is 20 feet longer than the length limit allowed by statute, so they can fill orders for logs that are to be cut up into timbers 56 feet long. The Attorney advised that the Bridal Veil Timber Company has about a year's supply of logs to market

and that their present procedure is to dump them into the Columbia River at Corbett where they maintain dumping facilities. However, these facilities will be destroyed when the state undertakes construction of the new highway at this point. He recommended, in view thereof, that the permit requested be granted so as to avoid any controversy with the Bridal Veil Timber Company relative to the destruction of the company's dock, and to avoid the trucking of logs over the Columbia River Highway for much greater distances where the curvature is excessive. The Engineer concurred in the viewpoint of the Attorney and recommended the granting of the permit subject to the condition that the company will certify that the logs are not to be cut up into shorter lengths at the mill and that the company will furnish the customary insurance in connection with the transportation of overlength loads. The Commission approved the recommendation unanimously.

In this connection the Commission discussed briefly the matter of holding a public hearing in Portland to discuss matters pertaining to the granting of permits allowing movements over state highways of loads that exceed the statutory length-limit of 50 feet, and it was tentatively decided to hold such hearing on the evening before the regular meeting of the Commission in March. (This date is to be confirmed later.)

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Wallowa County, providing for county maintenance of the Castor Ranch-Joseph Section of the Hurricane Creek County Road after construction of the same by the state as a federal aid secondary highway project, being project No. FAS 23-C(1).

Agreement with the City of Bend, providing for city maintenance of the South Section of the Butler Market Road (East 8th Street, Bend) from the intersection of Greenwood Avenue with East 8th Street to the north city limits of Bend, after construction of the same by the state as a federal aid secondary highway project, being project No. FAS 67-A(1).

Agreement with Deschutes County, providing for county maintenance of the Butler Market Road from the north city limits of Bend at East 8th Street to the intersection of the Butler Road with the Powell Butte State Secondary Highway No. 371, after construction of the same by the state as a federal aid secondary highway project, being project No. FAS 67-A(1).

Agreement with Sherman County, providing for county maintenance of a 1.6-mile section of the Wasco-Fulton Canyon County Road from a point at the south end of the Fulton Canyon State Secondary Highway No. 301 southerly a distance of 1.6 miles, after construction of the same by the state as a federal aid secondary highway project, being project No. FAS 68-A(1).

FEB 16 1940

Agreement with Botsford, Constantine & Gardiner relative to the handling of publicity matters for the state through the Highway Department's Travel and Information Department.

Application to the United States Department of the Interior for extra right of way needed for the improvement of the Columbia River Highway in front of the Celilo Indian Village, east of The Dalles.

Bargain and Sale Deed, conveying unto the Methodist Episcopal Church of Tigard two parcels of land, each containing 20,000 square feet, and being situate in tracts 3 and 4 of Tigard Highway Tracts, Washington County, being right of way transaction No. 7005.

The Commission discussed the setting of a date for an interim meeting to be held before its regular March meeting, for disposal of accumulated routine matters, and decided to hold such meeting on Tuesday, February 27, 1940, in Portland.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:45 o'clock p. m.

Henry L. Cabell
Chairman

M. O. Botsford
State Highway Engineer

E. B. Oodrich
Commissioner

W. H. Seavoy
Secretary

Thos. M. Clough
Commissioner

FEB 10 1940

Portland, Oregon, February 27, 1940

The State Highway Commission met in special session at 1:30 o'clock p. m. in the office of Chairman Henry F. Cabell, 1107 Failing Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission conferred with a delegation consisting of Mr. Paul Crooks, A. H. Saxton, and Theodore Arens relative to the question of whether contractors Saxton, Looney & Risley would be penalized in the amount of their bid bond for failure to enter into a contract with the Commission for the construction of the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, which contract was awarded to them by the Commission on December 8, 1939. Mr. Crooks, who headed the group, appeared as trustee for the creditors. Mr. Saxton was present on behalf of the contractors, and Mr. Arens appeared on behalf of the Associated General Contractors.

Mr. Crooks made a strong plea for relief from the payment of this penalty. He alleged that the bonding company that wrote the bid bond in this instance is not particularly concerned whether such relief is granted or not because the company is subrogated against claims and if the company is required to pay the amount of the bond then it collects a like amount from the contractor as a preferred claimant, after chattel mortgages, et cetera, have been satisfied, which simply means that Saxton, Looney & Risley will have to pay all of the claims, including the amount of the bid bond, or the creditors would have to go unsatisfied.

Chairman Cabell advised that the Commission requires contractors to furnish a bid bond for a specific purpose and if the contractor to whom a contract is awarded cannot furnish the contract bond then, in his estimation, he should be required to pay the penalty, otherwise confusion would develop and the Commission would lay itself open for considerable argument in every instance where a contractor for some reason or other fails to enter into the contract agreement. The Commission, he said, wants to avoid a situation of this kind and the establishment of a precedent in the matter and, accordingly, is of the opinion that it should abide strictly by the established rule and by the provisions of the bid bond. Chairman Cabell's remarks were endorsed by Commissioners Aldrich and Clough, Mr. Aldrich giving as his thought that any deviation from the present practice would establish a bad precedent and would react to the detriment of the state and the whole contracting fraternity.

Mr. Arens asked the Commission to give the matter thorough consideration for the benefit of the contractors association which, he said, would appreciate having the legal status of the matter exposed. After considerable

FEB 27 1940

discussion the conference was concluded with a statement by Chairman Cabell to the effect that the Commission would take definite action in the matter within the next few days. The Attorney was instructed, in the meantime, to investigate the contractor's application for his bid bond to ascertain whether or not the bonding company is a preferred creditor.

Mr. C. E. Fritts, Traffic Engineer of the State of Washington, was present and discussed with the Commission the suggestions offered by the Arrow Transportation Company, Portland, that a reciprocal agreement be arranged between the States of Oregon and Washington providing for the transportation of oversize vehicles between Umatilla, Oregon, and the Washington state line, particularly vehicles having an overall length in excess of the length limit specified by the Oregon statutes. Mr. Fritts stated the willingness of his department to cooperate with the State of Oregon so far as possible. Chairman Cabell pointed out that the legal length limit in the State of Oregon is 50 feet whereas in the State of Washington it is 60 feet. He gave as his thought that the Oregon Highway Commission is not in a position to enter into a reciprocal agreement for movements that do not comply with the law, particularly in view of the fact that the Oregon Legislature, in its 1939 session, saw fit to retain the present 50-foot maximum limit by voting down the bill that would have authorized loads of longer length.

The matter was discussed at some length during which opinions were expressed that it would not be proper nor legal to enter into any such reciprocal arrangement.

The Commission also discussed briefly with Mr. Fritts the matter of granting special permits for the transportation over state highways of loads of logs having an overall length in excess of the statutory limits. Mr. Fritts advised that the State of Washington does not have much difficulty in this respect due to the fact that the legal length limit in Washington is 10 feet longer than it is in Oregon; also the Washington law is more liberal than the Oregon law and permits are granted for excessive length loads without hesitation, if the width and curvature of the highway will permit same without undue hazard to other traffic.

The conference was concluded at 2:30 o'clock p.m. following which the Commission motored to Seaside, via the Wolf Creek Highway, inspecting en-route certain timber strips which the Commission is contemplating acquiring; also inspecting the county road between Elsie and Jewell which Clatsop County Court desires designated as a state secondary highway. Present on this trip were Chairman Henry F. Cabell, Commissioners E. B. Aldrich and Huron W. Clough; R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; H. B. Glaisyer, Secretary; Claire Parker, Right of Way Buyer; and others.

Mr. Parker pointed out timber tracts for which negotiations are now being carried on and also the tracts of burned timber for which the Commission has received an offer to purchase. The Commission authorized the Attorney to secure options for the purchase of the following described tracts: N $\frac{1}{2}$ of the NW $\frac{1}{4}$ of Section 11; that portion of the S $\frac{1}{2}$ of the NW $\frac{1}{4}$ of Section 11 which lies south of the highway; and the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 3, all situate in T. 4 N., R. 7 W., W.M., Clatsop County. He was also instructed to arrange a

trade agreement if possible for acquisition of timber and land situate in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 3, and in the N $\frac{1}{2}$ of the NE $\frac{1}{4}$ of Section 10, T. 4 N., R. 7 W., W.M., Clatsop County, trading for the same, if possible, burned timber situate in Section 33, T. 4 N., R. 7 W., W.M., Clatsop County, and in Sections 3 and 4, T. 3 N., R. 6 E., W.M., Tillamook County.

Discussion of the Elsie-Jewell Road was deferred until the evening session of the Commission in Seaside.

At 8:30 o'clock p. m. the Commission resumed its meeting in the parlor of the Seaside Hotel with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present. Also present were Messrs. Ivan Oakes and Jack Shirley, representing the Works Progress Administration.

The Commission discussed at considerable length matters pertaining to the acquisition of timber lands, approximately 1900 acres, along the Willson River Highway, particularly between the summit of the Coast Range and a point about three miles west of McNamer's Camp, which timber for the most part is owned by the Consolidated Timber Company. Mr. Parker, right of way buyer, reported about 100 million feet of timber involved in this transaction, of which amount he estimated approximately 10 million feet as being merchantable, burned timber. He also reported that the Consolidated Timber Company is asking \$25,000 for all of its timber on the tracts under discussion, including both burned timber and green timber and the land. The Engineer pointed out that much of this burned timber is located near the highway and will become a serious hazard to traffic when the highway is opened for public use. It was his thought that such timber should be felled so as to eliminate this hazard and suggested that such work be done as a W.P.A. project. Mr. Oakes gave as his thought that the project is eligible for W.P.A. funds and stated his willingness to submit the matter to authorities in Washington, D. C.

The question then arose whether or not the timber felled and cut into logs and cold-decked by W.P.A. forces could be disposed of later to the benefit of the state. Mr. Oakes stated that he did not believe that the government would approve an arrangement of that kind. After considerable discussion, the Engineer was instructed by the Commission to direct a letter to Mr. E. J. Griffith, W.P.A. Administrator for Oregon, outlining the entire matter as discussed at this meeting and to secure from him a letter in regard thereto from which the Commission will determine the advisability of spending \$25,000 of state funds to purchase this land and timber on the chance that the state will benefit later on by the sale of the timber that is felled and cold-decked. The matter is to be reconsidered by the Commission at its meeting on March 21 in the event Mr. Griffith's reply is received by that time. The Attorney was authorized and instructed to negotiate with the owners of the property on such basis, securing options, if possible, and to report the results of his efforts at the Commission meeting scheduled for March 21.

The Commission, by unanimous vote, approved the minutes of the meetings held on November 1, 2 & 3, November 20 & 21, December 7 & 8, and December 20, 1939.

FEB 27 1940

The Assistant Attorney reported the status of the 1940 budget for real property purchases. He advised that the Commission approved for expenditure in 1940 the sum of \$600,000 for such purpose, of which amount \$245,000 has been obligated. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration of each item the Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Houlton-Warren Section - Columbia River Highway</u>				
7439-Yeager, Clyde E.	R/W	1367 sq.ft.	2 1/2 sq.ft. plus \$10	McChesney

The Assistant Attorney brought up for discussion the matter of the overlap in the deed given by Clatsop County Court to the state for a stock pile site located in the SE $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 15 and in the NE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 22, T. 7 N., R. 10 W., W.M., Clatsop County. He recalled that at the previous meeting the Commission authorized deeding back to the county that portion of this site that overlaps property that the county previously deeded to an individual, provided that could be done without adversely affecting the remainder of the tract. He advised that the County Court has suggested that the matter be disposed of by a correction deed containing a proper description of the tract. He recommended approval of the suggestion in which recommendation the State Highway Engineer concurred inasmuch as the area involved is small and is not absolutely needed by the state. The Commission thereupon ordered the matter handled in such manner.

The Assistant Attorney also brought up for discussion matters pertaining to the acquisition of right of way from Albert Hofferber at Tigard. He explained that Mr. Hofferber owns two tracts, on one of which he conducts a service station and on the other a store business, and that Mr. Hofferber consented to deed to the state right of way that the state needed across these holdings; in fact, gave the state two options to purchase at \$1.00 each. However, before the transactions were closed he sold his holdings to a Mr. C. A. Donnelly, a condition of the sale being that Mr. Donnelly would honor the options given the state. Mr. Donnelly, he said, refuses to recognize the options and will not deed the right of way to the state unless he is paid the sum of \$750. He recommended that the Commission refuse to deal with Mr. Donnelly on such basis and that he be authorized to do what is necessary to force Mr. Donnelly to deed the right of way to the state in accordance with the terms of the options and the condition in his deed from Mr. Hofferber. The Commission approved the recommendation.

The Commission discussed and approved the request of the Port of

FEB 27 1940

Umpqua to deposit certain spoil from dredging operations in the Umpqua River at Reedsport on state-owned property adjacent to the Oregon Coast Highway at this place. (Agreement covering the matter was signed by the Commission on the following day.)

The Attorney brought up for discussion the matter of purchasing from Mr. J. T. Hafner certain lease privileges that he enjoys on property acquired by the state at the entrance to Silver Creek Falls State Park, Marion County. He explained that Mr. Hafner secured a lease from the prior owner to operate a dance hall on this property, which lease does not expire until June of 1941 but he is willing to surrender his lease if the state will pay him \$125 and will permit him to remove his buildings from the state's property. He gave as his thought that it would be to the state's advantage to settle with Mr. Hafner on such basis, which would remove this undesirable business from the state park and recommended approval of such settlement. The Commission approved the recommendation unanimously.

The Engineer requested authority to submit to the Public Roads Administration a partial program for the 1941 Regular Federal Aid Funds. He submitted a list of projects eligible for such funds from which the Commission, after careful study, selected the following for such partial program:

PROJECTS FOR 1941 REGULAR FEDERAL AID PARTIAL PROGRAM

County	Highway	Section and Kind of Work	Estimated Cost
<u>DIVISIONS #1 and #2</u>			
Multnomah	Columbia River	Troutdale-Dodson	G. \$ 260,000
*Clatsop & Tillamook	Coast	Hug Point-Manzanita 8.7 mi.	S.,B-11 110,000
Clatsop	Coast	Astoria 0.3 mi.	G. & P. 40,000
Columbia	Columbia River	Rainier	P. 30,000
Benton	Pacific West	Corvallis-South & North	P. 40,000
<u>DIVISION #3</u>			
Curry	Coast	Brookings 0.7 mi.	G. & Bit.M. \$ 70,000
Josephine	Pacific	Grants Pass-Green Creek, East Unit 0.7 mi.	G. & P. 30,000
Coos	Coast	North Bend-Marshfield, North Unit	G. & P. 80,000
*Josephine	Pacific	Sexton Mountain	G. 248,000

Unatilla	Oregon-Wash.	Pilot Rock	0.5 mi. G. & Bit.M.	25,000

* To be contracted in fall of 1940

The Engineer was thereupon authorized to submit the projects to the Public Roads Administration for approval.

The Engineer reported briefly on matters pertaining to the use of wooden stave pipe in highway culvert construction. He recalled that the Commission at a meeting held on November 21, 1939, ordered the purchase of a quantity of such pipe for use on highway work, provided the pipe were constructed in conformance with certain specifications that would provide a strength comparable to metal pipe, however, the manufacturers of the wooden pipe now offer objections to the state advertising for bids on their pipe in accordance with these specifications because they feel that it would have a bad effect on their business inasmuch as the specifications call for more metal bands than they are accustomed to using. He requested instructions from the Commission whether or not to change the specifications and recommended adherence to the specifications as written. The Commission approved the recommendation unanimously.

The Engineer also reported briefly on the amount of culvert pipe of various types that has been purchased by the Commission during the period October 15, 1933, to January 13, 1940, which report the Commission approved and ordered filed.

The Commission also approved, by unanimous vote, the plan submitted by the Engineer for the landscaping of the maintenance headquarters grounds at Medford and authorized an expenditure of approximately \$2,175 of state funds to pay for the work.

Commissioner Aldrich brought up for discussion the matter of preservation of timber strips along the Pendleton-John Day Highway in the vicinity of Camas Creek and Ukiah, in view of the increased logging activities in this vicinity. It was his thought that investigation should be made to determine whether or not it would be advisable to acquire some of this timber for future use and enjoyment by the general public. The Engineer was instructed to have the State Parks Superintendent make such investigation.

The Attorney reported the progress that is being made in the appraisal of property along Front Street, Portland, where it is planned to construct an arterial highway. He said that practically all of the appraisals have been made and that he has been requested by one of the City Commissioners to furnish him with the information assembled. In this connection the Engineer

advised that he plans to submit to the Commission at its March meeting a full report on the Front Street project, including estimates of cost of right of way and construction. The Commission decided, after discussion, not to divulge to anyone information assembled in regard to right of way and construction until the Commission has had an opportunity to study the report.

The Commission also discussed the matter of granting permits for transportation over state highways of logs, poles and piling, the overall length of which, including the equipment, exceeds the limit specified by statute. The matter was discussed from three standpoints: first, that of granting permits for loads that exceed the statutory length limit by only 3 or 4 feet; second, movements of piling or long logs that are not to be cut into small lengths at the mill; and, third, movements of long logs which are to be sawed into shorter lengths at the mill. A decision on the matter was deferred pending a conference with interested operators, which was tentatively scheduled for the evening of Wednesday, March 20, 1940, prior to the regular meeting of the Commission on March 21. It was decided, in the meantime, that Chairman Cabell should discuss the matter with Governor Charles A. Sprague and that the Attorney should prepare a form of application for permits covering such movements.

The Commission reconsidered the matter of granting contractors Saxton, Looney & Risley relief from payment of the penalty for failure to execute the contract agreement and furnish the contract bond in connection with the Warm Springs Agency-Vanora project on the Warm Springs Highway, which contract was awarded to them on December 8, 1939. After discussion, the Commission decided unanimously to collect from the contractors the full amount of the bid bond. The Attorney was instructed to make a demand on the contractors and their surety for such payment.

The Commission also reconsidered a resolution from Clatsop County Court requesting the designation of the Elsie-Jewell County Road as a secondary state highway. Involved in this discussion was the question of whether or not, if the Commission takes over this road, jurisdiction should include both branches of the road where it connects with the Wolf Creek Highway. Also, whether or not the Commission should accept the road in view of the fact that a portion of the right of way is only 40 feet wide and there are certain building encroachments thereon. The Commission decided that so far as the right of way is concerned it would not object to the 40-foot width because the alignment will have to be revised at some future date. As to the encroachments, the Commission thought the County Court should see to it that such are removed before the state takes the road over. The Attorney was instructed to investigate the records as to title to the right of way. The Engineer was instructed to make further detailed investigations and to ascertain from the Tidepoint Logging Company how long it expects to operate in this vicinity and how much it will cost to revise its guy wires which now extend over and encroach upon the present right of way. He was also instructed to report to the Commission the estimated cost to bring the present road to satisfactory secondary state highway standards and the cost to construct an alternate connection between the Wolf Creek Highway near Elsie and the Nehalem Secondary State Highway at a place known as Fish Hawk Falls.

FEB 27 1940

The Commission discussed a report from the Engineer on the matter of authorizing the planting of trees along the Hillsboro-Silverton Secondary State Highway No. 140 at the south approach of this highway into the city of Mount Angel, particularly in front of the Academy of the Benedictine Sisters. The Engineer advised that the right of way at this point is only 60 feet wide which is too narrow to allow for the proper development of tall evergreen trees such as have been suggested, but the church people have agreed to secure easements from the property owners for extra right of way as may be required if the state will furnish and plant the trees. He estimated that the state's expense in this undertaking would not exceed \$1,000 and recommended approval of the project. The Commission approved the recommendation unanimously.

The Commission considered and denied the request of the School Board of Mosier, Oregon, for the construction of guard fence along the Columbia River Highway in front of the Mosier School, it being the opinion of the Commission that such fence construction would be of no particular benefit to the state highway, and that the protection of school children is primarily a function of the school district.

The Engineer reported on the cost to complete the reconstruction of the Hood River Secondary Highway from Dee to Parkdale, in Hood River County, a distance of 5.3 miles. He estimated such cost at \$143,000, based on the reconnaissance survey made by Locating Engineer J. F. Waller. It appeared to the Commission that such project is too costly to undertake at this time. However, a definite decision was deferred pending further study and report by the Engineer, which report is to include an economic analysis of the road.

The Commission discussed a letter from the Baker County Taxpayer's League protesting the proposed rerouting of the Old Oregon Trail through the town of Haines which rerouting, they allege, will destroy their community park. The Engineer pointed out that the contract for the highway improvement has already been awarded and it is now too late to make any change in the plans; furthermore, in his estimation, the park will be damaged only very little, if at all, inasmuch as only a small portion of the park property is being taken. He recommended denial of the request. The Commission approved the recommendation.

The Commission discussed a report from the Engineer on the cost to widen the Sylvan-Beaverton Section of the Tualatin Valley Highway for four lanes of traffic, as has been requested by residents of that district. The Engineer advised that this section is four miles in length and that new right of way would have to be acquired for about one-half the distance to accommodate concrete pavement 44 feet wide, and estimated the cost of the improvement at \$172,000. The Commission deferred its decision in this matter pending further report from the Engineer based upon constructing the 4-lane pavement on the present right of way.

The Commission discussed the Engineer's report on the request of McLoughlin Union High School, Milton, Oregon, for permission to construct on state highway right of way in front of their school grounds a parking area

for school buses. The Engineer advised that the school district proposes to construct a concrete curb along the highway for a distance of about 200 feet and to pave the area between the curb and the existing highway pavement, and that such work will be done as a W.P.A. project at no expense to the state. He recommended approval of the request subject to the condition that the concrete curb is constructed not more than two feet from the edge of the existing sidewalk and that the parking of school buses be confined to a strip eight feet wide measured from the curb. The Commission approved the recommendation unanimously.

The Commission tentatively approved a form of permit prepared by the Attorney authorizing the construction by CCC forces of a sidewalk along the I.O.N. Highway in the town of Jordan Valley, it being understood that the state will be put to no expense in connection with the construction of this walk and that the walk will be placed in a location satisfactory to the State Highway Engineer.

The Engineer reported on the cost to oil the unoled section of the Newberg-Yamhill Secondary State Highway No. 151 as has been requested by residents of that district. He advised that the unoled section is 4.6 miles long and that it would cost about \$4,300 to construct a light oil surface thereon similar to that on the adjacent sections; however, a more substantial improvement, using a crushed rock base course, would cost about \$10,000. He further advised that this is a meritorious project and recommended the same for construction later on in the year in the event sufficient savings accrue from maintenance operations to finance the work. The Commission approved the recommendation.

The Commission discussed briefly a complaint from residents of Charleston, Oregon, concerning the disposal of drainage water from the Cape Arago Secondary State Highway near its intersection with Roosevelt Boulevard in the town of Charleston. Action on this matter was deferred by the Commission pending further investigation and report. The Engineer was instructed to have Maintenance Engineer J. N. Bishop give this matter his personal attention.

The Commission considered and ordered filed a report from the Engineer on projects that have been authorized for construction during 1940, using state funds exclusively to finance them.

The Commission reconsidered the claim of Mr. R. Allen, owner of Allen's Cash Grocery, Marshfield, for damages that he alleges he incurred by reason of the construction of the Bunker Hill Section of the Oregon Coast Highway, Marshfield. In this connection the Attorney advised that he has gone into this matter thoroughly, as instructed by the Commission at the last meeting, and is of the firm opinion that the state is not liable for the damage. He recommended that the claim be denied. The Commission approved the recommendation and instructed the Attorney to inform Mr. Allen that his claim is not one for which the state is liable, hence the Commission is without authority to expend state highway funds in payment thereof.

FEB 27 1940

The Engineer requested instructions relative to building encroachments on the Moody Tollbridge State Highway which extends a distance of about one-half mile south from the Columbia River Highway, just west of the Deschutes River Bridge, and connects with the county road at its southern extremity. He advised that this road is the shortest highway on the state highway system, and was designated a state highway simply as a convenience to the motoring public pending construction of the Columbia River Highway between The Dalles and the Deschutes River, so as to obviate the necessity of motorists paying a toll to cross the Moody toll bridge. He said that the road is of no value from the state highway standpoint although it provides a connection to the highway for the county road and would be valuable to the county from that standpoint. Also, that the right of way near the Columbia River Highway Junction is being occupied by a service station. He questioned the advisability of the Commission taking any action toward the removal of the service station buildings at this time and suggested, as an alternate, that the road be taken off the state highway system and turned over to the jurisdiction of Wasco County, which would require appropriate action by the Legislature. The Commission concurred in the viewpoint of the Engineer and thereupon instructed the Attorney to prepare appropriate legislation for presentation to the 1941 Legislature.

The Commission considered and ordered paid the invoice from the Western Association of State Highway Officials, in the amount of \$25, representing the dues of the State of Oregon in such association for the year 1940.

The Secretary presented the written opinion of the Attorney General with respect to the authority of the State Highway Commission to execute a form of easement submitted by the United States of America, through its Bonneville Power Administrator, pertaining to the construction of power transmission pole lines across state highways. It was pointed out that, according to this opinion, the State Highway Commission is authorized to enter into such proposed agreement if it so desires, provided the agreement includes provision to the effect that if executed by the Commission it will vest in the United States of America authority only to cross over the highway and does not in any way vest in the government authority to occupy right of way longitudinally. The Commission ordered the opinion filed.

The Commission discussed a resolution from the Carpenters and Joiners Union of Astoria, requesting that there be inserted in future state highway contracts a clause providing that contractors shall obtain their labor through the local offices of the Oregon State Employment Service. The Engineer advised that there are numerous reasons why the Commission cannot require contractors to obtain their labor from such sources, the most important reason being that about 80 per cent of the state contract work is Federal Aid work in connection with which the Federal Government dictates the policy with regard to the employment of labor, the federal policy being to require that only unskilled labor shall be secured from local employment offices. It has been the policy of the State Highway Department, he said, on the remaining 20 per cent of its work to follow the same policy, partly for the sake of uniformity and partly because from experience it has been shown that the work could be done much cheaper if the contractor were allowed to select his key

men from his own organization rather than be required to build up an entirely new organization for each job. He recommended denial of the request. The Commission approved the recommendation and instructed the Engineer to advise the Carpenters and Joiners Union of the action taken, giving the reasons therefor.

The Engineer requested authority to conduct an experiment on the Lebanon-Albany Section of the Santiam Highway providing for the stabilization of this road by reconstructing the same under several different specifications. He explained briefly that he has it in mind to try out four or five different types of improvement over a 2-mile section, and estimated the cost of the entire project at approximately \$35,000. The Commission appeared favorably inclined toward this project but deferred definite action pending further investigation and report by the Engineer.

A letter was presented from County Judge David F. Graham, Malheur County, suggesting that the Highway Commission remove from the secondary highway system the Vale West Secondary Highway (Graham Boulevard) and substitute therefor the county road known as the Sucker Creek Road, which extends south from the Nyssa-Adrian Secondary State Highway to Jordan Valley. The Commission denied the request, it being considered that this road does not meet the state's secondary highway requirements.

The Commission discussed informally matters pertaining to the controversy with Mr. O. S. Powell relative to the construction of standard driveways into his service station adjacent to the Pacific Highway just north of Hubbard, in Marion County. The Commission referred the matter to Chairman Cabell with full power to act.

The meeting was adjourned at 11:45 o'clock p. m. with the understanding that unfinished business would be disposed of on the following day enroute to Portland.

Mr. [Signature]
State Highway Engineer

W. H. [Signature]
Secretary

Henry F. Cabell
Chairman

[Signature]
Commissioner

Huron W. Clough
Commissioner

Enroute Seaside to Portland, February 28, 1940

The following matters had the attention of the State Highway Commission enroute from Seaside to McNamers Camp, on the Wilson River Highway. Present and entering into discussions were Chairman Henry F. Cabell, Commissioner Huron W. Clough, State Highway Engineer R. H. Baldock, Attorney J. M.

FEB 28 1940

Devers, and Secretary H. B. Glazier. Commissioner E. B. Aldrich was excused.

Request from the Gold Hill Garden Club for the construction of a sidewalk on the bridge over the Rogue River on the Pacific Highway at Gold Hill:- The Engineer estimated the cost of a 3½-foot timber sidewalk, 444 feet long, at \$1,887.00. A decision in this matter was deferred by the Commission until its next meeting.

A letter was presented from Morrow County Court renewing its request for the following improvements:

Completion of the improvement started last year on the Wasco-Heppner Secondary State Highway between Heppner and Rhea Creek;

Oiling the Oregon-Washington Highway between a place known as Hanna and Lena;

Designation, as a state secondary highway, of the county road which extends from the Lexington-Echo Secondary State Highway, up Butter Creek a distance of about 3 miles, to Pine City, which section was oil surfaced last year by the state as a federal aid secondary highway project.

Designation, as a state secondary highway, of the county road extending from the Columbia River Highway to Patterson's Ferry.

The Secretary was instructed to inform the County Court that the Commission expects to complete the Heppner-Rhea Creek project in the 1941 program for federal aid secondary highway funds; further, that recent investigations of the Oregon-Washington Highway project reveal that there is insufficient rock on the road to warrant an oil treatment but the Commission will authorize the Engineer to advertise for bids later on in the year for the furnishing of materials to stabilize the road in the event there are savings in the maintenance budget that can be used to finance the work, which would then make it possible for the Commission to do the oiling work the following year. The County Court's request for the designation of the Pine City Road and the Patterson Ferry Road as secondary state highways was deferred by the Commission for future consideration.

A letter was presented from the Whitaker Community Club, Portland, inquiring as to when the Commission expects to complete the construction of the Lombard Street extension of the Northeast Portland Secondary Highway, particularly between Northeast 20th Avenue and Northeast 72nd Avenue; also, requesting the construction of safety islands on this highway at its intersection with 52nd Avenue for the benefit of the many school children who are obliged to cross the highway at this point. The Engineer advised that the Commission has already tentatively provided in its program for 1941 federal aid funds for the paving of the 4-mile section of this road. The Secretary was instructed to so inform the Community Club. The request for the installation of safety islands at 52nd Avenue was referred to the Engineer for investigation.

The Engineer brought up for discussion the matter of substitution of roadside improvement projects in the 1939 Federal Aid Landscaping Program. He advised that this program now includes two projects, as follows:

North Powder-Muddy Creek Project, estimated to cost \$4,800.00;
Central Point-Medford Project, estimated to cost \$4,000.00.

Further, that he has been unable to agree with the Public Roads Administration as to certain work in connection with the North Powder-Muddy Creek Project, particularly the rounding of slopes and certain grading work, so it appears that this project cannot be undertaken; also, that there is not sufficient moisture available for plant growth on the Central Point-Medford Project and the cost to construct an irrigation system for this special purpose is not justified. He recommended, in view of the circumstances, the substitution of the following projects in this program:

Ontario-Snake River Section (1.28 miles - estimated cost \$4,000);
Middleton-Newberg Section (5.5 miles - estimated cost \$6,000).

The Commission approved such substitution of projects.

The matter of a garbage dump that is being maintained adjacent to the Corvallis-Eastside Secondary State Highway between Albany and Corvallis had the attention of the Commission, said matter having been reported by the school board having charge of the school located about one-quarter mile east of said dump. The Engineer advised that this matter has been investigated and it has been found that the dump is being maintained on private property owned by G. S. and L. Faxon who are selling their property under contract to a Mr. F. A. Lutz of Albany who, it appears, is operating the dump. Further, that the property involved is not a part of the right of way of the highway, hence is not under the control of the Highway Commission. The Attorney advised that he has been unable to find in the statutes any authority for the Highway Commission to abate this nuisance. He suggested that it would be proper to call the matter to the attention of the county health authorities. The Commission approved the suggestion and referred the matter to the Attorney to handle.

The Secretary presented a resolution from the County Court of Deschutes County in which the county elects to take over, as a county road, a portion of the Redmond-Bend Section of The Dalles-California Highway which was abandoned by the State Highway Commission on July 29, 1937, the highway having been reconstructed on other alignment. He also presented a resolution from the County Court of Marion County in which the county elects to take over as a county road a portion of the Beaverton-Aurora Secondary Highway which was abandoned by the State Highway Commission, by resolution, on December 27, 1935, when the highway at this point was reconstructed on other alignment. The Commission approved the resolutions and ordered them filed.

The Commission had under discussion a letter from Mayor George K. Aiken, Ontario, suggesting the erection of a large sign on the right of way of the John Day Highway about six miles southwest of Ontario, where the Malheur irrigation siphon crosses this road. It was Mr. Aiken's thought that

such sign is appropriate because this is the world's largest irrigation siphon and should be of particular interest to the general traveling public. The Engineer pointed out that approval of this request would be inconsistent with the Commission's policy with respect to signs; furthermore, this siphon is not of an historical nature, hence would not come in the category of signs which the Commission proposes to erect along the Old Oregon Trail. In view thereof, the Commission decided that it would be inadvisable to grant the request. The Engineer was instructed to so inform Mr. Aiken and advise him the reasons for such action.

The Commission discussed briefly the adoption of a policy with respect to errors that are committed by contractors in stating unit bid prices in proposals for highway construction work. The matter was referred to the Attorney for study and report at the next meeting.

The Commission had under consideration the matter of the installation of reflectorized crossing signs at certain types of grade crossings, and, after due consideration, Commissioner Clough offered the following resolution which was unanimously adopted by the Commission:

WHEREAS, the Bureau of Public Roads has promulgated and established certain rules and regulations governing safety standards and devices which must be employed at grade crossings which serve highways qualified for improvement under the provisions of the Federal Aid Highway Act; and

WHEREAS, the Commission desires to cooperate with the Federal Government in putting into effect the said rules and regulations; and

WHEREAS, it appears that some of the railroads affected by the rules and regulations promulgated by the Bureau are not common carriers and hence do not fall within the general rule established by the Public Utilities Commissioner; and

WHEREAS, it is deemed advisable by this Commission that with respect to railroads which are not common carriers a special application or petition be filed with the Utilities Commissioner in instances where grade crossing signs are to be removed and in their stead reflectorized signs installed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, as follows:

1. That in instances where grade crossing signs are to be removed and reflectorized signs installed at grade crossings over railroads which are not common carriers the following form of petition or application is approved and shall be employed for such purpose:

BEFORE THE PUBLIC UTILITIES COMMISSIONER OF OREGON

In the matter of the application of the
 State of Oregon, by and through its State
 Highway Commission, for authority to erect
 reflectorized railroad crossing signs at
 the highway grade crossing of highway over
 railroad in _____
 Section _____, Township _____, Range _____
 County, Oregon.

PETITION

Your petitioner respectfully represents and shows the following facts:

I.

That _____ is the owner and operator of a railroad in _____ County, which railroad is not a common carrier railroad, and which railroad crosses at grade a public highway known and designated as _____, and which grade crossing is located in _____ of Section _____, Township _____ Range _____ in _____ County, Oregon.

II.

That the owner of said railroad with the approval of the Public Utilities Commissioner has erected and has been for some time maintaining railroad crossing signs which consist of standard timber cross-buck signs.

III.

That said highway is a _____ highway under the jurisdiction of _____ and the cost of the construction of the project which involves said grade crossing is to be borne in part by _____ and in part by the Federal Government.

IV.

That Section 8 of the Hayden-Cartwright Act of June 16, 1936, and amendments thereof, by which there is made available by the Federal Government funds for highway construction in the State of Oregon contains the following provision:

"That no part of the appropriations hereafter made for the purpose of carrying out the provisions of the Federal Highway Act, or any acts amendatory thereof, or supplementary thereto, shall be approved for expenditure on any highway unless proper safety protective devices shall be installed or be in operation at any highway and railroad grade crossing or drawbridge on that portion of the highway with respect to which such expenditures are to be made, and said devices shall comply with the safety

FEB 23 1940

standards determined by the United States Bureau of Public Roads at that time as being adequate."

V.

That the Bureau of Public Roads has promulgated and established certain rules and regulations governing safety standards and devices which must be employed at grade crossings which serve highways qualified for improvement under the provisions of said Federal Aid Highway Act, and after providing with respect to certain types of crossings in said rules and regulations the said rules and regulations contain the following provision:

"For all other crossings, protection with reflectorized advance warning signs and reflectorized railroad crossing signs of the cross-buck type will be considered adequate at this time, except that

"(a) Protection of crossings of important trunk highways with main and branch line railroads which are not high-speed lines may be required under one of the methods enumerated under 1.

"(b) Non-reflectorized advance warning signs and non-reflectorized railroad crossing signs of the cross-buck type will be acceptable at railroad crossings that are not used for night operation and at railroad crossings where a satisfactory agreement is made or is in effect that train movements will be flagged across."

VI.

That the grade crossing referred to above is a crossing which comes within the provisions of the foregoing government regulation.

VII.

It is the purpose and plan of the petitioner to change the existing grade crossing signs or devices and make the same conform to the requirement of the Federal Government with respect to the foregoing rule and regulation by installing reflectorized signs.

VIII.

It is represented that the cost of altering and changing the said crossing signs so as to conform the same with the foregoing Federal requirements shall be paid by the petitioner, but thereafter the maintenance and/or renewal of said crossing signs or devices shall be at the expense of the owner of the railroad.

WHEREFORE, petitioner prays for an order authorizing and

permitting this petitioner to alter and change said existing grade crossing signs and devices and make the same conform to the Federal requirements, and that said order require the said owner of the railroad to thereafter maintain said crossing signs or devices.

Dated at Salem, Oregon, this _____ day of _____,
1940.

STATE OF OREGON, by and through its
State Highway Commission

By _____
By _____
By _____

The undersigned officers and qualified officials or owners of the _____ hereby approve the foregoing petition and by this endorsement join with the petitioner in requesting that the order prayed for be granted and that the said order provide that the cost incurred in altering and changing the existing crossing signs be paid by the State and that the owner of the said railroad does hereby assume and agree to pay the cost of maintaining and/or renewing the new crossing signs or devices. The undersigned waive a hearing and notice of hearing with respect to said matter and request that an order be made upon the filing of said petition.

ATTEST:

By _____
By _____

2. That said form of petition shall be completed by incorporating all of the facts, data and information related to the particular crossing involved, and when so completed the petition may be signed by the State Highway Engineer or the Assistant State Highway Engineer for the Commission and then filed with the Public Utilities Commissioner.

The Commission discussed briefly the matter of decreasing its insurance requirements in connection with the granting of permits for transportation over state highways of loads that are longer than the statutory length limits, as was suggested by Mr. G. M. Fox who appeared before the Commission at its meeting on February 15. A decision in this matter was deferred by the Commission until its next meeting. The Attorney and the Secretary were instructed to study the matter in the meantime and submit their recommendations in regard thereto. They were also instructed to look into the matter of purchasing public liability and property damage insurance protecting the Commission in connection with the granting of permits of all kinds, as a substitute for the insurance furnished by the several carriers.

The Engineer requested instructions relative to the payment of overtime to one of the W.P.A. crews performing special work on the Wolf Creek Highway. He explained that on August 12, 1939, Captain Jones, who was then superintendent of the W.P.A. operations on this highway, found it necessary to work a small crew of W.P.A. laborers overtime in removing a slide, and that the W.P.A. has refused to pay the men any extra amount for the overtime employment. He gave as his thought that the men are entitled to overtime pay and suggested that the state assume the expense which, he thought, would not total more than \$15, so as to avoid complications. After discussion, the Commission approved the payment of this expense with state funds.

The Commission had under discussion the matter of modifying its requirements for pole line permits across state highways. In this connection the Engineer pointed out that under the Commission's present ruling such crossings are prohibited except in unavoidable places. He also pointed out the current practice of pole line companies which is to construct their main leads across country on private right of way, necessitating the occasional crossing over state highways. He gave as his thought that such type of construction is preferable to the installation of a line of poles along the highway right of way, which not only is unsightly but is also more or less hazardous to the traveling public and, in view thereof, he recommended modification of the present policy so as to permit such crossings in instances of that kind. The Commission approved the recommendation and so ordered.

The Engineer brought up for discussion a letter from the Lebanon Strawberry Festival Committee in which the Commission was requested to detour Santiam Highway traffic onto paved city streets for a distance of three blocks in Lebanon during the progress of their 1940 Festival, in June. The Committee advised that their Fair is located on a side street but, due to the fact that the permanent places of business and amusement, such as restaurants, pool halls, et cetera, are all located along the highway, it is impossible to keep the crowd off the highway and it is their feeling that the hazard to pedestrians would be greatly reduced if highway traffic could be detoured during the time of their celebration. The Engineer stated his concurrence in the viewpoint of the Committee and recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission considered and ordered filed a resolution from the Council of Clackamas County Cities requesting the designation of 39th Street, Portland, between Sandy Boulevard and the north city limits of Milwaukie, as an arterial highway, and the improvement of the same as such.

The Commission discussed briefly the policy of the National Parks Service with respect to the collection of fees from motorists for the privilege of driving their automobiles over the Crater Lake Highway through Crater Lake National Park without visiting Crater Lake. Decision in this matter was deferred until the next meeting so as to give Chairman Cabell an opportunity to study the correspondence.

The Commission considered and ordered filed a letter from Charles B.

Mitchell, Lorane, Oregon, renewing the request of people of that district for the oiling of the Territorial Secondary Highway from Gillespie Corners to the Douglas County line.

The Commission had under discussion a letter from Governor Charles A. Sprague suggesting that outlines of legislation to be recommended to the 1941 Legislature be prepared and submitted to his office for review by September 1, 1940, and that drafts of necessary bills be made ready by December 15, 1940, so as to expedite the work of the Legislature. The Commission voted unanimously to comply with this request and instructed the Attorney to govern his actions accordingly.

A letter was presented from L. M. Lepper, Director of the Eastside Commercial Club, Portland, urging additional construction work in 1940 on the new Columbia River Highway between Portland and The Dalles, and suggesting that forest highway funds and federal aid funds be used to finance the work. The letter was discussed briefly but no action was taken thereon, it being the thought of the Commission that progress now being made on this project is as rapid as can be expected with funds available, and that the work cannot be advanced without handicapping improvements in other parts of the state.

The Commission also discussed letters from A. G. Harvey, Chairman, Barlow Road Extension Committee, Wamic, and L. M. Lepper, Director of said Association and of the Eastside Commercial Club, urging a survey of a proposed road, known as the Barlow Road Extension, from the town of Wamic, in Wasco County, westerly to a connection with the Wapinitia Highway at a place known as Bear Paw Springs. The Commission expressed reluctance to order a survey of this road, which is not on the state highway system, in view of the fact that it is through an entirely new district and could not be constructed for many years. However, the Commission authorized the Engineer to make a rough reconnaissance survey of the same at his convenience.

The Secretary presented a petition from numerous residents and property owners of Gleneden Beach, in Lincoln County, requesting a definite statement in regard to the Commission's plans for the proposed revision of the Oregon Coast Highway past Gleneden Beach. They alleged that the development of this beach district is being seriously handicapped by inaction of the Commission with respect to this project. The Engineer pointed out that some of the right of way for this proposed change has been acquired but the negotiations were stopped by the Commission two or three years ago when it became apparent to the Commission that it would not be able to finance construction for a number of years. He suggested that it would be advisable to contract this section, about 1½-mile in length and estimated to cost \$50,000, at an early date if funds can be found to finance the work and he also suggested a transfer of funds from some other project. After considerable discussion, the Commission approved the Engineer's suggestions and decided to transfer such amount from the allocation heretofore tentatively set up for the reconstruction of a section of the Oregon Coast Highway at Depoe Bay and, accordingly, authorized the Engineer to make such transfer of funds and to prepare the project for contracting as soon as possible, provided needed right of way can be acquired at reasonable cost. The Attorney was authorized and instructed to proceed with negotiations for the right of way.

A letter was presented from Mr. Ray W. Gill, Master, Oregon State Grange, in regard to the allocation of federal aid secondary highway funds. It was Mr. Gill's thought that these funds should be expended by the State Highway Commission in the improvement of outlying roads rather than for improvements contemplated by the Commission. The Engineer was instructed to write to Mr. Gill and explain to him fully the basis of the Commission's allocations and the reasons for the same. However, such letter is to be approved by Chairman Cabell before it is mailed.

The Commission had under discussion a petition signed by numerous taxpayers and citizens of Union and Walla Walla Counties urging the Commission to conduct snow removal operations on the Weston-Elgin Secondary State Highway so as to make this road available for traffic use throughout its entire length the year round. The Commission denied the request in view of the cost involved, which the Commission considered is not justified by the volume of traffic that the road carries.

The Secretary presented a newspaper clipping from the Bend Bulletin being an editorial entitled "Gasoline Tax Pays Dividends". The Commission considered this a well-written and timely editorial and instructed the Secretary to convey its appreciation for the same to Mr. Robert W. Sawyer, Editor-Manager of the paper.

A letter was presented from the Hillsboro Rotary Club inquiring whether or not the state, in connection with its program for the removal of service club signs from state highway rights of way, would consider the installation of one of the Commission's standard sign racks on private property adjacent to the Tualatin Valley Highway outside of the limits of Hillsboro. The matter was discussed but final action on the same was deferred until the next meeting.

The Commission had under discussion a letter from Mr. W. E. Reynolds, Commissioner of Public Buildings, Washington, D. C., inquiring if it would be possible to secure the services of the Highway Department's Landscape Engineer, Mr. George Otten, to collaborate with the Public Buildings Administration in a design for the planting of the United States Post-Office grounds in Salem. Mr. Reynolds explained that Mr. Otten's services would have to be gratuitous because the Federal Government is without authority to pay for his services. The Commission approved the loan of Mr. Otten's services for this undertaking.

The Engineer requested instructions relative to the disposal of an accumulation of scrap lumber and piling salvaged from the old Whiteson Bridge on the Pacific Highway West about three miles south of McMinnville. He advised that there are about 100 M-FBM of such material which is of no particular value from the state's standpoint, and recommended that it be advertised for sale on a competitive bid basis. The Commission approved the recommendation and so ordered.

The Engineer requested authority to purchase two power hoists for installation on trucks assigned to the Parks Department. He estimated the cost of the hoists at \$350, or a total of \$700.00. The Commission approved the purchase through the regular channels.

A letter was presented from County Judge J. H. Allen of Grant County requesting permission to obtain rock from a state-owned quarry located at mile post 57.79 on the Pendleton-John Day Highway. He said that the rock is to be used for a W.P.A. job and that under the W.P.A. regulations written consent of the state is required for use of the quarry. The Engineer advised that this quarry was secured for the purpose of obtaining materials for rock surfacing projects but the material is not desirable as oil aggregate, hence will be of very little use to the state in the future. He recommended approval of Judge Allen's request subject to the condition that the county will clean up the premises to the satisfaction of the Engineer when their operations are completed. The Commission approved the recommendation unanimously.

A letter was presented from Mr. Cal M. Young, County Commissioner of Lane County, advising that the county court has received an application from a Mr. T. T. Loftus, Glenada, for the purchase of a small strip of county-owned land adjacent to the Siuslaw Highway at Florence. He said that the county is inclined to sell this property but before doing so thought it advisable to ascertain whether or not the property is needed for state highway purposes. The Engineer advised that the property in question is a narrow strip of land lying between the highway and 9th Street, in Florence, and in his estimation should be acquired by the state in order to prevent its being commercialized. He recommended acquisition of the same. The Commission approved the recommendation and instructed the Attorney to secure an option from the county court.

The Commission discussed communications from the American Road Builders' Association and the Associated General Contractors of America relative to House Resolution No. 6395 now before Congress, which provides that wage rates on federal aid highway projects shall be established by the Secretary of Labor. The Commission considered such legislation inimical to the best interests of the State of Oregon and, accordingly, decided to oppose the passage of the same. The following telegram was thereupon sent to each member of the Oregon delegation in Congress:

"WE BELIEVE H.R. 6395 TO BE AN INVASION OF STATES RIGHTS AND INIMICAL TO THE BEST INTEREST OF THE STATE OF OREGON AND WILL APPRECIATE YOUR OPPOSING THIS BILL."

The Commission discussed the claim of Mr. Ben Hilton, Grants Pass, and his allegations that operation by the state of a gravel pit adjacent to Williams Creek at its crossing of the Williams Secondary Highway, in Josephine County, has interfered with his irrigation rights on certain property that he has under lease. Mr. Hilton contends that the state's excavation was made too close to the river and, as a result, considerable water seeps through the berm between the river and the pit and he is deprived of much water that he needs for irrigation purposes. He blames the state for this condition and has asked the state to do whatever is necessary to remedy it.

Commissioner Clough advised that he personally investigated this complaint. He gave as his thought that the trouble could be remedied if Mr. Hilton's dam were constructed a little farther upstream and were connected to

the present irrigation ditch by pipe line. He suggested, however, in view of the fact that Mr. Hilton will not need much irrigation water until about July 1 that the matter be held in abeyance until that time which will not only allow more time to give the matter additional study but will also provide an opportunity to see just what effect, advantageous or otherwise, the spring floods will have on the situation. Chairman Cabell approved this suggestion and it was so ordered.

The Commission confirmed its previous action setting Thursday and Friday, March 21 and 22, 1940, as the date for its next regular meeting for the receiving of bids on contract work, and instructed the Secretary to arrange to hold this meeting in the auditorium on the third floor of the Public Service Building, Portland, as usual.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the State Board of Forestry covering the use by the State Forestry Department of a roadway across a stock pile site owned by the Highway Department in Government Lot 7 of Section 36, Township 16 South, Range 8 West, W.M., Lane County.

Agreement with Colonial Construction Company disposing of its claim for additional compensation arising out of its contract with the State Highway Commission for the construction of the Corbett-Rooster Rock Section of the Columbia River Highway, in Multnomah County, Contract No. 2151.

Easement granting to Morrow County permission to maintain a roadway across certain state-owned property just west of Boardman for a period of six months in connection with a county W.P.A. Project.

Lease agreement from the United States Department of the Interior, Bureau of Reclamation, covering 2,852.08 acres situate in Townships 11 and 12 South, Range 12 East, W.M., in Jefferson County, and more particularly at the confluence of the Crooked River, Deschutes River, and the Metolius River, which property is to be used by the state for recreational purposes.

Permit granting to the Port of Umpqua the right to deposit on state-owned property at Reedsport certain spoil materials from dredging operations in the Umpqua River.

There being no further business to come before the Commission at this time the meeting was declared adjourned at 12:00 noon.

W. B. ...

Wm. M. Elough
Commissioner

Portland, Oregon, March 21, 1940

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present was Mr. Herman Oliver, John Day, Oregon, appointed by Governor Charles A. Sprague as State Highway Commissioner, effective April 1, 1940, succeeding Commissioner E. B. Aldrich, resigned.

Bids, as follows, for highway construction projects, sale of buildings, and scrap lumber were opened and read in conformance with previously-published notice:

Chairman Cabell announced that the award of contracts and sales of buildings, etc., would be made at 4:00 o'clock p. m. on the same day.

A delegation from Roseburg, representing the Chamber of Commerce, and consisting of W. C. Harding, Secretary; A. C. Marsters; County Commissioner H. B. Roadman; Harris Ellsworth, Senator C. W. Clark; and George Smith, was present in behalf of the North Umpqua County Road. They urged the Commission to extend the improvement completed last year a distance of about 1-1/8 miles to a connection with the present road, so as to make the newly-constructed portion available for general public use. Mr. Harding advised that the forest highway section of this road will be completed and ready for use by the general public about July 1st. They also urged the designation of this road as a secondary state highway throughout its entire length.

Chairman Cabell advised that the Commission is reluctant to add any more roads to the State Secondary Highway System but will give their request fair consideration. He also said that the Commission would bear in mind the request for the construction of the 1-1/8-mile section.

A delegation from Days Creek, Douglas County, consisting of Guy McGee; Carl Hill, Superintendent of Schools, Days Creek; Elton Jackson, and D. L. Weaver, was present and requested improvements to the Tiller-Trail Secondary Highway, particularly between Canyonville and Tiller. Others in the delegation were County Commissioner H. B. Roadman; Harris Ellsworth; George Smith; A. C. Marsters; and Senator C. W. Clark of Roseburg. Mr. McGee headed the group.

Mr. Jackson urged the improvement from the standpoint of the logging industry. He declared that this district contains the largest stand of sugar-pine timber remaining in the State of Oregon and that between 10 and 15 million feet of this timber is marketed annually over the Tiller-Trail Road, in view of which they consider that the expense of improving the road is fully justified. Mr. Hill spoke for the improvement from the standpoint of operation of school buses. He predicted a large increase in traffic over the road in the future and urged the Commission to provide an oil surface, at least between Canyonville and Tiller, so as to make the road safer for travel. Mr.

MAR 21 1940

Ellsworth endorsed the remarks of the other speakers. The Commission agreed to study the project.

Dr. W. D. Huntington, Aloha, appeared before the Commission in regard to a right of way matter near the town of Aloha, particularly with respect to the vacation by the Washington County Court of a section of the dedicated street that parallels the railroad at the Aloha railroad station. Dr. Huntington alleged ownership of a portion of this property and appealed to the Highway Commission for assistance in securing it inasmuch as the vacated area joins other property that he owns between the Tualatin Valley Highway and the railroad. The matter was referred to the Engineer for investigation and report.

A delegation, representing the Chambers of Commerce of Newport, Waldport, Toledo, and Agate Beach, came before the Commission in regard to several highway matters. Members of the delegation were L. C. Smith, Chairman; Larry Hill, President, Newport Chamber of Commerce; Franklin G. Gilkey, County Judge of Lincoln County; L. D. Nash, State Representative, Nashville; E. A. Woodman and Mayor James F. Baird of Newport; E. F. Altree, Agate Beach; L. G. English, District Attorney, Toledo; B. F. Updike, Toledo; and James H. McKibben, Newport.

They urged the Commission to reconstruct the Oregon Coast Highway to modern standards from Newport north and suggested that the proposed improvement at Gleneden Beach be deferred by the Commission until the sections north and south of Otter Crest have been reconstructed. They also urged the reconstruction of the McMinnaville-Tillamook Highway on the proposed new alignment east from Valley Junction, and improvements to the Corvallis-Newport Highway, consisting of widening, elimination of curves, et cetera.

Chairman Cabell advised that the Commission is cognizant of the fact that the Oregon Coast Highway should be improved between Newport and Kernville but because of the shortage of funds the Commission does not like to start the project until other important work on this highway has been completed, such as that now under way at Neahkahnie Mountain in Northern Tillamook County. He gave as his thought that the Commission might be able to start the work from Newport north when the Neahkahnie Mountain Section is completed, but not before that time because there are not sufficient funds available to finance both projects at the same time and the Commission feels that the opening of the Neahkahnie Mountain Road to general public use is of first importance. He pointed out that the Commission now has under consideration the reconstruction of a short section of the Coast Highway in the vicinity of Gleneden Beach and, if possible, will do this work this year, but believes that the proposed improvement at Otter Crest should wait until the sections north and south of this point have been revised. Furthermore, he said, the Commission believes that the improvement of the Oregon Coast Highway north of Newport should be given preference over the improvement of the Corvallis-Newport Highway between Toledo and Newport. The members of the delegation agreed to such arrangement.

Mr. Smith concluded the conference by stating that they do not want the Commission to think that they are dictating what the Commission should do

because they will be satisfied with anything, their purpose at this time being simply to urge the Commission to do something.

Mr. Hill inquired as to the Commission's plan for landscaping and sidewalk construction along the Oregon Coast Highway at Newport. The State Highway Engineer advised that this project was approved by the Commission some time ago but was inadvertently left off the list of projects that the Commission selected at the previous meeting for its 25 per cent program for 1941 Federal Aid Funds. He recommended to the Commission that this project be included in such partial program so as to insure its construction at the earliest possible time. He estimated the cost at \$25,000. The Commission approved the recommendation and authorized the Engineer to include this project in the list forwarded to the Public Roads Administration for federal approval. This concluded the conference.

The County Court of Harney County, consisting of County Judge Nelson B. Higgs and County Commissioners T. E. Jenkins and Charles A. Miler, was present and requested improvement of the Frenchglen Secondary Highway for a distance of about 8 miles south from Burns; also, the improvement of the Diamond Secondary Highway for a distance of about 7 miles south from Crane. They also asked for the improvement and oiling of the Crane-Lawen Section of the Burns-Crane Primary Highway. Judge Higgs read aloud a petition signed by residents, citizens, and business organizations of Harney County requesting such improvements.

Judge Higgs also mentioned the Princeton-Rome Secondary State Highway. He advised that C.C.C. forces under the U. S. Grazing Service have constructed a 12-mile section of this road north of Rome and they expect to construct another section south from Princeton during the coming working season, but will not be able to construct between these two sections because heavy rock excavation is involved and they are not equipped to handle such work.

Judge Higgs also asked for the paving of the unpaved strips along the highway pavement in the town of Burns, particularly on Broadway between West "V" Street and West "D" Street, and along West Monroe Street from Broadway to North Diamond Street. The Engineer was instructed to investigate the matter and report thereon.

County Judge J. B. Wilkerson of Columbia County was present and, asked for additional Federal Aid Secondary Highway Funds for county road construction in Columbia County, particularly to finance the remaining 5-mile section of the road that the County is building toward Vernonia from St. Helens. He was informed by Chairman Cabell that the Commission is directing its efforts toward the completion of the roads already started on this program and feels that the Nehalem Highway between Birkenfeld and Mist, and the secondary highway between Mist and Clatskanie should be completed before other obligations are assumed, in view of which the Commission is not in a position at the present time to give him any encouragement.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room with the same persons present and participating.

MAR 21 1940

County Judge Hugh McLain of Coos County conferred with the Commission in regard to the further improvement of the Marshfield-Coquille Section of the Oregon Coast Highway. He urged the Commission to continue the improvement of this highway, particularly two sections; viz., elimination of the curve on the Delmar Hill and the straightening of the highway between Beaver Creek and Coaledo Marsh bridges. He stressed the importance of these improvements from the traffic-safety standpoint by pointing out that it is now dangerous to travel over the road because of the large number of logging trucks that operate over it. He was informed by Chairman Cabell that the Commission considers that the North Bend-Marshfield Section is of first importance because it now carries the heaviest traffic for 2-lane pavements in the state and, until it is reconstructed, it does not appear possible to allocate additional funds to the Marshfield-Coquille Section.

The County Court of Tillamook County, consisting of County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, was present in the interests of the Wilson River Highway. They particularly inquired as to what provision has been made for the completion of the section between the Devils Lake Fork bridge and Glenwood. They were informed that the Commission has under consideration at the present time the filing of an application for additional W.P.A. funds to finance work between the bridge and a connection with the Gales Creek Road at Glenwood and beyond such point to the Gales Creek Post Office.

Commissioner Lindsey asked for the elimination of the curve where the highway emerges from the canyon at a point known as Randalls. He said that this point is at the end of the oiled section and a dangerous condition exists there which should be remedied. The matter was referred to the Engineer for investigation.

The County Court also inquired into the possibilities of securing additional Federal Aid Secondary Highway Funds for county road improvements in Tillamook County. Chairman Cabell pointed out that the Commission is handicapped this year because the Federal Aid Secondary Highway allotment for 1941 is considerably less than for the previous year and there is a question whether or not the Commission can spare any of these to Tillamook County. In any event, he said, the amount thereof will probably be small; further, it would not be possible to make the allocation early enough to contract the work during the present working season. He inquired which roads, in the opinion of the County Court, should be given prior consideration. The members of the Court appeared to be undecided as to this, whereupon the Commission referred the matter to the Engineer to discuss with the Court later, the intention being to award a contract in the fall of 1940 if there are funds available to finance it.

Commissioner Lindsey asked the Commission to improve the Wolf Creek Highway connection with the Oregon Coast Highway at Necanicum Junction. He alleged that the present connection is very poor and works to the disadvantage of Tillamook County and urged a better connection this year. The Engineer advised that he has this matter in mind but it does not seem possible to

construct a permanent connection this summer because of the expense involved; however, a survey has been made for a temporary connection which will be constructed as soon as state forces can get to it. It was his thought that such temporary connection would serve the purpose satisfactorily until the Commission can finance a permanent connection. This appeared to meet with the approval of Mr. Lindsey.

Commissioner Lindsey also requested the improvement of the Oregon Coast Highway south from the city of Tillamook. The Engineer asserted that this is a meritorious improvement because the present road is very crooked and narrow and carries a large volume of traffic. However, the revision south of Tillamook is tied up with the location of the highway through the city so it could not be constructed until plans for both sections are approved. He pointed out that he now has authority to carry on investigations south of Tillamook but not through the city. The Commission thereupon, by unanimous vote, authorized such investigation through Tillamook.

Commissioner Lindsey also requested improvement of the Oregon Coast Highway between Bay City and Garibaldi where, he declared, a dangerous condition now exists. The Commission agreed to inspect this section the next time it is in that vicinity.

Commissioner Anderson asked for additional improvements on the Little Nestucca Secondary Highway and for the construction of the proposed Dolph-Boyer project connecting the McMinnville-Tillamook Highway and the Salmon River Highway. He also asked for the widening of the pavement full width between curbs, for a distance of about two blocks in the town of Cloverdale and presented petitions signed by numerous residents of Cloverdale and vicinity requesting such improvement. He also requested the widening of a sharp curve on the Oregon Coast Highway at the southern limits of Cloverdale. The Commission referred to the Engineer, for investigation and report, the matter of widening the pavement in Cloverdale and widening of the curve at the south city limits.

Mr. Herbert Hardy, attorney for the Bonneville Power Administration, was present in regard to the use of the state highway in connection with the construction and maintenance of a substation near West Salem, in Polk County. He particularly requested permission to construct certain improvements on the highway right of way, including culverts, curbs, roadway approaches, and certain landscaping. The Engineer advised that he has studied the plans, which, he said, have been prepared in conformance with good engineering practice and are acceptable to him. He recommended approval of the Power Administration's request subject to the condition that the Bonneville Power Administration shall remove from the highway right of way all of its improvements if and when it abandons its use of said right of way. After discussion the Commission approved the Engineer's recommendation and thereupon signed a letter dated March 21, 1940, directed to Dr. Paul J. Raver, Administrator, Bonneville Power Administration, in accordance therewith.

Mr. J. S. Barber, Superintendent of the Water Board, Tigard, Oregon, came before the Commission in regard to a proposed revision of pipe lines in Tigard necessitated by the reconstruction of the Pacific Highway West through this town. The Commission referred this matter to the Engineer for handling.

A delegation from Marion County, consisting of Mayor W. W. Chadwick of Salem; Senator Douglas McKay; County Judge J. C. Siegmund; County Commissioners R. S. Nelson and Jim E. Smith; and County Engineer N. C. Hubbs, J. H. Davis, City Engineer of Salem; A. C. Haag, F. E. Needham, E. A. Miller, D. O. Lear, all of Salem, and Lee W. Eyerly and Leroy E. Grote of Roberts, came before the Commission and requested a survey of the South River Road, Salem, for a distance of about 3 miles south of the Salem city limits; they also requested the designation of the 12th Street cutoff, Salem, as a state secondary highway. County Commissioner Nelson headed the group.

Mr. Nelson advised that the County Court has in mind the further improvement of the South River Road as a V.P.A. project and wants to know how much it will cost to do the work to proper standards. He read aloud and filed with the Commission two letters requesting these projects. Speaking on behalf of the delegation were Commissioner Nelson and Senator McKay. After discussion, the Commission, by unanimous vote, authorized the Engineer to conduct a survey of the South River Road as may be necessary to provide a permanent improvement, the cost of the survey to be paid by the State. The Commission took under advisement the matter of designating the 12th street cutoff as a state secondary highway.

Mr. A. J. Price, President of the Old Wasco County Pioneers' Association, was present and asked the Commission to approve the erection of a monument upon the right of way of the Columbia River Highway near the town of Biggs as a memorial to pioneers who first reached the Columbia River at this point. He said that the Association will hold its annual meeting in May and would like to dedicate the monument at that time. He asked the Commission to approve the project and erect the monument but stated that the Association will pay its share of the cost and will furnish a properly inscribed tablet. Chairman Cabell explained that the Commission recently appointed a committee to pass on historical sites along the Old Oregon Trail. He suggested that Mr. Price contact Mr. Ray Conway of this committee. Mr. Price expressed the hope that something definite can be worked out at least for a temporary installation so that it can be dedicated by the Association at its annual meeting. He agreed to discuss the matter with Mr. Conway.

Mr. C. E. Gates of Medford, was present in regard to the Little Butte Creek Secondary Highway. He urged the Commission to complete the construction of this road up to Lake of the Woods which, he said, would reduce the distance from Medford to this point by some 26 miles. The matter was discussed at considerable length during which it was explained to Mr. Gates that the project is very costly and the Commission does not have funds available to finance it at the present time, particularly in view of the fact that the Commission is convinced from studies of the road that it is not as important as many other roads in the state which are in an uncompleted status, hence the Commission

would not be justified in allocating funds to it now. The Commission agreed to inspect the road the next time it is in that vicinity.

A delegation from Curry County, consisting of S. O. Newhouse, County Surveyor; Mrs. Kay Latimer and W. F. Miller of Wedderburn; A. G. Walker of Gold Beach; Onas S. Olson of Salem; and W. F. Bushnell and A. W. Strowger of Portland, was present relative to the improvement of the county road which extends up the Rogue River from the town of Wedderburn. They requested the improvement as a Federal Aid Secondary Highway and particularly urged modification in the alignment proposed by the State at the lower end of the road so as to follow more closely the existing road because, they alleged, if the road were constructed on the alignment proposed by the State it would be inundated during periods of high water whereas the existing road is at a higher elevation and would not be subject to such flood conditions. They pointed out that the Highway Commission at one time allocated \$10,000 of federal funds to improve this road but the project did not materialize because the County was unable to furnish right of way as required and they gave as their thought that, if the Commission will revise the alignment at the lower end, as requested, the cost of right of way would be greatly reduced, in which event it might be possible for the County to meet the requirements as to the right of way. They asked for a resurvey of this section using minimum specifications, and also asked for a resurvey at the upper end of the road so as to avoid certain private property on which the owner has constructed a fine home which will be only 15 feet from the highway unless the highway is realigned. It was their thought that considerable right of way would be donated if the Commission would change its plans as requested.

They also advised that the property owners would raise funds by private subscription to do a certain amount of construction work at the upper end of the road. Speaking on behalf of this project were Mrs. Latimer, Mr. Newhouse and Mr. Strowger. Mrs. Latimer alleged that 90 per cent of the people of Curry County are in favor of the improvement of the present road rather than construction of a new road as planned by the Commission, and read aloud a petition signed by numerous residents to that effect. Mr. Strowger stated that there are many fine home sites along this road and that numerous people from California would invest in and develop these sites if a good road were provided to them. He urged favorable consideration by the Commission.

Chairman Cabell explained the federal secondary highway regulations and advised that the Commission will be pleased to reconsider this matter but is not in a position to give a definite decision today, either as to the improvement or the survey, because the matter would have to be discussed first with the County Court and with the engineers of the Public Roads Administration. He agreed to inspect the road the next time he is in that vicinity, stating that the Commission is anxious to do something in Curry County, if possible. It was agreed that the Commission would get in touch with Mr. Newhouse when it contemplates the trip into Curry County.

The County Court of Morrow County, represented by County Commissioners George N. Peck and L. D. Neill, and County Engineer H. Tamblin, was

present in regard to the Wasco-Heppner Secondary Highway. They were accompanied by Mr. P. W. Mahoney, President of the Heppner Chamber of Commerce. They urged the Commission to complete the oiling of the Wasco-Heppner Secondary Highway from the end of the present improvement to the junction with the Heppner-Spray Secondary Highway, near a place known as Rugge; also to reconstruct the Heppner-Spray Road from said junction point to Hardman, and to oil the primary state highway between Heppner and Lena. They particularly urged the contracting of the Heppner-Rhea Creek project at an early date so that the work could be completed this year.

Chairman Cabell explained the status of the Commission's finances and advised that the Heppner-Rhea Creek project is at the top of the list of priority projects for contracting in July provided funds are available at that time to finance the work, but it is yet too early to state definitely whether or not it will be possible to place the work under contract at that time. The Engineer pointed out that the Heppner-Lena Road is not in condition at the present time to receive an oil treatment as was thought to be the case a few months ago. Subsequent investigation, he said, shows that considerable stabilization rock will have to be added which will cost about \$50,000, which is more than the Commission feels it can spare at the present time. Chairman Cabell added that the Commission appreciates that this would be a meritorious improvement but is not in a position to make any definite commitment to the project now because of the limited amount of funds available but the Commission will be pleased to reconsider it later on if savings accrue from maintenance operations during the present winter season.

A delegation from Oswego, headed by Dr. William H. Cane, and including 37 members, came before the Commission in regard to the landscaping of the Oswego Highway through the town of Oswego. They inquired as to the policy of the Highway Commission to cooperate in such projects. They were informed by Chairman Cabell that it is the policy of the State Highway Commission to cooperate in movements to beautify the roadsides of this state and occasionally the Commission contributes funds to help pay the cost of the work. He suggested that it would be advisable, before the Commission makes any definite statements in regard to the Oswego project, that the project be investigated by the Highway Department's engineers to determine its feasibility and the cost involved.

The Engineer advised that certain investigations have already been made for this improvement but the report has not as yet been prepared in a form to submit to the Commission, although he anticipates that it will be ready to render at the next meeting. Chairman Cabell thereupon advised the delegation that the Commission will study the Engineer's report and, if the project can be worked out satisfactorily, the Commission will proceed with the work.

At 5:00 o'clock p. m. Chairman Cabell announced the award of contracts, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote, as follows:

"Ochoco Creek-Prineville Section of the Warm Springs Secondary Highway, in Crook County. 1.29 miles grading. The low bid received on this project was that of Homer G. Johnson, Portland, in the amount of \$10,158.00. The next low bid was that of Leonard & Slate, Multhomah, in the amount of \$11,176.00. There were 11 higher bidders. The Commission awards this contract to the low bidder, Homer G. Johnson, at his bid of \$10,158.00.

"Austin Junction-Baker County Line Section of the John Day Highway, in Grant County. 4.73 miles grade widening, 9.59 miles surfacing and oiling; also furnish 3,000 cu. yds. crushed rock in stock piles. Fisher Bros., Oregon City, submitted the low bid for this project in the amount of \$73,006.20. Triangle Construction Company, Boise, Idaho, submitted the next low bid in the amount of \$74,311.00. There were 9 higher bidders. This contract is awarded to Fisher Bros. at their low bid of \$73,006.20.

"Lamonta-Crook County Line Section of the Warm Springs Secondary Highway, in Jefferson County. 6.25 miles grading and 10 miles fencing. Frank Penepacker, Portland, submitted the low bid on this job in the amount of \$28,440.00. Coos Bay Dredging Company, Marshfield, submitted the next low bid in the amount of \$29,748.95. There were 7 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Construction of maintenance patrolmen's headquarters adjacent to the Willamette Highway, near Odell Lake, in Klamath County. Barham Bros., Salem, submitted the low bid for this work in the amount of \$32,441.00. The bids of Walter Stutte and Leo Huls were irregular in that all of the columns were not filled in and, as a result, it was impossible to know what was intended. The Commission plans to print instructions as a guide to contractors hereafter, but in the present instance the bids were made out in such way that it was impossible for the Commission to know just what the bidders had in mind, hence they could not be considered. In view of the circumstances, the apparent second-low bid was that of Vernon Bros. Company, Boise, Idaho, in the amount of \$33,873.00. There were 8 higher bidders. This project is awarded to Barham Bros., at their low bid of \$32,441.00.

"Low Pass Section of the Siuslaw Highway, in Lane County. 3.57 miles grade widening, surfacing, and oiling; also furnish 1,500 cu. yds. crushed material in stock piles. Fisher Bros., of Oregon City, submitted the low bid for this project, in the amount of \$63,483.75, using asphalt, and \$63,699.75, using tar. McNutt Bros., Eugene, submitted the next low bid in the amount of \$72,088.50, using asphalt, and \$72,160.50, using tar. There were 2 higher bidders. This contract is awarded to the low bidders, Fisher Bros., at their low bid of \$63,483.75, based on the use of asphalt.

MAR 11 1940

"Drilling and casing a well on State Highway Commission's property north of McDermitt, on the I.O.N. Highway, in Malheur County. Three bids were received for this project, the low one being that of J. Naillon, Ontario, in the amount of \$1,076.00. The second low bid was that of Williams Drilling Company, North Powder, in the amount of \$1,380.00. The Commission rejects all bids and has ordered the project readvertised.

"Middle Unit, Troutdale-Corbett Section of the Columbia River Highway, in Multnomah County. 0.42 mile (5.0 acres) right of way clearing. Vernie Jarl of Gresham submitted the low bid for this project in the amount of \$600.00. Erick Enquist, Troutdale, submitted the second low bid in the sum of \$700.00. There were 4 higher bidders. This contract is awarded to the low bidder, Vernie Jarl, at his bid of \$600.00.

"South Unit, Fulton Canyon Section of the Fulton Canyon-Wasco County Road, in Sherman County. 1.62 miles grading and surfacing; also construct two and extend one reinforced concrete box culverts. The low bid for this project was that of the Mid-Columbia Sand and Gravel Company, The Dalles, in the amount of \$17,991.10. The next low bid was that of H. B. Klineline, Vancouver, Washington, in the amount of \$19,910.50. There were 6 higher bidders. The Commission awards this contract to the Mid-Columbia Sand and Gravel Company at its low bid of \$17,991.10.

"Weston-McDougall Camp Section of the Weston-Elgin Secondary Highway, in Umatilla County. 14.57 miles oiling. The low submitted for this project was that of Norris Brothers, Burlington, Washington, at \$8,462.00. The next low bid was that submitted by J. C. Compton, McMinnville, at \$8,872.40. There were three higher bidders. The Commission has awarded this contract to the low bidder, Norris Brothers, at their bid price of \$8,462.00.

"Catherine Creek Bridge Section of the Medical Springs Secondary Highway, in Union County. Construction of 81 ft. of composite trestle and 0.35 mile of highway roadbed. Denten and Young, Boise, Idaho, submitted the low bid for this project at \$9,307.00. Averill and Corbin, Portland, submitted the next low bid at \$11,290.00. There were two higher bidders. The Commission has awarded this contract to Denten and Young, the low bidders, at their bid price of \$9,307.00.

"Caster Ranch-Joseph Section of the Hurricane Creek County Road, in Wallowa County. 1.58 miles grading, surfacing and oiling, and construction of 77 lineal feet composite type bridges. The Commission received four bids for this project, the low one being that of Norris Brothers, Burlington, Washington, at \$25,204.50. The second low bid was that of McNutt Brothers, Eugene, at \$25,891.50. The Commission has awarded this contract to the low bidder, Norris Brothers, at their bid price of \$25,204.50.

"Tigard Section of the Pacific Highway West, in Washington County. 1.74 miles grading and paving. Roy L. Houck, Salem, submitted the low bid for this project at \$178,724.50. The next low bid was submitted by Jacobsen-Jensen Company, Portland, at \$202,633.50. There were seven higher bidders. The Commission has awarded the contract to the low bidder, Roy L. Houck, at his bid price of \$178,724.50.

"Sale of approximately 152 M-FBM scrap lumber and piling at the site of the old Whiteson Bridge on the Pacific Highway West, near McMinnville, in Yamhill County. The only bid received by the Commission for the purchase of this material was that submitted by the Weatherly Boom Company, Newberg, at \$280.00. The Commission has accepted this bid and has sold the material to the Weatherly Boom Company for the amount of its offer."

Chairman Cabell also announced that the successful bidders for the purchase of buildings would be announced on the following morning at 11:00 o'clock.

The Commission had under discussion the matter of holding a special meeting in Salem prior to the next regular meeting to dispose of accumulated routine matters, it being apparent that the Commission would be unable to dispose of such matters at the present meeting. It was decided to hold such meeting on Monday, April 8, 1940, in the office of the State Highway Engineer, Salem. (This date was later changed to Tuesday, April 9.)

The Commission adjourned at 5:30 o'clock p. m. to reconvene on the following morning at 9:00 o'clock in the same room.

Portland, Oregon, March 22, 1940

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 Huron W. Clough, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

County Judge Charles E. Baird of Baker County came before the Commission in regard to the oiling of the Flagstaff-Lower Powder Section of the Baker-Homestead Highway. He urged the Commission to allocate funds for the reconstruction of this section on permanent alignment and presented numerous arguments in support thereof. He suggested that if the Commission is unable to finance the entire section this year half of the work be done this year and the balance next year, and advised that the people of Baker County would not be satisfied with the oiling of the present road, as proposed by the Commission, and that they would prefer that nothing be done if they cannot secure permanent construction.

Chairman Cabell explained that the Commission realizes that the present road is not on the proper alignment or in the best of condition, and it was the Commission's thought that the people particularly wanted a dustless road which was the reason that the Commission authorized the light oil treatment this year at minimum expense. The estimated cost to construct on permanent alignment, he said, is in excess of \$200,000 which the Commission cannot spare at the present time in fairness to other parts of the state, particularly in view of the fact that so much money is now being spent in the Baker district. The Commission's construction program for this year, he said, has already been prepared and includes an item of \$10,000 for the oiling of the section under discussion. However, if the people of Baker County do not want this improvement, then of course the funds will have to be reallocated to some other project, preferably in Baker County so that Baker County would not lose the benefit of the same. He reiterated that the Commission does not have money available to even start construction on the permanent alignment now.

Commissioner Aldrich gave as his opinion, in view of the circumstances, that it would be advisable to improve the present road which would serve traffic until the Commission is able to finance construction on the permanent line. He pointed out that this highway is not on the federal aid system so would have to be financed entirely with state money, however predicted nevertheless that the new line would be built in four or five years. Commissioner Clough concurred in the statements made by Chairman Cabell and Commissioner Aldrich. After further discussion, Chairman Cabell informed Judge Baird that the Commission would bear this project in mind and discuss with the engineer the possibilities of building the new line by stage construction.

Messrs. Harry Coffey and O. A. Feland, representing the Mutual Benefit Health and Accident Insurance Company, discussed with the Commission matters pertaining to the furnishing of group insurance covering salaried employees of the State Highway Department. The Assistant Attorney reported on the proposed form of agreement covering the matter and pointed out several features which, in his estimation, should be modified. After discussion, the Commission indicated that it would approve the agreement with the modifications recommended and would authorize deductions from monthly payrolls to pay the premiums. The matter was re-referred to the Assistant Attorney to iron out the differences with the insurance company. He was instructed to present the matter to the Commission again at its next regular meeting.

Mr. John Whiz, Celilo Indian and interpreter for Chief Tommy Thompson, was present in regard to the improvement of the Columbia River Highway past the Celilo Indian village near The Dalles, also in regard to the cleaning up of the Indian village proper. He stated that arrangements have been made for him to go to Washington, D. C., on behalf of the Celilo Indians and inquired whether or not the Commission has objections to his using and quoting the State Highway Engineer's letter dated February 16, 1940, to M. A. Johnson, Superintendent, Yakima Indian Reservation, which, he believed, would help their cause considerably. He was authorized by the Commission to use this letter as he sees fit. Mr. Whiz then reported that, in accordance with the understanding that was reached when Chief Thompson and other members of the tribe appeared before the Commission at its last meeting, Chief Thompson called a

meeting of the Indians of the Celilo tribe and those of the Yakima and Warm Springs tribes in regard to the Commission's proposal for right of way and the cleaning up of their village but no agreement was reached, it appearing that the site proposed for the use of the Yakima and Warm Springs Indians was not acceptable to them, hence there is nothing to report. He advised, however, that it is his intention to take the matter up with the authorities in Washington, D. C.

Mr. Whiz then asked the Commission to take action to control the speed of traffic past the Celilo Indian village. He said that under present conditions traffic speeds by the village at an excessive rate endangering the lives of the Indians, particularly when crossing the highway in going to and from the Celilo store. After discussion, it was agreed that nothing should be done in regard to this matter until it is known whether or not the present plan, which involves the construction of a pedestrian underpass, meets with the approval of the authorities. In the event that such plan is not approved then the Commission will give the matter further study.

At 11:00 o'clock a. m. Chairman Cabell announced the following sales of buildings at Marshfield and Cottage Grove, bids for which were received by the Commission on the previous day, such sales having been previously approved by the Commission by unanimous vote:

Buildings at Marshfield:

"Building No. 7827 (formerly owned by Monrad Underland). Five bids were received for the purchase of this building, the high one being that of C. V. Bloyd, Marshfield, at \$37.50. The second high bid was that of Kenneth E. Dodd, Eugene, at \$26.00. The Commission considers the bid submitted by Mr. Bloyd satisfactory, and accordingly sells the building to him at his bid of \$37.50.

"Building No. 7826 (formerly owned by Garland F. Lillie). The high bid was submitted by Elmer Mikulecky, Marshfield, at \$40.00. This is Mr. Mikulecky's second choice. Inasmuch as his bid on another building has been accepted by the Commission, the bid for building No. 7826 cannot be considered. The second high bid was submitted by Mr. Ed Lorsung, Marshfield, at \$40.00. Mr. Lorsung's bid was contingent upon his being sold all of the buildings at Marshfield, hence cannot be considered, inasmuch as he was not a successful bidder for the other buildings. The third high bid was submitted by Kenneth E. Dodd, Eugene, at \$31.00. The only other bid was submitted by Frank Davies, Eastside, at \$17.00. The Commission has accepted the bid of Mr. Dodd and has sold the building to him at his bid price of \$31.00.

"Building No. 7824 (formerly owned by the George W. Davidson Estate). The high bid was submitted by C. V. Bloyd, Marshfield, at \$22.50. Mr. Bloyd qualified his bid by stating that he would purchase only one building at this letting. His offer for Building No. 7827 has been accepted, so his bid for Building No. 7824 cannot

MAR 22 1940

be considered. The next high bid was submitted by Kenneth E. Dodd, Eugene, at \$20.00. Frank Davies, Eastside, was next at \$17.00. There were two lower bidders. The Commission has sold the building to Mr. Kenneth E. Dodd at his bid price of \$20.00.

"Building No. 7825 (formerly owned by Ida D'Ambrosia). The high bidder for this building was Elmer Mikulecky, Marshfield, at \$200.00. The next high bid was that submitted by E. B. Pope, Marshfield, at \$100.00. There were three lower bidders. The Commission has sold the building to Mr. Mikulecky at his bid price of \$200."

Buildings at Cottage Grove:

"Building No. 5694, (formerly owned by A. W. Helliwell). With either tract A, or tract B, or with both tracts. The Commission received no bids for this property under any of these alternates. However, the Commission did receive a bid for Tract A alone, being that of D. C. Greening, Cottage Grove, in the amount of \$500.00. The Commission has rejected this bid as being unsatisfactory.

"Building No. 5694, alone. The only bid received for this building was submitted by Kenneth E. Dodd, Eugene, at \$206.00. The Commission considers this bid satisfactory and has sold the building to Mr. Dodd at his bid price.

"Building No. 5638 (formerly owned by Naomi Hoskins Preston). No bids were submitted for the purchase of this building."

Mr. James Morrell of the Consolidated Freight Lines, Portland, came before the Commission in regard to the company's request for a blanket permit authorizing the movement of its trucks, which are 11'6" in height, over state highways, particularly over the Pacific Highway between Portland and the California line and over the Old Oregon Trail between Portland and Ontario. He advised that his company has given careful consideration to the Highway Commission's proposal that the company pay the cost of depressing the Pacific Highway at the Springfield and the Goshen undercrossings, which work is estimated to cost in excess of \$4,000, and has decided that it cannot pay such cost because it believes that it should not be held responsible for these improvements in view of the fact that they are improvements for the benefit of the entire general public. After discussion the Commission decided unanimously to pay such expense with state funds and instructed the Engineer to have the work performed as soon as possible. He was also instructed in the meantime to investigate the clearances at both of these underpasses. If such investigation reveals sufficient clearance for 11'6" overall-height vehicles then the Commission will issue a permit authorizing the company to move its trucks over this highway at once; otherwise, the issuance of a permit will be deferred until the vertical clearance of each pass has been increased. As to the company's request for a similar permit to move its trucks over the Old Oregon Trail, the Engineer reported that there is sufficient clearance at all points except at the Mosier Tunnel where investigation reveals it would not be possible for two trucks each 11'6" in height to pass in the tunnel. Some

discussion was had as to the possibility of controlling traffic at this point by means of manually operated traffic lights. The Commission's decision in this matter was deferred pending further investigation by the Engineer. He was instructed to have the Traffic Engineer ride with one of the Consolidated Freight Line trucks through this tunnel and ascertain whether or not it would be possible to negotiate the tunnel without crossing the highway center stripe. The possibility of the truck passing through the tunnel without crossing the center stripe would indicate sufficient clearance for two trucks to pass in the tunnel and, under such circumstances, the Commission would authorize the granting of a permit for the 11'6" overall height movement without special flagmen or under the protection of traffic lights.

Mr. A. B. Sanders, Manager of the Oregon Coast Highway Association, was present and asked the Commission to postpone the further cutting of Scotch Broom along the Oregon Coast Highway, in Douglas County, until that already cut has grown back to normal size. The Engineer was instructed to have the Landscape Engineer look into the matter.

Mr. Bud Dietlein, owner of the diorama that was exhibited in the Oregon booth at the San Francisco Fair in 1939, was present in regard to renewing his contract with the Commission for the showing of this diorama at this Fair in 1940. He agreed to exhibit the same if paid the sum of \$3,000. He gave as his thought that the equipment has proved itself and that it is worth such sum if exhibited again this year. The Commission took the matter under advisement.

A delegation from Eugene, consisting of Messrs. Wm. Tugman, Ed. Turnbull, Mayor Elisha Large, and Fred Stickels, President of the Chamber of Commerce, came before the Commission in regard to the Commission's plans for the rerouting of the Pacific Highway through Eugene. The Engineer reported briefly the results of the surveys that have been made of this project which include not only the rerouting of this highway through Eugene but covers the matter of connections with the McKenzie and the Willamette Highways. He recommended adoption of the so-called Goshen Route for the Willamette Highway connection and the retention of the present route of the Pacific Highway from Goshen northerly to Springfield, thence to Eugene, following closely the existing route, with revisions to eliminate railroad grade crossings, provided the City of Eugene will adopt ordinances ordering one-way traffic on certain streets in Eugene. Otherwise, he said, the Commission would probably be forced to construct the highway on a permanent route which would bypass the City of Eugene on the west. He also recommended the construction of the Eugene-Springfield Section as the first project, involving the moving of the railroad closer to the river, and the construction of four-lane pavement between Eugene and Springfield. As a second project, he recommended the construction of the Willamette Highway easterly from the town of Goshen. The Commission indicated approval of the Engineer's report and recommendations and informed the delegation that in its opinion the Eugene-Springfield project is a logical one for 1941 grade crossing elimination funds. The plan as outlined appeared to meet with the approval of the delegation, whereupon the Commission decided to hold a public hearing on the matter in Eugene on Wednesday, May 1, 1940, starting at 2:00 o'clock p. m. The Secretary was instructed to formally notify the city of the

MAR 22 1940

hearing. The Engineer was thereupon authorized to release his report on this subject to the newspapers during the following week.

Mayor Large advised that the City of Eugene will cooperate in every way possible in this undertaking. He gave as his opinion that the City Council would not hesitate to adopt ordinances providing for one-way traffic streets as may be required. Mr. Turnbull suggested construction of an extension of 7th Street to a connection with the Pacific Highway west of Eugene, as an aid to the traffic problem. He also suggested that the Commission designate as a secondary state highway an extension of the Pacific Highway from 7th Street to 11th Street, in order to provide a state highway connection with the so-called "Route F" Highway to the Coast. The Commission agreed to consider the matter. This concluded the conference.

The Commission by unanimous vote approved the minutes of the meeting held on January 10, 11 and 12, 1940.

The matter of acquisition of right of way through the Jordan property at Troutdale came up for informal discussion and it was revealed that Chairman Cabell, responding to Mr. Jordan's request, personally inspected the property. After some general discussion, Mr. Cabell suggested that inquiry be made to ascertain the price for which Mr. Jordan's entire ranch could be purchased and also the price for which not only the right of way but the land lying between the right of way and the dike could be purchased and the Commission would then give further consideration to the subject.

The Engineer read aloud a report from the State Parks Superintendent relative to the acquisition of timber strips along the Pendleton-John Day Highway. The report was to the effect that the Pilot Rock Lumber Company which owns this timber is willing to sell to the state the timber situate in the Canas Creek area and along the John Day River between Canas Creek Bridge and the north boundary of the Whitman National Forest, at the Umatilla-Grant County line, at the following rates: \$3.00 per M-FBM for the pine timber and \$0.75 per M-FBM for the tamarack, there being no charge for the fir, sale being based upon a timber cruise made by the present owners and being contingent upon the company retaining title to the land. The report also indicates that there are some 1,200 acres involved in this transaction and that the timber stand is approximately 4,000 feet per acre which makes the cost approximately \$12.00 per acre. It was the Parks Superintendent's belief that the acquisition of these timber strips would make a timely and pleasing addition to one of the generally treeless Eastern Oregon highways if the land could be obtained along with the timber. The Commission appeared reluctant to acquire the timber only. After discussion, during which Commissioner Aldrich expressed his opinion that at least some of this timber land should be purchased, the matter was referred to the Right of Way Department to negotiate with the owners and secure options, if possible, after first consulting with the Parks Superintendent.

The Commission had under discussion a letter from the Oregon Washington Railroad and Navigation Company relative to the purchase by the company of a strip of land 40 feet wide and approximately 870 feet long adjoining the

northerly right of way line of the railroad in the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 4, Township 2 North, Range 9 East, W.M., near Lindsey, in Hood River County. They explained that the Railroad Company is making a line change in this vicinity and needs this additional strip of property for the extension of its slopes; that this land is below the normal pool level of the Columbia River and is now covered by water; and that the tract embraces approximately 0.8 acre of land for which the company is willing to pay the state \$20.00 cash. The Engineer advised that this property is a portion of the Starvation Creek State Park and, according to the State Parks Superintendent, is not particularly needed for park purposes. He recommended, in view thereof, that the 0.8 acre be sold to the railroad company at the price offered. The Commission approved the recommendation unanimously subject to the condition that the deed by which the property was conveyed to the state does not contain provision prohibiting resale by the state of any portion of the property. The matter was referred to the Attorney for handling.

A letter was presented to the Commission from Mr. A. M. Williams, Chairman of the North Lincoln Park Committee, Nelscott, advising that a Mr. W. L. Graham, Portland, who owns 20 acres of land on both sides of the Oregon Coast Highway between Delake and Nelscott on which there is a fine stand of virgin timber, has plans for the sale of this timber in the near future, and suggesting that the Highway Commission purchase a strip at least 100 feet wide fronting on the highway for about 660 feet, so as to preserve the timber standing thereon for public use and enjoyment. The Engineer was instructed to refer this matter to the State Parks Superintendent for investigation and to ascertain whether or not a strip 100 feet wide would be sufficient.

The Commission had under discussion the matter of authorizing Harold B. Say, Manager of the Travel and Information Department, to make a trip into California, involving about 16 days and an outlay of approximately \$100 for expenses, starting about April 20, 1940. Also, the advisability of authorizing Mr. Say to make a trip into the Middle West, starting about the middle of May, and involving a state expenditure of approximately \$200, which trips are for the purpose of promoting tourist travel for the benefit of Oregon. The Engineer advised that Mr. Say has it in mind to contact various motor clubs and newspapers in the western and mid-western sections of the United States, particularly in the areas from which Oregon is now deriving substantial travel and, with proper efforts, can expect increased travel. Further, that the mid-western trip would include stops at Salt Lake City, Denver, Omaha, Kansas City, St. Louis, Chicago, Milwaukee, Minneapolis, Detroit, Cleveland, Cincinnati, Fargo, Yellowstone, and Billings. He also said that Mr. Say will be accompanied by Mr. Ray Andrews, Vice President of the Botsford, Constantine and Gardiner Company, which company is handling publicity matters for the Highway Department. He recommended that Mr. Say be authorized to make these trips. The Commission approved the recommendation by unanimous vote, subject to approval by Governor Charles A. Sprague.

The Commission adjourned at 12:45 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with Chairman Cabell and Commissioner Clough present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

MAR 22 1940

The Commission conferred with representatives of the logging and lumber industries regarding the transportation over state highways of loads of logs, piling, et cetera, the overall length of which exceeds the statutory limit of 50 feet. There were approximately 50 representatives of the lumber and logging industries present including the following: R. K. McCulloch, Eugene; James Elliott, Astoria; E. VanVleet, Seaside; H. J. Cox, Eugene, Secretary-Manager of the Willamette Valley Lumbermen's Association; Senator F. M. Franciscovich, Astoria, representing the Clatsop County loggers; Fred W. Packwood, attorney, Portland, representing the lumber industry in general; W. S. Pratt, Milwaukie, contract hauler; Baxter Moore, Colton; F. D. Butler of the Thompson Lumber Company; O. K. Mowat of the Colton Logging and Lumber Company; T. W. Collins; and a Mr. Haley.

Chairman Cabell opened the meeting by explaining its purpose. He advised that the Commission is greatly concerned about the matter of granting permits for the transportation over state highways of logs involving overall lengths in excess of the 50-foot limitation specified by statute. He pointed out that the Highway Commission was granted limited authority by the Legislature to grant permits for emergency and isolated movements, but the Legislature did not give the Commission blanket authority to issue overlength permits indiscriminately. In fact, the Commission considers, he said, that the Legislature, by its action at the 1939 session when it voted down the bill that would have increased the overall length to 60 feet, does not want loads of such length moved over the highways of this state, except in cases of emergency, and in view thereof the Commission has decided not to grant permits for the same. However, if the applicant can clearly show that the logs are for emergency use in providing extra long timbers and are not to be cut into shorter lengths at the mill, then the Commission will give special consideration to the request and may grant special permits in the event that seems proper. This procedure, he said, will not entirely solve the problem but will aid greatly in its solution. Also, that special forms of application are to be prepared for use of each operator in filing his request for an overlength permit. Chairman Cabell then invited those present to express themselves in regard thereto.

There followed a general discussion of the matter during which it was pointed out by the operators that they do not know when they receive an order for long logs for what purpose the logs are to be used or where they are to be delivered eventually. In fact, about all that they do know is that the logs are going to the river for the open market. It was also pointed out that logs in long lengths are more salable than in shorter lengths, hence bring a better price. Mr. Elliott inquired whether or not the new ruling would be retroactive. He pointed out that he plans his operations well in advance and at the present time he has about 2 million feet of extra long logs ready in the woods for immediate delivery. He asked whether or not it would be necessary to buck these logs into shorter lengths. The Commission decided that if Mr. Elliott or any other operator will certify that his logs were bucked into the longer lengths before the Highway Commission's new rules became effective, then permission would be granted to move them over the highway, but no permit would be granted for logs so cut after the new rule becomes effective.

The Commission was asked if it intends to discontinue the granting of permits for the hauling of extra long logs. Chairman Cabell replied in the affirmative, stating that such permits would not be granted unless the owner would certify that they are not to be cut into shorter lengths at the mill. He added that the argument that the owners secure more money for the long logs is not a good one and is not sufficient to justify the granting of permits.

Senator Franciscovich stated that his clients are not particularly concerned with the new ruling because their operations are confined to the hauling of short logs which, he understands, the Commission will allow to be transported without permit. Logs of such length, he said, will not be re-sawed into shorter lengths at the mill. He also said that he was a member of the Legislature when the law specifying maximum lengths was enacted and, as he recalls, it was the general feeling of the Legislators that the Highway Commission should have authority to grant overlength permits whenever it considers it necessary to do so. He suggested that the affidavit contained in the application for an overlength permit be sworn to by the logging operator rather than by the individual trucker. The Commission indicated that the suggestion was worthy of consideration.

Mr. Packwood asserted that the operators do not know where the logs are going when they deliver them, hence the proposed ruling of the Commission requiring the operator to state where the logs are to be delivered is not practicable. He gave as his interpretation of the law that the Commission now has authority to grant overlength permits at its discretion and suggested the continuance of past practice in this regard, at least until some court decides the issue and, in any event, until the next Legislature convenes when the matter can be clarified. He asked the Commission to defer putting the new regulations into effect until he has had an opportunity to discuss with the Commission's Attorney, and other attorneys, the legal features. Chairman Cabell gave as his opinion that Mr. Packwood's request is reasonable whereupon the Commission instructed the Attorney to consult with Mr. Packwood in regard thereto. The Commission decided that, if it can be convinced by these attorneys that it now has the authority to grant overlength permits, then it would authorize continuance of the granting of the same until the meeting of the Legislature in January of 1941.

Chairman Cabell concluded the conference by stating that there is no question but that considerable confusion exists at the present time, however, in his estimation, it is not a matter for the State Highway Commission to tell the Legislature what to do, but on the contrary it is the function of the Commission to carry out the instructions and orders issued by the Legislature and if the logging industry is not satisfied with the present laws it must take the initiative in securing additional legislation. The conference was concluded at 3:00 o'clock p. m.

The Commission had under discussion the matter of acquiring from the Koster Products Company 116 acres of timber land situate adjacent to the Wolf Creek Highway between the Nehalem River and Quartz Creek. C. W. Parker, right of way buyer, reported results of his negotiations with the company for the

MAR 22 1940

acquisition of this tract which, he said, contains about 1,400 M-FBM of timber. He advised that the company is willing to exchange this property on a foot per foot basis for burned timber owned by the state south of the Wolf Creek Highway right of way in Section 33, T. 4 N., R. 6 W., W.M., Clatsop County, and in Sections 3 and 4, T. 3 N., R. 6 W., W.M., Tillamook County, there being 1,240 M-FBM of such burned timber, provided the state will pay the company \$545 cash in addition thereto to equalize the settlement. He recommended acquisition of the property on such basis. The Commission, after discussion, approved the recommendation unanimously.

The Attorney brought up for discussion the settlement for right of way across the Frank Heck property at Cottage Grove. He recalled that the Commission previously authorized an offer of \$16,000 in connection with the condemnation of this property which offer was refused, but Mr. Heck has stated his willingness to accept the sum of \$16,750. He recommended settlement at such figure in order to avoid condemnation. After discussion the Commission approved the recommendation unanimously.

The Secretary presented a letter from the Honorable Charles A. Sprague, Governor, advising, as a matter of record, that he has appointed Mr. Herman Oliver, John Day, Oregon, as a member of the State Highway Commission to succeed Mr. E. B. Aldrich at the expiration of his term on March 31, 1940, said appointment to expire on March 31, 1943. The Commission ordered the letter acknowledged and filed.

The Engineer reported serious damage being done to the Woodburn-Sandy Secondary State Highway west of Molalla by log haulers, with the result that maintenance costs have become excessive and the section crews are unable to keep the road in passable condition regardless of the fact that they have performed intensive maintenance work. He suggested that the Commission order a 50 per cent reduced load limit on this section until such time as the road becomes stable enough to withstand legal weight loads. He also reported a similar condition on the Albany-Lyons Secondary Highway, near Crabtree, and recommended similar action by the Commission on this road. He was instructed by the Commission to inspect these roads personally and to post them for such reduced load limits in the event he considers that advisable.

The Engineer also reported that the reduced load limit heretofore ordered by the Commission for the Nye Junction-Ukiah Section of the Pendleton-John Day Highway is no longer required inasmuch as the road has dried out sufficiently to withstand legal weight loads. He recommended lifting the reduced limit on this section. The Commission approved the recommendation and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, on the 16th day of February, 1940, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on several state highways, including the following:

PENDLETON-JOHN DAY HIGHWAY from Nye Junction to Ukiah, in Umatilla County;

and

MAR 22 1940

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

PENDLETON-JOHN DAY HIGHWAY from Nye Junction to Ukiah, in Umatilla County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the County Clerk of Umatilla County in which said highway is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The question of the penalty to impose on log haulers who have overloaded their trucks in log hauling operations on the Elsie-Jewell Road, in Clatsop County, had the attention of the Commission. The Engineer advised that recently officers of the State Police Department arrested several operators on this road and, in weighing the loads, found that they were grossly overloaded, in one instance the overload being 7,100 pounds and in another instance it being 27,300 pounds. Other overloads amounted to 34,600 pounds, 10,200 pounds and 31,300 pounds. The Commission decided that these overloads should not go unnoticed and, accordingly, ordered that the permits of these operators be cancelled for a period of 60 days in the event investigation reveals that the State Highway Commission has jurisdiction over the road on which the violations occurred. The Secretary was instructed to look into the matter and to ask the Public Utilities Commissioner to suspend the permits if this road is under the jurisdiction of the Commission.

The Secretary presented a petition signed by numerous citizens of Tillamook County requesting the construction of a proposed cutoff road connecting the Salmon River Highway and the McMinnville Highway between Boyer and Dolph. The Commission ordered the petition filed.

The Commission had under discussion the approval of a continuing W.P.A. project on the Wilson River Highway. The Engineer advised that the present allotment of W.P.A. funds for this road will be exhausted by July 1 of this year and, if work on this project is to continue, additional W.P.A. funds must be secured. He recommended a project involving a total expenditure of \$1,100,000 of which amount the State's share would be \$250,000, Tillamook

MAR 22 1940

County's share \$30,000, and the balance, \$320.00, would be W.P.A. funds. The work contemplated under this project, he said, would include grading, base course surfacing, and oil mat surfacing; also, construction of bridges as will be necessary, roadside cleanup, park development, and the felling of danger trees; and it would extend from the mouth of the Wilson River canyon west of Hills Bridge to a point approximately $2\frac{1}{2}$ miles southerly from Glenwood, but would not include the tunnel on this road. After discussion, the Commission approved the project and authorized the Engineer to sign the necessary papers to secure W.P.A. funds for the same.

The Attorney reported the results of the condemnation suit to acquire property of Mr. C. T. Gates, in Oregon City, which property is needed to provide a proper width right of way for the Pacific Highway East in Oregon City, along Fifth Street. He stated that the trial was not consummated but during the course of the same a satisfactory settlement was reached out of court which provides payment to Mr. Gates of the sum of \$12,900 and also provides that the state will install tie rods to protect the joint building wall between the Gates property and the adjoining property owned by a Mr. Wolf, and that the state will deed to Mr. Wolf the land on which the joint property wall rests. The Commission, by unanimous vote, approved such settlement.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration, the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - - -	6-2810	- Marshfield-Bunker Hill Section, Oregon Coast Highway, Coos County.	5th authorization - \$200.00
		Total to date	\$18,500.00
Retrace Line - -	8-2813	- Port Orford-Rocky Point Section, Oregon Coast Highway, Curry County.	1st authorization - \$150.00
Quarry - - - - -	9-2826	- Bend-Chemult Section, The Dalles-California Highway, Deschutes County.	1st authorization - \$700.00
Plans - - - - -	116-2809	- Wasco County Line-Miller Flat Section, Warm Springs Highway, Jefferson Co.	1st authorization - \$1,200.00
Prospect - - -	116-2808	- Lamonta-Crook County Line Section, Warm Springs Highway, Jefferson Co.	2nd authorization - \$200.00
		Total to date	\$9,800.00
Plans - - - - -	18-2816	- U.S.R.S. Flume, Klamath Falls-Malin Highway, Klamath County.	3rd authorization - \$150.00
		Total to date	\$1,050.00
Plans - - - - -	18-2843	- Klamath Falls-Lakeview Junction Section, Klamath Falls-Lakeview Highway, Klamath County.	1st authorization - \$4,200.00
Plans - - - - -	21-2838	- Newport Section, Oregon Coast Highway, Lincoln County.	1st authorization - \$500.00
Plans - - - - -	121-2826	- Toledo-Siletz Section, Siletz Secondary Highway, Lincoln County.	2nd authorization - \$1,400.00
		Total to date	\$2,200.00

Plans - - - - - 21-2833 - Depoe Bay Section, Oregon Coast Highway, Lincoln County. 3rd authorization - \$240.00
Total to date \$900.00

Plans - - - - - 123-2818 - Malloy Ranch-Hooker Creek Section, I.O.N. Highway, Malheur County. 1st authorization - \$5,600.00

Bench Mark - - - 24-2829 - North Salem Section, Pacific Highway, Marion County. 1st authorization - \$100.00

Plans - - - - - 226-2842 - Union Avenue-St. Johns Sec., Lombard Avenue in Portland, Multnomah County. 1st authorization - \$2,000.00

Plans - - - - - 33-2819 - Shaniko-The Dalles-California Highway Section, Sherman Highway, Wasco Co. 3rd authorization - \$700.00
Total to date \$3,100.00

Plans - - - - - 101-2821 - Mason-Salisbury Section, Sumpter Valley Highway, Baker County. 2nd authorization - \$1,200.00
Total to date \$3,000.00

Reconn. - - - - - 2-2820 - Through Corvallis, Pacific Highway West, Benton County. 1st authorization - \$150.00

Plans - - - - - 204-2826 - Skipanon-Ft. Stevens Section, Ft. Stevens County Road, Clatsop Co. 2nd authorization - \$1,550.00
Total to date \$2,050.00

Stock Pile - - - - 4-2833 - Mile Post 81.7, Columbia River Highway, Clatsop County. 1st authorization - \$ 60.00

Plans - - - - - 5-2820 - Scappoose-Multnomah County Line Section, Columbia River Highway, Columbia Co. 2nd authorization - \$1,000.00
Total to date \$3,000.00

Plans - - - - - 9-2827 - Greenwood Ave. Undercrossing, Central Oregon Highway, Deschutes County. 1st authorization - \$500.00

Stock Pile - - - - 9-2828 - Lapine-Horse Ranch Section, Fremont Highway, Deschutes County. 1st authorization - \$600.00

Location - - - - - 10-2825 - Gardiner Section, Oregon Coast Highway, Douglas County. 3rd authorization - \$200.00
Total to date \$1,880.00

Plans - - - - - 10-2826 - Canyonville-Days Creek Section, Tiller-Trail Highway, Douglas County. 1st authorization - \$600.00

Quarry - - - - - 13-2817 - Sage Hen Hill-Harney Section, Central Oregon Highway, Harney County. 1st authorization - \$250.00

Right of Way - - - 14-2815 - Hood River Loop Section, Columbia River Highway, Hood River County. 1st authorization - \$150.00

Plans - - - - - 15-2824 - Medford Section, Pacific Highway, Jackson County. 1st authorization - \$200.00

Plans - - - - - 121-2826 - Toledo-Siletz Section, Siletz Secondary Highway, Lincoln County. 3rd authorization - \$500.00
Total to date \$2,700.00

Plans - - - - - 22-2822 - Albany Section, Pacific Highway East, Linn County. 1st authorization - \$800.00

Location - - - - - 122-2823 - Crabtree-Scio Section, Albany-Lyons Secondary Highway, Linn County. 1st authorization - \$150.00

Plans - - - - - 23-2819 - Ontario-Undercrossing, Old Oregon Trail, Malheur County. 1st authorization - \$150.00

Quarry	- - - -	23-2820	- Ironside-Drogan Section, John Day Highway, Malheur County.	1st authorization - \$200.00
Quarry	- - - -	23-2821	- Cairo Junction-Hysse Section, Old Oregon Trail, Malheur County.	1st authorization - \$200.00
Plans	- - - -	-226-2841	- New Barnes Road-Germantown Road Section, Skyline Blvd. (County Road) Multnomah County,	2nd authorization - \$1,350.00
			Total to date \$1,950.00	
Bridge	- - - -	29-2832	- Beaver Creek, Oregon Coast Highway, Tillamook County.	1st authorization - \$100.00
Quarry	- - - -	30-2828	- Pendleton-Pilot Rock Section, Pendleton-John Day Highway, Umatilla County.	1st authorization - \$200.00
Plans	- - - -	31-2819	- Elgin-LaGrande-Hot Lake Section, Wallowa Lake and Old Oregon Trail, Union County.	1st authorization - \$250.00
Stock Pile	- -	33-2821	- Mosier-Deschutes River Section, Columbia River Highway, Wasco County.	1st authorization - \$165.00
Plans	- - - -	33-2819	- Shaniko-The Dalles-California Section, Sherman Highway, Wasco County.	4th authorization - \$900.00
			Total to date \$4,000.00	
Plans	- - - -	34-2824	- Middleton-Newberg Section, Pacific Highway West, Washington County.	1st authorization - \$150.00
Plans	- - - -	34-2819	- Multnomah County Line-Tigard Section, Pacific Highway West, Washington Co.	5th authorization - \$2,450.00
			Total to date \$6,950.00	
Plans	- - - -	-134-2823	- Campbell Bridge-Laural Road Section, Hillsboro-Silverton Secondary Highway, Washington County.	2nd authorization - \$1,075.00
			Total to date \$1,575.00	

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

R. I. Stuart and Sons, Contract No. 2216, for regrading and paving the Eagle Point-Hog Creek Section of the Crater Lake Highway, in Jackson County, requested an extension of time, from October 31 to December 27, 1939, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to the failure of the United States Forest Service to remove its telephone pole line from the highway right of way and also because the Engineer ordered the road closed for 28 days due to experimental changes in the cement mix. The Engineer advised that this contract was awarded on September 1, 1939, and was supposed to be completed by October 31, 1939, although it was not finished until December 27, 1939. He further advised that the contractor was delayed in commencing construction operations by reason of the fact that adjacent property owners had not moved their fences and there were also telephone and power poles that interfered; in fact, the contractor lost 18 days' time by reason thereof. He further advised that after the contract had been awarded the contractor was asked to construct 300 feet of pavement, using a

three-bag mix, to which proposition the contractor agreed. However, tests of the concrete made from such mix were so low that the contractor was forbidden to open the section to travel until the concrete had cured for 28 days, whereas, normally it would have been opened up within 21 days. In other words, on account of change in specifications, the contractor should be allowed seven days' extension of time. He recommended, in view of the circumstances, that the extension of time requested be approved but that the contractor be charged with the engineering and inspection costs incurred by the state subsequent to November 26, 1939, which would allow 26 days' extension without penalty. The Commission approved the recommendation unanimously.

Contracting and Sales Company, Inc., Contract No. 2263, for moving and reconstructing the Methodist Episcopal Church building along the Pacific Highway West, at Tigard, in Washington County, requested an extension of time, from March 3 to June 6, 1940, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to adverse weather conditions. The Engineer advised that the reason given by the contractor for failure to complete the project on time is correct. He explained that the buildings are being moved onto low and rather swampy ground, and that the continued rain of the last two months has made it impossible to carry on the work to complete the job on time. He also said that the buildings are occupied and in use and to have continued the moving under the circumstances would have seriously inconvenienced the owners. He recommended, in view thereof, that the extension of time requested be granted without penalty and in support thereof presented a letter from the Chairman of the Church Board consenting to such extension. The Commission approved the recommendation unanimously.

The Engineer reported that contracts Nos. 2193, 2216, 2218 and 2243, for the construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2193, with Berke Bros., Inc., for grading and paving the Roseburg-Shady Point Section of the Pacific Highway, in Douglas County. Completed February 23, 1940.

MAR 22 1940

Contract No. 2216, with R. I. Stuart & Sons, for regrading and paving the Eagle Point-Hog Creek Section of the Crater Lake Highway, in Jackson County. Completed December 27, 1939.

Contract No. 2218, with Odom Construction Company, for moving and re-establishing the school building and playshed near Manning, in Washington County. Completed November 18, 1939.

Contract No. 2243, with Babler Brothers, for furnishing crushed rock in stock piles on the Seaside-Mecanicum Summit Section of the Oregon Coast Highway, in Clatsop County. Completed March 1, 1940.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with W. R. Shaw providing for the payment of \$1,500 toward the cost of constructing a relief map of the State of Oregon, one copy of which map is to be furnished the State Highway Department.

Agreement with the Western Union Telegraph Company providing for the use of one of the company's poles along the Southern Pacific Company's right of way between Salem and Geer, in connection with the operation of the Highway Department's radio station KOHS by remote control.

Agreement with the West Coast Power Company providing for the use of three of the company's poles in connection with the suspension of a flashing beacon over the Oregon Coast Highway at the Olive Street intersection, in Newport.

Agreement with the Canby Light and Power Company providing for the use of three of the company's poles in connection with a traffic signal installation on the Pacific Highway East, in Canby.

Agreement with the Canby Telephone Company providing for the use of one of the company's poles in connection with a traffic signal installation in Canby.

Agreement with the United States Bureau of Reclamation covering the matter of ditch crossings on the Lost River Bridge Section of the Klamath Falls-Malin Highway, in Klamath County.

Agreement with Samuel Wolf, Oregon City, with respect to the party wall between Mr. Wolf's property and the Gates property in Oregon City.

Agreement with the Southern Pacific Company covering construction of an underpass on the Wolf Creek Highway, at Strassel, in Washington County.

Joint agreement with the California-Oregon Power Company and the Pacific Telephone and Telegraph Company providing for the use of certain poles in Klamath Falls, owned jointly by both companies, in connection with the suspension of overhead flashing beacons.

Agreement with Sweet Home Warehouse Company providing for the lease by the state of certain property in Sweet Home for equipment storage headquarters.

Receipt acknowledging payment by the Federal Government of the sum of \$16,009.06 in full payment for perpetual flowage easement on land situate in Lot 5, Section 4, Township 2 North, Range 9 East, W.M., Hood River County.

Bargain and sale deed conveying unto Paul Nordyke and wife 6328 sq. ft. of land situate adjacent to the Corvallis-Eastside Secondary Highway near Corvallis, Benton County, right of way transaction No. 7063.

Bargain and sale deed conveying unto Herbert V. Kruse 0.30 acre of land situate in the SW $\frac{1}{4}$ of Section 36, Township 1 South, Range 1 West, W.M., Washington County, right of way transaction No. 7001.

The Commission considered the setting of a date for its next regular meeting for receiving bids on highway construction projects and decided unanimously to hold such meeting in Portland on Thursday and Friday, May 2 and 3, 1940. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

There being no further business to come before the Commission at this time the meeting was adjourned at 4:00 o'clock p. m.

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1940	
9446	Apr. 9	Columbia River Highway. Troutdale-Dodson Section. Bids for construction of embankment and culverts received by U. S. War Department. State to award contract to General Construction Company.
9447		Albany-Lyons Secondary Highway. Crabtree-Scio Section. Repair work approved.
		Woodburn-Sandy Secondary Highway. Repair work approved near Molalla.
		Santiam Highway. Albany-Lebanon Section. Repair work approved.
		Salmon River Highway. Bellevue-Sheridan Section. Repair work project to be prepared for contracting.
		Portland. Front Avenue Project. Financing discussed.
		Florence. Delegation requests surfacing and oiling, at state expense, of road connecting old and new highway. Project approved subject to legality of expenditure of funds.
9448		Crater Lake Highway. Collection of fees from motorists who do not visit Park discussed. Solutions presented. No action.
9449		Wolf Creek Highway. Tunnel construction. Project to be prepared for contracting and submitted to Public Roads Administration for approval in 25 per cent partial program for 1941 federal funds.
9450		Equipment. Engineer authorized to purchase following: 1 1 1/2-yd. shovel with lighting system; 1 tractor; 1 12-yd. carryall scraper; 1 angle dozer. Instructions to Engineer relative to purchase of tractor and scraper. 10 light-type trucks; and 1 light-type sedan.
9451		2 car-heating boosters; and 10 truck scales. To be purchased on rental-purchase plan.
		Lacquer. Purchase of 10,000 gallons of white lacquer for painting "no passing" lines approved.
		Log hauling. Adoption of policy with respect to granting permits for overlength loads discussed. No action.
		Salem. State Street. Widening between 12th and 13th Streets approved.
		Portland. Front Street Project. Resolution relative to designating such route as a state highway route.
9454		Portland. Steel bridge over Willamette River. Union Pacific and Southern Pacific Companies to be informed of Commission's intention with respect to use of bridge in connection with proposed Front Street Project.
		Clatsop County. Warrenton. County Court requests that deeds for right of way for proposed improvement (Fort Stevens Road) be prepared to convey property direct to State of Oregon. Request denied.
		San Francisco Fair. Contributing funds to assist in financing Oregon exhibit discussed. Referred to Chairman Cabell.
		Wilson River Highway. New W.P.A. project approved. Engineer authorized to sign papers to secure W.P.A. funds.

Timber land. Wilson River Highway. Purchase of 1900 acres from Consolidated Timber Company approved on basis of Engineer's report.

Log hauling. Cannon Beach Road. Year-round hauling on section east of summit to Oregon Coast Highway junction approved. Present rules prohibiting hauling during summer months to be retained on section from summit to Cannon Beach.

Logs on Salmon River Highway. Special carrier permit of Knute Johnson Logging Company to be cancelled for failure to remove logs dropped on highway near Grand Ronde.

Pacific Highway. Green Creek. Mr. & Mrs. E. Crouch confer relative to settlement for right of way across peach orchard. Payment of \$12.50 per tree approved.

Non-skid wearing surface. Construction on following approved: Pacific Highway, 10-mile section north of Grants Pass; Cascade Secondary Highway, from Oregon City to railroad crossing north of Clackamas; Pacific Highway West, 4 short sections, from Tigard southerly 7 miles.

Planer for use on above projects. To be rented from J. C. Compton.

Baker-Homestead Highway. Flagstaff-Lower Powder Section. Construction of light oil treatment discussed. Mr. Oliver to confer with Baker County people.

Roadside improvement projects. List of projects approved for 1940-1941 program.

Traffic signal. Burns. Action deferred on approving lights installed by city on state highway route.

Central Oregon Highway. Action deferred on permitting U. S. Grazing Service to paint grill cattleguards, as experiment.

Fences. Request of U. S. Division of Grazing to construct stock fences along state highways in eastern Oregon approved.

Foster Road Extension. Engineering information to be furnished Multnomah and Clackamas Counties in order that grading work can be done to state highway standards.

Skyline Road. Multnomah County requests that funds heretofore allocated for improvement be reallocated to Foster Road extension. No change to be made in setup of funds.

Pacific Highway. Ashland. Delegation requests improvement through city. Inspection to be made.

Pendleton-John Day Highway. Tutuilla Bridge to summit of hill south of Pendleton. Mr. E. B. Aldrich inquires regarding reconstruction on permanent alignment.

John Day Highway. Request for oiling from junction with Baker-Unity Highway to Baker-Halheur County line denied.

Klamath Falls-Lakeview Highway. Cottonwood-Antelope Canyon Section. Request for construction during 1941 denied.

Award of contract. Commission approves award of contract for Tigard Grade Separation and Fanno Creek Bridge to Jacobsen-Jensen Company.

Load limit. Resolution reducing maximum load limit on West Diamond Lake Secondary State Highway.

9460

Resolution lifting reduced load limit on section of Lakeview-Burns Highway.

9461

Peaving equipment. Permit to be granted Oregon Packing Corporation to transport equipment in vicinity of Astoria.

9462

Plant specimens. Request of Robert T. Clausen, Cornell University, to collect plants along highways approved.

Log hauling. C. L. Hoover granted extension of time to continue logging operations on Columbia River Highway.

Gravel. Commission requested to prevent removal of rock and gravel from ocean beach at Bayocean, Tillamook County.

Curry County. Inspection of county road extending up Rogue River from Wedderburn to be made.

Columbia River Highway. Acquisition of Jordan property, in Multnomah County, discussed. Maximum offer \$13,000.

Park matter:

9463

Umpqua Lighthouse State Park:- Purchase of 1,097.85 acres of government-owned land south of Winchester Bay approved.

Timber strips. Salmon River Highway. Miami Corporation requested to grant six-months' extension of time for purchase of strips.

Park matter:

Tillamook Head, Clatsop County:- Parks Superintendent requests authority to negotiate for lease of government land. Annual lease fee to be ascertained.

Proposed national park in Curry County:- National Park Service to be contacted relative to assistance in financing park.

Timber strips. Pendleton-John Day Highway. Action deferred on purchase of timber strips owned by Pilot Rock Timber Company.

Right of way settlements:

9464

Cottage Grove:- Payment of \$500 to D. W. Sturgis for termination of lease approved. Right of way transaction No. 5638

Klamath Falls-Lakeview Highway, Dairy Section:- Payment of \$225 to W. McDaniel for removal of building. Transaction No. 3181

Condemnation. List of properties to be condemned. Resolutions adopted on following sections of highways:

9465

Oregon Coast Highway, Bandon Section;

Pendleton-John Day Highway, Pilot Rock Section;

9466

Frenchglen Highway, Wrights Point-The Narrows Section.

9467

Agreements, et cetera, signed as follows:

Benton County, construction of portion of Albany-Buena Vista-Independence County Road;

9468

Benton County, maintenance of portion of Albany-Buena Vista-Independence County Road;

Gordon and Agnes Stuart, disposing of controversy concerning approach road to Pacific Highway West, Yamhill County;

Agreements, et cetera, continued:

J. L. Wooden, et al, lease of property in Clatskanie for maintenance headquarters purposes;

Union Pacific Railroad Company, lease of railroad property in Albina District, Portland, for stock pile and storage purposes;

Federal Government, invoice calling for payment of real property sold to Government in connection with flowage easement, being a portion of original J. D. Yeon State Park;

Northern Pacific Company, deed conveying unto state property at Scappoose;

Bargain and sale deed conveying unto School District No. 44 property situate in Washington County;

Bargain and sale deed conveying unto Reuben W. Squire property in Woodland Addition to Bandon;

Bargain and sale deed conveying unto Oregon-Washington Railroad and Navigation Company land situate in Hood River County, being a portion of Starvation Creek Falls State Park.

9469 May 1

Eugene. Hearing. Rerouting of Pacific Highway through and adjacent to City of Eugene.

9472

Fern Ridge Dam. Conference relative to reconstruction of roads affected by construction of Dam.

Route F Highway. Conference relative to reconstruction as result of Fern Ridge Dam construction. (See entry above)

9473

Minutes of meetings held January 25, February 15 and 16, and February 27 and 28, 1940, approved.

Log hauling. Overlength loads. Permits for transportation of extra long logs to be granted as in past.

Insurance. Public Utilities Commissioner to be contacted relative to insurance required for movement of overlength logs.

Redwood Highway. Hayes Hill Section. Transportation of extra long logs authorized.

Log hauling. Redwood Highway, Hayes Hill Section. Transportation of extra long logs authorized.

9474

Amiesite. Decision deferred on matter of including Amiesite in state highway specifications.

John Day Highway. John Day. Reconstruction approved. Options for right of way authorized.

Curry County. Secondary highway system in county discussed.

Salmon River Highway. Sheridan. Reconstruction deferred.

Bellevue. Repairs to be made by state patching crew. Provision to be made in next year's program for contracting.

9475

Elsie-Jewell County Road. Engineer's report on removal of logging facilities from right of way, and connection with Wolf Creek Highway if road is placed on secondary highway system discussed.

Authority for expenditure of \$3,000 for additional crushed material for emergency surfacing confirmed.

Snow removal. Oregon Caves Highway. Expenditure useless if Caves Hotel is closed during winter season.

Quitclaim deed conveying unto Douglas County land in Douglas County near north city limits of Roseburg.

"Offer to Convey Easement", willingness to grant Bonneville Power Administration authority to maintain power pole line across state-owned property in Hood River County.

Salem, Oregon, April 9, 1940

The State Highway Commission met at 10:00 a. m. in the office of the State Highway Engineer, Room 325 State Office Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Olaisyer, Secretary

The Engineer discussed with the Commission matters pertaining to the bids received by the U. S. War Department on April 5, 1940, on behalf of the State Highway Commission, for the construction of the embankments and culverts on the Troutdale-Dodson Section of the Columbia River Highway, in Multnomah County, which bids were received along with bids for dredging operations in the Columbia River, the plan contemplating the use of the dredged materials in the highway embankment work. He said that the low bidder for this work was the General Construction Company, whose bid for embankment construction was 11¢ per cubic yard, totalling \$286,000.00, and for culvert construction \$28,550.00. The riprap work, he said, was not included in the call for bids but will be required in future contract work and is estimated to cost \$81,500.00, making the grand total cost of the highway work under this arrangement \$396,050.00. He gave as his thought that the unit bid of 11¢ per cubic yard for the embankment construction is somewhat high but suggested that it would be well to accept the same in view of the fact that the total cost of the work to the state under this plan would be considerably less than by doing the work under separate contract, using dredged borrow material, or by using borrow material from dry pits where available, with dredged borrow where material is not available from dry pits. He estimated the total cost on the basis of the first alternate plan at \$474,050.00, and under the second alternate plan at \$766,000.00.

An award to the General Construction Company on the basis of its bid, he said, would effect a saving of at least \$78,000.00 to the state, and possibly \$100,000.00, over any other possible award or plan for the performance of the work. Mr. Tom Davis, Senior Highway Engineer, Public Roads Administration, was present and advised that District Engineer W. H. Lynch would concur in the award of the contract to the General Construction Company if he receives a letter from the State Highway Engineer to the effect that the preliminary estimate of cost heretofore submitted to the Public Roads Administration for approval is considered too low, and provided, further, that Mr. Lynch is furnished with estimates of cost to do the work under the alternate plans. After considerable discussion and it appearing to the Commission that a substantial saving would be made if the bid of the General Construction Company is accepted, the Engineer was authorized and instructed to write such letter to Mr. Lynch. The bids received for the work were thereupon referred by the Commission to the Engineer with power to award the contract to the low bidder, the General Construction Company, upon receipt of concurrence in the award by W. H. Lynch, District Engineer, Public Roads Adminis-

APR 9 1940

tration, and upon the condition that the U. S. War Department awards its contract. This action of the Commission was taken by unanimous vote.

The Engineer reported the need to recondition certain state highways which are being badly damaged by continuous log-hauling traffic, particularly the following:

3-mile section of the Albany-Lyons Secondary Highway between Crabtree and Scio. He estimated that it would cost about \$30,000 to repair this section.

3.8-mile section of the Woodburn-Sandy Secondary Highway west of its junction with the Cascade Secondary Highway near Molalla. He estimated that it would cost about \$55,000 to repair this section.

Albany-Lebanon Section of the Santiam Highway. In connection with this project the Engineer requested authority to conduct experiments using different types of construction on short sections about one mile in length. He estimated that this project would cost about \$70,000 and advised that it is quite important that something be done to this road because maintenance costs under present conditions are extremely high; in fact, the amount budgeted for the calendar year 1940 has already been spent.

Bellevue-Sheridan Section of the Salmon River Highway. The Engineer advised that this section is rapidly going to pieces by reason of heavy hauling thereover, and there is urgent need for repairs because maintenance costs are extremely high under present conditions. He estimated that the improvement would cost approximately \$100,000 and suggested that funds to finance the same be secured by transferring those heretofore tentatively allocated for the improvement of the Lower Columbia River Highway near Scappoose. He also suggested that the Commission allocate \$150,000 from the contingency fund to finance the other three jobs.

In the discussion of this matter reference was made to the financing of the Front Avenue project in Portland, in connection with which the Commission has heretofore agreed to purchase right of way up to a maximum of \$800,000.00, representing 40 per cent of the estimated cost of construction. After due consideration of the entire matter, the Commission by unanimous vote approved an expenditure of \$155,000.00 from the contingency fund to finance improvements needed on the Albany-Lyons Secondary Highway, Woodburn-Sandy Secondary highway, and on the Santiam Highway between Albany and Lebanon, as reported by the Engineer, and authorized the Engineer to proceed with the work. The Engineer was also authorized to prepare the Bellevue-Sheridan project for contracting but not to advertise this project for bids until so instructed by the Commission.

A delegation from Florence, Oregon, consisting of J. C. Ponsler; Ira Rossman, Acting Mayor; and Harry Deveraux, Engineer for the W. P. A.

was present and asked the Commission to surface and oil at state expense a new road connecting the old and new state highways in the city of Florence, particularly along an extension of Lincoln Street. Mr. Rossman was spokesman for the group. He advised that the city has already graded the road in question, same being approximately 400 feet in length, with a maximum grade of 3 per cent and a roadway 28 feet wide. He asked the Commission to surface and oil the road because it is the most important roadway leading into their town from the Oregon Coast Highway, and the city is without funds to finance it.

Chairman Cabell advised that the Commission looks with favor upon this project but there is a question whether or not the Commission has legal authority to expend state money for such purpose in view of the fact that the road is not a connecting road between two state highways and the Commission is reluctant to establish a precedent by designating the road a secondary state highway. The Engineer estimated that it would cost \$810.00 to surface and oil the road. He pointed out that from the state's standpoint the road is in a much better location than the present connection at the north end of the Siuslaw River Bridge. He recommended the improvement at state expense if a way can be found to legalize the expenditure, particularly in view of the fact that the road has already been graded and will provide a much safer route into the business district of Florence than any existing road.

After discussion the Commission approved the project by unanimous vote, subject to an opinion from the Attorney that an expenditure of state highway funds for the purpose is legal.

Mr. E. P. Leavitt, Superintendent, Crater Lake National Park, came before the Commission in regard to the \$1.00 fee which the National Parks Service charges motorists for the use of the roads in Crater Lake National Park, particularly with reference to the collection of such fee from motorists who do not drive up to Crater Lake but who simply pass through the park on the Crater Lake Highway. This question has arisen because of complaints received by the State Highway Department from persons who are charged such fee for simply passing through the park.

Mr. Leavitt advised that the charge is made by the Parks Service for the use of the park road the same as the state exacts a license fee from motorists for the use of state roads, and the amount of the fee is based somewhat upon the mileage of roads in the park. He also advised that federal appropriations for national park purposes in any particular park are dependent somewhat upon the amount of revenue that the Parks Service secures from fees collected for the use of the roads in that park. He also explained other features of the Government's present policy, which, he said, has now been in effect for about three years, which policy provides that the amounts appropriated for any particular park shall not be increased from year to year until that park is more self-supporting, so it appears if more federal money is to be obtained for park improvements a better showing as to the revenues must be furnished. The relieving of the motorists from the payment of the fee, he said, would deviate from long-established policy.

APR 9 1940

He recited statistics concerning travel in Crater Lake Park and filed a written brief in support of his contention that no change should be made now in the present practice.

Chairman Cabell suggested as a possible solution that the state might pay a portion of the cost of maintaining the Crater Lake Highway within the park boundaries, the state's share to be based upon the volume of traffic that uses this road but does not go up to the lake proper. Mr. Leavitt replied that the suggestion involves a matter of policy of the National Parks Service and that he was unable to make any statement in regard thereto at the present time. He suggested that the matter of waiving the present fee be deferred for the time being and that in the meantime signs be erected at the park entrances calling attention of the motoring public to the fact that a \$1.00 annual fee will have to be paid for the use of the park road. He asked the Commission not to make any public statements in regard to the matter until he has had an opportunity to discuss it further with his superiors, and, in any event, not until the Commission has again consulted with him in regard thereto. He also asked the Commission for a letter stating the Commission's reaction to the contents of his brief. The Commission agreed not to take any public action on the matter until it has consulted further with Mr. Leavitt. The Commission also agreed to send him a letter outlining its viewpoint.

The question of whether or not the proposed Wolf Creek Highway tunnel should be constructed as a W.P.A. project or by contract was discussed by the Commission. Mr. Harry Deveraux, W.P.A. engineer, was present and entered into the discussion of this matter. The State Highway Engineer reported the advantages and disadvantages of both plans of construction. He estimated the total cost of the tunnel under the W.P.A. plan at \$301,685.00, of which amount the state's share would be approximately \$75,400.00 as compared to an estimated total cost of \$173,566.00 if the work were done under the contract plan, in which case the state's share would be about \$69,400.00. He pointed out that the performance of the work under the W.P.A. plan would necessitate the purchase of considerable high-priced equipment, which would not be worn out on the job and would be of no value to the state after the job was completed because there would be no other W.P.A. tunnels to construct; also, that it would take from seven to twelve months to construct this 810-foot tunnel under the contract plan, which, in his estimation, is a much shorter time than that in which it could be constructed under the W.P.A. plan.

Mr. Deveraux gave as his thought that the tunnel could be constructed in a year's time under the W.P.A. plan, with proper equipment. He pointed out that the Wolf Creek Highway W.P.A. project has already been established and declared that it would be a simple matter to have the project extended to include the tunnel. He said that it would take about three weeks to get the project started and about six weeks to secure approval by authorities in Washington, D.C. He also said that the W.P.A. rules are simple and that it would be possible to employ the same men on the job and to pay these men the same wages as if the work were done by contract. Furthermore, the present W.P.A. rules provide for the employing and discharging of men as may be necessary.

The Commission discussed this matter at considerable length and

decided that it would be to the best interests of the general public and all concerned if the work were done by contract. The Engineer was thereupon authorized and instructed to prepare the project for contracting and to submit it to the Public Roads Administration for approval in the 25 per cent partial program for 1941 federal funds.

The Commission adjourned at 12:20 p. m. and reconvened at 1:20 p.m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Engineer requested authority to purchase the following equipment for the Wolf Creek Highway W.P.A. project:

1 1½-yd. shovel equipped with lighting system, estimated cost \$19,000.00 - 1 truck crane to be traded in as part purchase price, value \$2,000.00 - net cost of new shovel	\$17,000.00
1 tractor, estimated cost \$8,800.00 - 1 old tractor to be traded in as part purchase price - net cost	8,300.00
1 12-yd. carryall scraper, estimated cost \$5,500.00 - 1 used scraper to be traded in - net cost	4,500.00
1 angle dozer, estimated cost	<u>2,400.00</u>
Total cash outlay on equipment	\$32,200.00

He requested particular instructions relative to the purchase of the tractor and the 12-yard carryall scraper. The question involved was whether to write special specifications for these two pieces of equipment or to purchase an RD-8 tractor and a 12-yard LeTourneau scraper direct from the manufacturers of such equipment and under the specifications of the manufacturing concern. The Engineer explained that the RD-8 tractor and the LeTourneau scraper are particularly well adapted to work on this project; and, while they may cost a little more than other types of equipment, he believed that it would be to the best interests of the state to purchase them for the purpose intended and he so recommended in this particular instance.

After considerable discussion the Commission approved the Engineer's recommendation by unanimous vote, subject to further approval by the State Board of Control and the securing of a quotation from the manufacturers that is considered reasonable, taking into consideration the value of one old tractor and one used scraper that are to be traded in as part purchase price. The Commission also by unanimous vote authorized the purchase of the 1½-yard shovel and the angle dozer requested by the Engineer for this project.

The Engineer also requested authority to purchase the following equipment:

10 light-type trucks, estimated total cost	\$9,000.00
1 light-type sedan to replace one wrecked,	
estimated cost	800.00

APR 9 1940

Also, to purchase on the rental-purchase plan 2 car-heating boosters, estimated to cost \$7,200.00; 10 truck scales, estimated total cost, exclusive of installation, \$12,500.00; installed, \$25,000.00.

The Commission approved the request by unanimous vote.

The Engineer reported the need to purchase 10,000 gallons of white lacquer for use in painting "no passing" lines on the vertical curve sections of state highways throughout the state. He explained the need for such striping as an additional safeguard to highway traffic and advised that the plan proposed for the striping conforms with the standards of the adjoining states and with those adopted by the American Association of State Highway Officials. He estimated that the paint would cost about \$11,500.00, and recommended the purchase. The Commission approved the recommendation unanimously.

The matter of the adoption of a policy with respect to the granting of permits for the transportation of 40-foot logs over state highways, involving an overall length in excess of the legal length limit, was discussed briefly but action thereon was deferred by the Commission until its meeting scheduled for May 2 and 3, 1940.

The Commission had under discussion a request for the widening of State Street, Salem, (route of the North Santiam Secondary Highway) between 12th Street and 13th Street. The Engineer advised that the Union Oil Company plans to construct a large service station at the northwest corner of the intersection of 13th and State Streets, which station will occupy a frontage of approximately 100 feet on State Street, and the company has requested permission to widen this section immediately in front of its property, at its own expense, which would mean the moving of the curbs a distance of about 10 feet for this one-half block. He pointed out that this would result in an offset of the curb line and would create a traffic hazard unless the curb for the rest of the block were set back a corresponding distance. He pointed out that traffic signals will have to be installed at the intersection of 12th and State Streets in the near future, in connection with which it would be advisable to provide for two moving lanes of travel to facilitate the operation of the signals. Also, that the Commission has plans to install, during the coming summer, new flashing-type railroad-crossing signals at this intersection; so, if the street is to be widened, it appears advisable that the work be done now before the signals are installed. He estimated the cost of the widening work at \$1,900.00, of which amount, he said, the Union Oil Company would pay approximately \$620.00 and the State Highway Department \$1,280.00. He recommended the improvement because State Street is now only 49½ feet wide between curbs, which is too narrow for the volume of traffic that it is required to carry; provided, however, that the City of Salem will adopt an ordinance continuing the present practice of parking cars parallel with the curb line. After discussion the Commission by unanimous vote approved the project as recommended by the Engineer.

The Commission had under discussion matters pertaining to the proposed Front Street project in Portland and particularly the matter of designating such route as a state highway route. The following resolution with

APR 9 1940

respect to such matter was adopted by the Commission by unanimous vote:

WHEREAS, vehicular traffic entering the City of Portland over the Pacific Highway from the north, the Columbia River Highway from the east and the Pacific Highway from the south is now and has been for some time routed through the City over Fourth Street by order and direction of the Oregon State Highway Commission; and

WHEREAS, the traffic so entering, passing through and leaving said City is of such volume that congestion, inconvenience and other traffic problems result by reason of confining such traffic to Fourth Street alone; and

WHEREAS, it is the judgment of the Highway Commission that an alternate route should be designated and thus made available for the convenience, the accommodation and the safety of the motoring public as well as for the convenience and safety of local traffic, both pedestrian and vehicular, having occasion to use or cross Fourth Street; and

WHEREAS, after extensive and careful study of traffic needs and conditions, which study was made by the Highway Commission in cooperation with municipal authorities of the City of Portland, it is the judgment of the Commission and said municipal authorities that Southwest Front Avenue, with certain related or connecting streets, would, if widened and otherwise improved, afford and make available more adequate facilities and accommodations for the general motoring public than are available under existing conditions; and

WHEREAS, if said project is promoted and carried through to completion, it will be necessary that additional real property be acquired for right of way and other street purposes; and

WHEREAS, it is the purpose of the Highway Commission to cooperate with the municipal authorities of the City of Portland in the acquisition of said real properties; and

WHEREAS, for the purpose of procuring funds with which to pay the City's pro rata share of the cost of such right of way the City is submitting to the voters of the City of Portland the question of issuing bonds in the amount of \$1,250,000, which question is to be voted on at the general election to be held in May, 1940.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the Highway Commission hereby declares its purpose and plan to cooperate with the City of Portland in the widening

APR 9 1940

and more permanent improvement of the following streets, known generally as the Southwest Front Avenue route, to wit:

Beginning at the intersection of Barbur Boulevard and Southwest Front Avenue at or near Southwest Lane Street in the City of Portland; thence northerly along Southwest Front Avenue, crossing Southwest Arthur Street (and its extension known as Southwest Kelly Avenue) by means of a structure passing over the grade of said Southwest Arthur Street to a point at or near the intersection of Southwest Carruthers Street; thence crossing diagonally from Southwest Front Avenue to Southwest Water Avenue, and thence along Southwest Water Avenue, passing underneath the grade of Southwest Madison Street at Hawthorne Bridge, and underneath the grade of Southwest Morrison Street at the Morrison Street Bridge, and thence to an intersection with the Steel Bridge at or near the intersection of Northwest Front Avenue and Glisan Street; thence onto the Steel Bridge by a set of ramps; thence across the Steel Bridge to the east side of the Willamette River, passing under the Steel Bridge by a set of ramps, at a point near the intersection of North Williams Avenue and Northeast Oregon Street; thence northerly along the east bank of the Willamette River, passing underneath the Broadway Bridge, and thence to an intersection with Interstate Avenue at or near its junction with North Tillamook Street.

Also, a second route which operates as a service drive and which diverges from the first named route at its intersection with Southwest Columbia Street and proceeds thence westerly along Southwest Columbia Street to its intersection with Southwest Front Avenue, and thence northerly along Southwest Front Avenue to its intersection with Northwest Glisan Street, said point being approximately the westerly end of the Steel Bridge.

2. That the Commission does further declare its purpose to officially and affirmatively adopt said route and said streets as streets over which to route state highway traffic if and when the voters of the City of Portland at the general election to be held in May, 1940, approve the issuance and sale of bonds in the sum of \$1,250,000, and if the necessary right of way can be procured at a cost satisfactory to the Highway Commission and the City authorities.

3. That for the purpose of determining the cost of real property needed and required for right of way purposes the legal and right of way departments of the Highway Department hereby are authorized and instructed to cooperate with the city officials of the City of Portland in the procurement of options disclosing the price or prices for which the several parcels of real property required for said project can be purchased, and that said options when taken be taken subject to the approval of the Highway Commission and the municipal authorities of the City of Portland.

4. That the permanent adoption and designation of said streets

as a route over which to direct traffic entering and leaving the City from the above named highways shall be wholly and completely contingent upon the action of the voters of the City of Portland with respect to the authorization of said bond issue.

5. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the Honorable Joseph K. Carson, Mayor of the City of Portland, and a certified copy thereof delivered to W. H. Lynch, District Engineer of the Public Roads Administration.

The Commission also discussed its plans for the use of the railroad bridge; commonly known as the Steel Bridge, over the Willamette River in Portland, in connection with the proposed Front Street arterial highway. It was the thought of the Commission that the owners of this bridge, which are the Union Pacific Railroad Company and the Southern Pacific Railroad Company, should have knowledge of the Commission's plans in this regard. Accordingly, the Commission authorized Chairman Cabell to write a letter to both railroad companies advising them of the Commission's intentions with respect to the use of the bridge so that they will be informed when the Highway Commission submits its application for the necessary easements and permits. (See letter dated April 9, 1940.)

The Commission had under consideration the request from the County Court of Clatsop County that the deeds secured for right of way for the proposed improvement of the county road in the City of Warrenton be prepared so as to convey the property direct to the State of Oregon rather than to Clatsop County. The Engineer pointed out that the proposed improvement is on the county road that leads to Fort Stevens and is scheduled for construction as a federal aid secondary highway project, although government approval has not as yet been secured. Further, that after construction is completed the maintenance of the road will be a responsibility of Clatsop County. In view thereof the Commission considered it inadvisable to take title to the right of way at the present time and thereupon tentatively denied the County Court's request.

The Commission had under discussion the question of contributing funds to assist in financing an Oregon exhibit at the 1940 San Francisco Fair. It was pointed out that if such exhibit is to be maintained this year it will require a contribution from the State Highway Commission of approximately \$8,000.00 of state highway funds. After considerable discussion the Commission referred the matter to Chairman Cabell to consult with the sponsors of the project, after which definite action will be taken by the Commission over the telephone.

The matter of continuing W.P.A. construction work on the Wilson River Highway was considered by the Commission. The Engineer recommended approval of a project costing approximately \$1,250,000.00, of which amount the state's share, as sponsor, will amount to about \$289,000.00. He explained that such project would provide 15 months' work and would complete the grading

APR 9 1940

of the Canyon Section and a 3-mile section at the Glenwood end of the road; in fact, will finance all work except the tunnel and the surfacing and oiling, which is to be done under state contract, and will also include provision for the felling of danger trees on the 1900 acres of burned timber land adjacent to the highway right of way, which property is being acquired from the Consolidated Timber Company. He further advised that the Consolidated Timber Company has agreed to sell its 1900 acres to the state for the sum of \$4,500.00, on the condition that Tillamook County will waive its claim for delinquent taxes. The Commission by unanimous vote approved the purchase of this timber land on the basis of the Engineer's report and also by unanimous vote approved the new U.P.A. project as reported. The Engineer was authorized to sign papers as may be necessary to secure U.P.A. funds.

The Commission discussed several letters from log haulers in Clatsop County who desire to truck logs over the Cannon Beach Road from the summit to its junction with the Oregon Coast Highway during the summer months as well as during the winter months, such operations under present rulings being denied them during the period May 1 to September 15, when beach travel is heaviest. The Engineer advised that the curvature of this highway from the summit easterly to the junction of the Oregon Coast Highway is not excessive and, in his estimation, the hauling of logs over the same during the summer months would not be unduly hazardous to other traffic, although from the summit west to Cannon Beach such operations would be dangerous because of the many sharp curves. He recommended year-round log hauling on the section east of the summit to the Coast Highway junction, provided the overall length of the loads do not exceed the statutory limit of 50 feet, but that the present ruling prohibiting log hauling during the summer months be retained in full force and effect along the section from the summit to Cannon Beach. The Commission approved the recommendation unanimously.

The Secretary presented a report from the Department of State Police concerning several logs that were dropped on the right of way of the Salmon River Highway west of Grand Ronde by truckers for the Knute Johnson Logging Company of Grand Ronde. According to this report the logs were lost in October, 1939, but the owners have failed to remove them notwithstanding that they have been ordered to do so by the police officers several times. The Commission instructed the Secretary to ask the Public Utilities Commissioner to cancel the special carrier permit of the Knute Johnson Logging Company, in accordance with the rules and regulations adopted by the Commission in January of 1940 and thereafter ratified by the Public Utilities Commissioner and the Superintendent of the Department of State Police.

Mr. and Mrs. E. Crouch, Grants Pass, came before the Commission regarding settlement for right of way that is needed for the improvement of the Pacific Highway at Green Creek, south of Grants Pass. They stated that they had been tendered an offer by one of the Highway Department's right of way agents for their property, which offer is acceptable to them in all respects with the exception of the amount that they have been offered for 58 peach trees. Such offer, they said, is \$10.00 per tree, whereas they feel that they should receive \$25.00 per tree.

APR 9 1940

The Assistant Attorney, who was present, stated that the price offered Mr. and Mrs. Crouch for their property is consistent with other offers made and accepted in that vicinity and that at the rate of \$10.00 per tree the Commission would be paying Mr. and Mrs. Crouch \$1,500.00 an acre for their orchard land, which is considered adequate for such property in this locality. The matter was discussed at some length but immediate action was deferred. The matter was reconsidered immediately after Mr. and Mrs. Crouch left the meeting, when the Commission decided unanimously to pay them \$12.50 per tree.

The Engineer reported the necessity to construct a nonskid wearing surface on the following highways:

- 10-mile section of the Pacific Highway north of Grants Pass;
- 4.6-mile section of the Cascade Secondary Highway from Oregon City to the Southern Pacific Railroad crossing north of the town of Clackamas;
- 4 short sections of the Pacific Highway West, totalling 5.5 miles, extending from the town of Tigard to a point 7.1 miles southerly thereof.

In order to do a satisfactory job of nonskidding, he said, it would be necessary to prepare the existing pavement surface by planing. He estimated the total cost of the work at approximately \$27,000.00, of which amount \$7,000.00 represents the cost of the planing work and the balance the cost of the nonskid work. He requested authority to proceed with these improvements and to rent a planer from Contractor J. C. Compton for use in connection therewith. The Commission approved the request unanimously.

The Engineer brought up for discussion the matter of constructing a light oil treatment on the Baker-Homestead Highway between Flagstaff and Lower Powder. He explained for Mr. Oliver's benefit the Commission's plans for this improvement and the objections that have been offered thereto by the people of Baker County. After discussion the matter was referred to Commissioner Oliver to discuss with the people of Baker County, it being understood that Mr. Oliver would notify the Salem office the results of his conference in sufficient time so that the project can be advertised for bids at the May 2 meeting of the Commission if indications are that the people of Baker County will be satisfied with the improvement as proposed.

The Engineer presented a list of projects which he recommended for consideration in the 1940-41 roadside improvement program to be financed with federal funds. After discussion the Commission approved the following projects for such program and authorized the Engineer to present them to the Public Roads Administration in the usual manner, and to prepare them for contracting:

<u>Division #1</u>	
Warren-St. Helens and Warren-Seappoose	\$2,500.00

(Continued on next page)

APR 9 1940

Division #2

Albany Airport through Overcrossing to South Albany Connection	\$ 27,500.00
12th Street Junction-Salem-South Section	8,500.00

Division #3

Grants Pass-South	4,500.00
Cottage Grove Section	2,000.00

Division #4

Klamath Agency-Modoc Point	8,000.00
Bend Undercrossing	2,500.00

Division #5

Pendleton-Adams and E. Pendleton Ave	9,000.00
	<u>564,500.00</u>

The Commission discussed the advisability of approving the traffic lights that the City of Burns has installed on the state highway route at certain intersections in Burns, but deferred final action thereon until the next regular meeting. The Engineer was instructed to submit a supplemental report at that time.

The Commission also discussed, but deferred its decision on, the matter of permitting the United States Grazing Service to paint grill cattle-guards on the Central Oregon Highway as an experiment to ascertain whether or not grills of this type would prevent range cattle crossing the highway.

The Secretary presented a letter from the United States Division of Grazing requesting permission to construct stock fences along certain sections of state highways in Eastern Oregon. He explained that the Grazing Service plans to construct its fences at the extreme edge of the highway right of way so as to obviate the necessity of securing easements from private property owners, which would be required if the fences were constructed just off the highway right of way. (See letter from M. H. Galt, District Grazier, Vale, Oregon, dated April 3, 1940.) The Engineer recommended approval of this request, subject to the condition that the fences be constructed at the extreme edge of the right of way. The Commission approved the recommendation unanimously and ordered that the matter be covered by appropriate written agreement.

Chairman Cabell presented a letter from the Southeast Portland Chamber of Commerce advising that the Board of County Commissioners of Multnomah County has relief funds available for a road project in the southeast district of Portland, and looks with favor upon the proposed extension of S. E. Foster Road to a proposed connection with the Mount Hood Highway. They asked the State Highway Commission to provide information and engineering data so that the county can proceed with the grading work to state highway standards, which work they contemplate financing with W.P.A. funds. They also asked that the federal aid secondary highway funds heretofore allocated by the Commission for the improvement of the Skyline Road be reallocated to the improvement of the Foster Road extension. The Commission decided that it is now too

APR 9 1940

late to make any change in the Skyline project; however, instructed the Engineer to furnish the engineering departments of Multnomah and Clackamas Counties such engineering information as he may have available concerning the Foster Road extension, and to inspect the location of the road during the progress of construction if requested to do so by the counties.

A delegation from Ashland, consisting of Mayor T. S. Wiley, Councilman C. H. Delaman, and City Superintendent E. C. Biegal, was present in regard to the improvement of the Pacific Highway through Ashland. They particularly asked the Commission to provide for the elimination of a turn in the present route at what is known as the Plaza Corner. The Engineer estimated the cost of this improvement, exclusive of right of way, at \$17,000.00. The right of way cost he estimated at \$35,000.00.

Chairman Cabell explained the established policy of the Commission with respect to the construction of highway improvements within cities in cases where the right of way costs exceed the construction costs, and advised that the Commission is reluctant to undertake such improvements without financial assistance from the city concerned. He mentioned the recent offer of the Commission with respect to the acquisition of right of way for the Front Street project in Portland, whereby the Commission agreed to pay for right of way an amount equal to 40 per cent of the cost of construction, the City of Portland to pay the balance. The matter was discussed at some length and the concluding remark from the Commission was to the effect that it would study the Ashland problem further and would inspect it on the ground some time this coming summer.

The Engineer discussed briefly with the Commission a letter from former State Highway Commissioner E. B. Aldrich, Pendleton, in which Mr. Aldrich inquired as to the possibility of securing the reconstruction of the Pendleton-John Day Highway on permanent alignment from Tutuilla Bridge to the summit of the hill south of Pendleton. The Commission deferred its decision in this matter until the next meeting.

A resolution was presented from Unity Grange No. 660, Baker County, requesting the oiling of the John Day Highway from its junction with the Baker-Unity Highway southeasterly a distance of about 12 miles, to the Baker-Malheur County line. The Commission considered that the project of most importance on this highway is the reconstruction of the section between Prairie City and Unity. The Secretary was instructed to so inform the Grange.

A letter was presented from Mr. W. H. Vernon, County Commissioner of Lake County, urging the construction of the Cottonwood-Antelope Canyon Section of the Klamath Falls-Lakeview Highway during the 1941 season. In the discussion of this matter it was pointed out that the Commission has spent a considerable sum of money on the Klamath Falls-Lakeview Highway during the past two or three years and that considerable work is still under way. Also, that the Commission is making as rapid progress toward the completion of this road as finances will permit. Considering the matter from all standpoints, the Commission decided that it could not comply with Mr.

APR 9 1940

Vernon's request. The Secretary was instructed to convey such information to Mr. Vernon, pointing out to him clearly the reasons for such action and furnishing him with a list of projects that have been contracted on this highway during the past three years.

The Engineer reported that on March 2, 1940, in accordance with authority previously granted him by the Commission, he awarded to Jacobsen-Jensen Company, Portland, the contract for construction of the Tigard grade separation and Fanno Creek Bridge on the Pacific Highway West, in Washington County, such company having submitted the low bid in the amount of \$86,292.50 on February 16, 1940, and the conditions of the award having been satisfied. The Commission by unanimous vote approved the award of this contract as reported.

The Engineer requested instructions relative to the posting of the West Diamond Lake Secondary Highway for a 50 per cent reduced load limit between its junction with the Crater Lake Highway and its junction with the Crater Lake North Secondary Highway. He said that the frost is leaving the ground and the reduced load limit should be put into effect at this time in order to prevent the road being damaged by traffic. He recommended approval of the posting. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the following road or highway has been designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

WEST DIAMOND LAKE SECONDARY STATE HIGHWAY

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

APR 9 1940

The maximum weights which shall apply to the following highway, to wit:

WEST DIAMOND LAKE SECONDARY STATE HIGHWAY from its junction with the Crater Lake Highway, in Jackson County, to its junction with the Crater Lake North Secondary State Highway, in Douglas County.

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations, as made and found by the State Highway Commission under the provisions of Section 55-2707, Oregon Code 1935 Supplement, shall be in full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that certified copies of this order be furnished the County Clerks of Jackson and Douglas Counties, in which counties said highway is located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The matter of lifting the reduced load limit heretofore in effect on the Lakeview-Burns Highway was also discussed. The Engineer advised that this road has dried out sufficiently to permit legal-weight loads without damage. He recommended adoption of an order permitting loads weighing up to the legal limit. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

APR 9 1940

WHEREAS, on the 16th day of February, 1940, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on several state highways, including the following:

LAKEVIEW-BURNS HIGHWAY from its junction with the Central Oregon Highway, in Harney County, to its junction with the Fremont Highway at Valley Falls, in Lake County,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

LAKEVIEW-BURNS HIGHWAY from its junction with the Central Oregon Highway, in Harney County, to its junction with the Fremont Highway at Valley Falls, in Lake County,

be and the same hereby is rescinded and cancelled as of this date and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished to the county clerks of Harney and Lake Counties, in which counties said highway is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Secretary presented a letter from the Oregon Packing Corporation, requesting permission to transport over state highways in the vicinity of Astoria certain pea viners, the overall dimensions of which are: width, 11 feet; height, 13 feet 5 inches; length, 48 feet. The Commission voted unanimously to grant this company a permit similar to that granted the D. E. Maling Company of Hillsboro for a like purpose, subject to the condition that investigation reveal that there is sufficient vertical and horizontal clearance to allow such movements without endangering traffic or injuring highway structures. The Secretary was authorized to issue the permit if investigations to be made by the Engineer reveal that there is satisfactory clearance on all highway structures involved.

APR 9 1940

A letter was presented from Robert T. Clausen, Assistant Professor of Botany and President of the American Fern Society, Cornell University, requesting permission to collect specimen plants along Oregon highways in connection with botanical studies which he proposes to undertake in Oregon during the coming summer. The Commission approved the request and instructed the Secretary to issue the customary permit covering such matter.

The Commission discussed a letter from Mr. C. L. Hoover, Cascade Locks, in which request was made for an extension of time of one month, from April 15 to May 15, 1940, within which to finish certain log hauling operations along the Columbia River Highway between Mile Posts 48.00 and 49.00, in Hood River County. The Secretary advised that the Commission previously authorized Mr. Hoover to haul logs on this highway up to April 15, 1940, but it is apparent that the operations will not be completed by then and it will take about 30 days' additional time. The Engineer recommended granting the request. The Commission approved the recommendation.

A letter was presented from Mr. A. W. Strowger in which the Commission was requested to take such action as may be necessary to stop the removal of rock and gravel from the ocean beach at a place known as Jackson's Cut, Bayocean, in Tillamook County. The Engineer recalled that the Commission has received numerous complaints about the promiscuous removal of gravel and rock from the ocean beaches and as a result the Commission considers it advisable to adopt a permanent policy with respect thereto, but has deferred action on the matter pending inspection of the several locations. However, the date for such inspection trip has not as yet been set. He suggested that it would be advisable to inspect the Bayocean site at the same time the others are inspected. The Commission approved the suggestion and instructed the Engineer to bear the matter in mind the next time the Commission makes a trip down the coast. It was tentatively decided to make such trip about the middle of May and to also inspect at that time the county road which extends up the Rogue River from Wedderburn, in Curry County. Mr. T. H. Davis, Senior Highway Engineer, Public Roads Administration, was requested to accompany the Commission on such inspection trip.

The Attorney brought up for discussion matters pertaining to the acquisition of the Jordan property, which is needed for right of way for the new Columbia River Highway near its junction with the Sandy River, in Multnomah County. He stated that as heretofore instructed by the Commission he again contacted Mr. Jordan and tendered the Commission's offer of \$13,000.00 for this property but Mr. Jordan refused the offer and reiterated his demand for \$23,000.00, which is the value that he places on the 60 acres involved. The Attorney asked the Commission to set a maximum amount that it would pay for the property under discussion. He was instructed to inform Mr. Jordan that the previous offer of \$13,000.00 is all that the Commission will pay and if he will not accept such offer then the Commission will probably be forced to resort to condemnation proceedings.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

APR 9 1940

Proposed addition to Unpqua Lighthouse State Park, in Douglas County:- The Parks Superintendent advised that there is available to the Commission, by means of purchase or lease, 1,097.85 acres of government-owned land situate just south of Winchester Bay, in Sections 24, 25, 26 and 35, Township 22 South, Range 13 West, W.M., which property, he said, adjoins the present state park at this location and has a 2-mile frontage on the ocean; further, that it can be purchased from the Government at the rate of \$1.50 per acre, or a total of \$1,646.78, or if the Commission prefers can be leased from the Government at an annual rental charge of \$82.34. He recommended purchase of the property. The Commission approved the recommendation unanimously.

Acquisition of timber strips along the Salmon River Highway:- The Parks Superintendent advised that the time limit set by the Miami Corporation for the purchase of this timber by the state has expired. He requested instructions whether to proceed with the purchase, which would involve a cruise of the timber, or to let the matter drop entirely. After discussion the Commission instructed the Parks Superintendent to ascertain whether or not it would be possible to secure from the Miami Corporation a 6-months' extension of time within which to purchase this timber, in view of the fact that Congress has not as yet acted upon the bill which provides federal funds to assist in the purchase of wayside timber tracts such as this. The Commission indicated that it would be satisfied with a 3-months' extension of time if it is impossible to secure one of longer duration. The parks Superintendent was further instructed not to make a cruise of the timber until authorized by the Commission.

Acquisition of government-owned property at Tillamook Head, in Clatsop County:- The Parks Superintendent requested authority to negotiate with the Federal Government for a lease of the following-described property: Lots 2, 3, and 4 of Section 31, Township 6 North, Range 10 West, W.M., with or without oil and mineral rights. He was instructed by the Commission to ascertain how much the state would have to pay annually for a lease.

Proposed national park in Curry County:- The Parks Superintendent reported receipt of a petition signed by the Curry County Court and numerous citizens of Curry County, urging the establishment of a national park in their county, as has heretofore been proposed by the National Parks Service. He suggested, in view of this petition, that it would be advisable to again contact the National Parks Service with respect to such park matter, particularly to ascertain whether or not government funds can be secured to help finance it. The Commission approved the suggestion.

Wayside timber strips along the Pendleton-John Day Highway:- The Parks Superintendent brought up for discussion the proposed purchase of the John Day Highway wayside timber strips owned by the Pilot Rock Timber Company, but action thereon was deferred by the Commission until the next meeting.

The Commission by unanimous vote approved the following right of way settlements:

Right of Way Transaction No. 5638, being a cancellation of the D. W. Sturgis lease of the Hoskins building, in Cottage Grove. The Assistant Attorney advised that the Cottage Grove improvement is scheduled for contracting on May 2 and it is imperative that the Hoskins building be vacated by April 15. Also, that Mr. Sturgis is demanding the sum of \$500 for the termination of his lease. He gave as his thought that \$500 is a reasonable and fair amount to pay Mr. Sturgis and he recommended approval of the payment of such sum. The Commission approved the recommendation unanimously.

Right of Way Transaction No. 3181, involving the moving of buildings from the right of way of the Dairy Section of the Klamath Falls-Lakeview Highway. The Assistant Attorney advised that one of the conditions of the purchase of this property was that the buildings would be removed at state expense, and in accordance with such provision the buildings were removed by a Mr. W. McDaniel at a cost of \$225.00. He recommended approval of payment of such sum to Mr. McDaniel for services rendered. The Commission approved the recommendation.

The Assistant Attorney reported the necessity to condemn certain properties that are needed for various highway improvements, as follows:

Right of Way Transaction No. 7557 - property required from Zylph Horn for right of way for the Pilot Rock Section of the Fendleton-John Day Highway, in Umatilla County. He suggested an offer of \$450 for this property in condemnation.

Right of Way Transaction No. 5363, being for property required from the heirs of the Carl J. Hansen Estate for right of way for the Bandon Section of the Oregon Coast Highway, in Coos County. He suggested an offer of \$120.25 for this property in condemnation.

Right of Way Transaction No. 7813, being for property required from Molly Tomlin as a source of materials to be used for the improvement of the Wrights Point-The Narrows Section of the Frenchglen Secondary Highway, in Harney County. It was his thought that an offer of a nominal amount would be satisfactory in this case.

After discussion, the Commission authorized the Attorney to proceed with condemnation of these properties, and approved the suggested offers for condemnation purposes. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

APR 9 1940

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Bandon Section of the Oregon Coast Highway
Pilot Rock Section of the Pendleton-John Day Highway

real property owned by or in possession of the following parties and/or persons, to wit:

Bandon Section of the Oregon Coast Highway
R 5363-Heirs of Carl J. Hansen
Pilot Rock Section of the Pendleton-John Day Highway
R 7557-Zylph Horn

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnations proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State

APR 9 1940

of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair, and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Wrights Point-The Narrows Section of the Frenchglen Highway

real property owned by or in the possession of the following parties and/or persons, to wit:

R 7813-Molly Tomlin-Harney County

and this Commission does hereby declare further that the said property

APR 9 1940

or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Benton County providing for the construction of

APR 9 1940

a portion of the Albany-Buena Vista-Independence County Road, beginning at the junction of said road with the Albany-Corvallis State Highway, near the north end of the Willamette River bridge, at Albany, and extending northerly a distance of 4.368 miles to a place known as Fir Grove School, said work to be done as a federal aid secondary highway project.

Agreement with Benton County providing for the maintenance of the above-described section of the Albany-Buena Vista-Independence County Road after construction of the same by the state as a federal aid secondary highway project, being Project FAS 13.

Agreement with Gordon Stuart and Agnes Stuart, husband and wife, disposing of the controversy concerning an approach road to the Pacific Highway West, in Yamhill County.

Agreement with J. L. Wooden, et al, Clatskanie, Oregon, providing for the lease of property in Clatskanie for state highway department maintenance headquarters purposes.

Agreement with the Union Pacific Railroad Company providing for the lease of certain railroad property in the Albina District, Portland, for stock pile and storage purposes.

Invoice calling for the payment by the Federal Government of \$10.00 for a small parcel of real property sold to the Government in connection with a flowage easement, said property being a portion of the original J. B. Yeon State Park, Right of Way Transaction No. 1266.

Deed executed by the Northern Pacific Railroad Company conveying unto the state certain property at Scappoose, in accordance with settlement previously approved by the Commission on January 3, 1940, Right of Way Transaction No. 7247.

Bargain and Sale Deed conveying unto School District No. 44, Washington County, certain property situate in the Northwest Quarter of the Northeast Quarter of Section 15, Township 2 North, Range 4 West, W. M., Washington County, being Right of Way Transaction No. 7039.

Bargain and Sale Deed conveying unto Reuben W. Squire property situate in Lot 2, Block 8, Woodland Addition to Bandon, being Right of Way Transaction No. 5353. (Approved by the Highway Commission on March 3, 1939.)

Bargain and Sale Deed conveying unto the Oregon-Washington Railroad and Navigation Company, for the sum of \$20.00, 0.8 acre of land situate in the Southwest Quarter of the Northeast Quarter of Section 4, Township 2 North, Range 9 East, W.M., Hood River County, being a portion of the Starvation Creek Falls State Park,

APR 9 1940

adjacent to the Columbia River Highway, Right of Way Transaction No. 6106.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 p. m.

W. H. Baldock
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
Huron W. Clough
Commissioner
Herman Oliver
Commissioner

Eugene, Oregon, May 1, 1940

The State Highway Commission convened at 2:00 p. m. in the Circuit Court Room of the Lane County Courthouse to conduct a public hearing with respect to the rerouting of the Pacific Highway through and adjacent to the city of Eugene, in accordance with notice previously sent to the Eugene City Council. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were about 200 interested citizens.

Chairman Cabell opened the meeting by explaining its purpose and then called upon the State Highway Engineer to explain the plan in detail and the engineering features involved. The Engineer exhibited a map showing an outline of the proposed improvement, and arrangement of the highways affected, particularly the connections with the McKenzie and the Willamette Highways. He pointed out that the plan as contemplated provides for the establishment of one-way traffic on Sixth and Seventh Streets; the elimination of eleven railroad grade crossings on the present route between Eugene and Springfield by moving the railroad tracks to a location nearer the Willamette River; the establishment of a permanent connection with the McKenzie Highway at West Springfield; and a connection with the Willamette Highway at Goshen.

MAY 1 1940

Extensive studies, he said, were made of the five prospective routes, and the conclusion was reached that the so-called Goshen route, which follows closely the present route of the Pacific Highway, is the cheapest and the most desirable under present conditions, although eventually it may be necessary to construct the alternate route which bypasses Eugene on the west. (See the Engineer's report dated March 19, 1940, for details.)

Chairman Cabell advised that the State Highway Commission has not as yet adopted the Engineer's report, it being considered advisable to defer doing so until this public hearing was held to ascertain the viewpoints of the people of Eugene. He then invited those present to express their views, either for or against the plan, and suggested that those who are not in favor of it present their arguments first.

Mr. Dave Evans, attorney, offered objections in behalf of a group of property owners and businessmen along High and Pearl Streets whose holdings are involved. He said that these people are not trying to interfere with the progress of the State Highway Department's program or the Commission's plans for this project, except in one point and that is the provision for one-way traffic on Sixth and Seventh Streets. He gave as his thought that the traffic problem in Eugene is not serious enough as yet to require one-way traffic streets and that the adoption of such a plan now would simply mean that the burden of sacrifice would be placed upon comparatively few people. He alleged that 75 per cent of the population of Eugene reside south, east, and west of the business section and that 90 per cent of the business in Eugene is local business, which indicates that these people could not conduct business at local institutions without crossing and recrossing the streets that are state highway routes. The people of Eugene, he said, are not particularly interested in the tourist business, which makes up only a small percentage of the total business transacted. He also said that they have not made extensive surveys of traffic and other conditions, so they are not in a position to present first-hand arguments from that standpoint, except that they have secured experience reports from people in other localities who have had experience in the same problems. He particularly referred to the city of Portland. He suggested, as an alternate for the adoption of one-way traffic streets, that signs be erected directing northbound traffic along High Street from Broadway to Sixth Street, thence along Sixth Street to a connection with the present Pacific Highway, and directing southbound traffic along Seventh Street to High Street, thence along High Street to Broadway. It was his thought that such routing could be accomplished effectively by the erection of appropriate signs and that such plan would take care of the situation satisfactorily without prohibiting two-way traffic on any street. He urged the Commission to give conscientious consideration to the suggestion and reiterated that the Commission's plan in every other respect meets with the approval of his constituents. Mr. Evans filed with the Commission a petition signed by 21 property owners and tenants of property on and affected by the proposed highway change, in which the Commission was requested to alter its plans so as to provide for two-way traffic on High Street and Pearl Street.

Mr. Gordon Gullion gave as his thought that the moving of the

MAY 1 1940

Southern Pacific railroad tracks nearer the river would interfere with Eugene's recreational center which is located in that vicinity. He suggested that investigations be made for the moving of the railroad to the north side of the river. He was informed that the cost for such an undertaking would be prohibitive. Also, that the recreational center has been taken into consideration in the formulation of the plans and it will not be interfered with. The Engineer advised, however, that he would give the matter further thought. This concluded the presentation of those opposed to the plan.

Mr. Ed Turnbull, Chairman of the Highway Committee of the Eugene Chamber of Commerce, spoke in favor of the project. He approved the plans in their entirety and asserted that, in his estimation, the engineers have performed an exceedingly good job in preparing them. The Chamber of Commerce, he said, is willing to leave the entire matter in the hands of the State Highway Commission and its engineers.

Fred Stickels, President of the Eugene Chamber of Commerce, read aloud and filed with the Commission a resolution adopted by the Board of Directors, in which the Commission was requested to approve the program as outlined by the Engineer and to commence construction in accordance therewith at the earliest possible time.

Mr. Victor P. Morris also spoke in favor of the plan as presented, on behalf of Dr. Donald M. Erb, President of the University of Oregon, who, he said, regretted his inability to be present and speak for himself.

Mayor Elisha Large stated that the City of Eugene has been looking forward to this improvement for years, and advised that the Eugene City Council is unanimously in favor of the plan as recommended by the State Highway Engineer. Others speaking briefly in behalf of the project were the following: Ford Hand, Chairman of the Retail Merchants Division of the Chamber of Commerce; Judge G. O. Potter, member of the Eugene Planning Commission, who advised that the plan as proposed meets with the unanimous approval of the City Planning Commission, which considers it to the best interests of the City of Eugene; George McMorran, retired businessman; Lyman McCredie, Cashier, First National Bank, who stated that his bank does not wish to harm any business but believes that the plan as proposed will serve the City of Eugene in the best possible manner; W. B. Gard, Manager, United States National Bank, Eugene Branch; Dr. Orville Waller, tax payer, who alleged that the plan as proposed serves the need of traffic in Eugene better than any other that could be devised; Howard Merriam, President of the Oregon Pacific Highway Association, who approved the plans in general as an improvement to the Pacific Highway route; Frank Highland; Wm. Tugman, Managing Editor, Eugene Register-Guard Publishing Company, who stated that he approves the plans because they are so flexible and subject to change without much difficulty whenever necessary. He particularly approved the plan for the reconstruction of the unit between Eugene and Springfield Bridge.

Chairman Cabell concluded the conference by stating that the Commission on a number of occasions has found it necessary to vote to change the

MAY 1 1940

routing of highways notwithstanding that it adversely affects some people. The Commission dislikes very much, he said, to cause anyone damage but sometimes it seems necessary and the best thing to do in the interests of the general public. The purpose of the public hearing, he said, is to secure expressions from the people concerned. The arguments presented are given serious thought by the Commission and the advantages and disadvantages studied. He reiterated that the Commission has not yet approved the Engineer's report on the Eugene situation but expects to pass on the matter in the near future and at that time will give all the arguments presented at this hearing full consideration.

There followed a general discussion of matters pertaining to the project under discussion.

Mr. Oscar Todd, member of the Board of Education of Eugene, offered the Commission full cooperation in every way, although, he said, there is one problem involving one of the schools which he would like to have clarified. The school situation was explained in detail by Mr. J. F. Cramer, Superintendent of Schools. Mr. Cramer stated that the Washington grade school will be very adversely affected by the highway plan as proposed. This school, he said, is located at Seventh and High Streets and if the proposed plan is adopted it will simply mean that the school is surrounded by heavy-traffic streets and that school children will be subjected to a serious traffic hazard. There are more than 130 of these children, he added, and all but 16 of them will have to cross a 4-lane highway four times daily. He also said that they are not opposing the project as planned but the situation is serious and he favored closing the school if the plan is adopted. The Commission referred Mr. Cramer to the Traffic Engineer for a study of this problem.

Mr. Burghardt inquired as to what provision has been made for a roadway into the Eugene cannery. He was informed by the Engineer that the cannery will have the same access that it now has; furthermore, that he would be very glad to discuss the matter with Mr. Burghardt at any time suitable to him. Mr. Merriam advised that he is a director in the Fruit Growers' Association which owns this cannery and that the Association offers no objection whatsoever to the Highway Commission's plans so far as the cannery is concerned. Others inquiring as to details in connection with the proposed plans were Pauline Walden, Clarence Hyde, and Floyd Manville.

The meeting was concluded at 3:25 p. m., following which the Commission conferred in an adjoining room with the members of Lane County Court relative to the matter of reconstructing roads that are affected by the construction of the Fern Ridge Dam west of Eugene, which the U. S. War Department is constructing as a flood control project.

Following such conference the Commission and the County Court discussed such matter with the following representatives of the U. S. Army: Major C. R. Moore, District Engineer, and Lieutenant O. L. Hoffman. The following plan with regard thereto was tentatively adopted: The Federal Government will pay the costs to grade and surface a section of the "Route F" Highway from its junction with what is known as the Fisher Road westerly to a

MAY 1 1940

point about one mile east of the Territorial Secondary Highway, and do what may be necessary to provide a road comparable to the existing county road known as the Elmira Road. Inasmuch as such type of improvement will not meet the state highway standards, the state is to pay the cost of such widening and other work as may be necessary to provide an improvement that will meet the state highway standards. The entire project is to be done by contract, and the respective shares of the state, county, and the government are to be determined on the basis of the unit bids received.

The Engineer was instructed to work out the details with Lieutenant Hoffman and P. M. Morse, County Engineer of Lane County, and to present to the Commission an estimate of quantities and costs involved, following which another conference is to be held and final decision reached.

The conference was concluded at 4:20 p. m., after which the Commission returned to Salem, disposing of the following routine matters enroute:

The Commission by unanimous vote approved the minutes of the meetings held on January 25, February 15 and 16, and February 27 and 28, 1940.

The Commission discussed the adoption of a policy with respect to the granting of permits for the transportation over state highways of logs involving overall lengths in excess of the length-limit specified by statute. The Attorney advised that he has consulted with Judge L. T. Harris of Eugene, attorney for the Booth-Kelly Lumber Company, in regard to this matter, and ascertained that Judge Harris contemplates a friendly action in court to determine the authority of the State Highway Commission to grant such permits. He was authorized by the Commission to defend the action.

The Commission decided unanimously, in view of the contemplated procedure and pending the outcome of the same, to continue the granting of permits for the transportation of extra-long logs as in the past, and so ordered.

The matter of the insurance to be provided by permittees in connection with the securing of permits for overlength movements was also discussed. It was the thought of the Commission that operators should not be required to go to the expense of furnishing extra insurance for the protection of the members of the Commission in the event that is not absolutely necessary. The Attorney pointed out that the Public Utilities Commissioner is required by law to secure insurance from operators and at present is requiring such insurance in the amounts of \$5,000/\$10,000 public liability and \$1,000 property damage, although the law does not state the exact amount that shall be required. He suggested, in the event that the Commission desires more protection than is offered by such insurance coverage, that it might be possible to get the Public Utilities Commissioner to raise his requirements in that respect. He was instructed by the Commission to contact the Public Utilities Commissioner relative thereto.

The Engineer reported that a survey has been made to determine the width of pavement on the Hayes Hill Section of the Redwood Highway, in
